Desi, Upadesi and Darshana. The Yogis and Joláh Yogis have as a rule abandoned celibacy and become house-holders. The Bhartháris are some of them celibates and some house-holders. The others are all *Udasi*, *i.e.*, they are celibates and lead an ascetic life. Those who are house-holders intermarry within the limits of their sub-sect. The Yogis string ornaments and deal in thread, and are also called Dorihár. The Joláh Yogis, are weavers, and the Bhartháris play on the *Sarangi*, a sort of guitar, and sing songs in praise of Bharthári, brother of Vikramáditya. The house-holders admit no outsiders, but the ascetics take in members of the higher castes. The ceremony of admission includes shaving the hair-knot (*tik*), boring the ears, and putting on a yellow cloth and a sacred thread made of sheep's wool, to which is attached the emblem of the sect, a wind instrument called *singhi nad* made of the horn of a deer, or of *bel* or sandal wood. This is blown at all religious ceremonies and before taking food. The members of the sect are usually Saivas, but some Bhartháris are now Muhammadans. Like the Atiths they bury their dead in a sitting position.

The Jugis of Bengal Proper do the same, and their occupation, their use of the *Padabi* 'Náth,' their low social rank, &c., all point to a connection between them and the Jogis of other parts of the Province. The change from 'o' to 'u' is seen in many Bengali words besides Jugi, *e.g.*, Muchi, Mudi, Dhuti, and Puthi.

Shágirdpeshá.

788. The Shágirdpeshás are specially interesting, as they are the only true caste in this Province which takes its origin from miscegenation, and which is still adding to its numbers in the same way. Amongst the members of the higher castes of Orissa who do not allow widow remarriage, and also amongst the Káyasth immigrants from Bengal, it is a common practice to take as maid-servants and concubines women belonging to the lower clean castes, such as Chásá and Bhandári. The offspring of these maid servants are known as Shágirdpeshá. They form a regular caste of the usual type and are divided into endogamous groups with reference to the caste of the male parent. Káyasth Shágirdpeshás will not intermarry with Karan Shágirdpeshás nor Rájput Shágirdpeshás (their number is very small) with those of Káyasth origin, but intermarriage between the Shágirdpeshás of Karan and of Khandáit descent sometimes takes place, just as such marriages sometimes occur between persons belonging to the castes to which they owe their origin. The caste of the mother makes no difference in the rank of the children, but those who can count several generations from their original progenitor rank higher than those in whose case the stigma of illegitimacy is more recent.

The word Shágirdpeshá, which is commonly pronounced Ságarpeshá, means servant, and is applied with reference to the traditional occupation, which is domestic service. It is said that the word should properly be confined to the offspring of Bengali Káyasths, and that the illegitimate children of Karans and other castes of Orissa should be called Krishnapakshi or Antarpuá or again Antarkaran, Antarkhandáit, etc. This distinction however, is not observed in practice. The relationship between the legitimate children of a man of good caste and their bastard brothers and sisters is recognised, but the latter cannot eat with the former, hence they are called *Bhátántar*, or separated by rice. They are entitled to maintenance, but cannot inherit their father's property so long as there are any legitimate heirs. They usually serve in their father's house until they grow up and marry; male children are then usually given a house and a few bighas of land for their support. The Shágirdpeshás are also sometimes known as Golám (slave), a term which is also applied to the Sudras of Eastern Bengal who appear in several respects to be an analogous caste. Another appellation is Kotha po (own son), as distinguished from Prajá po (tenant son) which formerly denoted a purchased slave. Their family name is usually Singh or Dás. Some of them have taken to cultivation, but they will not themselves handle the plough. They usually live in great poverty. It is said to be impossible for a Shágirdpeshá under any circumstances to obtain admission to his father's caste. If a man of that caste were to marry a Shágirdpeshá woman he would be outcasted and his children would become Shágirdpeshás. Persons of higher rank (usually outcastes) are admitted to the

caste. A feast is given by the applicant for admission, and he is then formally acknowledged as a caste-fellow.

In their social observances the Shágirdpeshás follow the practices of the higher castes. They forbid the re-marriage of widows and do not allow divorce. Polygamy is only permitted when good cause is shown, *e.g.*, if the first wife is barren or diseased. They belong to the Vaishnava sect, worship the ordinary Hindu gods and employ good Bráhmans. The binding portion of the marriage ceremony is the joining of the hands of bride and bridegroom by the officiating priest. Shágirdpeshás of the first generation, being illegitimate, cannot perform their father's *srádh*. They usually cremate their dead.

In spite of their number (about 47,000), the caste is said to be of quite recent origin, and it is asserted that it did not exist a century and-a-half ago. However this may be, Shágirdpeshá is an Urdu and not a native Oriyá word.

Shámri.

789. Shámri or Shámvari is a small Baniyá caste of Patna, Shahabad and Saran. They are grocers and salt-sellers.* Some trade in grain with pack ponies or bullocks and some are cultivators; a few have become landholders. There is a tradition in Saran that they derive their name from a salt lake named Shambhar in the neighbourhood of which they formerly lived. In Shahabad and Patna it is said that they come from Sambalgarh, Moradabad. There are no sub-castes, and the usual prohibited degrees of relationship constitute the only bar on marriage within the caste. Child-marriage is practised by those who can afford it, but the poorer members of the community marry as adults. The binding part of the ceremony, which is of the usual type, is the painting of the bride's forehead with vermilion. Two wives are allowed, but according to some this is permitted only in case of barrenness on the part of the first wife. Widows may marry again by the Sagái rite. The reports differ as to whether the first husband's younger brother has a preferential claim or not. The majority of the caste, in Saran at least, belong to the Nánakshái sect. They venerate Satya Náráyan who is worshipped especially before marriage. Bándi, the seven sisters and Sitalá are also worshipped, chiefly by the women, who also adore a mound of earth called Devákur, which is set up inside the house. The better classes burn their dead and throw the ashes into a river or lake. Amongst the poor burial is the rule; usually fire is first placed in the mouth (*Mukhagni*). The *srádh* is performed on the 13th day in Shahabad and on the 17th day in Saran. In Shahabad it is said that the whole caste is strictly vegetarian, but in Saran only those who are Nánakshái abstain from flesh; others have but few scruples and will eat even field mice. They follow the Hindu law of inheritance, except that a brother or brother's son, even if of a separate mess, succeeds to the exclusion of a sister or sister's son. They are served by good Bráhmans, and the highest castes will take *pakki* from their hands.

Sinduriá.

790. The Sinduriás are sellers of the red powder called *sindur*. They are common throughout Bihar, but are found chiefly in Darbhanga. Their existence as a separate caste is uncertain. They themselves often claim to be Káyasths; but the genuine Káyasths deny all connection with them. In the Sonthal Parganas they are now usually grocers and are said to be descended from the Gandhabanik caste.

Sitalá.

791. Sitalá or Sitaliyá is a small caste of brass workers in the Tributary States of Orissa. They are nomadic in their habits. Their usual title is Padhán. They are reported to be a separate caste unconnected with any other community; but further enquiry may possibly result in their identification with the Maláras of Ranchi who have already been described.

Siyal.

792. The Siyals are toddy-drawers in Orissa. They are sometimes said to be a sub-caste of Chamár, but the more general view is that they are an entirely distinct group. They

* It is sometimes said that they are a sub-caste of Rauniár, but this seems improbable. The latter are traders in grain and cloth and money-lenders.

trace their origin to a Vaisya father and Chandál mother. The Jyotish serve as their priests. Widows are allowed to re-marry. They abstain from pork and fowls, and profess not to drink wine, but are said to do so secretly. They will neither eat, drink, nor smoke with any other caste.

SIYALGIR.

793. The Siyalgirs are a small community, who reside in the Mohanpur outpost of Dantan thana in Midnapore. They speak a dialect of Gujaráti, and are supposed to have immigrated from the west some five or six generations ago, but nothing is known regarding the precise time of the settlement or the reasons which led to it. They are said to have thievish proclivities, and may possibly be the descendants of some wandering Bhil tribe which found its way to Midnapore and stayed there. They now follow a variety of occupations. Some sell fish, some make and sell bamboo mats, some are cultivators, and a few sell groceries. They profess the Hindu religion, but have no Bráhmans to perform their ceremonies. Their priests are men of the tribe called Paramániks, who have picked up a smattering of religious lore. Widows are allowed to marry again by the Sángá rite. The dead are buried, not burnt.

SOKIYÁR.

794. Sokiyár is a small caste found only in Hazaribagh. Most are cultivators, but some are gardeners or day-labourers. A few are zamindars, tenure-holders, and money-lenders. The origin of the caste is unknown, beyond a vague tradition that it came from Janakpur, on account of which Janakpuriá is sometimes used as a synonym for the ordinary caste name. Chásiyár is another synonym. There are three divisions, Gandoriya, Chehaur and Basaria. Members of the first and third groups may intermarry and eat with each other, but not with the Chehaur, which forms a true sub-caste. The favourite title is Mahton. The Sokiyárs employ Jyotish Bráhmans as their priests. Widow marriage is allowed, as also divorce and polygamy. There is little in their religious observances to distinguish them from other Hindus of the middle class. It should, however, be noted that the Falgu and Barákar rivers are considered sacred, especially the former, in which the ashes of their dead are deposited by those who can afford the journey. They specially venerate the sun which they look on as the great manifestation of God's power on earth. They also worship Bhagabati. They rank on about the same level as the Kahárs. Their water, however, is not taken by the higher castes.

SUDHA.

795. The Sudha or Sud is a tribe of Orissa with traditions of having formerly been the dominant power in Baud, with whose chief they still claim relationship. Though now cultivators, they believe that they were formerly soldiers, and adore guns in consequence. They worship the Bakul tree and will on no account fell it. They are divided into various exogamous septs. There is no intermarriage between the Sudhas of Baud and Athmallik and those residing in the other Orissa States. They practise infant marriage. When a girl is about to attain puberty and no suitable bridegroom is forthcoming, she undergoes a mock marriage to an arrow, and can then remain single without blame until a suitor appears. They tried to have themselves recorded in the census schedules as Sudra-Mahálaik.* In 1891 they seem to have been confused with Sudra.

SWEEPER CASTES.

796. There is a good deal of confusion regarding the sweeper castes. They are all known generally to outsiders as Mehtar, but this word in its strict sense refers only to the sub-castes of Hári who remove night-soil.† The following are the main scavenger castes of Bengal:—Hári and Bhuinmáli, Dom, Lálbegi, Sek or Sekra, and Hela or Halálkhor. In Ranchi Báuris, and in Singhbhum and Angul, Ghásis act as sweepers. In Jessore the work is done by a degraded section of Chota Bhágia Muchis. The Magistrate of Rajshahi reports another sweeper caste called Kharakpuria or Kángnia (from *kángan* a comb) who make combs and other articles from bone. The latter, however, seem to be only a section of the Hári caste with whom they intermarry. Two other terms, Ráut and Bhángi, are also used by scavengers as caste names. The former is a title of many castes, including Kurmi, Dhánuk and Goálá, and it is probably used

* For further details see "Tribes and Castes of Bengal," Volume II, page 267.

† In Monghyr and Dacca there is said to be a separate caste called Mehtar, but this seems doubtful.

only as a title by some of the sweeper fraternity. In some districts the term is said to be synonymous with Halálkhor, while elsewhere it is applied to Doms who work as scavengers. Bhángi is sometimes said to be a general term applied by Hindus to all who remove night-soil, including Dom, Hári, Bhuinmáli, Halálkhor and Lálbegi, and it appears to be used in this sense in the United Provinces. In Rajshahi the term is said to refer to an upcountry caste that only removes night-soil when away from home. A Dom again who becomes a *Sadhu* is said to be called Bhángi. In Ranchi the word is reported to be equivalent to Lálbegi, and in Saran to Halálkhor.

*Lálbegi.*

797. The Lálbegis are usually held to be Muhammadans, but they often call themselves Hindus. The truth is that they are on the border-land between the two religions, and they worship both Muhammadan *pirs*, such as Pir Jahar and the Pánch Pir, and also Jagadamba and other godlings of the low-caste Hindus around them. Their priests are men of their own community. They eat the leavings of all, whether Christians, Hindus or Muhammadans, and also pork, except in Eastern Bengal, where their leaning towards Muhammadanism is most marked. They have no sub-castes and no *gotras*. They practise infant marriage and permit divorce and the re-marriage of widows. They remove night-soil and sweepings, but not the bodies of dead animals. Their women assist in their work. They have no traditions regarding their origin, but their caste name is probably derived from Lál Beg who is described in the Poona Gazetteer as the patron saint of the Halálkhors. This would seem to indicate some link between them and the latter, but in Bengal, no connection is admitted. Their relationship with the Sekras seems closer, and in Rajshahi the two castes are said to intermarry.

*Halálkhor.*

798. The above account of the Lálbegis applies in most respects to the Halálkhors. In Hazaribagh a degraded Bráhman is said to act as their priest, while in Champaran the Hajjám officiates at their funeral ceremonies. They reverence the Pánch Pir, and also Jagadamba, Goreiya, Manasá, Hanumán, Bándi and other Hindu godlings. Their name is said to mean 'eaters of lawful food,' in ironical allusion to their want of any scruples as to what they eat.

*Sekras.*

799. The Sekras (from Shekh ?) have been more completely converted to Muhammadanism than either of the above castes. Their boys are circumcised; they refrain from pork; they worship no Hindu gods; they are married by Muhammadan Kázis, and they observe the Ramazán and offer up prayers like other Muhammadans. They remove night-soil, but not dead bodies. They marry young and allow divorce and widow re-marriage.

*Hári.*

800. The Hári is the main Hindu sweeper caste of Bengal Proper and Orissa. It has been fully described by Mr. Risley. The following notes are merely designed to supplement his account. According to the *Brahma Vaivartta Purán*, they are descended from a Let father and Chandál mother. Their own tradition is that after creating the four main castes of Manu, Bráhma found that he had not created any one to keep the world clean. He accordingly rubbed some dust from his arm and with it made the first Hári. The name is said to be derived from '*har*,' a bone, and in some places they still make combs and other articles of bone.*

In Birbhum there are said to be four sub-castes:—

(1) Bhuinmáli, cultivators.
(2) Dái or Phul Hári, midwives.
(3) Kahár Hári, *pálki*-bearers.
(4) Mehtar Hári. These alone act as sweepers. They are again subdivided into three sections, Bengali, Maghaya, and Bánswári. Four sub-castes are also reported from Bankura and Singhbhum, Birkadmá, Duliá, Khariá and Mehtar in the former, and Kadmá, Nágbansi, Silkátá and Tántkátá in the latter district. In Singhbhum the Kadmá sub-caste alone act as sweepers.

In Balasore there are two sub-castes, Karna and Nalua. They have various exogamous groups, including Ghorá, Bágh, Nág, Sálmách, Mokhiari, Karpuriá,

* The name may also be due to the fact that they use bones as implements for cleaning privies. The Kodmá sub-caste may possibly prove to be the same as the group known as Kadmá in Midnapore, *ante* paragraph 727.

Gidhariá and Muthiá. Some of these appear to be totemistic—the Bágh and Muthiá sections worship the tiger, while those of the Ghorá group will on no account touch a dead horse.

The sweeper sub-castes remove night-soil, but are averse to touching the bodies of dead animals. They will, however, do so in some places where Doms are not available. They eat pork and other people's leavings. In Angul the Náori Háris eat ichneumons, frogs, and the flesh of horses. Their priests are usually their own caste men, but in some places the barber officiates, and occasionally a Baishnab performs their ceremonies. They specially reverence Káli to whom they offer goats, swine, fowls and liquor. They also worship the sun with offerings of white goats, milk and *ghi*. Amongst their minor deities are Mangal Chandi, Sitalá and Banadebi. In Angul they have no idea of the greater gods and worship Hingalá, Mangalá and Pitábali.

*Bhuinmáli.*

801. The Bhuinmális are said to belong to the Hári caste, but prefer the former designation, especially when they have given up the work of scavengers and taken to more respectable occupations. In the Sonthal Parganas they are said to be the same as Phul Hári. They profess to remove sweepings only, but in the town of Rampur Boalia and in the Chittagong and Noakhali districts they also carry away night-soil and dead animals. Their women do not usually assist. They sometimes eat pork, but never the leavings of other people. In Noakhali they have two sub-castes, Barabhágia and Chotabhágia. Their *gotras* are Aliman and Káshyapa. They are served by degraded Bráhmans and have begun to give up widow re-marriage.

*Dom.*

802. The Doms remove dead bodies, both of human beings and of animals. They remove night-soil only in a few districts. Those who do so are said to belong to the Maghaya sub-caste. Their other sub-castes include Domchi, Domri, Uttariya, Bánsphor, Supra, Dhopra and Turi. The sister's son acts as priest. At marriages a Hajjám attends to advise, and brings the vermilion to be smeared on the bride's forehead, which has been previously consecrated by a Bráhman. They chiefly worship Káli. In sickness they invoke Barani under a large banyan tree which they smear with vermilion. In Eastern Bengal they reverence *pirs*, and in Rajshahi they observe the Muharram. They have the reputation of being very successful sorcerers.

*Ghási.*

803. The Ghási sweepers of Singhbhum are said to belong to the Karua and Dakhina sub-castes and to have come from Orissa and Mayurbhanj. It may be noted that Karua is also the name of a sub-caste of Hári in Orissa. They eat swine and cattle and the leavings of Hindus. They call themselves Hindus, but their priests are of their own caste. They worship Dharam (Dharmaráj), Barapál (Bar Pahár) and Chatri Mahábir, and also a goddess called Mangalá.

*Chotabhágia Muchi.*

804. The Chotabhágia Muchis of Jessore who remove night-soil have been outcasted for so doing. They number about a hundred families in all. They worship Káli and Satya Náráyan.

Telingá.

805. A few small colonies of Telingás are scattered about Bengal in various districts, *e.g.*, in Midnapore, Bankura, Kuch Bihar and Rangpur. They appear to be the descendants of mercenaries employed by native rulers, and they are often mentioned in the correspondence which took place in the early days of the Company's rule in Bengal. Thus in 1760 Nawáb Jafar Ali Khán wrote to complain that 300 Telingás had fled from his service to that of the Birbhum Rájá. There were also many Telingás in the East India Company's service. The Telingás of North Bengal are said to eat pork but not beef. They deal in birds, feathers, etc., and some are acrobats. Their pursuits are similar to those of the Bediyás, but they deny all connection with them. They have priests of their own.

Taulá.

806. The Taulá (from *Tulá*, cotton) is a weaving-caste of Orissa. It is found chiefly in Angul and the Orissa Tributary States. Its rank is about the same as that of the Báuri and Ghasuriá. Dead bodies are buried; they are placed on the back

with the head pointing north. The marriage and other ceremonies are performed by a man of the caste. The essential part of the marriage ceremony is the presentation of a piece of thread to the bride and bridegroom. The Táulas will eat the leavings of Bráhmans and Karans, but not those of lower castes. Some of them have taken to cultivation.

THÁTÁRI.

807. The Thátári is an Orissa caste of workers in brass and bell-metal. Some have land. They are not regarded as a clean caste, but they enjoy the ministrations of good Bráhmans. They worship a brass scale and its weights on the *Dasahára* day. There is nothing else in their customs which calls for notice except that at marriage the *Kanyádán*, or 'bestowal of the daughter's hand,' is the binding portion of the ceremony. The Thátári is said by some to be the same as Kánsári.

THORIÁ.

808. Thoriá has already been mentioned in the note regarding Golá, of which it is some times said to be a sub-caste. The evidence of this, however, is not very convincing, and I have, therefore, thought it better to show it as a separate caste.

TIPÁRÁ.

809. The Tipárás are divided into Purán, or Tipárá proper, and Jamátia. The Jamátias are said to have come long ago from a place in the south called Achlong, and from them the Tipárá kings formerly recruited their fighting men.

There are two other divisions known as Nawátia and Riyáng, who are not yet looked upon as true Tipárás. The Nawátias are said to come from Chittagong. The Riyángs are of Kuki origin, and their previous home is reputed to be on the upper reaches of the Barák river; they were formerly the *pálki*-bearers of the Tipárá kings. In respect of social status the Purán rank highest and then, in order, the Jamátia, Nawátia and Riyáng. These four sections practically form sub-castes. Intermarriage is not absolutely forbidden, but it is not considered proper for a man to give his daughter in marriage outside his own community, and in practice he very seldom does so. There is, however, no such scruple on the man's side, and a Tipárá will take a wife from any other section, if he can get her, or even an outsider, *e.g.*, a Hindu or a Manipuri.* Except the Jamátias, each section is divided into Daphás or exogamous groups, some of which are said to refer to occupation and others to the original place of residence.†

The religion of the Tipárás has already been discussed.‡ Their marriage customs are primitive. When a young man wishes to marry a girl he serves in the house of her father, as Jacob served for Rachel,§ for a period of from one to three years. When he has completed his service, he visits his bride at night by stealth and leaves her before daybreak. He remains absent for three days, and on the fourth day he appears with his people at the bride's house, where a feast is given and the marriage is then complete. In the plains the Hindu marriage customs are coming into vogue, but even here it is the Ojhá or tribal priest who performs the ceremony, and the worship performed on the occasion is in honour of the tribal god Lámprá. Infant marriage is rare. Divorce and the re-marriage of widows are allowed. The Tipárás burn their dead and mourn for a week, at the end of which period offerings are made to the spirit of the departed. Similar offerings are again made after the expiry of a month.

TULÁBHINÁ.

810. The Tulábhiná is the cotton spinning caste of Orissa (*Tulá* means 'cotton' and *bhiná* 'spin'). The Tulábhinás of Puri intermarry only with their caste-fellows of Rampur and Nayagarh, and not with those of other districts and States. Some have now taken to cultivation. They have a special instrument for spinning

* According to another account, a person of either sex who marries into a lower sub-tribe becomes *ipso facto* a member of that sub-tribe.

†The following is a list of the Dafás:—(1) *Purán*, Apaiácha, Bá:bhal, Chhatratriyá, Daitya Singh, Golai, Kuwátiá, Ochái, Sink, Sáyetiá, Gáhin, Apiyásá, Silotiá, Sena.

(2) *Nawátia*, Kawá, Anak, Rukshyum, Phadong, Garjong, Rambuk, Mosbung, Khaklu, Hárbáng, Tangbái, Mungbái, Achlong, Náithong, Dangro, Gagrá, Totárám, Murásing, Khálí.

(3) *Riyáng*, Bráihá, Ulchai, Upáto, Chongpring, Nokham, Mórchá, Khaiyángchá, Hákóngchá, Durangchá, Páhhung, Ayángchá, Banjóchá, Háikáchá, etc.

‡ *Ante* page 186.

§ The practice is common also among the Koch, Kachári, Mech, Santál, &c.

which they call a *láthi*, and which they worship on certain occasions. They are not a clean caste, but are served by good Bráhmans and rank much higher than the weaving castes, Taulá and Pán.

Ujiá.

811. The Ujiá caste is found only in Balasore and the adjacent Native States. The traditional occupation is fishing, and the caste name is probably derived from *Ujan*, 'to swim,' as the Ujiás manage their nets while swimming. Some also manufacture lime. There are four exogamous groups called Bakti, Amat, Jhunamara and Dalai. Widows are allowed to re-marry, the only ceremony in their case being the presentation by the bridegroom of a new dress, a garland of flowers, and a bracelet. The social rank of the Ujiás is very low.

## Muhammadan Castes and Tribes.

Main divisions.

812. The conventional division of the Muhammadans into four tribes—Shekh, Saiad, Moghal and Pathán—has very little application to this Province. In the proper sense of the words the Shekhs should be Arabs and the Saiads the descendants of Ali, Muhammad's son-in-law, by his wife Fátima, but in Bengal both groups include a great number of persons of purely local origin. This is especially the case with Shekh, which in many parts, instead of connoting a foreigner, does exactly the reverse, and raises the presumption that the persons who so describe themselves are converts of Indian extraction.

The Muhammadans themselves recognize two main social divisions, (1) Ashráf or Sharif and (2) Ajláf, which in Bengali has been corrupted to Atráp. The first, which means 'noble' or 'persons of high extraction,' includes all undoubted descendants of foreigners and converts from the higher castes of Hindus.* All other Muhammadans, including the functional groups to be presently mentioned and all converts of lower rank, are collectively known by the contemptuous term Ajláf, 'wretches' or 'mean people;' they are also called Kamína or Itar, 'base' or Razíl, a corruption of Rizál, 'worthless.' This category includes the various classes of converts who are known as Nao Muslim in Bihar and Nasya in North Bengal, but who in East Bengal, where their numbers are greatest, have usually succeeded in establishing their claim to be called Shekh. It also includes various functional groups such as that of the Joláhá or weaver, Dhuniá or cotton-carder, Kulu or oil-presser, Kunjra or vegetable-seller, Hajjám or barber, Darzi or tailor, and the like. Of these divisions, the Ashráf takes no count. To him all alike are Ajláf. This distinction, which is primarily one between the Muhammadans of foreign birth and those of local origin, corresponds very closely to the Hindu division of the community into Dwijas or castes of twice-born rank, which comprised the various classes of the Aryan invaders, and the Sudras or aborigines whom they subdued. Like the higher Hindu castes, the Ashráf consider it degrading to accept menial service or to handle the plough. The traditional occupation of the Saiads is the priesthood, while the Moghals and Patháns correspond to the Kshattriyas of the Hindu régime.

In some places a third class, called Arzál or 'lowest of all,' is added. It consists of the very lowest castes, such as the Halálkhor, Lálbegi, Abdál and Bediya, with whom no other Muhammadan would associate, and who are forbidden to enter the mosque or to use the public burial ground.

Muhammadan Caste Panchávats.

813. A striking point of resemblance between the Muhammadam functional groups and Hindu castes is that they have the same system of caste management. The Joláhás, Kunjras, Kulus, Dáis, Darzis, Dhuniás, etc., all have their governing committees. In Bihar this body is called a panchávat, but in some parts of Bengal the term seems to have gone out of use since its application to the rural police committees. In Dacca they are called Matbar (from mu'tabar 'worthy of confidence'), in Jessore, Pradhán, and in Murshidabad and the 24-Parganas, Mandal. The number of members varies from two to five. They are sometimes elected, and sometimes they attain their position without any formal method of selection; occasionally they are appointed by the zamindar.

* In some places many of the Moghals and Patháns are regarded as Ajláf.

The post is said to be much coveted by the well-to-do members of the community. Where the election system prevails, it is often the practice for the new member to celebrate his elevation by a banquet. In Murshidabad, on such occasions, the Mandals of all the surrounding villages are feasted and presented with a turban, each senior Mandal being given three yards of cloth, each junior Mandal two yards, and each Piyádá or messenger one yard.

The panchâyat takes cognizance of all breaches of caste custom in respect of trade, religion or morality. No member of a caste is allowed to engage in any occupation which is looked on as degrading; a Joláhá, for instance, may not mend shoes, nor may a Kulu serve as a washerman, nor a Dhuniá act as a midwife. In some cases a caste will not even allow its members to engage in avocations which are generally considered more honourable than its own traditional occupation. No member of a caste may endeavour to oust another from any employment he has obtained, by offering to do the work for a lower wage or otherwise. The panchâyat deals with all breaches of the above rules. It also organizes trade strikes. Among the social offences of which the panchâyat takes cognizance may be mentioned the eating of forbidden food, adultery, divorce without due cause, elopement of wife or daughter, circulating false rumours or making false complaints against a caste fellow, *marrying women of other castes* (whether of higher or lower rank is immaterial), eating with or smoking from the *hukka* of out-castes, etc. They will also determine the expenses to be incurred on the occasion of marriages or other ceremonies. Petty disputes of a civil nature are settled by the panchâyat. It is not the custom to deal with matters that come within the purview of the criminal courts, but an exception is made where the offence is a trifling one and both parties agree to abide by the finding. When a question comes up for adjudication the panchâyat meet, usually in the house of the senior member, and the accused is sent for to appear and explain his conduct. If the facts are disputed, the statements of all persons having knowledge of them are heard and the panchâyat then announces its decision. Possessing as they do an intimate knowledge of the people and of the local conditions, it is said that they seldom fail to arrive at a right decision. If either side is dissatisfied and the case is taken into court, the whole influence of the community is brought to bear to support the decision previously arrived at by the caste authorities.

For venial offences, a small fine is usually imposed. The receipts from this source are allowed to accumulate and are then employed, either for a feast or in meeting the marriage expenses of some poor member of the governing body, in the burial of paupers or the purchase of the mats for the use of the headmen when they meet, or on some object of public utility or amusement. If the offence is more serious or if the offender is contumacious, his *hukka* and water are stopped; in other words he is outcasted. No one may eat with him or smoke in his *hukka*, or visit his house, or marry into his family. In extreme cases the barber, washerman and other village servants are forbidden to work for him. In large towns a man may sometimes disregard the sentence of excommunication and seek new associates elsewhere. But in the country the penalty is too heavy to be borne long, and sooner or later the culprit is fain to acknowledge the error of his ways and to make due reparation; he then tenders his apologies in public, and is usually forgiven and reinstated after he has given a feast to his caste fellows.

In some places, in addition to these special caste committees, there is a general panchâyat whose authority is recognised by all Muhammadans except those of the Ashráf class. In Dacca town, for instance, each ward or quarter has at least one committee of elected sardárs or headmen which deals with local matters. Where a sardár is himself concerned, or where the question at issue affects the whole city, it is referred to a general meeting of all the sardárs of all parts of the city.

PREVALENCE OF ENDOGAMY AMONGST MUHAMMADANS.

814. These panchâyats are found usually only amongst the functional groups, and with them the freedom of action of the individual is greatly restricted in consequence. The authority of the panchâyat extends to social as well as trade matters, and we have seen that marriage with people of other communities is one of the offences of which the governing body takes cognisance. The

result is that these groups are often as strictly endogamous as Hindu castes. The prohibition on intermarriage extends to higher as well as to lower castes, and a Dhuniá, for example, may marry no one but a Dhuniá. If this rule is transgressed, the offender is at once hauled before the panchâyat and ejected ignominiously from his community. A member of one such group cannot ordinarily gain admission to another, and he retains the designation of the community in which he was born even if he abandons its distinctive occupation and takes to other means of livelihood. Thus Mr. Abu A. Ghaznavi, a zamindar of Mymensingh to whom I am indebted for an excellent report on the Muhammadans of Eastern Bengal, says:—There are thousands of Joláhás who are butchers, yet they are still known as Joláhás. Similarly, there are Kulus who are traders, glaziers, tin-smiths, money-lenders, etc., but they remain Kulus all the same."

815. Amongst the Ashráf and the cultivating Shekhs, on the other hand, there is no standing caste committee, and offences against the general sentiment or prejudices are less universally and less readily dealt with by the community. A man is more his own master and is less answerable to his neighbours. There are thus fewer restrictions upon marriage. The Muhammadan religion recommends a man to avoid taking as his wife a woman of superior rank, but otherwise it places no restriction upon marriage so far as social position is concerned. The pride of blood, however, amongst the Muhammadans of foreign descent is considerable. They keep a careful record of their family traditions and matrimonial connections and are very averse to doing anything which will lower them in the eyes of their fellows. The people, moreover, are very conservative and the general tendency is for a Saiad to marry a Saiad, a Pathán a Pathán and so forth. But so long as both parties belong to the Ashráf community, no slur attaches to mixed marriages and they occasionally take place, chiefly between Saiad families and genuine Shekhs of foreign extraction.* In most places, however, intermarriage between the Ashráf and Ajláf are not tolerated, and it very seldom happens that a man of the higher class will give his daughter to one of the lower grade. It is not so heinous an offence for an Ashráf man to take a wife from the Ajláf ranks, but if he does so he is still looked on as degraded. The case is somewhat different when a Muhammadan of the higher class is already married to a woman of equal rank. He may then without much loss of prestige take as his second spouse a woman of lower status, but in such cases the Ajláf wife holds an inferior position in the household, and her children take her rank and not that of their father. The relaxation of the general rule in the case of a second marriage may perhaps be ascribed to the fact that a man's first wife is usually selected by his parents, so that full weight is given to social considerations, while if he marries a second time, he makes his own choice, and personal attractiveness plays a more important part. The result is that unequal marriages often take place, and by their occurrence they have gradually come to be looked upon as less inexcusable than a *mésalliance* when marrying for the first time.

816. The above represents the general practice in respect of marriage amongst the Ashráf community, but with them the rules are far less absolute than with the functional castes, and exceptions occasionally occur.† An Ashráf family which has lost its money is occasionally willing, for a consideration, to form an alliance with a wealthy Ajláf family. Similarly, any Muhammadan who is well off, though he cannot go from one caste to another, can gradually enter the ranks of the Ashráf. The proverb "Last year I was a Joláhá, this year I am a Shekh; next year if prices rise I shall be a Saiad" is well known, and it represents what often occurs, though the process of promotion is not quite so rapid in reality as it is in the proverb. A well-to-do man of a functional group, say a Joláhá, will discard the word Joláhá, call himself Shekh and assume a more respectable name,‡ and if he be hospitable he will

* It is said to be very uncommon for a Saiad to give his daughter to a Shekh. The alliances which take place are usually cases of a Saiad taking a Shekh's daughter as his wife.

† In districts where the foreign element is small, as in most parts of East and North Bengal, the objection on the part of the Ashráf to taking Ajláf wives is not so strong as it is elsewhere. But in no case, unless driven thereto by poverty, will an Ashráf give his daughter to a man who is still admittedly of the Ajláf class.

‡ *See* Chapter IV, paragraph 311. Thus Chánu Miyán will become in turn Chainuddin, Muhammad Chainuddin, and Maulavi Muhammad Chainuddin Ahmad.

slowly secure for himself a circle of friends from the poorer classes of the Ashráf community. He will then marry into an Ashráf family, probably of doubtful status,* and his son will be recognised as a true Ashráf. The process is easier in the towns than in the villages, where people are more conservative, and in a distant place than near home, where a man's connections are well known. The greatest difficulty that a *parvenu* has to overcome is to gain recognition for his female belongings from the Ashráf women. The latter are much less easily won over than the men, and will often decline to hold intercourse with women of lower rank, even when very wealthy.

We may conclude, therefore, that while Muhammadans of the higher classes are theoretically free to marry whom they like, they very seldom take wives from amongst the lower classes, and in practice usually confine their matrimonial alliances to their own community. Muhammadans of lower rank, who belong to certain functional groups, are just as strictly endogamous as the members of Hindu castes. Amongst the low class Shekhs, most of whom are the descendants of Hindu converts, the rule is less strict but endogamy exists in practice owing to the scruples of the classes above and below them.

COMMENSALITY.

817. The rules regarding commensality are not at present very rigid, and judging from the conflicting reports received from different districts, the practice seems to vary a good deal. It may be stated generally, however, that in the case of the Ashráf, the question is purely a social one, just as it is amongst Europeans. A man of high position will not sit down to eat from the same dish, or in the same place, with a man who is distinctly his inferior, but he has no objection to taking food prepared by an Ajláf any more than a European has. He may also, in special circumstances, *e.g.*, when on a journey, eat with an Ajláf without any loss of respect, but although a man might make an exception of this sort, his wife would under no circumstances do so. In the case of the Ajláf castes, the usual rule appears to be that each caste should eat alone, but on this subject I cannot do better than quote the following remarks from an excellent report by Mr. Muddiman, Subdivisional Officer of Gopalganj:—

> With regard to the question of eating with outsiders, I have, after conversation with many Muhammadans of all classes, come to this conclusion. All Muhammadans are in actual practice more or less infected with the Hindu prejudice as to eating with outsiders. Curiously enough, educated Muhammadans, while denying that they have any prejudices on this point, probably infringe their own pronouncement more frequently than others. On the other hand, uneducated men freely protest that they will not eat with certain classes (*e.g.*, Shekhs and Joláhás will not eat with the Muhammadan Teli or Dhobi), but in practice they often do so. I was amused to see a Shekh peon quietly eating with a Náth (*sic*) just after denying that he would do anything of the kind. There is no doubt that the vast majority of the Muhammadans of this subdivision look upon eating with outsiders of lower status as a thing which, if not forbidden, is to be kept quiet on social grounds, if no other.

DISTRIBUTION OF MUHAMMADAN CASTES AND TRIBES COMPARED WITH PREVIOUS ENUMERATIONS.

818. No useful purpose would be served by comparing the distribution of Muhammadan castes, as shown by the present enumeration, with that on previous occasions, as this is the first time that attention has been prominently directed to the subject and an effort made to secure a proper return. The caste tables of 1881 show no Muhammadan castes, and in 1872 and 1891, the information was very incomplete. At the present census, for instance, 1,241,961 Joláhás have been returned compared with 725,627, in 1891 and 119,749 in 1872, and there are 124,528 Kulus against 31,314 in 1891 and none in 1872. The great majority of Muhammadan castes were not returned at all at either of these censuses. Even now the figures are not complete, and the amorphous ranks of the Shekh not only include large crowds of converts from Hinduism, but also many Joláhás and others who had a strong objection to being returned under their functional designations and claimed to be entered under this head. I shall therefore pass on to note briefly on the meaning of the various designations under which Muhammadans were entered in the caste column of the

* Owing to the Muhammadan law of inheritance, there is a tendency for all Muhammadan families to gradually become impoverished, and many of the Ashráf have thus been merged in the ranks of the Ajláf. This is a serious matter which is now attracting the attention of the leaders of the Muhammadan community, who hold that the law of inheritance laid down in the Hedaya was intended for a pastoral people, and is not applicable to the present state of society in India. It is very undesirable that the ancient families should disappear, and yet this is what must happen sooner or later unless something is done to prevent it.

schedule and to indicate how far they represent true castes of the Hindu pattern.

ABDÁL.

819. The Abdáls or Doklás are found in North Bengal, Purnea and Mymensingh. They form a true caste whose occupations are much the same as those of the Hindu Hári. They sweep homestead lands, throw up the plinths on which houses are built, carry torches at processions and play the drum. They castrate animals and circumcise Muhammadan boys, and their women act as midwives. They are regarded as degraded, and other Muhammadans will not eat with them. They may enter the mosque, but are not permitted to worship in company with the better classes, nor are they allowed to be buried in the public cemetery. They are sometimes considered to be a branch of the Bediyá fraternity.

AFGHÁN.

820. Afghán has as much the same signification as Pathán, but I have treated it separately, as it is used more particularly of the persons who come from Afghánistan for trading purposes and eventually return thither, whereas most of the so-called Patháns, even if foreigners, have been domiciled in Bengal for many generations.

AJÁT, AJLÁF, NASYA AND NAO MUSLIM.

821. Out-castes are called Aját. They are Muhammadans whose social position is very low, but who do not belong to any of the recognised functional groups. Ajláf, in its more general sense, includes all Muhammadans of the lower class, but it is used more specifically in the south of Bengal Proper to designate low caste converts from Hinduism who are not included in any of the functional groups. Most of them were probably Pods and Chandáls before they attorned to the faith of Islám. In North Bengal the word Nasya, meaning 'a thing of nothing,' is used in a similar way to describe the Muhammadan converts from the ranks of the Rájbansis and Meches. It corresponds to the Nao Muslim of Bihar, which is the name there given to recent converts from amongst the lower castes.

AKHUNDJI AND KHWÁNDKÁR.

822. The term Akhundji is applied to teachers and others who know the Persian alphabet, as a token of respect. It does not in any way indicate race or caste. Most persons so called are probably Saiads. Khwándkár is a similar word. It means a Muhammadan teacher or school-master irrespective of his race .

ATASHBÁZ.

823. The firework-makers or Atashbáz are reported toform an endogamous group, but the total number returned is so small that it would seem that many of them must have been entered as Shekh.

BÁKÁLI AND BAKHO.

824. Báklá, is derived from *bakali* 'a pot-herb,' and means a vegetable seller. At the present day most Bákális deal in grain. They are said to form a true caste in Bihar where most of them are found. The Bakhos are beggars and drummers. Their wives are called Bakhayan. They are found mainly in Bihar.

BARHI AND KHARÁDI.

825. In Champaran the Muhammadan carpenters or Barhis are said to constitute a separate endogamous group. It is not clear if they are the same as the Kharádis or turners who make the legs of bedsteads, and who are also reported to form a true caste.

BEDIYÁ AND NAT.

826. Bediya is a generic term for gipsy in Bengal Proper and Nat in Bihar. Some call themselves Hindus and some Muhammadans, but the majority now claim to belong to the latter religion. They are, however, far from orthodox. They are not allowed the use of the mosque or burial-ground and are regarded by Muhammadans in much the same light as are Chamárs by Hindus. They are fully described in 'The Tribes and Castes of Bengal.'

BEHÁRÁ AND BELDÁR.

827. The Muhammadan *pálki*-bearers are known as Behárá. In some districts they appear to form a separate caste, but they have not been very fully reported on, and in some places it is probable that the word merely indicates the occupation of the persons so returned. The Beldárs dig earth. They were returned mainly from Eastern Bengal, where it is said that they are converts from the ranks of the Chandáls. I have no information as to whether they are endogamous or not.

828. The Bisáti is a pedlar of any caste, and the term is merely a functional designation. Bhagawáni is a term which refers to sect and not to caste.*

BISÁTI AND BHAGAWÁNI.

829. The Bhánrs and Páwariás seem to be allied, though separate, castes. The former who are also known as Bhárwa, go to parties, where both men and women dance and act. The men are often pimps. The Páwariás are also players, but their speciality is to play and sing outside the house when a male child is born, and so obtain presents from the parents. It is sometimes said that the women sing and dance in male costume, but so far as my information goes, it is the men who occasionally perform in female attire, and not the women in the garb of men.

BHÁNR AND PÁWARIÁ.

830. The Muhammadan Bháts who are fairly numerous in some parts of Bihar, are converts from Hinduism. Their title is Rái, and they still have Hindu names. They form a true caste of very low rank. They compose verses and go round singing them, and will accept presents even from the lowest classes. At marriages they sometimes run beside the bridegroom's *pálki* reciting what they consider to be suitable verses. They also appear at the *srádh* ceremonies of Hindus. Their songs are usually in praise of the Prophet and of Ali and Fatima, but the diction is vulgar and the language a mixture of different dialects.

BHÁT.

831. The Bhathiárás or inn-keepers are found chiefly in Bihar. Their women cut grass, do syces' work and cook for Muhammadan travellers. They form a true caste, but their social position is very low. They have been fully described by Mr. Crooke.†

BHATHIÁRÁ.

832. Bhátiyá was returned as the caste of more than 1,700 persons in Rangpur, and also by about 1,000 persons in the adjoining part of Assam. It is there said to be the name of down-country Muhammadans who visit Assam for purposes of trade, but in Rangpur it is the designation of Muhammadans who come from Serajganj and other places further down the stream of the Brahmaputra to settle on new alluvial formations. They are not endogamous, but the Rangpur Muhammadans look down on them and will not readily intermarry with them.

BHÁTIYÁ.

They are not the same as the low mendicant caste of the same name described by Mr. Risley who live by dancing, juggling and singing.

833. Fishing and fish-selling is the occupation of several groups, and it is not quite clear how far each is distinct from the other. The Máhifarosh (*máhi* 'fish' and *farosh* 'selling') both catches and sells fish. The Nikári sells fish but does not catch them, and so claims a somewhat higher status.‡ The Chákláí is a small community in Jessore of higher origin which has been degraded for selling fish. The Chaudáli is a small group of fish-vendors in the 24-Parganas, also known as Musalmán Bágdi. It is reported to be endogamous. I have treated it as a sub-caste of Nikári. I have included under the same head the Doháriya and Pájhra, two small communities of Muhammadan fish-vendors in Murshidabad.

CHÁKLÁI, CHAUDÁLI, DÁTIYÁ, DOHÁRIYA, MÁHIFAROSH, MÁHIMAL, NIKÁRI, PÁJHRA.

The Dátiyá, who is found only in Rangpur and Mymensingh, and the adjoining districts of Assam, catches fish, and so also does the Máhimal whose head-quarters is in Assam. The Dhawá is another fishing caste which will be separately mentioned further on.

834. The word Chambá generally indicates a tribe of beggars, usually Muhammadans, who extort alms by cutting or scarifying the skin. They are also known as Máskátá. But in Darbhanga where nearly all the persons so returned at the census were enumerated, the term is applied to an endogamous group of Muhammadans, found chiefly in the Banipati thana, who castrate animals, chiefly bulls. They are also cultivators.

CHAMBA.

835. The Chatkis are a small endogamous community in Tippera who make lac ornaments. They also sell fancy articles and eatables. They do not appear to have been entered

CHATKI AND CHATNA.

* For an account of the Bhagawánis, see Chapter IV, paragraph 333.
† 'Tribes and Castes of the North-Western Provinces and Oudh,' Vol. II, page 34.
‡ In Bogra he is said to have given up fish selling and is now a dealer in vegetables.

under this name at the census. The Chatna is an allied group returned only from Backergunge. The occupation is very similar to that of the Hindu Kapáli, viz., the making of jute thread and the weaving of gunny-bags.

CHAUDHÁRI AND CHHIPIGAR.

836. Chaudhuri or Chaudhári is merely a functional appellation of a class of land-owners corresponding to zamindar, which has become the family title of many Hindus as well as of Muhammadans. Chhipigar is a somewhat uncertain term. It refers to persons who dye cloths, cushions, quilts, etc. Sometimes it means caste and sometimes function only.

CHIK AND KASAI.

837. The Chik and Kasai (Kassab) are butchers, but the former deals only in the meat of sheep and goats, while the latter sells beef; he also sometimes trades in hides. Both communities are strictly endogamous. They rank very low, and the more respectable classes will not associate or eat with them.

CHURIHÁR AND LÁHERI.

838. The Churihár and Laheri are allied castes. The former makes bangles of glass and the latter of lac. The men prepare the bangles and the women sell them. The Laheris sometimes also paint flowervases. Both groups are true castes and both rank low.

DAFÁDÁR AND NALIYÁ.

839. The Dafádár and Naliyá or Nalua are mat-making castes of East Bengal. The Dafádár is considered the more respectable of the two, and will not eat or intermarry with the Naliyá. He crushes the reed on a stone, whereas the Naliyá cuts it into strips with a knife. Both form regular castes of the Hindu pattern.

DAFÁLI AND NAGARCHI.

840. The Dafális, who are somewhat numerous in Bihar, are beggars and musicians, and their name is derived from the 'daf' or drum on which they play. They perform chiefly at marriages, and on the occasions when goats are sacrificed to Shekh Sádu. They often take a prominent part in the less orthodox forms of Muhammadan worship. Sometimes they sell trinkets and prepare the tape called Newár. They form a true caste of very low status.*

The Nagarchi is the Muhammadan drummer caste of Bengal Proper, whose instrument is the drum called *nagra*. They believe that they were originally employed in military service, but their present rank is very low, owing, it is said, to the fact that their women take part in their performances. They have no objection to attending at Hindu ceremonies, and many of them are semi-Hindus. I have included under this head the Dhuli or Bádyakar,† and also the Dagari whose drum, called *dagar*, differs but very slightly from that of the Nagarchi.

DÁI AND MEHÁNÁ.

841. In Bengal Proper where more than 20,000 persons were returned as Dái, the term means midwife.‡ In most districts the profession is the occupation of a special caste, but in some the work is done by the wife of the Abdál or of some other man of low social status. The equality of the sexes in the census figures shows that, where the word was found in the schedules, it usually referred to the caste and not merely to the occupation. Páthuá is a synonym for the Dái caste in Chittagong. The term is derived from Páthá a he-goat, the castration of these animals and of oxen being the main employment of the men, while their wives act as navel-string cutters. In this district the professional Dái merely severs the cord, and does not, as elsewhere, assist in the delivery of the child. This is done by the other females of the family or by midwives of the proper sort who are locally known, not as Dái but as Dharani. I have shown separately a few persons returned as Mehánáá, but their true caste is probably Dái. The men were usually returned as drummers, and the women as navel-string cutters. Mehánáá seems to be a title of Dái, and often, where persons were returned as Dái by caste, the word Mehánáá was found added to the name as a sort of title.

DARZI.

842. The Darzi is a Bihar caste of tailors. Pathháns and Jolháhás occasionally take to the same occupation, but they do not thereby gain admission to the tailor caste, and the Darzis properly so-called will not intermarry with them.§ The Darzi ranks above most of the other functional groups.

* See also Crooke. Op cit, Vol. II, p. 240.
† It has been suggested that they are of Muchi origin.
‡ In Bihar it generally means 'ayah' or 'maid.'
§ In Saran there is said to be a tendency for Jolháhás who are tailors to pass by slow degrees into the Darzi caste, but this cannot occur at once; it is a matter of years and sometimes of more than one generation.

843. The Dháwá is a palki-bearing and fish-catching caste of Northern, Central, and Western Bengal. Its members cannot intermarry with any other group. Its reported strength exceeds 18,000, but the real number, as in other cases, is probably greater.

DHÁWÁ.

844. The Muhammadan washerman is called Dhobi, while his Hindu rival spells his caste Dhobá. He serves even sweepers and Chamárs, and his social rank is therefore very low. No other class of Muhammadans will eat in his house.

DHOBI.

845. The Dhuniá or cotton-carder, also known as Nadáf, with nearly 200,000 representatives, is one of the largest Muhammadan functional groups, but it is almost wholly confined to Bihar, and is most numerous north of the Ganges. It is strictly endogamous. It ranks below the Joláhá.

DHUNIÁ.

846. The word Fakir or Sáin (from Swámi) was originally applied to religious mendicants, and especially to the descendants of the Khádims, *i.e.*, custodians of Dargahs (tombs of saints), who were supported by voluntary gifts, but it has now come to mean any beggar. In a narrower sense it refers to the low class of Muhammadans in Bihar who bury dead bodies and keep the winding sheet as their reward. The latter form a true caste. Their status, it is needless to remark, is very low.*

FAKIR.

847. The Gaddi, or Ghosi as it is called in Sasaram, is a caste of converts from the ranks of the Hindu Goálás, who keep cows and buffaloes and live by dealing in milk and butter. As a rule they bear Hindu names and observe Hindu superstitions. In Champaran they are still known as Goálás. I have included under this head persons returned as Jat.

GADDI.

848. The Hajjám, or Turk Naia, shaves all classes and so ranks very low. He is less respectable than the Hindu barber, as he does not, like the latter, attend on ceremonial occasions. In addition to shaving, the Hajjáms are quack doctors and circumcise Muhammadan boys. It is believed that they are converts from Hinduism, and many still live like Hindus and are known by Hindu names. They are a true caste.

HAJJÁM.

849. The word Hijra means, 'eunuch,' and the excess of males shows that the word was often used in this sense in the census schedules. But it is also employed to indicate people who sing and play at the birth of a child, and may possibly, when used with this meaning be a synonym for Páwariá.

HIJRA.

850. The Joláhás or weavers, with nearly one and a quarter million representatives, are the most important functional group amongst the Muhammadans. The name is commonly supposed to be a corruption of Johálá the plural of Jáhil, 'ignorant,' and is therefore much disliked by the persons concerned, who begged to be permitted to return themselves as Shekh. This could not be agreed to, as it would have vitiated the returns, but they were allowed, as a compromise, to call themselves Momin (faithful or orthodox), Nurbáf (a weaver), or Kárigar (a workman). The latter word is not altogether unexceptionable, as it may be used of any workman, but it is generally understood as referring to the Joláhá in particular,

JOLÁHÁ.

* In Bihar the word, fakir, is often used with reference to Hindu mendicants also.

and persons so returned were classed accordingly. Momin and Nurbáf are generally said to be applicable to the Muhammadan weavers and to no other class. The Joláhás form a regular caste, and their organisation is as strict as that of any functional group amongst the Hindus. In Darbhanga they are divided into two endogamous sub-castes, Tirhutia and Dakhneya, each with its own panchâyat. They are one of the most respectable of the functional groups, and a Nasya or low class Shekh will eat with them without objection. Some, who have become rich, call themselves Maulavi and are allowed to mix with the Ashráf classes. In Faridpur they usually belong to Dudhu Miyán's sect. Some have given up weaving and taken to cultivation, and others hold clerical appointments or work as bookbinders. Many have become khitmatgars in European households; but, with the exception of tailoring and dyeing, the rules of the caste forbid them to gain a livelihood by other handicrafts. They are most numerous in the Patna Division. From the excess of females, it would appear that the men who go away from home for work elsewhere usually describe themselves as Shekhs.

KÁGHAZI.

851. The Kághazis are paper-makers. The total number thus returned is small, and the word probably merely refers to occupation.

KALÁL.

852. The Kalál or Muhammadan distiller is also known as Ráuki, probably from 'araki, a dealer in 'arak (the sap of the date-palm). They correspond to the Hindu Kalwárs from whom they are probably descended. Some now carry *pálkis*. They are practically confined to Bihar and the north of Chota Nagpur.

KALANDAR AND MADÁRIA.

853. Kalandar is the name of a class of Muhammadan fakirs. Many are jugglers. They were returned only from Bihar and Midnapore. They are probably the same as, or very closely allied to, the Madárias, another group of fakirs, many of whom are jugglers, monkey-leaders and snake-charmers.

KÁN.

854. The Káns who are found only in Bengal Proper are probably allied to one of the groups included under the general term Bediyá. They repair umbrellas, make fish-hooks, and deal in *hukkas*, wooden combs, cotton waistbands, etc.

KASBI.

855. Kasbi means a prostitute. It is not a caste but a profession. I have included under this head other terms having the same meaning, such as Peshákar, Málzádi, Besyá, and Tawáif. The last-mentioned is a dancing girl as well as a prostitute, and is regarded as holding a less degraded position.

KÁZI AND KHÁN.

856. The word Kázi is used as a title by the descendants of Muhammadan Magistrates. It has no reference to caste or tribe. Khán is a title of Patháns, but I have thought it better to show the persons thus returned under a separate head, as in Mymensingh, where they are chiefly found, it is used as the designation of the descendants of converts from respectable Hindu castes.*

KHOJÁ.

857. There is some danger of confusion between Khojá and Khwájá. The latter simply means merchant, while the former may be either a eunuch, or a tribe of Sunni Muhammadans in Jhelum and Jhang in the Punjab, or it may refer to the followers of the Aga Khán, whom they regard as their *Imám* or religious leader, descended in direct line from the Old Man of the Mountain, Shekh-al-Jabal, the founder of their faith and the converter of their ancestors, the terrible assassins of Alamut. It is doubtful if many of the persons returned as Khojás in Bengal belong to this community.

KULU.

858. Kulu, Khulu or Kalu is the name of the Muhammadan oil-pressing caste. It is strictly endogamous, and is found chiefly in the districts west of the Bhágirathi. Its strength is about an eighth of a million.

KUNJRA.

859. The Kunjras or green-grocers, have their head-quarters in Bihar, where their number exceeds 170,000. In addition to selling vegetables, some sell fish and draw toddy.

* These Mymensingh converts usually take as their surname the words Mozumdar, Thákur, Biswás, Chaudhari and Ráj. The last mentioned claim descent from some line of Hindu Kings.

Many earn a livelihood as boatmen. They are a regular caste, and occupy about the same status as the Dhuniás. Sabji or Sabjifarosh is, in some places, a synonym for this caste.

MÁLI.

860. Musalman Mális or gardeners and flower-sellers were returned only in two or three districts. It is not certain if they form a separate caste or not.

MALLÁH.

861. Malláh is an Arabic word meaning boatman. It is applied to Hindus as well as to Muhammadans, and is equivalent to the Hindu word Mánjhi. It probably represents a caste amongst the followers of the prophet.

MALLIK.

862. There was no entry regarding which so many divergent reports were received as Mallik. It was reported from Champaran that the persons known by this name are the descendants of Saiads, and from Shahabad that they are a low caste of singers. In Mymensingh it is said that the Joláhás use the word as a title. In South Bihar again, where the Malliks are most numerous, it is stated that they are the descendants of Saiad Ibrahim and his soldiers, mostly his own tribesmen and relations. He was a general of Aláuddin Ghori, and was deputed to put down an insurrection in this part of the country. He planted garrisons in various Hindu villages, and his soldiers took Hindu women as their wives and settled there. Ibrahim's tomb is still to be seen in the town of Bihar. He was given the title of Mállik on account of his brilliant victories, and the word was subsequently applied to the whole community of which he and his soldiers were the founders. Whatever their origin may be, the present status of the Malliks of Bihar is generally regarded as respectable, and in some parts they freely intermarry with Shekhs.

MÁNGTÁ.

863. The Mángtás are usually beggars, but some are cultivators. Very few were returned under this head at the census.

MANIPURI.

864. The home of the Manipuris is in Assam, but there are colonies of them in Dacca and Hill Tippera. The majority are Hindus. Those who returned themselves at the census as Muhammadans were enumerated (with one solitary exception) in Hill Tippera.

MASALCHI.

865. The traditional occupation of the Masalchis is torch-bearing, but at the present day nearly all of them are cultivators. They form an endogamous group. They are found only in Jessore and Faridpur and belong to Dudhu Miyán's sect.

MIR.

866. Mir is a contraction of Amir, 'a chief or leader,' and is usually a title of Saiads, but it is not confined to them, and is sometimes used by Shekhs, while in Saran a case of a wealthy Joláhá having assumed the title recently came to notice. In Champaran the word is said to be the title given to Hindu converts of the Shiah sect of Islám.*

MIRDHÁ AND MIRZÁ.

867. Mirdhá simply means a village overseer or head of peons, and does not denote caste. Mirzá means son of a Mir, and is really a title, but in some parts of Bihar it is said to be the name given to children of Saiads or of dignitaries of Muhammadan times by women of lower rank.

MIRIÁSIN.

868. The Miriásin or Dom Miriásin has been described by Mr. Nesfield.† He is a musician, and sings at marriages and other ceremonies. He plays on the *tom-tom* and *tabla*. He also deals in, and applies, leeches. The group is endogamous. Its rank is very low.

MIYÁN.

869. Miyán simply corresponds to 'Mister.' It is a title of respect claimed chiefly by persons who are not sufficiently educated or well placed to be able to claim such titles as Munshi, Maulavi or Chaudhuri, and is often applied to the junior members of a Muhammadan family.

* There is a Saiad family in one of the Bihar districts known as Mir Gadahia, one of whose ancestors was Nawáb at Patna and earned the soubriquet by bringing bricks for his house on asses' backs.

† Brief View of the Caste System of the North-Western Provinces and Oudh, page 43.

870. Whether the persons usually known as Moghals are really Turks or not is not a question which need be discussed here.* It will suffice to say that the persons who call themselves by this name mean thereby to assert that they are the descendants of the foreigners who came to India with Baber or were subsequently attracted thither by his successors. I have included under this head Beg which is a title used almost exclusively by the Moghals. The return of this race is probably far more correct than that of Shekh or even of Saiad and Pathán, as very few of the converts from Hinduism or upstarts from the lower ranks of Islám affect the name.

MOGHAL.

871. Muchi includes Chamár. The number of persons of this caste who have become Muhammadans and who still retain their old distinctive name is very small, but it is probable that there are many converts from amongst the Chamárs who are now known by other names such as Abdál, Bádyakar or Dhuli.

MUCHI.

872. The Mukeris (from *Muker* 'a flour merchant') sell grain and wood. In some places they are tobacconists or hide-merchants. Sometimes they drive hackney carriages.

MUKERI.

873. The Náik lives by singing, dancing and the prostitution of his women. It is not clear whether he forms a separate caste or whether the term merely denotes occupation. The Nalband, or farrier, may be of any caste and the term is merely a functional designation. Nánbái and Páneri are other terms of the same category. The former simply means a man who follows the trade of a baker, and the latter any one who sells betel leaves.

NÁIK, NALBAND, NÁNBÁI, PÁNERI.

874. The Patháns are properly the descendants of the Ghaznivites, Ghorians and other more recent comers from Afghanistan. In Bengal, however, the term includes not only the descendants of persons of this stock by local women, but also many converted Hindus of the higher castes, and especially those of a Rájput or Bábhan origin. In Mymensingh all converts from the higher castes take the title Khán (which has been shown separately), and many doubtless gradually come to call themselves Patháns. In Orissa Pathán is often used like Shekh in Bengal Proper, and Turk in parts of Bihar as description of Musalmans generally.

PATHÁN.

875. The Patwás are embroiderers and are reported to be a true caste. Rangrez like Darzi seems to be the name, not only of persons of various castes who have taken to dyeing, but also of an endogamous group of which this is the traditional occupation.

PATWÁ, RANGREZ, SÁBANGAR, SARDAR AND SIKALGAR.

The Sábangars or soap-makers are reported to form a true caste; but only 34 persons were returned under this designation at the census. Sárdar means 'a headman' and Sikalgar 'an armourer,' or a person who cleans swords. It is doubtful if these terms refer to caste.

876. The origin of the Pirális has already been referred to. Some of them managed to regain their original Hindu castes, while others became Muhammadans. The latter have retained many of their Hindu usages and superstitions, and do not intermarry with other Muhammadans; they hold a respectable position in Muhammadan society. Most of them are found in Jessore and Khulna, but they do not appear to have been returned separately at the census.

PIRÁLI.

877. The true Saiad is a direct descendant of Ali, the fourth, or as the Shiahs say the first, Khalifa by Muhammad's daughter, Fátima. They are divided into Hasani and Husaini, according as they claim descent from one or other of these famous martyrs. By sect they are usually Shiahs. They hold the highest rank amongst the followers of Islám. The number of persons who call themselves Saiad in Bengal alone exceeds 236,000, and it is obvious that these cannot all be the descendants of Ali. The fact is that the rank of Saiad is much coveted and is frequently claimed by persons of other branches of the community who have

SAIAD.

* The usual name for all Muhammadans in Bihar and Chota Nagpur is Turk, and the Musalman barber is called Turk Nain. It is only in Orissa that we find traces of the word Moghal as a general term in the expression "Moghalbandi" which refers to the tract administered by the Moghals as distinguished from the hilly country which they did not enter. The generic term for Musalmans in Orissa is, however, not Moghal but Pathán.

raised themselves to a high position in other respects. When a Sunni becomes a Shiah, he often calls himself Saiad, and in this sense the word simply means that the person in question accepts the superior authority of the first Khalífa. It is also a title given to Hindu converts of high caste, and there is a tradition that in Akbar's time numerous high caste converts were allowed to call themselves Saiad. I have included under this head a small number of persons returned as Maulavi.

Shámbuni.

878. The Shámbunis are a small class of Muhammadan fishermen in the Cox's Bazar subdivision of Chittagong. They are looked down on by other Muhammadans, and can only marry amongst themselves. They are a hardy race. They have no traditions as to their origin, but their appearance gives rise to the supposition that they are of mixed descent, half Bengali and half Magh. They closely resemble the Maghs in respect of the fishing nets they use, the huts they live in, and the clothes they wear. Many speak the Magh language, while those who profess to talk Bengali speak it so corruptly that they are barely intelligible even to their immediate neighbours. They do not appear to have been separately returned at the census.

Shekh.

879. The word Shekh is still more ambiguous. In its strict sense it means 'an elder' or 'a chief' and should connote an Arabic descent. There are various divisions, which I have not attempted to show separately, such as Koreishi, the members of Muhammad's own tribe; Abbási, the descendants of Muhammad's uncle Abbás; Siddiki (the true), the descendants of Abu Bakr, the first Khalífa, of whom this was the title; and Faruki (distinguisher of right and wrong), the descendants of Omár, the second Khalífa who was so called by his followers. In Bengal the word is commonly appropriated by all converts to Muhammadanism, especially in East Bengal, where the proportion of such converts is large and the number of Muhammadans of foreign origin is relatively small. In Bogra, for example, the Magistrate reports that most Muhammadans who did not claim to be Saiads were entered in the census schedules as Shekh. In Bihar it is less easy for a new convert of low caste to take this title,* and he must be content to pass for some time as a Nao Muslim, but even here no objection is made to its assumption by converts of good caste, such as Bráhmans and Káyasths.

Not only do new converts often call themselves Shekh, but it is also the title assumed by well-to-do members of the various functional groups, when desirous of hiding their humble origin and entering the Ashráf class. Amongst the uneducated the greatest ignorance prevails regarding the meaning of this and kindred terms, and the idea that all Muhammadans must necessarily belong to one or other of the four classes, Shekh, Saiad, Moghal and Pathán, is quite as deep-rooted as the belief amongst Hindus in their four-fold division into Bráhmans, Kshattriyas, Vaisyas and Sudras. In Dinajpur it is repoted that the common people hold that all priests are Saiads; the police and peons, Patháns; woollen cloth dealers, Moghals; and cultivators, Shekhs.

The true Shekhs will not ordinarily intermarry with those of local origin, but a good deal depends on their relative material position. In some places there are regular sub-castes, *e.g.*, in Malda, where there is a small settlement of immigrants who came from Darbhanga some fifty years ago; they are known as Darbhangia Shekhs and marry only within their own community. There is another endogamous community in the same district known as Shershábádia who are said to be very good cultivators. In Purnea the Shekhs are divided into four sub-castes, Bengali, Kalaiya, Habalyar and Khotta. The first mentioned are found east of the Mahánandá and speak a mongrel dialect, partly Bengali and partly Hindi. They are probably converts from the Rájbansis and Koches, and many still worship Bishahari. The Kalaiyas who inhabit the centre of the district are also of Hindu origin and derive their name from the Hindu practice observed by them of not marrying in the same family or *kul*. The Habalyar, who formerly inhabited the Haveli Pargana, and the Khotta, who come from the West Bank of the Kosi, present no special characteristics.

* It has already been mentioned that in parts of Bengal Proper low caste converts are known as Nasya or Atraf. But they are gradually shaking off these distinctive appellations and gaining recognition of their claim to rank as Shekh.

The more enlightened members of these four groups are now beginning to associate freely with each other but the feeling against intermarriage is still strong amongst the ignorant.

Sonár, Tikulihár, Thawái.

880. The number of Muhammadans returned as Sonár or goldsmith, Tikulihár or spangle-maker, and Thawái or mason is very small. These terms apparently indicate profession rather than caste, but in one district the Tháwáis are reported to be an endogamous community.

Thákrái.

881. The Thákráis are found only in Champaran. They are mostly cultivators of Hindu origin. They claim to have been Rájputs prior to their conversion to Muhammadanism. They observe the Hindu custom of *gaunâ* or second marriage, and use brass vessels like Hindus instead of copper ones like the Muhammadans. Most of them refrain from beef and are still subject to many Hindu superstitions. They are the most respectable of the Ajláf class.

Tuntia.

882. The Tuntias or Tutias are a Muhammadan caste of Western Bengal whose traditional occupation is the cultivation of the mulberry tree (*tunt*) for feeding silkworms. Of late years this occupation has become less profitable and many have taken to ordinary cultivation and field labour, while some twist ropes from a reed called *sar*. As a community they have a bad reputation, and many of them are professional thieves and dacoits. They are regarded as a degraded class, and other Muhammadans will not give them their daughters in marriage, though they have no objection to receiving Tuntia girls as wives. Males of the ordinary Ajláf class will usually eat with Tuntias, but their wives will not associate in any way with the women. There seem to be no distinctive features in their religious beliefs and social practices. At the census they tried to return themselves as Shekh.

Social precedence amongst Muhammadans.

883. For the purpose of social precedence the Muhammadans may be divided into three main groups as follows. I have omitted the minor functional castes from the scheme, as it is often difficult to say precisely what their rank is. I have divided group (*b*) into four sub-groups with reference to the relative position of the various castes included in it. The castes in each group or sub-group other than group (*a*) are arranged alphabetically :—

(*a*) *Ashráf* or better class Muhammadans—

(1) Saiad.—The true Saiad holds the first place in the Muhammadan social system, just as does the Bráhman amongst the Hindus.

(2) Shekh.—This head includes only the genuine Shekhs of foreign extraction and converts of good social position, but not those who are converts from low Hindu castes.

(3) Pathán. } In some places many of these two races are regarded as Ajláf. A great deal seems to depend on the extent to which their females observe the *parda*.
(4) Moghal. }

(5) Mallik.

(6) Mirza.

(*b*) *Ajláf* or lower class Muhammadans—

(1) Cultivating Shekhs and others who were originally Hindus but who do not belong to any functional group, and have not gained admittance to the Ashráf community, *e.g.*, Piráli and Thákrái. These stand at the top of the Ajláf community.

(2) Darzi, Joláhá, Fakir and Rangrez.

(3) Barhi, Bhathiárá, Chik, Churihár, Dái, Dhawá, Dhuniá, Gaddi, Kalál, Kasái, Kulu, Kunjra, Laheri, Máhifarosh, Malláh, Naliyá, Nikári.

(4) Abdál, Bákho, Bediyá, Bhát, Chamba, Dafáli, Dhobi, Hajjám, Muchi, Nagarchi, Nat, Pánwariá, Madária, Tuntia.

(*c*) *Arzál* or degraded class—

Bhánr, Halálkhor, Hijra, Kasbi, Lálbegi, Mángtá, Mehtar.

## NEPALESE CASTES AND TRIBES.

884. Before dealing with the tribes and castes of Nepal, it is advisable to give a brief outline of the history of the country. Until the close of the 10th century the kingdom of Nepal was confined practically to the Valley of Nepal Proper. It was bounded on the east by the Dud Kosi river, beyond which lay the independent country of the Kirátas or Kiránti. Its western limit was the Trisulganga which divided it from the territory of Gorkha. Its inhabitants were known as Newárs, a mixed race formed by a fusion of Mongolian and Aryan blood, who were divided into various castes. The ancient traditions mention a conquest of the country by a Kiránti chief, named Yellang or Yalambara, but the majority of the kings were Rájputs. In 1322 A.D. Hari Singha Deva, Rájá of Mithila or North Bihar, having been driven from his dominions by the Muhammadans, took refuge in Nepal and ultimately wrested it from a Rájput dynasty, whose family name was Varma, which is said to have ruled without interruption for forty-five generations or 2,000 years. Hari Singh's descendants continued in power until 1769,* when the Gorkha king, Prithi Náráyan, conquered and annexed the country. Prithi Náráyan claimed descent from the Rájput princes of Udaipur, one of whom fled at the time of the Muhammadan invasion in the 12th century and occupied Palpa or the submontane country north of the modern district of Gorakhpur, whence he gradually obtained possession of the kingdom of Gorkha or the north-eastern portion of the basin of the Gandak between the Marsiangdi and the Trisulganga rivers. After annexing Nepal, Prithi Náráyan crossed the Dud Kosi and conquered the country of the Kirántis, thus extending the frontier of Nepal to the Mechi river which formed the western boundary of Sikkim.

OUTLINE OF HISTORY OF NEPAL.

885. It will appear from the foregoing sketch that the terms Nepali, Gorkha and Kiránti, which are often used with the object of denoting caste, are merely terms indicating locality. Nepali means an inhabitant of Nepal, and a person so described may belong to any one of the numerous castes and tribes of that country. In its strict sense Gorkha means an inhabitant of the province of that name, but as the present ruling family comes from it, the term has acquired a wider meaning. Amongst Europeans it is usually applied to the classes from which our Nepalese regiments are recruited, such as Khas, Gurung, and Mangar. Kiránti, which in early Sanskrit literature was a term applied to any border tribe, means an inhabitant of the country between the Dud Kosi river and the Singilela range, *i.e.*, to the Khambu, Limbu and Yákhá tribes. The name of the drug Chiretta is said to be a corruption of Kiráta, and the goddess Umá is often called Kiráti.

MEANING OF NEPALI, GORKHA, KIRÁNTI.

886. Newár is the name of a nationality rather than of a caste, and the term simply means a member of the community that inhabited Nepal proper prior to the Gorkha conquest in 1768, just as Bengali means an inhabitant of Bengal.†

NEWÁR.

The Newárs are divided into Hindus and Buddhists, known respectively as *Sivamárgi* and *Bauddhamárgi*, the proportion of Hindus being from one-third to one-half of the total. Occasionally Hindu Newárs become Buddhists and *vice versâ*, but on the whole the tendency is for the Hindu section to increase at the expense of the Buddhistic. Converts to Buddhism from the ranks of other tribes are rare. The Gurungs who still profess that religion have no connection with their Newár co-religionists, and their priests are Tibetan Lámas. The Buddhist Newárs come but little to British territory. They find a more profitable field for their energies in Tibet, and as they have no religious scruples about eating with the Tibetans, there are not the same obstacles to residence in that country that prevent Hindus from travelling there. I am told that some of the wealthiest merchants in Lhásá belong to this community.

---

* In 1568 the kingdom had been divided into four parts—Bhátgaon, from the Bághmáti to the Kosi; Banepá, east of the Nepal Valley as far as the Dud Kosi; Káthmandu, between the Bághmáti and the Trisulganga, and Patan south of Káthmandu.

† As noted elsewhere Nepal and Newár are really the same word.

887. Owing to the absence of intelligent men amongst the few Buddhist Newárs who have settled in British territory and to the ignorance of all the affairs of this branch of their community which is professed by Hindu Newárs, it is very difficult to get reliable information regarding them. It appears, however, that they are subject to a modified caste system.* Their three primary divisions of caste are :—

BUDDHISTIC NEWÁRS.

(1) Bánhra or priests, corresponding to Bráhmans. These are, or ought to be, clean shaven.

(2) Udás, comprising the mercantile and trading community and corresponding to Vaisya. These are clean shaven except for the top knot. They are orthodox Buddhists.

(3) All others, including Jápus or agriculturists, and all lower classes who are engaged in domestic service and the inferior handicrafts. These have mixed Hinduism with their old religion and are far from being pure Buddhists.

888. The Bánhras inhabit the monasteries and are the descendants of monks who, while abandoning the rule of celibacy, still continued to reside in the Viháras or monasteries provided for them. Originally the Bánhras were divided into four orders —(*a*) Arhan, (*b*) Bhikshu, (*c*) Śráwaka, and (*d*) Chailaka. They were all strict ascetics. These divisions are obsolete, and the name of Bhikshu alone survives. According to Oldfield the modern divisions of the Bánhras are nine in number. The highest is Gubháju (from Gurubháju). These are priests by traditional occupation, but many follow other avocations. Those who act as priests are called Vajra Achárya or teachers of the mysteries of the Vajra. Every Gubháju is initiated into the duties of a Vajra Achárya before he attains manhood, failing which he sinks to the rank of Bhikshu. After initiation he is free to follow any occupation he chooses. The Bhikshus are goldsmiths, but at certain religious ceremonies they perform the inferior duties which are beneath the dignity of the Vajra Achárya, such as washing, clothing and carrying the image, and superintending the minor details of the ceremony. The only outsiders who can now become Gubhájus are Bráhman lads adopted by members of this group and duly initiated in the duties of a Vajra Achárya. The seven other classes of Bánhras follow various handicrafts, but are excluded from the priesthood.† Socially they are on an equality with the Gubhájus and Bhikshus; they eat together and intermarry, and live in the same monastery or Vihár. Owing to this settlement from time immemorial in a particular Vihár, a secondary division into fraternities or corporations has sprung up, and the inhabitants of each Vihár have their own organisation and rules.

BÁNHRA.

889. The second main division, or Udás, consists of seven classes, but all can eat together and intermarry.‡ The bulk of the trade is in their hands. A Bánhra may become an Udás, but an Udás can never become a Bánhra. An Udás will take food from a Bánhra, but a Bánhra will not do so from an Udás. The Udás are orthodox, and the only priest whom they employ is the Buddhist Vajra Achárya.

UDÁS.

* Pandit Hara Prasád Sástri derives Bánhra from 'Pandit' which is known to be the original form of the Bráhman title Pánré and also of Pándá, the name for a pilgrim conductor. Most of what follows regarding the Buddhist Newárs is taken from Oldfield's Sketches from Nepal.

† These classes, says Oldfield, include (1) *Barrhaju*, (2) *Bikhu*, (3) *Nebhar*, all of whom, like the Bhikshus, are gold and silversmiths ; (4) *Nebharbharki*, workers in brass and iron ; (5) *Tankarmi*, makers of cannon and guns ; (6) *Gangsabharki*, and (7) *Chiwarbharki*, carpenters. I am unable to confirm the above classification from the enquiries I have been able to make, but this may be due largely to the fact that since the Gorkha conquest, caste distinctions are dying out amongst the Newárs. The Gorkhas treat them all as Newárs and do not regard minor caste distinctions. I discussed Oldfield's account of the Buddhist Newárs with a Gubháju of Khátmandu who contradicted it on many points. According to him the Bhikshuk is the highest of all. He is celibate and a recluse. If a Bhikshuk breaks his vows and has a family, his children are called Bikhu and take the rank assigned by Oldfield to Bhikshu. Bánhrá says my informant, comes from Bándya and Barrhaju or Bandeju is simply a synonym for Bánnra and not, as Oldfield would have it, a separate caste. Moreover, Nebharbharki, Tankarmi, Gangsabharki, Chiwarbharki are all terms indicating professions, which may be followed by any caste and not only by Banhrás.

‡ The seven classes are (1) *Udás*, strictly so-called. They are merchants and trade chiefly in Tibet ; (2) *Kansar*, workers in alloys ; (3) *Lohakarmi*, masons ; (4) *Sikarmi*, carpenters ; (5) *Tamautá*, workers in brass, copper and zinc ; (6) *Awa*, tile-makers, and (7) *Márikarmi*, bakers. *Urái* is a Newári synonym for Udás. According to my informant these terms merely indicate profession, and the *Awas* are usually *Jápus*.

890. The third or lowest class is the most numerous. They are not strict Buddhists. They avowedly combine the worship of Siva and other Hindu gods with that of Buddha and attend services in Hindu temples. At marriages and other ceremonies they employ a Bráhman priest as well as their own Buddhist Vajra Acháryа. There are 30 different classes with special hereditary callings. Six form a special division, Jápu, whose main occupation is agriculture.* These are at the head of this class, and they constitute at least half of the entire Buddhist population. The remaining 24 castes have various occupations.† The caste called Sálmi or Sawmi, whose traditional occupation is oil-pressing, is now the wealthiest in the whole Newár community, and its members trade as merchants like the Udás. These castes intermarry to a very limited extent.

Jápu.

From all the above a Hindu may take water without losing caste.

891. There is a fourth class comprising eight castes who follow menial and degrading occupations, and who are looked on as impure both by Hindus and by Buddhists.‡ These, however, are just as exclusive among themselves as the pure castes. According to Oldfield all caste questions amongst the Newárs, Buddhistic as well as Hindu, are decided by the Bráhmans.§ Questions of religion are settled by a convocation of Bánhras, and matters connected with social practices by the *gatti* or panchávat. The Buddhist Newárs burn and do not bury their dead.

Unclean castes.

892. As already stated, the Hindu Newárs form an entirely distinct community and have no dealings with those who are Buddhists. I am indebted to Mr. Earle for the following list of Hindu Newár castes.‖ They are arranged in the order of social precedence. Their relative rank was fixed by the Newár kings who themselves decided all caste questions of this sort. It will be noticed that some of the castes named have already been enumerated in the list of Buddhist castes. This is because some of their members are Buddhists and some are Hindus :—

Hindu Newárs.

A.—High Castes.

1. Devabhája, Bráhman and spiritual teacher.
2. Suryabansi Mull, Royal family of Newárs.
3. Srestha, Ministers and other officials.
4. Karmáchárya, officiating priest.
5. Joshi, astrologer.
6. Jápu, cultivator. Newár synonyms are Bali and Doka-kawmi.
7. Tiniáchá, officiating priest at death ceremonies.

B.—Intermediate Castes.

8. Áwá, mason.
9. Kawmi, carpenter and sweet-meat maker. Si-kawmi is the Newár name of the carpenters' occupation, while Lohár-kawmi is that of the workers in iron. These terms are not used to indicate the caste, which is Kawmi. Chunára is the Khas name of a carpenter.
10. Cheátá, burner of bodies of high caste people.

* These six classes are (1) *Mu*, cultivators of an aromatic herb; (2) *Dangha*, land measurers; (3) *Kumhá*, potters; (4) *Káhábhuja*, cultivators and musicians at funerals; (5) *Jápu* or *Kisiai*, cultivators; (6) *Boni*, cultivators. They are all closely connected with the land. The Jápus, who are the most numerous class, have given their name to the whole group.

† (1) *Chitrakár*, painters; (2) *Bhát*, dyers of red colour to all cloth except linen; (3) *Chippa*, dyers of blue colour to all materials; (4) *Kawa* or *Nekarmi*, blacksmiths; (5) *Nau*, barbers and surgeons; (6) *Sálmi*, oil-pressers; (7) *Tippa*, vegetable-growers; (8) *Pulpul*, torch-bearers at funerals; (9) *Kausa*, inoculators for small-pox; (10) *Konar*, spinning-wheel makers; (11) *Gathá*, gardeners; (12) *Kathá*, Navel-cord cutters; (13) *Táti*, weavers of shrouds; (14) *Balhaiji*, makers of wheels for sacred car; (15) *Yungwar*, makers of sacred car; (16) *Ballah* and (17) *Lamu*, pálki-bearers for persons of high rank; (18) *Dalli*, sepoys; (19) *Pái*, basket-makers; (20) *Góowa*; (21) *Nanda Góowa*, cowherds; (22) *Ballahari*, wood-cutters; (23) *Gaukau*, drag the sacred car; (24) *Nalli*, paint the eyes of the idol of Bhairab. The Gubháju with whom I discussed the subject declared that the groups numbered (2), (4), (5), (12), (13) are *Sivamárgi*; he had never heard of groups (7), (8), (16), (17), (18), (20) and (21), and he said that (10) and (14) are the same as *Sikarmi*.

‡ (1) *Nai* or *Kasai*, butchers; (2) *Jugi*, musicians at festivals; (3) *Dánta*, ditto, (4) *Dhávi*, charcoal-burners; (5) *Kalu*, leather-workers; (6) *Pariya*, fishermen and executioners; (7) *Chamákhalá*, sweepers, and (8) *Sanghar*, washermen. My informant says that these are now all *Sivamárgi*.

§ This requires further enquiry. The Gubháju whom I consulted denies that the Bráhmans have anything to do with Buddhist Newárs.

‖ I have omitted from the list several Buddhist castes which Mr. Earle had included, as these have been separately dealt with, and I am informed that it is impossible to arrange Buddhists and Hindus in the same precedence list.

11. Chhipi, dyer of cloth.
12. Kumhá, potter. Kumhál is the Khas name.
13. Chalan, musicians who attend when dead bodies are taken to be buried.
14. Khusál, small-pox inoculator. A Newár synonym is Sawá.
15. Duitá, collector and seller of wood and fuel.
16. Gathá, gardener.
17. Támautá, metal utensil maker. A Newár synonym is Dhusi.
18. Káu, blacksmith.
19. Náu, barber.
20. Bhát, religious caste, receivers of gift at funerals.
21. Táti, weavers of winding sheets.
22. Kathá, cut the cord at birth.

### C.—Low Castes.

23. Pási, washerman. A Newár synonym is Sangat.
24. Nái, butcher. The Khas name for this caste is Kasái.
25. Jugi, tailor and musician. Kusulliah and Suchikár are Khas names for this caste.
26. Dáutá, musicians. Newár synonyms are Dung, Duni and Dong.
27. Po, Sweepers and burners of dead bodies, not night-soil removers. Also executioners and workers in bamboo. Pore and Porya are the Khas names for this caste.
28 Chamá Khalá, mehtar, *i.e.*, remover of night-soil.
29. Kulu, drum-maker and currier.

Newár sub-castes.

893. Most of the above castes are divided into various subdivisions. The Sreshtas, for example, have the following among other groups:—Maiké, Bhanil, Achár, Palu, Banja, Biju, Tájábhári, Kuseta, Lailatá, Chhátar, Pukwán, Gangatá, Máhájutá, Kuché, Thaku Khulé, Khasa. I have been unable to get full information regarding these subdivisions but am informed that they constitute no bar on marriage. This, however, may be owing to the fact that many of the Newárs who have settled in British territory have forgotten the caste distinctions in force in Nepal and have intermarried, not only with other sub-castes, but also with other castes, and even with other tribes. They have thus lost caste in their own country, and would not be re-admitted to their original community if they returned to Nepal.*

Newár castes returned at census.

894. Special pains were taken in Darjeeling to have all the Newárs entered according to their proper castes instead of under the general term Newár. The details thus obtained are given in the margin. The great excess of Hindus amongst the Darjeeling Newárs is due mainly to the fact, already adverted to, that the Buddhist Newárs who leave their own country find Tibet a more profitable field for their enterprise, and partly to the superior strength of Hindu influences. Cut off from his home ties and associations, the Buddhist Newár soon adopts the religious belief of his neighbours, and, in the absence of his own Vajra Achárya, is fain to accept the ministrations of the Bráhmans and to enroll himself, nominally at least, in the ranks of Hinduism. The returns show that several members even of the orthodox Buddhist castes, Bánhra and Udás, returned themselves as Hindus. The figures showing the number of each caste are not to be relied upon as indicating the relative strength of the

* This is doubtless a modern illustration of the reason for caste differentiation in early times when the Hindus who settled in Bengal were cut off from communion with their caste-fellows in Upper India.

different castes in Nepal, partly because the extent to which the castes come to the British territory is not uniform, and partly on account of the great laxity which prevails amongst the emigrants. As noted above, they intermarry freely with other communities and they are probably equally free in claiming to belong to castes of good social standing. It seems very improbable that the Sreshtas in Darjeeling should really outnumber the Jápus, a far more numerous caste in Nepal, very nearly in the ratio of 100 to 1. One of the Darjeeling census officers informed me that when inspecting schedules he often found that Chhipis and other low caste Newárs had returned themselves as Sreshtas.

In concluding this notice of the Newárs, the following extract is quoted from Wright's History of Nepal:—

The marriage-tie is by no means so binding among the Newárs as among the Gorkhas. Every Newár girl, while a child, is married to a *bel*-fruit, which after the ceremony is thrown into some sacred river. When she arrives at puberty, a husband is selected for her, but should the marriage prove unpleasant, she can divorce herself by the simple process of placing a betel-nut under her husband's pillow and walking off. Of late years, however, this license has been somewhat restricted, and a divorce cannot now be effected in so simple a manner. Widows are allowed to remarry. In fact, a Newárin is never a widow, as the *bel*-fruit to which she was first married is presumed to be always in existence. Adultery is but lightly punished among the Newárs. The woman is divorced, and her partner in guilt has to make good the money expended by the husband on the marriage, or, failing this, he is imprisoned.

The Newárs burn their dead, and widows may, if they please, immolate themselves as *satis*, but it is very seldom that they avail themselves of this privilege.

Khas, Mangar and Gurung.

895. The Khas, Mangar and Gurung are the three dominant tribes of Nepal (known as Mukhia) who overthrew the Newár dynasty in 1769. The Mangars and Gurungs are described in the Tribes and Castes of Bengal. Both tribes are of a well marked Mongoloid type, and speak their own non-Aryan dialects. The Khas, on the other hand, have received a considerable admixture of Aryan blood; they speak an Aryan language, and in all respects have come to a much greater extent under Hindu influences. To show how this came about, I cannot do better than quote the following extract from Hodgson's Essay on the Origin and Classification of the Military Tribes of Nepal*:—

From the twelfth century downwards, the tide of Musalman conquest and bigotry continued to sweep multitudes of the Bráhmans of the plains from Hindustan into the proximate hills, which now compose the western territories of the kingdom of Nepál. There the Bráhmans soon located themselves. They found the natives illiterate, and without faith, but fierce and proud.

Their object was to make them converts to Hinduism, and so to confirm the fleeting influence derived from their learning and politeness. They saw that the barbarians had vacant minds, ready to receive their doctrines, but spirits not apt to stoop to degradation, and they acted accordingly. To the earliest and most distinguished of their converts they communicated, in defiance of the creed they taught, the lofty rank and honours of the Kshatriya order. But the Bráhmans had sensual passions to gratify, as well as ambition. They found the native females—even the most distinguished—nothing loath, but still of a temper, like that of the males, prompt to repel indignities. These females would indeed welcome the polished Bráhmans to their embraces, but their offspring must not be stigmatised as the infamous progeny of a Bráhman and a Mlechha—must, on the contrary, be raised to eminence in the new order of things proposed to be introduced by their fathers. To this progeny also, then, the Bráhmans, in still greater defiance of their creed, communicated the rank of the second order of Hinduism; and from these two roots, mainly, sprung the now numerous, predominant, and extensively ramified, tribe of the *Khas*—originally the name of a small clan of creedless barbarians, now the proud title of the Kshatriya, or military order of the Kingdom of Nepal. The offspring of original Khas females and of Bráhmans, with the honours and rank of the second order of Hinduism, got the patronymic titles of the first order, and hence the key to the anomalous nomenclature of so many stirpes of the military tribes of Nepal is to be sought in the nomenclature of the sacred order. It may be added, as remarkably illustrative of the lofty spirit of the *Parbattias*, that in spite of the yearly increasing sway of Hinduism in Nepal, and of the various attempts of the Bráhmans in high office to procure the abolition of a custom so radically opposed to the creed both parties now profess, the Khas still insist that the fruit of commerce (marriage is out of the question) between their females and males of the sacred order shall be ranked as Kshatriyas, wear the thread, and assume the patronymic title.

* J. A. S. B. 1833, page 217. The Gurungs are divided into two endogamous sub-castes Chárjât and Solahjât.

The Khasas are one of the tribes mentioned by Manu as having become outcastes from the extinction of sacred rites and from having no intercourse with Bráhmans. From a very early period they were recognised as an important tribe in Upper India. According to Atkinson the tribe originally came from Central Asia and has left its name in Kashgar, Kashmir and Hindu-Kush. The Khasiyas of Kumaon are said to be of the same race.*

Allied to the Khas are the Ekthária and Thakuri. These are the descendants, more or less pure, of the original Rájput refugees, and the only difference between them is due to the circumstance that the ancestors of the Thakuris at one time or another were rulers of one or other of the numerous petty States that were once scattered throughout Nepal.† The Thakuris, whose title is Bábu, are divided into two sub-castes, Sáhi and Hamál, of which the former is the higher. They do not assume the sacred thread until they marry. Prior to that date they have no caste restrictions and can eat anything, and in any company, except that of degraded castes. Ráná, Thápá, and Burhathoki are clan names common to Khas and Mangar. The Mangar have taken to the use of high-sounding titles such as Surajbansi and Chandrabansi, but these are purely fictitious. So also is the word Chettri which the Khas are beginning to assume as a caste name.

KHAMBU, LIMBU AND YÁKHÁ.

896. The Khambu, Limbu or Yákthumbá, Jimdár or Rai, and Yákhá tribes form the group generally known as Kiránti, and the Kiránti country is said to be the tract lying between the Dud Kosi river and the Singilela range. This extended use of the word is, however, objected to by the Jimdárs and Yákhás who inhabit the country between the Dud Kosi and Támbor rivers and claim that this tract alone is properly called Kiránt desh. These two tribes intermarry. The Khambus and Limbus are found in the country east of the Támbor.

The Khambus inhabit the southern spurs of the Himalayas, and their country is known as Solah Khambu, probably in connotation of the fact that there are sixteen sub-tribes, each with its own peculiar dialect. In British territory the Khambus claim to be Jimdárs and assume the Kiránti title Rái, but in Nepal their pretensions are ridiculed and they are excluded from all social intercourse with the Kirántis proper. They have much intermixed with the trans-Himalayan tribe known as Khámbá Bhotia; they eat beef—an abomination in the eyes of the real Kirántis, and their religion is partly Lámáist Buddhism and partly Hinduism. In the eyes of the more orthodox Hindus of Nepal, the Khambus and Gurungs stand on much the same footing, so far as ceremonial purity is concerned. In Table XIII, I have followed the general view prevailing in Darjeeling and have treated Khambu and Jimdár as synonymous terms; if I had kept them separate, the details would have been of little value, owing to the fact that Khambus here usually call themselves Jimdár.

South of the Khambus are the Limbus, who adjoin the Ráis on the west and the Lepchas on the east. Some of the Limbus eat beef and have intermarried with Lepchas, and these are looked down upon by their own people and by the Kirántis. The better class of Limbus, however, abstain from beef and have no dealings with the Lepchas; these are admitted to social intercourse and nuptial relations with the Kirántis.

The Jimdárs will eat food cooked by Limbus, but not that cooked by Khambus. The taking of water is no test of social rank in Nepal. A man of

* The patronymics of the Khas are borrowed from the Bráhmans rather than the Rájputs. The Khasas are constantly mentioned in the Mahábhárata, the Vishnu Purán and other early writings, and are named in the Ceylon archives as one of the tribes that submitted to Asoka. For a full review of their early history see Atkinson's Gazetteer of the Himalayan Districts of the North-Western Provinces and Oudh, Vol. II, pages 375, *et. seq.* See also Wilford As. Res. VI, page 455. The common derivation of Khas from Khas-nu "to fall," seems purely imaginary.

Amongst the Newárs the offspring of Bráhmans and low caste women other than those of the Kámi and Damái castes are called Khatri and rank with the Sreshta.

† It is curious to note how many Nepalese tribal names have come down from very early times. The Yákhás (Yakshas) were employed by Asoka to build his chaityas. The Kirátas and Kichaks are constantly referred to in the Mahábhárata, and in the Dipavansa the names are given of the Thárus who converted the multitude of Yakkhas in the Himavat. The signification of the words, however, is not the same as it was then. Kiráta, for instance, meant any border tribe, and Khasa seems to have been used to include numerous Himalayan tribes.

any caste, even a Bráhman, will take water from a new earthen pot or from a brass vessel belonging to any one, even a Bhotia.

The Khambus and Limbus have been fully described in the Tribes and Castes of Bengal. The following brief account of the Yákhás is based on information received through the Deputy Commissioner of Darjeeling.

There are numerous exogamous groups, the members of each of which are supposed to be descended from a common ancestor.* A man may not marry in his own group, neither may he marry an aunt or a niece. Outsiders are admitted, only if of higher social rank and on condition that they marry a girl of the tribe and eat from her hand. Marriage may be either infant or adult. Widows may marry again, and the first husband's younger brother has the first claim to his sister-in-law's hand. There is no special ceremony for the marriage of widows. Wives can be divorced for adultery, but they are not outcasted and there is nothing to prevent any one else from marrying them. The religion is said to be of the ordinary Hindu type, but this point requires further inquiry. Bráhmans are employed for religious and ceremonial purposes. The dead are sometimes burnt and sometimes buried in a horizontal position. When burnt the ashes are thrown into the nearest river. Pork and fowls are eaten, but not beef or vermin.

OTHER TRIBES.

897. Mánjhi is not really the name of a tribe; it is a functional designation originally given by the Khas to the Kúswár and Botia tribes, whose traditional occupation is fishing, but is now accepted by the persons concerned as their proper caste name, a striking illustration of the way in which caste sometimes replaces tribe. The Kámis or blacksmiths and goldsmiths, and the Sárkis or cobblers, are now looked upon as castes, but it is possible that they too were once tribal and not functional groups. The Kámis, in spite of their degraded position, have a more Aryan type of face than most of the other castes of Nepal. Their common title, however, is Mijhar which reminds one forcibly of the root *mi*, meaning 'man' in many of the Tibeto-Burman languages of the frontier. The other tribes and castes of Nepal, other than those of the Terai, have been enumerated in paragraph 607.

* The total number given me is 29, viz., Linkhim Háng, Pullu Háng, Máren Háng, Iyok Háng (these four are of royal descent), Lingbu Khim, Koyungbá, Kongreng, Thomphárá, Chángwáren, Sámyáng, Mángkhárok, Hung, Juwá, Chitláng, Hengwá, Kokwá, Tambá, Támli, Pángphu, Lummá, Rogu, Kháyá Chong, Khong Chhá, Ulambáng, Kháyá Khim, Songreng, Yáimbá, Lábyeng. I was unable to ascertain the meaning of any of these words.

## SUBSIDIARY TABLES REFERRED TO IN CHAPTER XI—CASTE.

SUBSIDIARY TABLE No. I.—Absolute and relative strength of each group in the Table of Social Precedence.

SUBSIDIARY TABLE No. II.—Variation in caste, tribe, and race since 1872.

# SUBSIDIARY TABLE I.—Absolute and relative strength of each group in the Tables of Social Precedence.

* ***Baniya.***—Appears to have included Gandhabanik and Subarnabanik in 1881.
***Bhandari.***—Included with Napit in 1881.
***Gandhabanik.***—See "Baniya."
***Gaur.***—Classed with Goala in 1881 and 1891. The persons so shown in Orissa and the Orissa States have been assumed to be Gaur for the purpose of this statement.
***Halwai.***—Not shown separately in 1881. Probably classed with Mayra.
***Jugi.***—Included in Patwa in 1872.
***Kalwar.***—Was not shown in 1872 when it was probably amalgamated with Sunri.
***Subarnabanik.***—See "Baniya."
***Sudra.***—There are none of this caste in Orissa. The 80,753 persons shown there in 1891 refer partly to Sadha and partly to Chasa.
***Sutradhar.***—Not shown in 1881. Probably added to Barhi.

# Chapter XII.

## *OCCUPATIONS.*

## Introductory Remarks.

Reference to Statistics.

898. The statistics regarding occupations will be found in Tables XV and XVI. The former table is divided into four parts, viz:—

A.—General summary, showing the number of persons following each occupation shown in the classified scheme of occupations to be presently referred to, in the Province, as a whole (British Territory only), in the Feudatory States, and in cities.

B.—Details for districts and states for all occupations which form the means of subsistence of more than 1,000 persons in any district.

C.—Distribution of occupations by religion.

D.—Subsidiary occupations followed by persons who are mainly dependent on agriculture.

In Table XVI occupation is combined with caste. Only the more numerous castes are dealt with, and for each of these the actual workers are distributed according to the 24 Orders, or main groups of occupations, shown in the classified scheme. The number of persons following the actual traditional occupation of the caste is shown in notes at the foot of the Table, and an Appendix is added showing the distribution by caste of the persons who follow certain important pursuits.

At the end of this chapter will be found the following Subsidiary Tables, in which the more important features of the statistics are presented in a more readable form than in the voluminous tables above referred to, which occupy 198 closely printed pages or two-thirds of the total space taken up by all the other tables put together:—

*Subsidiary Table I.*—General distribution by occupation.

*Subsidiary Table II.*—Distribution of the Agricultural, Industrial, Commercial and Professional population by natural divisions and districts.

*Subsidiary Table III.*—Selected occupations, 1901 and 1891.

*Subsidiary Table IV.*—Occupations of females by Orders, and certain selected Sub-orders and Groups.

*Subsidiary Table V.*—Occupations combined with Agriculture.

*Subsidiary Table VI.*—Occupations by religion for Sub-orders and selected Groups.

*Subsidiary Table VII.*—Occupations of certain selected castes.

*Subsidiary Table VIII.*—Distribution by Caste or Race of Government officers of certain Departments.

Occupation scheme.

899. The classified scheme of occupations prescribed by the Census Commissioner is a very elaborate one. All occupations are divided into eight main Classes; these classes are subdivided into 24 Orders and 79 Sub-orders, and the sub-orders are further subdivided into 520 Groups. The general features of the scheme differ but very slightly from those of the previous census. An attempt has been made to distinguish makers from sellers, and persons who work in factories from those who work at home, but it is doubtful whether the results obtained are of much value. So far as village occupations are concerned, their most characteristic feature is that the same person both makes and sells. The confectioner, for example, makes his sweets and sells them; the potter retails the earthen vessels which he moulds; the person who makes bangles is the same as the person who sells them, and the fisherman usually himself sells the fish which he catches. The principle which I followed was to class as 'makers' all persons who were entered in the schedules, either as making, or as both making and selling, any article, and to show as 'sellers' only those who were entered merely as selling it, but it is probable that many of the latter were also in reality makers of the

thing sold, and were described merely as sellers owing to the want of accuracy on the part of the enumerators. It was still more difficult to apply in practice the distinction between factories and home industries, easy as it may seem in theory. Special instructions were issued to the enumerators to note clearly whether the persons engaged in each industry worked at home or in factories, but, in spite of this, the entries were often so vague that it was impossible to say which was meant.

VAGUE ENTRIES IN SCHEDULES.

900. The vagueness of the return of occupations was unfortunately by no means confined to cases of the kind noted above, and entries such as *izaradár* (farmer), peon, contractor, *mistri* (artificer), coolie and *chákari* (service) were unfortunately very common. There were numerous other entries which, though not so vague as the above, could still be classed under several different heads of the scheme, such as railway coolie, doctor (unspecified), mendicancy (unspecified), engineer, service in mill, cloth-seller, *krishi majur*, *go-rakshyak*, *kaila-bikroy* (*kaila* means 'charcoal' as well as 'coal'), wood-seller and the like. Many of these were most difficult to deal with, and although a clue was often furnished by the locality where the person was enumerated, or by the caste, sex and other entries on the slip relating to him, it was inevitable that there should be a considerable amount of guessing, and it would be absurd to pretend that in every case the persons concerned were assigned to the right groups in the occupation scheme. All that can be said is that we did the best we could, and that, considering the large numbers dealt with, it may be hoped that the mistakes which occurred to some extent cancelled one another.

There were other entries which, though vague in themselves, could usually be classified aright with reference to the caste column. Thus in Bihar the word *jajmánkar* was frequently shown as the occupation of Bráhmans, Hajjáms, Dhobis, Mehtars, Chamárs and Doms. The term indicates that the person concerned carries on his traditional caste occupation and has the right to be employed by certain persons and to receive from them the customary fees. Consequently all that was necessary was to refer to the caste column in order to find out whether the person concerned was a priest or a barber or a washerman, etc., as the case might be. *Brit* is another term very similar to *jajmánkur*, with this difference, that it connotes a small grant of land held rent-free from the landlord as a consideration for services rendered. *Basti kámaná* or *mahalladári* has a somewhat similar meaning, but this term is applied more specially to the Doms, who remove dead bodies, and their females, who act as midwives. There were again other entries which at first sight seemed quite incomprehensible, but which in the end we were often able to find the meaning of. Some of these weremerely English words in a vernacular dress, such as '*buchar*' (butcher), but others gave much trouble and it was not always that the proper meaning could be traced. *Sárjján sáheber márkáwálá* is an instance of an entry which required a good deal of puzzling over before it was discovered to refer to a marker on a rifle range. So also *rel brikmyán* which proved to stand for 'brakesman' and *nayentri* (no entry) which an officious copyist had noted on a slip for a person whose means of subsistence had not been recorded by the enumerator.

MIXED OCCUPATIONS.

901. But our difficulties did not end here. The occupation scheme deals with a number of special occupations, but it does not, as a rule, provide for cases where, as often happens in practice, the occupations are of a mixed character, and these had to be assigned, more or less arbitrarily, to one or other of several special heads shown in the scheme under each of which they might be classed with almost equal propriety.* A grain-dealer, for example, finds a place in one group of the occupation scheme and a cloth-dealer in another, but nothing is more common than to find a man combining the two occupations. The *máli* or gardener often combines with his traditional occupation the making of flowers from pith and of fireworks. So also, money-lending and cloth-dealing generally go together. The persons employed in the rural police force have usually some other

* The same difficulty exists in England also, and Dr. Longstaff has suggested that it should be met by entering the person under both headings, making the requisite correction when totalling the occupations (Studies in Statistics, page 224). This, however, would involve an amount of elaboration which would not be possible in the time allowed.

employment as well, but in the main occupation table only the principal one is shown. The result is, as will be seen in paragraph 907, that the number of persons, returned as village watchmen at the census, is far smaller than the number actually employed, as shown in the police returns. There are also certain recognised shops which have no corresponding equivalent in English and which are not provided for in the occupation scheme. Of these, the most important in this Province is that known as a *manohári dokán*. In 1891 the keepers of such shops appear to have been treated as stationers; but although stationery is sold, this is by no means the only, or indeed the most important, class of goods dealt in. Amongst other articles may be mentioned clocks, chairs, glass, glass bangles, looking-glasses, enamelled plates, toys, biscuits, caps, buttons, stockings, handkerchiefs, shoes, brushes, woollen goods, tobacco, soap, perfumery, tin boxes, walking-sticks, and *hukkás*. This sort of shop is so common that I opened a special head for it and *parchun dokán*, its Bihar equivalent. Another well-known class of shop in Bengal Proper is that known as *tel labaner dokán* (salt and oil shop). In these shops, in addition to salt and oil, rice, pulse, and treacle are often sold. The shop does not exactly correspond to a grocer's, but the resemblance is sufficiently close, and I accordingly classed the people who own such shops as grocers. I also treated as grocers the keepers of the shops known in Bihar as *pansári dokán*, where salt, pepper, turmeric, spices, dyes, tea, and medicines are exposed for sale, and the *khichari farosh*, or vendor of rice, *dál*, fuel, oil, salt, tobacco, and molasses.

Not only was there much uncertainty in assigning to a particular group persons returned as living by these mixed occupations not provided for in the scheme, but it was often clear that the occupation named by the enumerator was only one of several actually followed. Thus a Dom is a scavenger and a drummer as well as a basket-maker, and his wife is a midwife, but he would usually be entered under only one of these heads. Many persons who deal in various kinds of goods and also lend money were often returned either as money-lenders or as dealers in some special article. Moreover, the census refers to a man's occupation on a particular day. There are separate heads in the occupation scheme for agricultural labourers, *pálki*-bearers, earth-workers, porters, tank-diggers, paddy-huskers, road and railway labourers, etc. The same man may, and often does, at different seasons, follow all these forms of employment in turn, but only one of them will find a place in the census returns.

OCCUPATIONS NOT SHOWN IN SCHEME.

902. We had to classify as best we could the various occupations returned which were not covered by any of the entries in the occupation scheme, such as umbrella-repairers, torch-bearers in marriage processions, vendors of Fuller's earth, castrators of animals, makers of wooden sandals, catchers and sellers of snakes, collectors and sellers of the water-weed used for refining sugar, cleaners, sellers of oil-cake and of *pálkholá* (earth-cakes eaten by pregnant women), electrical engineers and workmen, sycophants,* devil-drivers, mica miners, *gáriwálás'* touts,† etc. In a few cases, where the occupation was important, or the number of persons returned was considerable, a new group was opened, but, as a rule, the items were classed under the most appropriate head available in the prescribed scheme.‡ The makers of wooden sandals, for example, were treated as carpenters.

METHOD OF CLASSIFYING OCCUPATIONS.

903. It will thus appear that, in spite of the elaborate nature of the classified scheme of occupations, there was ample scope for differences of opinion; and if the head of each census office had been left to deal finally with

* The *musáhib*, or sycophant, is a hanger-on of wealthy zamindars, whose business it is to flatter his patron and laud his various good qualities.

† The gáriwálá's tout, or *dalálgári*, is the boy who frequents railway stations and tries to get people to go in particular hackney carriages, for which, if not rewarded by the traveller, he receives a small commission from the driver.

‡ When the occupation scheme for the next census is issued, it would be advisable to give a complete list in the vernacular of all the occupations actually found in the schedules on the present occasion, and not merely of the items specially provided for in the scheme, with the number of the heading under which each should be grouped. This should be done by the Provincial Superintendents, each for his own Province; and to allow of its timely preparation, the general scheme should be prescribed at least six months before the census is taken.

the various questions that came up regarding the classification of the entries found in the schedules, there might have been marked variations in the procedure followed in different parts of the Province. In order to preserve uniformity as far as possible, I passed orders myself on every doubtful point. The Deputy Superintendents submitted for my decision all cases which were not absolutely clear, and their references, with my replies, were circulated to all the offices in a series of 'Questions and Answers.'* In addition to this, alphabetical lists of the actual entries found in the schedules were prepared in each census office and submitted for my inspection, with the number of the group selected for each occupation noted against it. After I had passed these lists, they were lithographed or printed, and circulated to other offices in the same language for information. From time to time, as fresh occupations came to light, supplementary lists were prepared and submitted to me, after which they were incorporated in the original index of the office concerned. These indices have been carefully preserved, and should be of great use at the next census.†

ERRORS IN COMPILATION.

904. But in spite of all the care taken to ensure accuracy and uniformity, there was still a loop-hole for serious mistakes. I myself decided on the number of the group to be given to each occupation, but the practical application of the orders was necessarily left to subordinates, who examined the sorters' tickets and marked against each occupation the number of the group shown against it in the index. Items bearing the same group-number were then added together, and the entries in each ticket were added up to obtain the district total. The possibilities of error were threefold. In the first place, the sorter might neglect the rule requiring each occupation to be entered on his ticket exactly as it was found in the schedules, and add together items which, though apparently very similar, yet belonged to different groups in the scheme. Secondly, the men who affixed the group-numbers might rely on their memory and so make mistakes, and, thirdly, the process of compiling such a vast array of separate items was a very elaborate one, and there was a great danger of mispostings Thanks to the slip system, it is believed that the errors due to these causes were fewer than ever before. In spite of the fact that 520 distinct occupations were shown in the classified scheme, the great bulk of the population was returned under a few simple heads, and it was arranged that these should be dealt with first. The ordinary sorters were given a list of the more common occupations and told to sort only those slips the occupations shown on which belonged to one or other of these heads, and to place all other slips in a separate heap. In this way more than four-fifths of the total population were finally dealt with. For the sorting of the remaining slips, selected men were employed on better pay under specially-chosen supervisors. The attention of the Deputy Superintendents was concentrated mainly on this part of the work, and it was checked as carefully as possible. The male and female slips were sorted separately, and a comparison of the results for each afforded a valuable means of detecting mistakes. When the district totals had been prepared, they were sent with the sorters' tickets and tabulation registers to my office, where the figures were again examined in as much detail as was possible in the time available. In addition to the check in my office, I examined the entries myself with special reference to the corresponding details for 1891, and where marked discrepancies were noticed, or where the results for any reason seemed improbable, the figures on which

* The classification in respect of the districts dealt with in the Bhagalpur Census office was not always in accordance with the general standard. Instances came to my notice when passing the tables for compilation, where occupations had been classified without reference to me, and it was not always possible at that stage to remove the consequent differences in procedure.

† This system of centralising the classification was found in some cases to present difficulties due to the varying meaning of the same word in different parts of the Province. Thus *bepári* was found to mean in one place a general merchant, in another an itinerant dealer in grain, and in a third, a shopkeeper of any kind. *Mahájan* usually means a money-lender, but it is occasionally used with special reference to people who advance money for the purchase of grain, and who should therefore be more correctly classed as grain-dealers. The word *tejárati* has a similar dual meaning. An *áratdar* is usually a warehouseman, who charges a commission for the storage of goods, but sometimes he himself is the dealer. *Pujári* generally means a priest, but when used with reference to Oriyá Bráhmans, it means a cook.

As a check on errors in classification due to these local differences in meaning, the Deputy Superintendents were asked to bring to my notice all cases where the classification sanctioned by me appeared to them to be open to question.

they were based were traced back to the tickets.* In this way many mistakes were removed, but although everything possible was done to ensure accuracy, it is impossible to be confident that the tables are absolutely free from mistakes.† All that can be asserted is that, so far as errors in tabulating the results are concerned, they are probably far fewer than they must have been under the system of compilation in vogue before the present census; that they are confined to the smaller items, and that, so far as the main heads which were separately dealt with are concerned, there has been no appreciable inaccuracy. Some allowance must, however, be made for errors due to the vagueness of many of the original entries in the schedules, the incompleteness of many other entries, and the necessity of assigning mixed occupations, covering several distinct groups in the scheme, to one group in particular.

PROPOSED SIMPLIFICATION OF CLASSIFICATION IN FUTURE.

905. This brings me to a point on which it is necessary to lay special stress, *viz.*, the desirability of greatly simplifying the scheme of classification at future censuses. In his General Report on the Census of India in 1891, (page 87) Mr. Baines wrote:

> It may be gathered from these remarks that a high value is not attached to the results of the census of occupation. This is true, and the opinion is not confined to those who have had the administration of the operation in India alone. In some of the countries in Europe the subject is excluded altogether from the enumeration, and in one at least, which need not be named, much forethought and many elaborate instructions were rewarded by results which the census authorities thought it advisable not to mislead the public, by including with the rest. In Germany, as well as in the United States, it has been decided that a comprehensive industrial survey, obtained by dint of detailed enquiry, spread over a considerable time, is preferable to the rough and ready return which is all that it falls within the capacity of a synchronous census to furnish.

Similarly, in the report on the Census of England and Wales in 1891 (page 35) it is said that:—

> A census . . . does not supply data which are suitable for minute classification or admit of profitable examination in detail. The most that it is reasonable to expect from data so collected is that they shall give the means of drawing such a picture of the occupational distribution of the people as shall be fairly true in its main lines, though little value can be attached to the detailed features. It is not wise to demand from a material a result for the production of which it is unsuited.

In a paper read before the Royal Statistical Society‡ Mr. Baines repeated the opinion that detailed information as to the industrial organisation of a country cannot be obtained by the machinery of the general census, and in the discussion which followed the reading of this paper, Sir Robert Giffen expressed agreement with Mr. Baines as to the undesirability of attempting to do much regarding occupations in an ordinary census and admitted that, if an elaborate enquiry were desired, it could only be carried out by a separate proceeding, quite outside the census and conducted by a different staff.

If such is the case in Europe it seems obvious that in India a detailed classification of occupations is even less likely to furnish satisfactory results, while it tends to obscure the main facts which a less elaborate method would bring out. At the same time it adds enormously to the expense of the undertaking, and it would certainly be no exaggeration to say that from one-third to a quarter of the entire expenditure on the census operations was incurred on the compilation of the occupation tables. An analysis of the figures shows that about six-sevenths of the total population (British Territory only) has been classed under one or other of 16 groups as noted in the margin. The number

| Group. | | Number of persons. |
|---|---|---|
| 27. | Herdsmen ... ... ... ... | 590,517 |
| 36. | Rent receivers ... ... ... ... | 1,476,411 |
| 37. | Rent payers ... ... ... ... | 40,168,469 |
| 38. | Farm servants ... ... ... ... | 401,073 |
| 39. | Field labourers ... ... ... ... | 4,340,688 |
| 60. | Barbers ... ... ... ... ... | 449,523 |
| 64. | Indoor servants ... ... ... | 499,593 |
| 78. | Cow and buffalo keepers ... ... | 418,602 |
| 79. | Fishermen and fishcurers ... ... | 549,641 |
| 80. | Fish dealers ... ... ... ... | 673,614 |
| 102. | Rice pounders and huskers ... ... | 422,346 |
| 124. | Grocers, etc., ... ... ... ... | 484,106 |
| 272. | Cotton weavers ... ... ... ... | 991,982 |
| 444. | Priests ... ... ... ... ... | 456,229 |
| 504. | General Labour ... ... ... ... | 5,346,843 |
| 513. | Mendicancy ... ... ... ... | 479,087 |
| | Total ... | 63,649,753 |

* In some cases re-sorting was ordered, but it was impossible at this stage to have recourse to this checking on a very extended scale.

† One such mistake came to notice in connection with an enquiry made by Mr. L. P. Shirres, I.C.S. In Table XV, 147 persons had been shown as working in Match Factories, but it was found that they belonged properly to another group, *viz.*, "Match, candle, torch, lamp, lantern-makers and sellers, etc."

‡ Journal of the Royal Statistical Society, Volume LXIII, Part I.

of these groups would be still smaller, and the population contained in them would be even greater, if we added together items which are not really distinct. For example fishermen and fish-dealers cannot properly be treated as distinct occupations* and it would be better to amalgamate them, and also boat and barge men, under which head 247,255 persons have been shown. Similarly it is inadvisable to attempt to distinguish between the different classes of landless labourers. It was found in practice very difficult to say whether any particular entry referred to a farm servant or field labourer, and it has already been stated that the same person may be, and often is, at different times a farm labourer, a rice pounder, a *pálki*-bearer, an earth-worker, etc. Moreover many, who were returned simply as 'coolie' and so had to be relegated to the category of 'general labourers,' were doubtless, at the time of the enumeration, working in the fields, or on some kind of earth-work or the like, for which a special head is provided in the scheme, and the figures recorded against these special heads are, therefore, incorrect. It would be better to show all classes of landless labourers together, in which case this group alone would account for about 11 millions of the total population. It seems to me that if the occupation scheme were limited to about 30 heads (which might be printed on the sorters' tickets) we should obtain, at a tithe of the cost, a far more accurate distribution of the population according to the main heads of occupation, and this is all which can reasonably be expected from a synchronous census. It has already been shown that accurate detailed statistics are not to be expected, and if they are required for any particular occupation, the information should be sought elsewhere,† or made the subject of a separate enquiry on different lines.

| Group. | | Number of persons. |
|---|---|---|
| 38. | Farm servants ... ... ... ... | 401,073 |
| 39. | Field labourers ... ... ... ... | 4,340,688 |
| 102. | Rice-pounders ... ... ... ... | 422,346 |
| 420. | Palki-bearers ... ... ... ... | 184,151 |
| 441. | Porters ... ... ... ... | 46,069 |
| 74. | (Sub-order) earth-work ... ... | 210,363 |
| 804. | General labour ... ... ... ... | 5,346,843 |
| | Total ... | 10,951,526 |

## Comparison with 1891.

General Remarks.

906. In previous chapters the statistics have been treated, first from the statical, and then from the dynamical point of view, *i.e.*, the results of the present census have in the first instance been examined by themselves, and the changes which have taken place since previous enumerations have been dealt with afterwards. In the present chapter the procedure will be reversed, partly because the discussion of the comparative results will lend support to the plea set up for a simplification of the occupation scheme, and partly because it will throw light on the system of classification adopted, which it is desirable should be clearly understood before any conclusions are drawn from the figures for the present census.

The classification of occupations previous to the last census was based on such a different system that it is quite impossible to institute any comparison of the results, and although the general scheme at the present census follows that of 1891 closely in most respects, there have been several important alterations, both in the scheme and in the method of classification adopted, which make it impossible to draw many definite conclusions from the variations disclosed by the figures. This should be borne in mind when comparing the number of persons shown against each group at the two censuses in Subsidiary Table No. III. The following notes on the comparative statistics will show that the differences disclosed by such a comparison are due to artificial causes almost as frequently as to genuine changes in the actual conditions.

The most important change of system in dealing with the results is in connection with occupations combined with agriculture. In 1891 all such

* A few sections of the fishing community catch fish but do not retail them, and a few others expose them for sale, but do not catch them; but the majority of the fishing fraternity both catch and sell.

† For factories, coal-mines, tea gardens and other large industries, full information will be found in various special returns and in the annual reports of the Director-General of Statistics. The strength of the Civil and Military Services can be ascertained from the Civil and Army lists and other official publications. Similarly the number of persons employed in the post office, telegraph, forest and other departments of the State could be gleaned far more accurately from special returns prepared departmentally. Information regarding village chaukidars should be obtained from the police, and regarding service under local bodies, including sanitary service, from statements prepared by the local bodies concerned. The income tax report affords a good deal of information regarding the more important commercial occupations. Statistics of this kind might well be collected in connection with the census, but they should be obtained in the manner here indicated and not through the agency of the enumerators.

occupations were tabulated for the general occupation table under the non-agricultural head, and a separate table was prepared of all occupations combined with agriculture, whereas, at the present census, they have been tabulated according to the principal occupation, whether agricultural or otherwise, and columns have been added to show the number of persons whose chief means of livelihood is non-agricultural but who depend partly on agriculture as a subsidiary occupation, while the separate table of occupations combined with agriculture deals only with the subsidiary pursuits of those of whom agriculture is the chief source of income. In other words the persons shown at the present census as rent-payers and rent-receivers represent the total number who returned these occupations as their principal means of support, whereas, in 1891, the corresponding groups included only those who subsisted on these pursuits and nothing else. The result is that more than a million and a half persons have been classed under these two heads who, according to the system in vogue in 1891, would have been entered in the main occupation table under other heads.

ORDER I—ADMINISTRATION.

907. The result of this change of system is apparent in all parts of the Occupation Table. In Order I there has been a marked increase in the number of officers of Government and clerks under Government and District Boards and Municipalities and their families, and a heavy falling off under the heads 'village accountants' and 'watchmen and other village servants.' Many, if not most, of the patwáris and rural police have some second occupation, and where the latter has been returned as their principal means of support, they have, at the present census, been tabulated under that head. In 1891, on the other hand, when the second occupation was agricultural, they were shown in Order I in the main occupation table. It will be seen from the statement in the margin that the number of persons who returned their employment in the rural police force as their principal means of support is far smaller than the number actually entertained. The difference is due, in a great measure, to the fact that in many cases agriculture was entered as the principal means of subsistence, and it will be seen from Table XVD that the number of cultivators and field labourers who were shown as partially dependent on their earnings as village watchmen was not less than 36,434. If these be added the discrepancy between the two sets of figures is greatly reduced. There would of course be others whose main occupation was returned as something else, such as fishing, *pálki*-bearing, or general labour, but of such dual occupations no record was kept. I have entered into this particular discrepancy at some length, partly because the police statistics are available with which to compare the census figures, and partly because in Table XVD, which was not compiled according to the full scheme, a separate head was reserved for village watchmen.

| DIVISION. | POLICE FIGURES. | CENSUS FIGURES. |
|---|---|---|
| Burdwan ... | 21,227 | 13,346 |
| Presidency ... | 16,290 | 9,819 |
| Rajshahi ... | 17,610 | 8,390 |

| Total ... | 152,287 | 85,371 |

ORDER IV—PROVISION AND CARE OF ANIMALS.

908. In Order IV there are several noticeable variations between the results of the last two enumerations. Cattle-breeders show a marked decrease, while the number of herdsmen is far greater than it was ten years previously. The difference is due in part to the ambiguity of the terms used in the schedules. The word *go-rakshyak*, for example, may mean either a cattle-breeder or a herdsman. It probably refers more often to the latter and was treated accordingly at the present census, but in 1891 it was, apparently, in some districts at least, taken as the equivalent of cattle-breeder. The majority of the persons shown as cattle-breeders in 1891 were returned in the Presidency, Orissa and Burdwan divisions, where the occupation is comparatively rare,* and it is here that the greater part of the difference between the two sets of figures is found. But even if cattle-breeders and

| DIVISION. | NUMBER OF CATTLE-BREEDERS. | |
|---|---|---|
| | 1891. | 1901. |
| Burdwan ... ... | 17,668 | 2,707 |
| Presidency ... | 29,527 | 1,851 |
| Orissa ... ... | 28,486 | 3,650 |
| Total ... | 76,681 | 8,208 |

* Of the 29,927 persons shown as cattle-breeders in the Presidency Division, Nadia alone contributed no less than 24,165.

herdsmen be taken together the present figures are far in excess of those of 1891. This is owing to the stress which was laid on the rule that "women and children who work at any occupation, of whatever kind, not being merely an amusement or of a purely domestic character, such as cooking, must be entered accordingly, whether they earn wages or not." Boys who herded their parents' cattle were consequently often shown as herdsmen, whereas at the previous census they were probably entered as dependent on their parents' occupation.

909. The great increase under the two main heads of Order V—Agriculture, *viz.*, rent-receivers and rent-payers, has already been explained. On the present occasion these heads include all persons who returned them as their chief means of livelihood, whereas, in 1891, they included only those of whom they formed the sole occupation.* It is also due in part to the greater care which is taken at each succeeding census, to secure correct entries in the schedules. The natural inclination of the people is to return their traditional caste occupation, *i.e.*, the Dhobá, when asked what his occupation is, says 'Dhobá' or washerman, the Barhi says 'Barhi' or carpenter, and so on, although in fact they may live mainly by cultivation. The extent to which such mistakes are eliminated varies with the amount of supervision exercised, and this was certainly greater at the present census than on any previous occasion. The removal of such mistakes was further facilitated by the provision of separate columns in the schedule for principal and subsidiary occupation, and by the more detailed enquiries which this change of procedure necessitated.

ORDER V.—AGRICULTURE.

The persons shown as farm servants and field labourers aggregate nearly 5 millions, compared with rather more than a million and a half in 1891, but the difference is wholly due to the transfer to these heads of persons returned as general labourers at the previous census; the number of the latter is now well under 6 millions compared with nearly 9 millions ten years earlier. I have already pointed out that the distinction between these two heads is a fallacious one, and that amongst the landless labourers the same person at different seasons of the year earns his livelihood in different ways.

The number of tea-garden coolies has risen from 50,639 to 208,727, but here again the result is due to a more accurate return rather than to an actual increase, although this, too, has been considerable. In his report on the last census Mr. O'Donnell stated that the figures then returned were far less than the truth. Speaking of the statistics for Jalpaiguri he wrote:—

"Only 12,822 persons out of a population of 681,352 in Jalpaiguri district have been returned as tea cultivators, but they must be supplemented by very many amongst the 57,623 general labourers and 5,504 farm hands. Indeed even the grand total of these three occupations most probably falls short of the reality."

There were 35,683 acres under tea in this district in 1891 and the present area is 76,158. At a rate of 1½ coolies per acre the number employed in 1891 should have been 53,524, and the present number 114,237. The occupation table of the present census gives the number as 113,685, while, according to the village tables, the total population of all kinds enumerated on the tea estates is 133,207. The number of betel vine growers exceeds that returned in 1891 by more than 40,000, but the person who cultivates the betel vine frequently sells the leaf himself, and it is difficult to distinguish between the two occupations. The number of sellers of the betel leaf, who are shown in another part of the classified scheme (Order VII), has decreased considerably. The present returns disclose only 14,117 fruit and vegetable-growers compared with 174,604 in 1891, but, on the other hand, the number of vegetable and fruit-sellers, who are shown in Order VII, has risen from 8,718 to 154,921. These fluctuations afford a vivid illustration of the impossibility, in this country, of drawing a distinction between makers (or growers) and sellers, except only in a few special cases where selling forms a separate, well-defined occupation. The decrease in the number of fruit-sellers and fruit-growers taken together is not greater than would be expected from the change of system, already more than once alluded to, in dealing with occupations combined with agriculture. The distinction

* Table XVD shows that of the rent-payers (male actual workers), 1,263,583 or 9 per cent combine agriculture with some other occupation. If the total population returned under the head 'rent-payers' be reduced by 9 per cent., the number falls to about 44½ million, or only about 6 per cent. more than in 1891.

between agents and managers of landed estates and clerks, bailiffs, etc., though sufficiently clear in theory, is not always easy to apply in practice, and the fluctuations compared with 1891 are due in a great measure to changes in procedure. I reserved the former head for persons in authority, but at the previous census it must have included many petty zamindári officials. The two heads combined show a decrease, due to the fact that many with dual occupations have been treated as agriculturists at the present census.

ORDER VI—PERSONAL AND DOMESTIC SERVICES.

910. Barbers and washermen appear to be less numerous than in 1891, but the explanation is, to a great extent, the same as that just given, *i.e.*, it is due to a different method of manipulating the results, and also, it may be, to greater success in securing correct entries in the schedules, and in combating the tendency of functional castes to return as their actual occupation that with which they are credited by tradition. The head "Miscellaneous and Unspecified" accounts for only 139,839 persons compared with 1,062,919 in 1891. As far as possible, we avoided classifying occupations under vague terms like this. Whenever the caste, or the birth-place, or the word used* gave a fairly reliable clue to the precise kind of service followed, the classification was made accordingly. This probably accounts for an increase of nearly 200,000 under the head 'indoor servants,' and for the greater number of cooks. Moreover, in 1891 the important distinction between *chákar* and *chákari* appears to have been overlooked. The former refers to domestic service, but the latter is more commonly employed with reference to more respectable forms of employment, usually clerical, either under Government or under some private employer. Instead, therefore, of entering persons thus returned in the Miscellaneous Group of Order VI, which refers to domestic and personal service, I opened a fresh head in Order XXIII for 'unspecified service,' and this includes 215,754 persons, most of whom, in 1891, would have been shown in Order VI.

ORDER VII—FOOD, DRINK, AND STIMULANTS.

911. The general slight decline in the number of persons following the avocations included in Order VII is attributable to the transfer of a certain number, who combine these occupations with agriculture, to the agricultural head. There are also some fluctuations due to changes of classification. Those under the heads 'betel-leaf-sellers' and 'fruit-sellers' have already been dealt with. The falling off under 'rice-pounders' has been met, to a great extent, by an increase under 'flour-grinders.'

ORDERS VIII AND IX—LIGHT, FIRING AND FORAGE, AND BUILDINGS.

912. In Order VIII there has been a marked increase in the number of coal-miners, which is two and-a-half times as great as it was ten years ago. The number of brick- and tile-makers and of masons and builders in Order IX is also considerably greater than it was in 1891, owing to the growing prosperity of the people and the gradual replacing of wood and mud buildings by houses of bricks and mortar.

ORDER XI—SUPPLEMENTARY REQUIREMENTS.

913. There has been an apparent shrinkage of about 43,000 in Order XI, but this is because the keepers of the shops known as *Manohári Dokán*, who number 53,742, have been shown in Order XVIII and not as stationers. The reason for this change of classification has already been given (paragraph 901). Printing presses afford employment to one and-a-half times as many persons as they did ten years ago, and the number of book-binders has risen by about 30 per cent. These changes are probably genuine, but under some of the other groups the variations are, to a great extent, artificial.

ORDER XII—TEXTILE FABRICS AND DRESS.

914. There has been but little apparent change in the total number of persons employed on textile fabrics and dress, but the details differ considerably. This is owing partly to the opening of new heads, but there have also been a few genuine changes, amongst which the decline in the number of workers in wool and cotton deserves special mention.

* For instance, *chákar* means a servant, but, except in East Bengal, it connotes indoor service, corresponding to that of a 'bearer' in European households, and so was classed under the head 'Indoor service.' In Dacca, on the other hand, the meaning is wider, and there was no alternative but to relegate persons entered merely as '*chákar*' to the head provided for unspecified domestic service.

915. Most of the village industries show a falling-off. It is slight in respect of brass, copper, and bell-metal workers, but in the case of potters, carpenters, and shoe-makers it is very considerable. There is not much room for difference of opinion as to the proper classification of these occupations, but there is another factor which has probably resulted in making the difference in the figures more marked than it really is. I refer to the tendency of functional groups to return their traditional caste occupation to which reference has already been made. A man of a weaving caste will often call himself a weaver, even when his main source of income is derived from agriculture or some other employment, and there are reasons for believing that this source of error was removed to a greater extent on this than on previous occasions. The change of system in dealing with occupations combined with agriculture has also affected the figures to a considerable extent. At the same time it seems certain that machine-made goods are gradually replacing those made by hand in the villages. Shoes of English manufacture* are rapidly displacing the country-made article, at least amongst the better classes; cheap cotton cloth from Manchester, known as *márkin*, is supplanting the stronger but more costly country cloth; amongst Muhammadans Chinaware is being used instead of the local potter's earthen vessels, and knives, axes, etc., from Sheffield and the Continent are ousting the rougher implements made by the village blacksmith. The brass- and copper-smith holds his own, because the domestic cooking and other utensils of these materials have not yet been, and are not likely to be, replaced by enamelled saucepans or other imported substitutes, and the growing prosperity of the country leads to a constantly growing demand for them. I am unable to explain the great decrease in the number of persons returned as saltpetre-refiners and sellers. The quantity of saltpetre extracted is very little less than it was ten years ago, and an independent enquiry indicates that there, at least, the number of persons working as saltpetre refiners approximates more nearly to the figures of the last census than to those now returned. The persons who follow this employment are usually partially agriculturists, and it is possible that the change of system in tabulating occupations combined with agriculture is responsible for the apparent decline under this head.

VARIOUS ARTISAN GROUPS.

916. There is a remarkable decline in the number of persons shown in Order XVIII—Commerce, chiefly under the heads 'General merchants' and 'Shop-keepers unspecified.' Here, again, the result is in the main artificial. Greater care was taken to eliminate vague entries, such as *Dokándari* from the enumeration schedules, and in the course of tabulation no items were relegated to these general heads for which any suitable special place could be found in the occupation scheme.† The change of system in dealing with occupations connected with land must also have greatly affected the number of persons shown in this Order. Table XVD shows, for example, that amongst rent-payers (males, actual workers), 108,885 returned shop-keeping as a subsidiary means of livelihood. In Order XIX—Transport and Storage, there has been a net increase of 8 per cent., but the details again disclose variations due, in the main, to changes in classification.

ORDERS XVIII AND XIX—COMMERCE, TRANSPORT, AND STORAGE.

917. The same remark applies to Order XX—Learned and Artistic Professions. The decrease under the head 'Priests, Ministers, etc.,' is, to a great extent, counterbalanced by the entry of a larger number of persons as catechists, church and temple servants, etc. The number shown as religious mendicants is much larger than in 1891, when it would seem that many persons of this class must have been treated as ordinary beggars and shown in Order XXIV. The distinction between religious mendicants and ordinary beggars was seldom shown at all clearly in the entries in the occupation column of the schedules, and it was often necessary to refer to the caste column, in order to decide which was

ORDER XX—PROFESSIONS.

* In 1900-1901 the number of pairs of boots and shoes imported was 324,798 compared with 156,715 in 1890-91. The value of cutlery and hardware imported during the same period rose from 32 to 77 *lakhs* of rupees, and of glass and glassware from 21 to 29 *lakhs*. The value of imported cotton piece-goods, etc., have risen during the decade from 1,365 to 1,617 *lakhs*.

† Thus 'Bepári' was in most parts of the Province treated as meaning grain-dealer, whereas, in 1891, it was probably, in many districts, shown as shop-keeper unspecified.

probably meant. It would be better in future to abandon the distinction between the two classes.

OTHER OCCUPATIONS.

918. The variations in respect of the remaining occupations may be summarily dealt with. The decrease of more than three millions under the head of general labour has already been explained. It is due to the transfer of about this number to the cognate head of 'field-labourers' in Order V. Order XXIII is swollen by the entry of the new group 'Service unspecified,' which was classed in 1891 with unspecified domestic service. As already stated, there has been some confusion between ordinary and religious mendicancy; and the two heads combined include only 689,892 persons compared with 771,581 in 1891. This satisfactory result is due in part to greater material prosperity, but it is also largely attributable to the fact that alms are less freely given to the begging fraternity than was formerly the case. With the spread of education, the loafer finds it less easy than it was formerly to unloose the purse strings of the villagers.

## GENERAL DISTRIBUTION OF POPULATION BY OCCUPATION.

INTRODUCTORY REMARKS.

919. It will be seen from the preceding discussion that the classification of occupations under a large number of special heads is beset with numerous difficulties, due to—(1) the vagueness of many of the original entries, (2) the existence of dual occupations of which only the principal one is shown in the main occupation table, (3) the fact that the census refers to the state of affairs on a particular day, and (4) the errors which, in spite of every precaution, must unavoidably creep into the preparation of such an elaborate table. So far as dual occupations are concerned, the errors probably cancel each other to a great extent. If X represents the number of persons returned as following main occupation A and subsidiary occupation B, and Y, the number following main occupation B and subsidiary occupation A, it may be assumed that the error, due to the entry against occupation A of the whole of X, is cancelled by the exclusion of the whole of Y, *i.e.*, that the loss, sustained by occupation A, owing to the return of some of the people who partly subsist by it under occupation B, is made good by the excess number returned as solely dependent on A, who in reality are partly dependent on B.*

The vagueness of some of the entries has affected only a few heads, and, except in the case of 'general labour,' where the number runs into millions, it is not likely to have been sufficient to vitiate the general accuracy of the return. The same observation applies to the circumstance that a census deals with the occupations of the people on a particular date. It is only the landless labourer who is constantly changing his means of livelihood, working in the fields at one time and at other time carrying a *pálki*, or digging earth, or working in a jute press or a brick-field. The mistakes which occurred in compiling the results may sometimes have affected particular heads of occupation in individual districts; but it is hoped that the number of such mistakes is small, and in any case they cannot affect the main features of the occupation statistics in the Province as a whole.

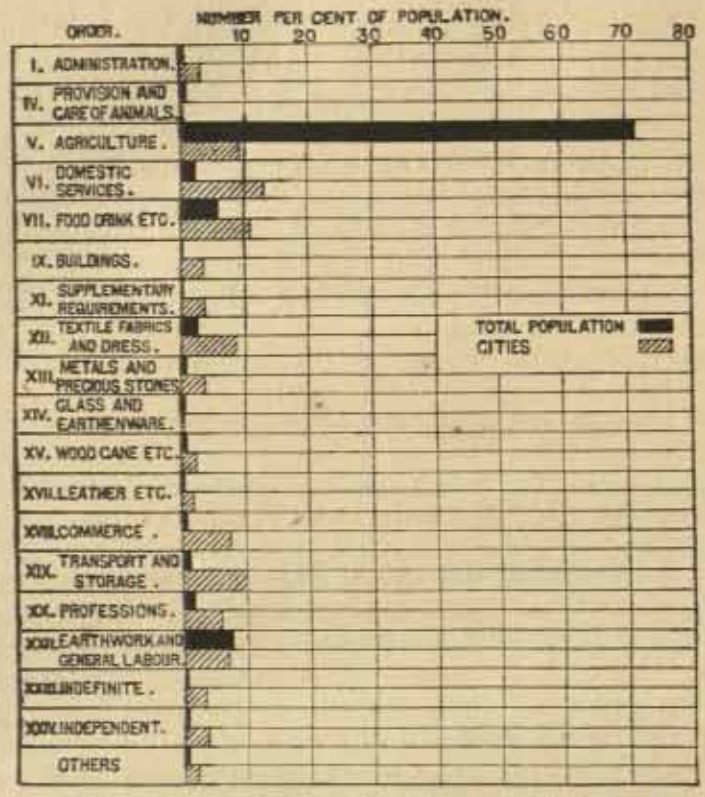

In the following discussion, unless the contrary is expressly stated, the figures should be taken to refer to the total number of persons who subsist by each occupation, *i.e.*, the actual workers and the persons dependent on them.

GENERAL FEATURES OF THE OCCUPATION RETURN.

920. The most striking feature of the return is the large proportion of the population who are dependent on agriculture. Nearly two-thirds of the people are either landlords or tenants; six per cent. have been returned as agricultural labourers, and of the seven per cent. shown as general labourers, the great majority must also be mainly dependent on agriculture. About twelve per cent. of the total population (including dependents) are engaged in the preparation and supply of material substances, and of these half find a

* It cannot be too often repeated that the Occupation Table merely shows the number of persons dependent on each occupation as their principal means of support, and not the total number who pursue it, either alone or in combination with other avocations. Thus if there are X chaukidars in a district, of whom Y are primarily dependent on other means of subsistence, the number returned as chaukidars at the census will be $X-Y$.

*Diagram showing the general distribution of the population by occupation (Orders).*

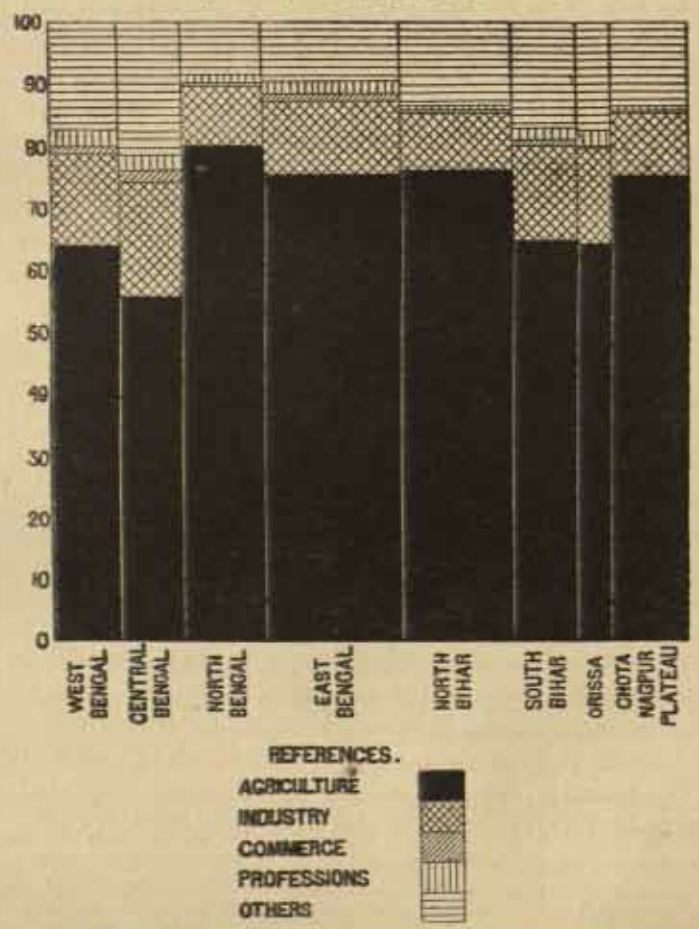

livelihood by the provision of food and drink, and a fifth by making and dealing in textile fabrics and dress. Domestic and sanitary services provide employment for very few, and the number of persons who subsist by this means is barely two per cent. of the population, or less than a third of the number so employed in England and Wales. Commerce, transport, and storage provide employment for two persons in every hundred, of whom rather more than half are engaged on transport and storage and slightly less than half on commerce. In spite of Bráhman priests, the professions are the means of subsistence of less than two persons per cent.

DISTRIBUTION OF POPULATION BETWEEN AGRICULTURE, INDUSTRIES, COMMERCE, AND PROFESSIONS.

921. The diagram in the margin has been prepared to indicate the general distribution of the population of each Natural Division between agriculture, industries, commerce, and professions. The proportions are to some extent disturbed by the tendency, already more than alluded to, of persons who belong to functional groups to return their traditional caste occupation, if they follow it at all, even though they derive their support mainly from some other employment. A weaver will still call himself a weaver even though he has only one loom for his whole family, and derives the greater part of his earnings from cultivation. This tendency has been counteracted with more success on the present, than on previous, occasions, but it still affects the figures, especially in Orissa and South Bihar. So far as the figures go, North Bengal contains a larger proportion of persons dependent on agriculture than any other part of the Province, and this is very possibly the case; but it

*Diagram showing the distribution of the population by occupation (Classes) in each Natural Division.*

NOTE.—The base of each rectangle is proportional to the population of each Natural Division. The height shows the percentage of the population of each Natural Division which is employed on each Class of occupation.

must also be remembered that this is the tract where the number of the functional (non-agricultural) castes is smallest, and the population is composed mainly of Muhammadans and race castes who would be under no temptation to profess to live by non-agricultural occupation; the tendency in fact is here in the other direction, and a man is more likely than not to say that he lives by agriculture, even when the greater part of his time is devoted to some craft, such as carpentry. Then come North Bihar and East Bengal, followed closely by Chota Nagpur. The industrial population is, of course, largest in Central Bengal, and next come Orissa, South Bihar, and West Bengal. The position of West Bengal would be much higher, but for the inclusion of Midnapore and Birbhum, where the industrial population is relatively very small. The commercial and professional communities, like the industrial, are most strongly represented in Central Bengal.

922. Another method of viewing the return from a general standpoint is by taking the occupations commonly followed in every village, *i.e.*, those which, taken together, meet all the requirements of ordinary village life. The figures for these simple pursuits are given in the margin. The occupations, as here entered, are to be understood in the widest sense, and not merely in the restricted meaning assigned to them in the classified scheme. The head 'general labourer', for example, includes not only the ordinary coolie, but also flour-grinders, paddy-huskers, tank-diggers and other earth-workers, *pálki*-bearers, firewood collectors, etc. More than 93 per cent. of the population are dependent on these village occupations. Most of them are hereditary, and the barber's son becomes a barber and the weaver's son a weaver,* and we have already seen in the Chapter on Caste that the affairs of each are regulated by a standing Committee, or *panchâyat*. The duties and remuneration of each group are fixed by custom, and the caste rules strictly prohibit a man from entering into competition with another of the same caste. In many districts, the barber, washerman, blacksmith, etc., each has his own defined circle (*brit* or *sarhan*), within which he works, and no one else may attempt to filch his customers, or *jajmâns*, from him on pain of severe punishment at the hands of the caste committee. The exclusive right to employment by the people in the circle constituting a man's *brit* is often so well established, that it is regarded as hereditable property and, with Muhammadans, is often granted as dower. The method of payment often consists of a fixed fee for regular services, *e.g.* to the blacksmith for keeping the plough in order, to the barber for shaving and hair cutting, to the leather-dresser for supplying country shoes and leather straps for plough-yokes and the like, and a special payment on particular occasions, such as to the village midwife, who is usually the wife of the cobbler or drummer, for the delivery of a child, and to the barber on the occasion of marriages.

VILLAGE INDUSTRIES.

| Occupation. | Groups included. | Number per 10,000 of total population. |
|---|---|---|
| Landlords and tenants ... | 36, 37, 40, 49, 50, 51, 52 | 6,429 |

923. Much curious information on this subject is given by Dr. Grierson in his little book on the Gaya district, where the old customs have been preserved to a greater degree than in most other parts of the Province. The custom is there for each artisan to take his recognised share of grain when the crop has been reaped and brought to the threshing-floor. The carpenter and blacksmith each are given about a maund of grain (half being rice) yearly for

* It has already been pointed out that the introduction of foreign articles is forcing many of the weavers and other artisans to turn to agricultural pursuits.

each plough,* while the Chamár gets 12 seers. The Dom or basket-maker receives no regular income. He is paid for what he does, and his only perquisite is the right to take the table leavings of all castes, expect the Dhobá, whose remains he scorns to touch.† The Teli also draws no fixed stipend, but receives 4 seers of oilseed for every seer of oil he is required to supply. In addition to these regular payments from the villagers, the artisan or village servant often holds a small plot of land rent free, in return for which he supplies the zamindár with earthenware, or shaves him and his family and cuts their hair, &c., as the case may be.

The same system is in vogue in Bengal Proper, but to a more limited extent. The Dhobá and Nápit usually enjoy small grants of rent-free land from the zamindárs, and the *pálki*-bearers and Háris also do so occasionally. They receive fixed remuneration, in cash or grain, from the villagers; but the present tendency is towards payment by the job. The village carpenters and blacksmiths are usually paid in cash for the actual work done. The Nápit often enjoys the exclusive right to work for people in a recognised circle, but this is not usually the case with the other village servants and artisans. The village organization, with its complete outfit of servants and artisans, who render it independent of all outside help, which is so common in other parts of India, never seems to have been fully developed in the greater part of Bengal Proper, and there is often a great dearth of local craftsmen, which is now being met by the settlement of immigrants from Bihar. The up-country Dhobá, for example, is now to be found in almost all parts of Bengal.

In Orissa, on the other hand, the system in vogue in Bihar, is in full force. Whenever a new village is formed, the first care of the settlers is to secure their own staff of village servants, who are induced to come by small grants of land known as *chákrán jaigir*, averaging about an acre in area, which they enjoy in addition to the customary remuneration from the villagers whom they serve. The washerman and barber serve a fixed circle of from 30 to 50 families and receive small monthly payments of grain or money. The barber also gets presents of cloth and rice, on the occasion of marriages, varying in value from Re. 1 to Rs. 5, while the washerman receives the old cloths in which dead bodies are carried to the pyre, and also the cloths discarded at the *srádh* by the relatives, who are given new ones on that occasion. His wife also receives small presents from well-to-do people when a child is born. The carpenter and blacksmith receive from 12 seers to 15 seers of paddy per plough and are paid by the job for other work; they, too, enjoy a monopoly of the work in a fixed circle of *jajmáns*, who are partitioned amongst their heirs like other property. The Jyotish, or astrologer, has no fixed circle, but he usually serves about 100 families, and also acts as the priest of the Chamár and Siyal castes. He attends at all ceremonial observances and shares the offerings with the Bráhman, taking from a quarter to three-eighths of the total amount given.

924. The detailed figures in the table of occupation may now be reviewed very briefly. The number of officers of Government (actual workers) shown in group 3 is only 1,988, but it must be remembered that this group includes only officers who are directly concerned in the administration. Engineers and officers of the education, postal and medical departments, and the like, find a place in other parts of the scheme. The same remark applies also, to some extent, to clerks, some of whom, moreover, may have been classed under the head of 'writers unspecified', owing to the vagueness of the entries in the schedules. The number of constables and village watchmen shown in the scheme represents, as already explained, only those who returned these occupations as their principal means of support, and does not represent the total number borne on the books of the police department.

ORDER I.—ADMINISTRATION.

925. Bengal is not a pastoral country, and very little stock is bred beyond such as is required locally. The only important entry in Order IV is, therefore, that of the herdsmen who look after the village cattle kept either for grazing or for the supply of milk. Of these there are about three-fifths of a

ORDER IV.—PROVISION AND CARE OF ANIMALS.

* The carpenter also gets from 4 to 6 pice a day and his food (*Sidhá*) when employed on other work by cultivators, or 3 to 4 annas a day, when his employer is not a cultivator.

† The Dom's antipathy to the Dhobá is so pronounced that his most binding promise is clenched by saying:—"If I fail, may I become like a man who has eaten from a Dhobá."

million. About 29,000 persons have been returned as cattle-breeders, but the distinction between them and the cow keepers and milk and butter sellers, of whom there are 430,000 (Order VII, Group 78), is a very fine one, and much reliance cannot be placed on the figures for each taken separately. Of the shepherds and goatherds and breeders of sheep and goats (31,000), the majority are in South Bihar and Chota Nagpur. This occupation is frequently combined with blanket weaving under which head 19,000 persons are shown (Order XII, Group 251).

ORDER V.—AGRICULTURE.

926. We have already seen that more than three-quarters of the population are dependent on agriculture, and in these circumstances it may be asked why no attempt should have been made to subdivide Group 37—rent-payers, which alone contains more than 46 millions. The answer is that any attempt to do so would have been misleading, owing to the impossibility of securing entries in the schedules sufficiently clear to permit of the necessary differentiation. The terms used in describing the different kinds of interest in land are so numerous, and their meaning in different localities varies so greatly, that any attempt to particularise would have been foredoomed to failure. I consulted district officers on the subject, but the general opinion was strongly against any attempt to complicate matters by the detailed instructions which would have been necessary, especially as it would have been quite impossible, with the agency available, to ensure their being carried out.* It has already been pointed out that the census is not the means by which detailed information of this kind can be collected.†

An attempt has been made to distinguish between farm servants and field-labourers, *i.e.*, between permanent and temporary hands, but much importance should not be attached to the figures for each taken separately, and it must be remembered that of the 5½ millions shown under the head of 'General Labour' (Order XXII, Group 504), the great majority derive the major part of their earnings from work in the fields. The field-labourer is employed only when necessity arises, at the time of ploughing, weeding or harvesting. The farm servant, on the other hand, is provided with work all the year round; he is found chiefly on the zamindár's private land or on the holdings of persons of the higher castes, who will not handle the plough themselves. In Gaya the farm servant or *kamiyá*‡ takes a loan from his employer and binds himself to work for him for 100 years or until the loan is repaid. He receives less pay than temporary hands, but this is counterbalanced by the fact that he is kept on all the year round.

In Bengal Proper there is usually no local supply of field-labourers, and the persons so employed are usually immigrants from Bihar. The dearth of hired labourers is often met by a system called *badlá* or *gántá* under which the actual cultivators combine to plough, hoe or weed each other's fields in turn.§ So far as the returns go, the cultivators on the *jhum* system, which has already been described,‖ are practically confined to the Chittagong Hill Tracts and Hill Tippera. A kind of rice called *dáhi dhán* is cultivated by jhuming in parts of Chota Nagpur, but the persons who there resort to this form of agriculture have not been distinguished from other cultivators.

The figures for indigo refer only to the establishments on the factories, which are practically empty, at the time of year when the Census is taken. The persons who grow the plant have been shown as ordinary cultivators. In the case of tea, the other great exotic crop, the Census statistics are more complete, and the figure shown in Table XV (about 209,000) represents a very

* In Bombay Mr. Enthoven endeavoured to distinguish lessees of villages, tenants and sharers not cultivating, and tenants and sharers cultivating, but he had to give up the attempt. He says:—"The entries in the schedules were so carelessly made that the statistics could not be compiled for a sufficient number of cases to be of any value, and the attempt was therefore abandoned." Bombay Census Report, 1901, page 233.

† A great deal of valuable information on this subject is to be found in the recent Settlement Reports for Orissa, Chittagong and Muzaffarpur, and other similar publications.

‡ The same system is in force elsewhere, *e.g.*, in the north of Chota Nagpur. The farm servant is called *Kámat* in North Bengal and *Krishán* in Nadia.

§ This practice is common in Nadia when the fields have to be deep hoed (*korpáni*) which, with the light ploughs in use, is necessary every 3 or 4 years. About 20 *raiyats* join together and work their way in line from one end of the field to the other, making each stroke of the hoe in unison and turning up the soil to the depth of about a foot.

‖ Ante paragraph 163.

close approximation to the number of persons actually employed on the tea gardens. To the 88,000 persons returned as cultivating the betel-vine, the 211,000 shown in Order VII, Group 123, as selling betel-leaf, must be added in order to obtain the true number who live by the cultivation and sale of this article.

ORDER VI.—PERSONAL SANITARY SERVICES.

927. The most numerous item in Order VI is that of indoor servants, who aggregate about half a million. Then come barbers and washermen. The number of cooks is very small, being less than one to every 1,200 of the population. In an agricultural community, where the women of the family perform this duty themselves, the number is naturally not very great: but it is probable that some of those shown as indoor servants, or under the head 'miscellaneous,' also serve as cooks. The 73,000 sweepers and scavengers are to be found chiefly in municipalities; nearly 22,000 of them were enumerated in the 16 places treated as cities.

ORDER VII.—FOOD, DRINK AND STIMULANTS.

928. The largest entry in Order VII is that of fishermen and fish-sellers, who together aggregate 1,239,000. They are most numerous in Central and East Bengal. There are various fishing castes. Some will only catch fish and others will only sell it, but the majority do both. Those who catch fish, again, often have prejudices against employing certain methods. Some will only use nets, and others only bamboo fishing contrivances or fishing rods, &c. Next to the fishing community, the most numerous groups are those of the oil pressers and sellers, and the grocers, numbering 485,000 and 497,000, respectively, the rice pounders with 431,000, the cow-keepers and milk-sellers with 430,000, and the grain and pulse-dealers with 350,000. The latter figure represents only those of whom grain dealing is the main occupation. The total number of persons who trade in such staples is much greater, and every money-lender and considerable shop-keeper deals in grain to a greater or less extent. Grain parchers, sweetmeat makers and sellers, and flour grinders are also numerous, and so are the betel-leaf sellers who have already been mentioned.

ORDER VIII.—LIGHT, FIRING AND FORAGE.

929. The figures relating to light, firing and forage call for no detailed comment. Firewood, charcoal and cowdung sellers number 142,000, while the rapidly growing coal-mines support about 83,000 persons.

ORDER XI.—SUPPLEMENTARY REQUIREMENTS.

930. Passing over Orders IX and X, which present no special features, we come to a miscellaneous collection of occupations grouped under the heading "Supplementary Requirements." The mills in which paper is manufactured afford a livelihood to about 4,500 persons, and the manufacture of paper by hand to about half that number. Printing presses support 20,000 persons, and nearly 12,000 are book-binders. Over 15,000 persons obtain a livelihood from employment in machinery and engineering workshops, and over 21,000 from the making of ploughs and other agricultural implements. There are also nearly 10,000 mechanics, not included in the above heads, exclusive of railway mechanics. Amongst other occupations which support a fair number of persons may be mentioned the making and selling of glass and other kinds of bangles, and of flower garlands. The number of sugar-press owners and agents is small; but the occupation deserves mention, as it is one which has completely changed the old system of extracting the juice of the sugarcane. Formerly the cane was squeezed by being passed between two revolving wooden cylinders, but the pressure thus obtained was weak and uneven, and the operation had to be repeated several times, and even then the juice was not wholly extracted. This archaic mill has been superseded by one of iron, by means of which not only is the work done much more expeditiously, but far less juice is left in the cane. The new machine is expensive, and very few cultivators could afford to buy one, but this difficulty has been got over by the introduction of the hire system. Local agents have been appointed all over Bengal, and a number of the mills are sent to each to be hired out at so much a day. This method has proved most successful; they have come into use almost everywhere, and the raucous creaking of the old wooden mills, once so characteristic of the early spring in many parts of the Bengal *mufassil*, is now rarely to be heard. The history

of the introduction of this machine is of interest, not only on its own account, nor because of the novel system under which its use has been extended, but also because it shows that the *raiyat* is quite ready to adopt new methods or means, when they are really an improvement, and that his refusal to adopt certain "improved" ploughs and other implements provided for his benefit is due, probably, not so much to his conservative prejudices, as to the fact that they are not in reality so suitable for the work to be done as their advocates believe them to be.

ORDER XII.—TEXTILE FABRICS AND DRESS.

931. The silk industry is shown as supporting only 142,000 persons, chiefly in Rajshahi, Malda and Murshidabad, but these figures do not include all persons who derive part of their income from this source. In Jalpaiguri and elsewhere the Mech women rear the Endi silkworms, and spin and weave the rough silk, which is now greatly in demand amongst Europeans as a dress-material for hot weather wear. The fact that they do so, however, has not been recorded at the Census: they are in the main cultivators, and silk weaving is only an employment for their leisure hours, but it ought none the less to have been entered in the schedules. In spite of European competition, cotton cleaners, spinners and weavers still number about a million, but with people such as these the traditional occupation dies hard and many of the so-called weavers are in reality mainly cultivators. The number of looms in use amongst a given number of persons returned as weavers is far smaller than of old, when the craft was a more profitable one. The cotton mills of Bengal are overshadowed by those of Bombay, but they support upwards of 8,000 persons. The chief manufacture of Bengal is jute; no fewer than 130,000 persons are maintained by the jute mills, and another 13,000 by the jute presses. The rapid growth of this industry is one of the most striking features of recent years, and the banks of the Hooghly for many miles above and below Calcutta are now studded with jute factories.* Piece-goods dealers and tailors with their families number about 184,000 and 183,000 persons, respectively. The former of these occupations, like the wholesale trade in grain and the money-lending business, is in many parts largely in the hands of the enterprising Márwáris.

ORDER XIII.—METALS, &c.

932. The workers in gold, silver and precious stones (320,000) form the most numerous item in Order XIII, and next to them come the blacksmiths (257,000). Iron foundries are shown as furnishing employment to about 4,000 persons, but this industry has probably been confused occasionally with machinery works (Groups 225 and 226 of Order XI). Brass, copper and bell-metal workers and sellers number about 112,000.

ORDER XIV.—GLASS AND EARTHENWARE.

933. The potters are the only people of importance in Order XIV. Including persons who sell earthenware they number 467,000. The industry has suffered slightly from the extended use of China-ware by Muhammadans, and of metal utensils by all classes of the people; but, on the other hand, the demand for tiles is growing, and this to some extent makes up for a loss in other directions.†

ORDER XV.—WOOD, CANE AND LEAVES.

934. The makers of baskets, mats, etc., aggregate about 329,000. The basket-maker is often also a scavenger, and the line of demarcation between the two groups is not very reliable. Including woodcutters and sawyers, there are 339,000 carpenters.

ORDER XVII.—LEATHER, ETC.

935. There are two important entries in Order XVII—shoe, boot and sandal makers (158,000) and sellers of hides, etc., (113,000). The latter occupation is sometimes followed by Muhammadans, but, as a rule, both are the speciality of the cobbling and leather dressing caste (Chámár and Muchi), and there is no real distinction between them.

* The extension of jute cultivation to meet the growing demand for this staple is one of the main factors in the growing prosperity of East and North Bengal.

† There is a separate head in Order IX for brick and tile-makers, but the potter, who usually makes tiles, would always describe himself as a Kumhár.

936. About 152,000 persons have been shown under the head of bankers and money-lenders. Most of these belong to the latter category, but the occupation is seldom practised alone. The money-lender is often a piece-goods dealer or a general merchant, and he usually also trades in grain. It would be better to combine at least the figures for general merchants (25,000) and "shop-keepers otherwise unspecified" (183,000) with those for money-lenders. The assistants and clerks of merchants, money-lenders and shop-keepers, taken together, number about 137,000.

ORDER XVIII.—COMMERCE.

937. In spite of the great extension of railway communications, the occupation under the head "Transport and Storage," which affords support to the greatest number of persons is that of boatmen (248,000). The number of persons shown as engaged on railways is, roughly, 116,000; but this includes only those employed on open line. Persons working on the construction of railway embankments are included in Order XXII.—Earthwork, and those engaged in the manufacture of railway carriages and the like in Order X.—Vehicles and Vessels. There are about 186,000 *pálki*-bearers and 105,000 cart owners and drivers. The postal and telegraph departments support about 33,000 persons. Porters number 46,000 and weighmen and measurers 22,000.

ORDER XIX.—TRANSPORT AND STORAGE.

In respect of porters it may be mentioned that loads can be carried in three ways, *viz.*, on the back, on the head, and on the shoulder. The Himalayan tribes carry their loads on the back, supporting them by a strap which passes over the top of the forehead. The *pálki*-bearing castes usually carry things on the shoulder, suspended at each end of a split bamboo, called a *bhángi* or *bhár*. Other castes accustomed to labour, such as the Nuniyás, generally carry loads on the head, and they often have a prejudice against the use of the *bhár*. Others, again, such as the Sokiyárs of Hazaribagh, will on no account carry a load in any other way. Amongst the Chota Nagpur aborigines the practice is that women carry loads on the head and men on the shoulder, and with the Santáls a common way of enquiring as to the sex of a new born child is by means of the question:—"Is it a head carrier or a shoulder carrier?"

938. The priests, with 462,000, form by far the largest group in Order XX; but it is probable that a great many persons returned as priests were merely so entered because they belonged to the Bráhman caste. The number of persons who are actually supported by the occupation must be much smaller. Religious mendicants are shown as numbering 191,000, but it was often very difficult to say if a particular entry in the schedules referred to a religious mendicant or to an ordinary beggar. The latter, who are included in Order XXIV, aggregate 498,000, but it would be safer to take the two items together, which gives 690,000, or nearly 9 per 1,000 as the number of persons who live by mendicancy. About 3,000 persons, were returned as circumcisers, chiefly in East and North Bengal. Elsewhere this operation is usually performed by the Musalmán Hajjáms.

ORDER XX.—LEARNED PROFESSIONS.

There are 117,000 teachers of various kinds, and 30,000 writers unspecified. In addition to the last mentioned there are no less than 216,000 persons who returned their occupation merely as "service" and have, therefore, been classed in Order XXIII.—Indefinite; most of these are probably engaged in various clerical avocations. Pleaders, mukhtars and other limbs of the law aggregate some 52,000, and their clerks 22,000. Touts and petition-writers usually preferred to describe their means of support by some other name, and the number of persons thus returned is only 2,000. An attempt was made to distinguish between medical practitioners with and without a diploma, but with doubtful success. Taken together they number 132,000, of whom only 15,000 have been shown as possessing a diploma, license or certificate. There are only 33,000 persons returned as midwives or *dháis*, but the real number is much greater. The *dhái* is usually the wife of the village Chamár, Hári, or Dom, and she seems usually to have been returned under her husband's occupation. In a few instances males were returned as actual workers. It was generally found, on enquiry, that the entry was a mistake, and the males in question were then shown as dependents. In Dacca, however, it is reported that men

some times assist in this operation. They take no part in the actual delivery of the child, but are merely called in to sever the umbilical cord.

METHODS OF THE INDIGENOUS MIDWIFE.

939. Special enquiries were made, at the request of the Census Commissioner, regarding the methods followed by the indigenous midwives, and much curious information was obtained, of which a short analysis is given below. When the pains begin the patient is either made to kneel down on all fours and to hold a basket, pillow or some similar article to her breast, or she sits on the lap of the *dhái* who presses her knees against her loins and kneeds her abdomen with her hands. A string is often tied round the patient's body above the abdomen with a view, it is said, to prevent the child from endeavouring to seek an exit in the wrong direction.

In order to facilitate delivery the passage is anointed with castor oil, the abdomen is rubbed with mustard oil, and nutmeg and betel-leaves are given internally as a stimulant, while an effort is made to promote nausea by stuffing a handful of the patient's hair into her mouth. If these methods prove unavailing and the pains are prolonged, water over which *mantras* have been uttered (called *jalpará* or *mantra jal*) is given to the patient.* Should this expedient fail, various other devices are resorted to. In some places a man uproots a tamarind plant with tender leaves, standing the while with his face to the north and holding his breath, and this is tied to the woman's hair. Elsewhere a man pulls out a pumpkin plant by the roots, while the free end of his loin cloth hangs loose, and the roots are tied round her waist. Another plan is to show to the patient the lid of an earthen pot on which a *mantra* has been chalked by a Bráhman, or to tie round her waist a *pipal* leaf on which a *mantra* has been similarly inscribed. Various nostrums are given internally, such as hot *ghi* or milk, a compound of 30 drugs sold by grocers, of the contents of which the midwife is generally ignorant, or the stalk of a plant brought from Mecca, known as *khálás phul* or the delivery plant. In Sikkim great faith is reposed in the efficacy of celts, or thunder-stones as they are commonly called. The stone is washed with soap in a little warm water which the woman is made to imbibe. In Gangpur, if serious symptoms appear, an exorcist (*Kalo* or *Gunia*) is called in. The room is filled with smoke and he then waves in the air a large piece of wood with a carved head, to the accompaniment of innumerable tom-toms and the screams of grief of all the old women of the village. The object is to frighten away the evil spirit who is causing the trouble, but the result is more often to accelerate the death of the unfortunate patient. Compared with this, there is much to be said in favour of the customs of the Kolhán. When a Ho's wife is seized by the pains of labour, he locks her up by herself in his house, and betakes himself with a cock to the roof, where he sacrifices the bird to his God, Singbonga, and then waits for developments. When he hears the new-born babe cry, he descends and cuts the navel string. It is not stated what happens when the delivery is not attended by a successful issue.

It will readily be imagined, from what has already been said, that the *dhái's* resources are very limited.† The occupation is usually hereditary, and the young woman who aspires to follow this occupation must first go through a course of attending delivery cases, as a spectator or assistant, before she is allowed to practise on her own account. But there is very little obstetric skill to be acquired from her elders, and her proficiency seldom becomes very great. In ordinary cases everything usually goes off satisfactorily, but when a cross birth occurs, the *dhái* rarely attempts to turn the child. More often she seizes the arm or leg presented and endeavours to attain the desired end by force. If successful the limb is usually dislocated and the mother terribly lacerated, but more often the effort ends in failure and death ensues. In Jashpur it is reported that, when the midwife fails to deliver the fœtus, she dissects it with the implement used for cutting areca-nuts and removes it piecemeal.

* In the Chota Nagpur States special virtue is imparted to the water, not by the utterance of *mantras* but by the husband dipping his toe in it.

† Their remuneration varies from 4 annas upwards, according to the circumstances of the parents. Well-to-do people in special cases give as much as Rs. 25. In addition to money, they receive presents of plates, cloth, &c.

940. When a delivery has been safely accomplished the umbilical cord is severed, usually by a sharp-edged piece of bamboo or an oyster shell,* and the infant's bowels are opened by a dose of castor oil or the insertion in the anus of the oiled stem of a betel-leaf. In most places, it is believed that, for several days, the mother's milk is deleterious, and in the meantime a wet-nurse is called in, or the infant is fed on tepid cow's milk, which it draws up by means of a small roll of cotton thread (*palté*), one end of which is placed in its mouth and the other in the bowl of milk. It is rubbed twice a day with oil and turmeric, and this is often done until it reaches the second or third year of its age. A mixture of certain leaves and powdered crocodiles' teeth is sometimes given to it periodically as a prophylactic against chills and bowel complaints. In Bengal Proper the mother is not allowed to rest after the confinement until the placenta has come away. In Bihar she is given a draught of mustard oil mixed with assafœtida, and is allowed to lie on her back while the *dhái* rubs and twists her about until it has been expelled. The mother is considered unclean for 21 days, and during this period she is not allowed to leave the room set aside for her accouchement. For the first six days she is kept warm near a fire, and is well rubbed and fomented three times a day. She is allowed only one meal daily, and this consists of old rice, *dál* and vegetables. Animal food at this time is strictly forbidden, nor is cold water allowed in order to alleviate the thirst caused by the hot and stuffy atmosphere. Pieces of ginger fried in *ghi* are administered as a stimulant. On the 13th day she is bathed.

CUSTOMS AFTER DELIVERY.

941. The only remaining item to be mentioned under the head of "Learned and Artistic Professions" is that entitled 'Band-masters and players (not military)', with a strength of 100,000. The principal constituents of this group are the village drummers and players on *tom-toms* and similar primitive instruments, who, like the *dhái*, belong to the lowest strata of the community and who combine with their musical performances on the occasion of marriages and other high days, the making of baskets, the dressing of skins and the removal of refuse.

OTHER OCCUPATIONS.

The principal occupations in the three last Orders of the scheme have already been mentioned elsewhere. The majority of the persons in Order XXII belong to the great class of landless labourers who are dependent chiefly on agriculture for their support, but who, at the time of the Census, were temporarily engaged on earthwork or whose occupation was so vaguely entered that they could not be assigned to any specific group. About 32,000 persons were returned as working in factories, the nature which was not specified, in districts where the existence of several different kinds of factories prevented their entry under any particular head.

## OCCUPATIONS IN TOWNS.

942. We have hitherto been considering the distribution of the population by occupation in the Province as a whole. It will be well to glance briefly at the corresponding distribution amongest the urban population. The ordinary town in Bengal is usually, to a great extent, urban only in name, and many of the mufassil Municipalities are either overgrown villages, or contain on their outskirts, considerable areas of a purely rural character. Instead, therefore, of compiling the statistics of occupation for all so-called towns, it was thought better to do so only for certain large towns of a truly urban nature. The following towns were therefore selected :—Calcutta, Serampore, Howrah, Bally, Cossipore-Chitpore, Manicktala, Garden Reach, Dacca, Patna, Bihar, Gaya, Chapra, Muzaffarpur, Darbhanga, Monghyr and Bhagalpur, and the statistics in columns 14 to 19 of Table XV refer only to these places, which, for the purpose of this discussion, will be distinguished as cities. Their aggregate population is

SCOPE OF THE STATISTICS.

* This seems to be an interesting survival of the time when metals were not known. In the same way in certain religious ceremonies the use of matches, or even of a flint and steel, is forbidden and fire is obtained by the friction of two pieces of wood. A later survival of the same kind is the custom prevalent amongst some castes of presenting the bride at marriage with a mirror of polished metal. In certain ceremonies only copper knives may be employed.

1,780,931 or rather less than half the total population shown as urban in Imperial Table I.

943. The main distribution of occupations in cities differs *toto cælo* from that in the Province as a whole, and whereas, in the latter, nearly three-quarters of the population are dependent on the land, in these towns the proportion falls below 1 in 10. Moreover, while the rent-payers in the whole Province outnumber the rent-receivers in the ratio of 31 to 1, in cities they are only twice as numerous. Actual cultivators seldom reside in towns, and only visit them at intervals for purposes of business or recreation, but amongst landholders it is a common practice to keep up a town house in which they spend a considerable part of their time. The most common avocations of residents in cities are those connected with the preparation and supply of material substances, especially 'food and drink' and 'textile fabrics and dress.' The persons engaged in 'personal services' are relatively far more numerous in towns than elsewhere, and the number returned under this head in the place treated as cities represents more than 14 per cent. of the total number so employed, whereas the population of these cities is very little more than two per cent. of the total population of the Province. The disproportion in the case of 'commerce' is also marked, and nearly one-fifth the total number of persons returned in Bengal under this main head were reported from these cities.

GENERAL FEATURES OF THE STATISTICS.

| CLASS. | NUMBER SUPPORTED BY IT PER 10,000 IN | |
|---|---|---|
| | Province. | Cities. |
| A. Government | 72 | 362 |
| B. Pasture and Agriculture | 7,244 | 979 |
| C. Personal services | 219 | 1,392 |
| D. Preparation and supply of material substances | 1,230 | 3,656 |
| E. Commerce, &c. | 197 | 1,737 |
| F. Learned professions | 173 | 594 |
| G. Unskilled labour | 789 | 995 |
| H. Independent | 76 | 357 |

On turning to the details for individual occupations it will be noticed that these cities hold a leading position in respect of many of the larger industrial undertakings requiring capital for their prosecution, such as printing-presses, machinery and engineering workshops, iron-foundries, cotton mills, jute mills, oil mills and the like.

## WORKERS AND DEPENDENTS.

944. It was laid down in the instructions that "women and children who work any occupation of whatever kind, not being an amusement or of a purely domestic character, such as cooking, must be entered as actual workers." Only those persons should have been returned as dependents who do not in any way add to the earnings of the family, but amongst many classes of the community it is not considered respectable that a woman should help to augment the family income, and the return of actual workers is vitiated in consequence to a certain extent.

PERSONS SHOWN AS WORKERS.

945. The proportion returned as workers is highest, as compared with dependents, in Order IV—Provision and care of animals, where herdsmen, who have very few dependents, bulk largely in the total. Next comes Order II—Defence, which consists mainly of soldiers and sailors whose families are elsewhere; and next, Order VIII—Light, firing and forage, where the collectors and sellers of firewood, etc., are the most numerous group.

ORDERS IN WHICH WORKERS ARE MOST NUMEROUS.

In Order V—Agriculture, the general proportion of actual workers is small, owing to the large extent to which landlords and tenants, who have many dependents, bulk in the total, but nearly three-fifths of the class of agricultural labourers are workers. In this Order, as a whole, great variations are noticeable in different parts of the province. The proportion of workers is lowest amongst the prosperous agriculturists of East Bengal, and it is nearly as small in other parts of Bengal Proper and in Orissa. It is high in North Bihar and the Chota Nagpur Plateau and highest of all in South Bihar. So far as the natural population of each division is concerned, the real

difference is even greater than the figures would indicate. The proportion of workers in Bengal Proper is swollen by immigrant labourers from Bihar and elsewhere who have left the non-working members of their families behind them.

It is not only in respect of agriculture that the number of dependents is relatively highest in East Bengal; it is so in the case of industrial, commercial and professional occupations also. So far as the figures go, North Bihar is the antipodes of East Bengal, but if the absentee workers of South Bihar, who remit money regularly to their homes from their place of employment in Bengal Proper, could be brought into the account, there can be little doubt but that that tract of country would show the largest all-round proportion of workers and the smallest number of drones.

946. A more interesting feature of the return is the light which it throws upon the occupations of females. There are certain employments which are practically monopolised by women. We have already seen that only a microscopic number of males were returned as actual workers under the head 'midwifery': and that even these few perform only the comparatively unimportant task of severing the umbilical cord. Amongst other pursuits which are mainly in the hands of women, may be mentioned tattooing,* cotton spinning, flour-grinding, firewood collecting, grain-parching, rope-making and rice-pounding. A list of the more important occupations, in which the proportion of females is high, is given in the margin. There are other forms of employment in which the proportion of the sexes is more even, such as basket making and dairy farming, where the number of women is slightly in excess, and in-door and domestic service, work on tea-gardens, jhum cultivation, saltpetre refining, coal-mining, hay and fodder-selling, and mendicancy where they are rather less numerous than the men. The number of females is about two-thirds that of males amongst field labourers, oil-sellers, washermen† and fish-sellers.

FEMALE OCCUPATIONS.

| | Occupation and group. | Number of females to 100 men. |
|---|---|---|
| 275. | Cotton spinners | 1,974 |
| 96. | Flour grinders | 1,089 |
| 486. | Tattooers | 462 |
| 259. | Silkworm rearers | 406 |
| 150. | Firewood collectors | 402 |
| 66. | Water carriers | 373 |
| 349. | Leaf plate makers | 358 |
| 292. | Fibre mat makers | 262 |
| 98. | Grain parchers | 255 |
| 290. | Rope, sacking and net makers | 239 |
| 102. | Rice pounders | 219 |
| 105. | Fruit and vegetable sellers | 161 |

The occupations in which females are engaged may be grouped into three classes—those which are followed by women independently, without reference to the work of their male relatives, such as midwifery, tattooing, silk-worm rearing, domestic service, flour grinding and the like; those which are supplementary to their husbands' occupation, such as cotton-spinning, carried on by the wives of weavers, and the selling of fruit, vegetables, milk and fish by the wives of fruit and vegetable growers, cow-keepers and fishermen; and lastly those in which both sexes work together such as basket-weaving, work on tea-gardens and coal mines and as field labourers or *jhum* cultivators. The occupations which females follow, either independently or as a supplement to some kindred employment of their male relatives, are generally distinguished by two characteristics, their simplicity and the small amount of physical labour which they involve.

## Occupations combined with Agriculture.

947. It has already been explained that in Table XV, the main Occupation Table, the persons have been tabulated according to their principal means of subsistence and that details have also been given, showing (for actual workers only) the number of

GENERAL REVIEW OF FIGURES.

* Some interesting information on the subject of tattooing has been collected, but space cannot be found for it here, and another opportunity must be taken of dealing with it.

† Females assist in this occupation chiefly in Bihar and Orissa.

It may be noted here that the female workers shown under "Barber" attend on women, and especially on the inmates of the zenanas to which male barbers are not admitted. They cut the nails and stain the feet with *altá* (cotton impregnated with the dye of lac).

those whose principal occupation is not connected with agriculture, but who follow some agricultural pursuit as a secondary means of livelihood.* In Table XVD, details have been given, under a few main heads, of the subsidiary occupations followed by those whose principal means of support is agriculture. These statistics are reduced to proportional figures in Subsidiary Table V. These proportional figures and the discussion in connection with them which follows, refer only to actual workers, and dependents are here left out of account. The total number of persons (actual workers only) following other pursuits who returned themselves as partially agriculturists is 681,622, or 6·1 per cent. of the total number of workers who did not return agriculture as their principal means of support. On the other hand, 1,684,650, or 8 per cent. of the persons (actual workers) who reported agriculture to be their main occupation named some non-agricultural pursuit as a subsidiary employment. The proportion of persons, whose main occupation is agriculture, and who returned some other employment as a subsidiary one, agrees sufficiently closely with that of those whose main occupation is non-agricultural, and who returned agriculture as a subsidiary employment, to justify us in assuming, as we have already done in paragraph 919 that the figures in Table XV, which show the principal occupation only, afford a very accurate view of the proportion of the population which derives its entire support from the occupation, *i.e.*, that the failure (an unavoidable one) to allow for subsidiary occupations makes no substantial difference in the number entered under each head.

OCCUPATIONS MOST COMMONLY COMBINED WITH AGRICULTURE.

948. The persons shown in Table XV as having returned agriculture as a subsidiary means of subsistence are most numerous in Class A.—Government, where the high proportion is due to the large number of persons returned as village watchmen, 1 in 5 of whom are partially dependent on agriculture. The proportion of persons who are partially agriculturists in Class D—Preparation and Supply of Material Substances, taken as a whole, is below the average, but in a few individual groups it is large. Of the cotton weavers more than 50,000 or over 13 per cent. named agriculture as a secondary means of subsistence. About 27,000 potters, or nearly 15 per cent., are also in part dependent on agriculture. The largest proportion of persons in Class C—Personal Services, who subsist partly by cultivation, is found amongst the barbers and washermen, where they number more than 35,000, or 18 per cent., and 22,000, or 13 per cent., respectively. The high proportion in these cases is due to the custom, already described, by which zamindars give them small grants of land rent-free in return for their services. In Class E—Commerce, the general average is exceeded in the case of bankers and money-lenders, and boatmen, of whom about 8,000, or 1 in 6 and 16,000, or 1 in 8, respectively, have a secondary occupation connected with the land. Class F—Learned and Artistic Professions, contains a larger proportion of persons who are partially agriculturists than any other main head except Class A. Of the priests 25,000, or 16 per cent., were so returned, and of lawyers, 3,333, or 16 per cent.

949. Table XVD enables us to look at the matter from a different standpoint and to distinguish the non-agricultural occupations of zamindars, or rent-receivers, from those of cultivators, or rent-payers, and agricultural labourers. It will naturally be supposed that the latter must be very different from the former, and this fact is clearly brought out by the figures. Of the rent-receivers with subsidiary occupations, about 1 in 7 is a money-lender, 1 in 9 a priest, and 1 in 10 a merchant; grain dealers, clerks, schoolmasters and medical practitioners are also numerous. Of the rent-payers who returned a second occupation, 1 in 12 is a shopkeeper, 1 in 20 a fisherman or boatman, 1 in 26 a cow-keeper, 1 in 47 a washerman and 1 in 47 is a village watchman. Amongst agricultural labourers with some other employment 1 in 15 is a keeper of cows, and 1 in 17 is a fisherman or boatman, and 1 in 32 a village watchman.

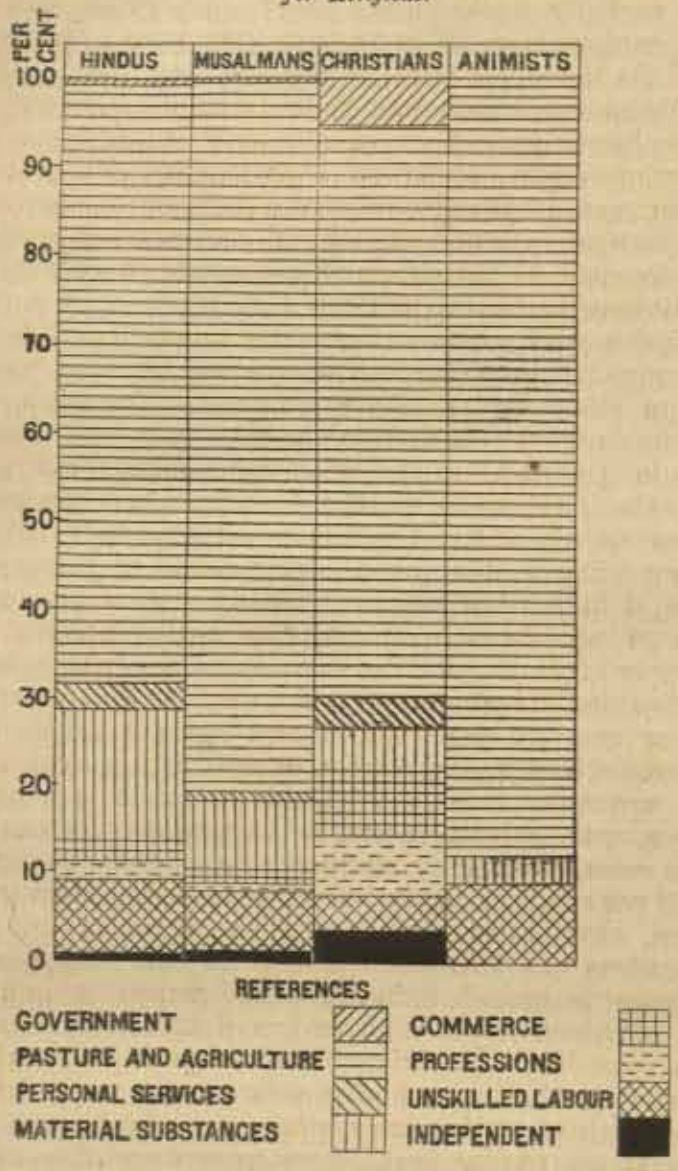

* By agriculture, in this section, is to be understood ordinary cultivation, *i.e.*, the occupations shown in Sub-orders 10 and 11, which include rent receivers, rent-payers, farm-servants, field-labourers and *jhum* cultivators. The growers of special products (Sub-order 12), and those engaged in agricultural training and supervision, etc. (Sub-order 13) are excluded.

## Occupation by Religion and Caste.

950. Table XVC showing the distribution of occupations by religion was not prescribed by Government, but the system on which the tables were compiled rendered it easy to prepare such a return, and as the information which it gives is of a very interesting character, I applied for and obtained the permission of the Census Commissioner to add it to the regular series. The prominent features of this branch of the occupation statistics are clearly illustrated in Subsidiary Table VI, at the end of this Chapter, and it is not proposed to repeat here what can more readily be gleaned from the tabular statement and from the diagram in the margin which shows the main distribution by occupation of the adherents of the principal religions of the Province, *i. e.*, of Hindus, Musalmans, Christians and Animists. It will suffice to draw attention to a few of the more important considerations. It should, however, be explained that in this part of the occupation return no distinction has been made between workers and dependants, and that the figures both in the table and in the discussion which follows refer not merely to the actual workers, but to the total number of persons supported by each occupation, whether they personally work at it or not.

Occupation by Religion.

*Diagram showing the main distribution by occupation (classes) for Religions.*

951. The first point to be noticed is the very large proportion of Musalmans who subsist by agriculture, and the small number engaged in intellectual pursuits. Of those who live by agriculture again, the proportion is high in the case of tenants, while that of landlords and of agricultural labourers is relatively small. No less than 7,316 in every 10,000 Muhammadans are cultivators, compared with 5,555 amongst the same number of Hindus, but the proportion who are land-owners is only 170 in 10,000 as against 217 in the same number of Hindus. The Muhammadans hold a much smaller proportion of civil service appointments than the Hindus, and those who are officers of Government, with their families, are only half as numerous as they would be if such appointments were distributed in equal proportions amongst the different religions. The proportion of Muhammadans following mercantile pursuits, or belonging to the learned and artistic professions, is even smaller, and it may be said, generally, that the occupations, other than those connected with agriculture, in which Muhammadans preponderate are very few. The chief are those of tailors,* dyers, masons and builders,

Muhammadan Occupations.

* They here outnumber the Hindus in the proportion of 8 to 1.

silk-worm-rearers, operatives in silk filatures, cotton cleaners and pressers, butchers, hotel and refreshment-room keepers, veterinary surgeons and farriers, horse and elephant trainers, *hukká* stem makers, makers and sellers of glass bangles, and book-binders. Although they do not outnumber the Hindus, the proportion of Muhammadans is also high amongst vegetable and fruit-sellers, thatchers, silk-spinners and weavers, and cotton weavers. The last named occupation was returned by 419,485 Muhammadans, or 16 in every 1,000, compared with 545,722, or 11 per 1,000 in the case of Hindus.

ANIMISTS' OCCUPATIONS.

952. The Animistic tribes are even more dependent than the Muhammadans on agricultural pursuits, and about 77 per cent. are cultivators or field labourers. Their other important occupations include those of herdsmen, coal miners, firewood, etc., collectors and sellers, plough makers and blacksmiths, weavers, basket makers, road and railway labourers and general labourers. The number returned under the last-mentioned head was 220,965, or 8 per cent. of the total Animistic population. There is not a single Animist amongst the officers of Government, nor are there any authors, pleaders and the like. On the other hand, only 13 were returned as following 'disreputable' occupations, compared with more than 47,000 Hindus and 21,000 Muhammadans entered under this head.

OCCUPATIONS OF CHRISTIANS.

953. Owing to the large number of Native converts, nearly two-thirds of the Christians are cultivators, but the main feature of the return, so far as Christians are concerned, is the large proportion who live by the service of the State, the learned professions, commerce and occupations connected with the railways and other means of transport. Of the total population less than 4 per 1,000 are Christians, but amongst 'officers of Governments' nearly 1 in 7 professes this religion; in the army the proportion is nearly 1 in 2, and in the navy, 19 out of 20. Amongst other important occupations of Christians may be mentioned those of general merchants, bankers, brokers and agents, railway employés, ships' officers, and mariners, managers, &c., of various mills, factories and workshops, missionaries, professors and teachers, journalists, lawyers, doctors and engineers.

OCCUPATIONS OF HINDUS.

954. The Hindus represent about two-thirds of the total population, and their distribution by occupation does not differ materially from that in the province as a whole, except in the special cases where occupations are to any marked extent the monopoly of the followers of other religions. Such cases have already been dealt with, and it is unnecessary to refer to them again. The Hindus have considerably more than their numerical share of appointments under Government, and the proportion who follow learned and scientific pursuits is also considerably larger than the average of other religions. Of lawyers and priests 17 in every 20 are Hindus. But the occupations where they most preponderate are those of barbers, cow-keepers and milk-sellers, ship and boat builders, furniture makers, and workers in wool and fur, in gold, silver and precious stones, in brass, copper and bell-metal, in iron and steel, in earthen and stoneware and in leather. In the case of persons following these pursuits the Hindus number 9 out of every 10, and in some cases they exceed 19 out of every 20.

OCCUPATION BY CASTE.

955. But the most interesting feature in connection with the occupation statistics is the return of occupation by caste which has now been prepared for the first time.* Imperial Table XVI contains details for nearly 150 castes, and proportional figures for the more important ones are given in Subsidiary Table VII at the end of this chapter.

In considering the statistics of occupation by caste it must be borne in mind that, on the one hand, there is a tendency on the part of some of the functional castes, which has already been alluded to, to describe as their occupation that which is assigned to them by tradition, and on the other, the fact that in these statistics only the principal occupation has been dealt with, and that many who mentioned agriculture as their principal means of support may have named their caste occupation as a subsidiary one.

* Under the old system of abstraction by ticks it would have been impossible to prepare such a table, but with the slip system introduced by the present Census Commissioner the task was a comparatively easy one; the slips were first sorted by caste, and those for each caste were then re-sorted according to the occupations shown on them.

Conditions vary so greatly in different parts of this great Province that the figures for each sub-province frequently disclose very divergent results. The most striking feature of the statistics which have been collected is the extent to which the different functional castes have abandoned their traditional occupations, especially in Bihar. The Ahir or Goálá is in theory a dairy man, but in Bihar four-fifths of the total number are cultivators, and barely 1 in 20 follows the traditional caste occupation. In Bengal Proper, however, the proportion is much higher, and nearly a third of the total number keep cows and sell milk. The proportion is about 1 in 7 amongst the Gauras who are the corresponding caste of Orissa. The Chamár should be a worker in leather, but in Bihar only 7 per cent. were returned under this head, while two-thirds were shown in Order V—Agriculture, and nearly one-fifth as earth-workers and general labourers. In Bengal Proper, on the other hand, nearly a quarter of the total number are leather workers, and only a third follow agricultural pursuits. The Hajjáms and Nápits are more faithful to their traditional profession; two-fifths of them were returned as barbers in Bihar and more than half in Bengal Proper. The proportion of Kumhárs, who are still potters, is also fairly high, being nearly 2 in 5. Nearly half the Telis of Bihar subsist by cultivation, but more than a third of them follow their traditional occupation of oil-pressing. In Bengal Proper nearly half the Joláhás or Muhammadan weavers live by weaving, but only a quarter do so in Bihar. The Tántis, or Hindu weavers, have given up their characteristic handicraft to a much greater extent, and only 1 in 9 is still a cotton weaver in Bihar and 9 in 20 in Bengal Proper. The proportion of weavers is still smaller amongst the Páns of Orissa, being only 1 in 18. Lastly, the Bráhmans follow priestly pursuits to a very limited extent. In Bengal Proper barely 1 in 6 is a priest, in Bihar 1 in 13, and in Orissa only 1 in 34. The low proportion in the last mentioned sub-province is due to the inclusion of the degraded Mástán Bráhmans who are usually ordinary cultivators.

CASTE OR RACE OF OFFICERS OF CERTAIN DEPARTMENTS.

956. The above discussion is based solely on the Census statistics. In Subsidiary Table VIII, I have given details of the caste or nationality of the officers of certain departments of Government compiled from official publications and independent enquiries based thereon. The most noticeable feature of this return is the very small share of high appointments which falls to the Muhammadans and the practical monopoly of all such appointments held by Hindus by the members of the Bráhman, Baidya and Káyasth castes. The Hindus are less than twice as numerous as the followers of the Prophet, but they hold nearly nine times the number of high appointments, viz., 1,235 compared with only 141. Again, of the total Hindu population, less than 1 in every 11 is a Bráhman, Baidya or Káyasth, but these three castes between them hold 1,104 of the 1,235 appointments filled by Hindus. Their advantage is still more marked, if we consider only the highest appointments. The three High Court judgeships and the 22 posts in the Covenanted and Statutory Civil Service, which are held by Hindus, are all filled by members of these three castes. As regards their relative success amongst themselves, it will be noticed that the Baidyas have by far the largest share of these appointments and the Bráhmans the smallest. The Baidyas are outnumbered by the Bráhmans and Kayasths in the ratios of 34 to 1 and 18 to 1, respectively; yet they can boast of 7 Covenanted and Statutory Civilians compared with only 2 who are Bráhmans and 13 who are Káyasths. Of the Deputy and Sub-Deputy Magistrates, 70 are Baidyas, 128 Bráhmans, and 144 Káyasths. The proportion of Baidyas is not so high amongst the Sub-judges and Munsifs, but even here, with 40 appointments, compared with 136 filled by Bráhmans and 160 by Káyasths, they have far more than their fair numerical share. On the other hand, the Rájputs and Khatris, though they number nearly a million and a half, hold only 5 high appointments, and the Babháns with over a million hold none. The Goálás with nearly 4 millions claim but 1 appointment—a subordinate post in the Medical Department. Numerous castes are entirely unrepresented in the higher grades of the Civil Service of the State, amongst whom it will suffice to mention the Rájbansis and Namasudras with an aggregate strength of nearly 4 millions, and the Kurmis and Bágdis, each numbering over a million.

CASTES OF PERSONS RETURNED UNDER CERTAIN MAIN OCCUPATIONS.

957. In conclusion we may glance briefly at some of the results disclosed by the Appendix to Table XVI which gives the distribution by caste of the persons engaged on some of the main occupations. It is unnecessary to refer again to Group 2.—Officers of Government, as the constituent castes of this group have just been considered with reference to the more detailed statistics collected independently. In Group 3.—Clerks, Inspectors, etc., the Káyasths, with nearly 10,000 appointments, easily hold the first place. They are followed by the Bráhmans with about 6,000. The Baidya is the only other caste which can claim more than 1,000 actual workers in this group. Amongst the zamindárs, the Bráhmans, who number about 88,000, are the most numerous community; then follow the Káyasths with 73,000, the Bábhans with 36,000 and the Rájputs with 25,000. Bráhman zamindárs are found all over the Province. They are especially numerous in the Orissa, Presidency, Patna and Dacca Divisions, but they are outnumbered in the Presidency and Dacca Divisions by the Káyasths and in Patna by the Bábhans and Rájputs, especially by the former, who are more than twice as numerous. Of the other castes, the first place is taken by the Kaibarttas with nearly 11,000 landholders, mostly in Bengal Proper, and next to them come the following, all of whom contribute more than 4,000 to the total; the divisions where they are mainly found are noted against each caste:—Ahir and Goálá (Presidency and Patna), Baidya (Dacca and Chittagong), Karan (Orissa), Khandáit (Orissa), Kurmi (Patna), Namasudra (Presidency and Dacca), Rájbansi (Rajshahi) Sháhá (Dacca and Rajshahi) and Teli (Burdwan). The Agents and Managers of landed estates and the officers of the postal and telegraph departments are mainly Bráhmans and Káyasths, and the same castes hold a leading position, in point of numbers, amongst professors and teachers in schools and lawyers and law agents. They also considerably outnumber the Baidyas, amongst medical practitioners, but the latter, of whom the practice of medicine is the traditional occupation, stand easily first, if proportional figures are looked to. Of the total number of Baidyas, 1 in every 20 has been returned as a medical practitioner (actual worker) whereas amongst Káyasths and Bráhmans the corresponding proportion is only 1 in 193 and 1 in 400 respectively.

# SUBSIDIARY TABLE I.—General Distribution by Occupation.

# APPENDIX II.

*Extracts from District Reports regarding causes of Conversion to Muhammadanism.*

*Midnapore.**—The considerable Muhammadan population in East and North Bengal offers a fertile field for the preacher and maulavi. The hundreds of students that come out every year from the Dacca, Chittagong, Calcutta, and Rajshahi Madrasas completing Arabic studies are mostly absorbed in the above occupations. There is not a village inhabited by Muhammadans which is not periodically visited by the preachers and maulavis. The visitors do not levy any fee or subscription, but are voluntarily invited to preach from village to village, where they are not only fed very sumptuously, but also offered cash presents in addition. The Hindus generally attend such assemblies and listen to the preachers. The doctrines of Islam are simple enough for everybody to understand, and some of the Hindus, who appreciate the good lessons and probably those who have not many relatives to induce them to hang back, renounce Hinduism and embrace Islam. The above cause has been at work almost everywhere at all seasons from a long time, and has produced the present astonishing result. It never attracted public notice owing to the instances of conversion at any particular place being few and far between, but on the whole it has been the chief cause of the gradual increase of the Muhammadan population.

*Hooghly.*—Fresh accessions to the Muhammadan faith are still being received from outside by the conversion principally of low-caste Hindus. There is no organised propaganda, but maulavis and other learned men occasionally preach about their religion. The following instances of conversion occurred in the town of Hooghly. About a year ago a Native Christian was converted to Muhammadanism. Very recently a Dhoba woman was converted. A Hindu, by caste Káyastha, who read up to the First Arts, embraced Muhammadanism with his wife a few years ago. Some families of Banias, Suris, Telis, Mayras and Brahmans who have been converted are living in Pandua. In the Serampore Subdivision the Matwali of Sitapur reports that occasionally one or two Brahmans, Káyasths, Ahirs and Bagdis accept the Moslem faith.

*24-Parganas.*—Conversions from other religions are still to be seen. This is generally effected by maulavis, who deliver religious lectures. There are no organised societies for propagating the tenets of the religion.

[*N.B.*—In response to a request for some specific instances of conversion with the reasons for the same, the following forty cases were reported]:—

| Name and address of persons converted. | Profession. | Cause of conversion. | Former caste. |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1. Mukta Muchini of Hydarpur, thana Baduria. | Day-labourer | She fell in love with one Jhanu Sheik of her village, who converted her and afterwards married her. | Muchi. |
| 2. Mukta Dassi of Kalutolla, Hasanabad. | Ditto ... | She married a Muhammadan. | Goala. |
| 3. Mathura Bania of Magrahat .. | Railway gateman. | He fell in love with a Muhammadan girl and married her. | Bania. |
| 4. Degámbari Dasi, Magrahat ... | Day-labourer | She was a poor widow with two little children, and under the inducement of a rich Muhammadan she was converted with her two boys. | Dhopa. |
| 5. Jasodia Telini, daughter of Ajtam Teli of Sonari, thana Musrak, district Saran, aged 30 years. | Mill-hand ... | She fell in love with her Muhammadan paramour, who converted her to his faith. | Teli. |
| 6. Nanku Kalwar, *alias* Nanku Miun, son of Bisseswar Kalwar of Dabary, thana Madhubanjia, district Saran, aged 32 years. | Ditto ... | Embraced the religion of Muhammad of his own accord. | ,, |
| 7. Dalu Mali, *alias* Dil Muhammad, son of Heta Mali of Belaganj, thana Belaganj, district Belaganj, aged 30 years. | Ditto ... | Ditto ditto ... | Mali. |

* The author of this report was a Muhammadan.

| Name and address of persons converted. | Profession. | Cause of conversion. | Former caste. |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 8. Mahadevya Chamarin, daughter of Nauker Chamar of Karai, thana Dildargunge, district Ajamgarh, aged 13 years. | Nil ... | Married a Muhammadan while in sick-bed. | Chamar. |
| 9. Lakpatia Bharin, *alias* Saliman Bibi, daughter of Narsing Bhar of Rajanpur, thana Mirganj, district Saran, aged 25 years. | Mill-hand ... | Fell in love with her Muhammadan paramour, and was converted to his faith. | Bhar. |
| 10. Jitu Kahar, *alias* Situ Mian, son of Thakuri Kahar of Vikaran, thana Mirganj, district Saran, aged 45 years. | Ditto ... | Embraced the Muhammadan religion of his own accord. | Kahar. |
| 11. Nathia Bharin, daughter of Narsing Bhar of Rajanpur, thana Mirganj, district Saran, aged 30 years. | Ditto ... | Fell in love with her Muhammadan paramour, who converted her to his faith. | Bhar. |
| 12. Lakpatia Gurarin, daughter of Kanta Gareri of Mubarakpur, thana Mohanla, district Shahabad, aged 30 years. | Ditto ... | Ditto ditto ... | Gareri. |
| 13. Sandaria Kaharin, daughter of Thakur Kahar of Vikanan, thana Mirganj, district Saran, aged 50 years. | Ditto ... | Embraced Muhammadanism of her own accord. | Kahar. |
| 14. Andia Kaharin, daughter of Thakur Kahar of Vikaran, thana Mirganj, district Saran, aged 30 years. | Ditto ... | Fell in love with her Muhammadan paramour, who converted her to his faith. | Do. |
| 15. Parmeswar Kahar, *alias* Dil Muhammad, son of Bhagaban Kahar of Sandapur, thana Manjhi, district Saran, aged 32 years | Ditto ... | Embraced Muhammadanism of his own accord. | Do. |
| 16. Thakur Dasi, *alias* Kusum Dasi, daughter of Biswanath Pal of Nayabasti, thana Barrackpore, aged 40 years. | Nil ... | Fell in love with a Muhammadan and was converted. | Kumhar (potter). |
| 17. Prasanna Dasi, daughter of Tarini Ghose of Nayabasti, thana Barrackpore, aged 50 years. | Nil ... | Embraced the Muhammadan religion after her son's conversion to that faith. | Goala. |
| 18. Hara Devi, daughter of Dinanath Banerji of Nayabasti, thana Barrackpore, aged 40 years. | Seller of wood | Owing to straitened circumstances, she embraced Muhammadanism. | Brahman. |
| 19. Harani Dasi, *alias* Idis Bibi, daughter of Madhu Kaora of Nayabasti, thana Barrackpore, aged 40 years. | ... | Fell in love with a Muhammadan paramour, and was converted to his faith. | Kaora. |
| 20. Rajkumari Dasi, daughter of Mati Ram Paramanik of Nayabasti, thana Barrackpore, aged 60 years. | Ayah ... | Ditto ditto ... | Napit. |
| 21. Behari Goala, *alias* Khodabox, son of Sewo Prasad Goala of Ujayini, thana Pabeganj, district Mirzapur, aged 25 years. | Beggar ... | Owing to straitened circumstances, he embraced the Muhammadan religion. | Goala. |
| 22. Lachman Pasi, son of Suku Pasi of Sadar Bazar, thana Barrackpore, aged 32 years. | Lives on the sale-proceeds of his house property. | Fell in love with a Muhammadan prostitute and became a convert. | Pasi. |
| 23. Kokil Kaora, son of Bhadua Kaora of Chanak, thana Barrackpore, aged 40 years. | Labourer ... | Ditto ditto ... | Kaora. |
| 24. Hari Bagdi, son of Kala Chand Bagdi of Chanak, thana Barrackpore, aged 32 years. | Nil ... | Owing to his straitened circumstances, he became a convert to Muhammadanism. | Bagdi. |
| 25. Mathura Goala, son of Dhani Ram Goala of Chanak, thana Barrackpore, aged 30 years. | Nil ... | Ditto ditto ... | Goala. |

| Name and address of persons converted. | Profession. | Cause of conversion. | Former caste. |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 26. Habul Chandra Ghose, son of Haran Chandra Ghose of Sewli, thana Barrackpore, aged 30 years. | Nil ... | Conviction of the truth of Muhammadanism. | Goala. |
| 27. Mahendra Napit, son of Radhanath Napit of Gambhirgachi, aged 35 years. | Day-labourer | Joined a band of magicians; married the girl of one of them, and became a Muhammadan. | Napit. |
| 28. Dasi Goalini, daughter of Kerun Mall of Durgapara, aged 23 years. | Nil ... | Two years after the death of her husband, she fell in love with a Muhammadan named Soleman of Bandipur, and embraced Islam. | Goala. |
| 29. Mookhada Dasi, wife of Nimchand Ghose of Kamdebgachi, aged 25 or 30 years. | Nil ... | She embraced Muhammadanism when driven out of her father's house for her immoral character. | Do. |
| 30. Abhoya Dasi, wife of Nakul Ghose, Kharki, aged 30 or 32 years. | Nil ... | She embraced Muhammadanism on account of her husband's ill-treatment. | Do. |
| 31. Dasi Bagdini, wife of Tustu Bagdi of Khamur, aged 20 or 25 years. | Nil ... | She fell in love with Khoah Mondal of Madangram and afterwards married him. | Bagdi. |
| 32. Satya Bagdini, wife of Puti Bagdi of Konami. | Nil ... | Owing to her straitened circumstances, she embraced Muhammadanism. | Do. |
| 33. Bilashi Bagdini, widow of Hara Bagdi of Nischindapur, aged 35 or 36 years. | Nil ... | Ditto ditto ... | Do. |
| 34. Paran Tiyar, son of Natabar Tiyar of Kasimpur, aged 30 or 32 years. | Nil ... | Owing to his straitened circumstances he embraced Muhammadanism. | Tiyar. |
| 35. Shebu Bagdi, *alias* Shamser Mundol of Chandigore, aged 30 or 35 years. | Nil ... | Ditto ditto ... | Bagdi. |
| 36. Badan Ghose, son of late Ravan Ghose of Degha Nebodhin (present abode), aged 30 or 35 years. | Nil ... | Fell in love with a Muhammadan woman and became a convert and married her. | Goala. |
| 37. Kumi Dasi, wife of Nim Chand Ghose. | Nil ... | She was enticed from the protection of her husband by a Muhammadan named Kedar Mandal, who converted her to his faith and married her. | Do. |
| 38. Punchi Dasi ... ... | Nil ... | She was enticed away by her Muhammadan paramour, Ohijuddi, and converted to his faith. | Do. |
| 39. A Bagdi woman at Bankura, in thana Dum-Dum. | Nil ... | She was enticed away by a Muhammadan, who subsequently converted her and married her. | Bagdi. |
| 40. Wife of Prem Chand Rajak, Rajarhat, thana Dum-Dum. | Nil ... | She eloped with a Muhammadan, named Pusha Garwan, who subsequently converted and married her. | Dhoba. |

*Jessore.**—The following are some instances of conversion which took place recently in the Jessore district :—

(*a*) Four Hindu families of the Kan caste of village Ulashi, station Sarsha, consisting of about 18 persons, became Muhammadans.
(*b*) One Hindu barber of village Kauria, station Kotwali.
(*c*) Mati Lal Ghosh of Mandalgauti, station Kotwali of Káyasth caste.
(*d*) A Hindu barber woman of Rajapur, station Kotwali.
(*e*) A Hindu barber woman of Dorajhat, station Kotwali.
(*f*) A Hindu barber of Dighalia, station Narail.
(*g*) A fisherwoman of Kaitkhali, station Narail.
(*h*) A woman of carpenter caste of Bhekutia, station Kotwali.
(*i*) Devendra Nath Mukerji of Taliganj, near Calcutta. He is an educated man, and has married in a Muhammadan family of Itna, station Lohagara, where he is now residing.
(*j*) A Brahman woman of Kharki, station Kotwali.

* Report written by a Hindu gentleman.

(*k*) A family of native Roman Catholics of Ghope, station Kotwali, consisting of four persons.

(*l*) Eleven native Protestant Christian families, consisting of about 40 persons, of Daulatpur.

There are many other like instances which it seems unnecessary to detail for the purpose of this report. Most of these converts are from among the lower class of Hindus.

*Dinajpur.**—It often happens that Hindu females having fallen in love with Muhammadan males adopt the Muhammadan religion. It not infrequently happens that Hindus having fallen ill are treated by Muhammadans, who provide them with food and water, are out-casted by Hindus, adopt the Muhammadan faith, and are received with open arms by the Muhammadans. There is no organised propaganda to propagate the faith of Islam, but the mosques scattered all over the country represent the religious centres around which are grouped the Muhammadan people, whose social habits and fraternity tempt the men of other persuasions to enter into the folds of Islam. I came to know of a Káyastha who was employed as a vernacular teacher in a village in the Thakurgaon subdivision. He was among Muhammadans. He fell ill. His Muhammadan neighbours tended him and saved his life. He embraced Islam in gratitude for the kind treatment of the Muhammadans.

Last year a Brahmin, who was a sweetmeat-seller of this town, became a Muhammadan.

I came across a *dervish*, who is a disciple of a *pir* of Panipat, named Brali Quolonder. He said his father was a Chhatri of Ajmir, whose name was Ramchand. Ramchand's wife gave birth to a number of children, but none of them lived. Then the parents said that the next child who would be born to them would be given to Allah. The boy was so given away; he lived, and is now a *dervish* with the name of Wabibuksh.

There is a *chaprasi* of the Subordinate Judge of Dinajpur by the name of Gopal Sheikh. He says he was a servant of a Muhammadan. The Muhammadan master went to Calcutta; Gopal fell seriously ill there, and food and water were given to him by Muhammadan hands. Gopal found his caste was gone, having eaten food of Muhammadans, and so he became a Muhammadan.

*Rangpur.*—Real conversion to Muhammadanism is rare. Within the last ten years three persons embraced Islam at Rangpur, cases frequently occur here in which Muhammadans are accused of enticing away Hindu women. In these cases, however, no actual conversion takes place. Babu Uma Prasanna Guha, Subdivisional Officer of Nilphamari, reports that two years ago he convicted a man named Nadia Das in a bad livelihood case. The other day this man appeared as a complainant before him and gave his name as Nadia Nasya. He further reports that a widow of an Eurasian indigo planter of Kishorgunge (Nilphamari), is still living as the wife of a Muhammadan.

*Rajshahi.*†—There are no fresh accessions to the Muhammadan faith still being received from outside. There is no religious propaganda. A rare case of a Hindu being converted to Muhammadanism is sometimes heard of. This conversion is, however, generally the outcome of illicit connection of a Hindu woman with a Muhammadan male. The former being out-casted by the Hindu society is compelled to embrace Islam, as she has no other alternative. It is understood that about six years ago, a Brahmin widow of Mahisbathan, close to the Boalia Courts, became a convert to Islam in the way stated above.

*Jalpaiguri.*‡—There is no organised propaganda for the spread of Islam, but sometimes maulavis and learned people from other parts come into the district and preach Islam. It is known that six persons of other religions have embraced Muhammadanism in this town in the last few years. These are—(1) Khoitu Fakir and (2) his wife, who were formerly Beldars; (3) Dil Muhammad, who was orginally a Goala; (4) Fatay Muhammad, who was a Nepali Chhatri; (5) Umer Ali, who was a Nagpuri Oraon, and (6) a man now living near the Jalpaiguri municipal pound whose name is not known to me. Besides the above, I have at times heard that other persons have become converts to Muhammadanism in the town, but I have no personal knowledge of them.

*Dacca.*§—Even now cases of the conversion of Hindus to Islam are reported:—

(1) Mohim Chandra De was a peon in the Munshiganj subdivisional office. He fell in love with a good-looking Bediya girl. He embraced Muhammadanism and married the girl.

(2) Mano Ranjan Ganguli, a native of Bikrampur, became a Muhammadan. His wife remained a Hindu. He instituted a suit for conjugal rights, but was unsuccessful.

(3) A Brahman widow in the Narayanganj subdivision fell in love with a Muhammadan young man and became a Muhammadan. There was a criminal case, due to her brothers, administering a severe beating to her lover.

(4) A woman of the Chandál caste fell in love with a Muhammadan of a neighbouring village and became Muhammadan. Her brother instituted a suit against her lover for abduction, but the accused was acquitted. The girl was ultimately forsaken by her lover and became a prostitute.

(5) A Hindu physician, who practised in a village in the district of Tippera, saw in the course of his duties a very handsome Muhammadan girl. He was so much in love with her that he wanted to marry her. Her father told the physician that he could not marry his daughter to him unless he became a Muhammadan. On this the physician embraced

* Written by a Muhammadan gentleman.
† Ditto by a Hindu.
‡ Ditto by a Muhammadan.
§ Ditto by a Hindu.

Muhammadanism, but the girl's father ultimately refused to marry his daughter to him. The physician could not again become a Hindu, as the Hindu society does not take back a renegade.

(6) One Umakanta Sarkar of Kalipura in Tippera embraced Muhammadanism under the following circumstances:—He was a landlord of considerable influence. His faith in the Hindu religion was not very firm. Taking advantage of this, the Muhammadans of the neighbourhood persuaded him to embrace their religion, giving him to understand that he would be made the head of the local Muhammadan community. He became a Muhammadan and tried to convert his wife and his mother also. In this he failed.

(7) A man of the Sudra caste of Belka in Bikrampur embraced Muhammadanism under the following circumstances:—The man was rather thickheaded and poor, but at the same time had a mania for marrying. Being poor and half an idiot, he could not get a wife from his own sphere of life, but the local Muhammadans gave him hopes of marrying if he became a Muhammadan. He did so, but I could not ascertain whether he succeeded in getting a wife.

(8) The ancestor of Asad Ali Khan, a zamindar of the district of Chittagong, is said to have been a Hindu of good family. It is not known how and why he became a Muhammadan, but it is a fact that in social and religious ceremonies, he used to visit the Hindu family from which his ancestors came.

(9) A widow of the Kapáli caste was treated unfairly by her deceased husband's brother and fell in love with a Muhammadan neighbour, who helped her in several ways. She became a Muhammadan, and is likely to be the mother of a progeny.

(10) The widow of a Lagnáchárjya Brahman entertained Muhammadan lovers, of whom she had more than one. The jealousy among two of them became so keen that one was murdered by the other. The criminal case instituted brought the matter to light. The widow was not allowed to remain in society and eventually became a Muhammadan.

(11) A notable case of the conversion of a respectable Hindu occurred at Nakhanda, in the Manikganj subdivision, several years ago. The convert was a high-class Káyasth, a zamindar, named Guru Prasad Basu. He was constantly taken to task by his cousin, Rash Behari Basu, and other neighbours for his non-Hindu practices. This annoyed him much, especially when he found some difficulty in marrying his daughter, and he determined to take revenge on his cousin by becoming a Muhammadan. He accepted the faith of Islam, taking the name of Habibar Rahaman, and slaughtered cows in the precincts of the very building where his father had worshipped the Hindu gods. He invited numerous Muhammadans to the house, and married his daughter to a high-class Muhammadan, who is now living with him. He is treated with regard by Muhammadans. His Hindu wife was rescued by his neighbours at the time of his conversion.

(12) One Mohesh Chandra Sikdar, son of Ramjoy Sikdar of Sivalay, a Sudra by caste, fell in love with one Satya Kaluni of Aricha, a Muhammadan widow. He married her by *nika* and became a Muhammadan. He has now taken the name of Mafizuddin Khan, and acts as a Molla among the local Muhammadans.

(13) A Sudra named Dinanath came from Sylhet and settled in Harina. He fell in love with a Muhammadan woman of the Musalman Kahar class, and became a Kahar himself and married her. He retained his old name, and is now known as Dinu Kahar. He had several children, and gave one of his daughters in marriage to a Kulu. He thus became a Kulu himself, and the Kahars gave him up. In a short time he found that his new status did not suit him: it raised him a little socially, but oil-pressing was less profitable than palki-bearing. He wanted to become a *Kahar* again, but the Kahars would not take him back until he got his daughter divorced by his Kulu son-in-law and married her to a Kahar after giving a substantial feast to the Kahar community.

(14) One Rajani Saha of Elachipur had a small shop at Dasara, where he fell in love with a Muhammadan girl. He took boiled rice from her hands. This came to light, and he was out-casted. He became a Muhammadan and took the name of Reazuddin Khan.

There are some other instances of a similar nature, but it is now very difficult to trace the origin and the cause of conversion. There was a Muhammadan landowner at Shasrail in thana Keranigunge, who is said to be descended from a Hindu family. One of them, Oliulla Chaudhury, actually celebrated *Kali Puja* with pomp. This *Kali Puja* he used to perform every year. The family is now reduced to poverty, though they are now still regarded as very respectable, having descended from a good family.

*Mymensingh.**—In a congested Province, where all possible arable lands have been tilled, the population does not grow so rapidly as in a newly-settled rich country. As an instance, we may cite the example of England and the United States. Since the emigration of the British and other European settlers to the United States of America, the population of that country has grown more rapidly than that of England or any other country on the Continent of Europe. Now I would show that the same causes which accelerate the growth of population in the United States are also at work for the growth of Muhammadan population in East Bengal. East Bengal is throughout interpersed with many mighty and big rivers, and alluvial lands are formed every year on account of the periodical overflowing of the rivers. The Musalman peasants, depending, as they do, entirely on agriculture, and being more adventurous in spirit than the Hindus, emigrate to *chur* lands for better prospects in life, and there they get fresh air, fresh water, and plenty of edibles. Any one who has

* Written by a Muhammadan.

visited these *chur* lands will have found that these tracts are almost entirely inhabited by the sturdy Musalman peasantry. The Hindu has no settling propensity. He is more attached to his own hearth and home, and so is satisfied with whatever he gets in his flood-damaged villages. This, combined with other disadvantages, such as child-marriage, forced widowhood, living upon unsubstantial food, etc., is the cause of the gradual decline of the Hindu population in India in the great struggle for existence, which is continually going on in this world.

*Faridpur*.—The following are some well known cases of conversion from Hinduism.

(1) The Meahs of Kusla:—Zamindars of Kotalipara belong to the same stock with the *siki* zamindars of Paschimpar who are Rarhi Brahmans. The latter still admit the relationship and help the former in their struggles. The Meahs are admitted to the zenana of the Paschimpara zamindars and address the women as if they were still Brahmins and relations. The foremost representative of this family is Maulavi Hemyat-uddin, a pleader and a public-spirited citizen at Barisal.

(2) The Khans of Khanpara. A branch of the Káyasth zamindars of Ujani in Muksudpur thana. The senior representative of the family is Anwaruddin Khan.

The conversion in both cases occurred long ago and the cause is not known. The old story of expulsion from Hinduism on account of their having partaken of the flavour of non-Hindu food (specially beef, &c.) quoted for the Tagore family of Calcutta is said to account for these conversions. It is obvious, however, that there were other causes also as the Calcutta Tagores are still within the pale of Hinduism, whereas the families here described are not.

(3) Islam Khan of Mahispur, P. S. Makshudpur, was Prahlad Sha (caste Shaha).

(4) Islam Khan of Tepabhala, P. S. Kotwali, was Guru Charan Shaha before.

(5) Kudi *alias* Srearna was seduced from her husband by a Musalman and was converted by him.

(6) Faridpur town chaukidar Abdul married Durga Charan's sister from Goalchamat (Faridpur), and made her a Muhammadan.

(7) The Collector's chaprasi, Jasim, married a Hindu prostitute by Muhammadan rites and she is now a Muhammadan.

(8) Debendra Nath Chakravarti, a Namasudra Brahmin, became first a Christian and then a Muhammadan, taking the name of Din Mahomed.

(9) Khanu Molla of Khagail married a Káyasth widow and she and her children by her first husband embraced Muhammadanism.

(10) Maniruddi of Sriramkandi seduced a Namasudra woman from her husband and married her.

(11) Raju Khan, hotel-keeper of Faridpur, was formerly a Hindu with the name Rajani Shaha. He partook of food cooked by his Musalman mistress and on being outcasted he became a Musalman. The only organised Muhammadan propaganda is that of Saijuddin Khan; his main thought is to uphold the tenets of his particular sect rather than to propagate the doctrines of Islam amongst persons of other religions.

*Backergunge*.*—I came across ten cases of conversion to Muhammadanism, and in all cases love or lust was the motive. In one case the man was a respectable Hindu belonging to one Káyasth caste and was a private tutor in a Muhammadan family. He fell in love with a girl of the family, and they eloped and then married. In another case a Brahman became a convert for similar reasons. In six cases the converts were low-caste Hindus, who lost their caste on account of intrigues with Muhammadan women. The cases of conversion reported by the Subdivisional Officer of Pirojpur were all due to love-intrigue, and he says that religious convictions are never the motive. The Subdivisional Officer of Patuakhali does not mention any specific instance. The Subdivisional Officer of Bhola says that although there are many cases of converts in his subdivision, yet they are mostly Jogis by caste.

*Tippera*.*—There are instances of Hindu families of higher classes embracing Islam. The Dewan families of Pargana Sarail in Tippera and of Haibatnagar and Jangalbari in Mymensingh and few others of this district were converts from high-caste Brahmans. They have still retained a memento of their old faith in their title of Thakur.

Amongst the recent converts of this district, the following are worth mentioning:—

(*i*) One Manaranjan Ganguli, husband of a niece of the late Babu Girish Chandra Banerji, once a leading pleader of Tippera, embraced Islam, and is now a Muhammadan preacher under the name of Din Mahamed.

(*ii*) Uma Kanta Chandra, a high-caste Hindu talukdar of Kalipura in thana Matlab Bazar, accepted the Muhammadan religion with his family. The name he adopted on conversion was Omarkhan.

(*iii*) In village Kalikachhya in thana Brahmanbaria, one Gurudas Ray's nephew embraced the Muhammadan religion and married a Muhammadan girl.

(*iv*) One Bango Pal, son of Sarup Pal, a Káyasth, resident of Brahman Chapitala in thana Moradnagar, accepted the Muhammadan religion in order to marry a Mohammadan girl of village Ramchandrapur. His present name is Alif Khan.

There are other instances of conversion from low-caste Hindus, which are not worth enumerating here.

* Written by a Hindu.

*Noakhali.**—Conversion to the Muhammadan faith on account of a belief that it is the true faith does not exist, at the present time at least. There have been instances of low-caste Hindus embracing the Muhammadan faith, because they have been excommunicated by their caste-fellows. There have been instances, again, of Hindus embracing the Muhammadan faith because they could not otherwise ally themselves to the object of their love. Such instances can hardly be called instances of true conversion. I will now cite the instances which have come to notice:—

(1) The most recent case is that of a Brahman woman who left her husband and became a Muhammadan because her lover is a Muhammadan. There was a sensational criminal case instituted by the husband against the lover, Lal Mea. Lal Mea was convicted by the Sessions Judge, but was acquitted on appeal.

(2) The Subdivisional Officer of Feni reports that about ten years ago a Sudra by the name of Judhisthir, living in village Teteswar, within the jurisdiction of Feni subdivision, was excommunicated by his caste-fellows because he had taken food from the hand of a Tipara. He became a Muhammadan to avoid further persecution.

(3) Village Champaknagar within the jurisdiction of thana Chagalnaia in the subdivision is inhabited mainly by the Kumhar (potter) caste. A family of Kumhars brought up a waif found in the street. Ultimately it was discovered that this boy came of Muhammadan parentage, and the Kumar family was excommunicated by their caste-fellows. The whole family embraced the Muhammadan faith.

(4) Bhairab Saha of Pachgachia was converted to Muhammadanism because he could not otherwise marry the object of his love, Fuljan.

(5) A Bhuinmali widow of Bamni, named Padma, took a second husband, Sona Mea syce, and is now living with him in this town. She is now a Muhammadan.

(6) A Bhuinmali male of Kheri, with a wife and children, became a Muhammadan to marry the object of his love, a Muhammadan woman.

(7) A napit (barber) widow, whose sons are still Hindus and follow their caste-profession (one of the sons is my barber), left her home with a Muhammadan, and was thus converted into that faith.

(8) A Feringi, who has taken the name of Din Muhammad on conversion, embraced the faith of Islam about four years ago. He gives out that he became a Muhammadan because he had dreamt that he would suffer everlasting punishment if he remained in his faith (Christianity).

(9) Ram Kumar Saha of Barakul in Tippera embraced Muhammadanism about twenty years ago. He now goes by the name of Abdul Karim, and sells potatoes in this town (Noakhali). He himself was questioned by me. He said he was without relatives and money. There was no one who would lend him any help to get a wife. He became a Muhammadan and married a Muhammadan girl. In this case, too, the sole object seems to have been to obtain a wife.

(10) A family of Brahmans of Kahars, consisting of a man and his wife, becames Muhammadans about 1½ or 2 years ago. The report is that the woman had an intrigue with a Muhammadan, and her caste-fellows excommunicated the whole family, who had thus no other alternative but to turn Muhammadans.

Instances can, no doubt, be multiplied of conversions like the above. It will, however, be seen that, except perhaps the Feringi, all became converts for definite causes other than a belief in the creed of Islam. Love in a very few cases and criminal intrigue mostly are the cause which chiefly work in increasing the followers of the Prophet in this district. Formerly no doubt the low-caste Hindus embraced Muhammadanism in large numbers owing to the oppression of the ruling race and of the degraded position they held in their own community.

*Gaya.*†—The number of Muhammadans descended from local converts alone is very small. The origin of such descendants may be traced in many cases to the union of a Muhammadan prostitute with a Hindu, the offspring being debarred from caste and becoming Muhammadan, as is the case of several descendants of the Tikári Rájas. Several cases are, however, known in which whole villages have become converted to Islam. Thus towards Daudnagar and the north-west of the district, whole villages may be met with filled with Muhammadans, the descendants of Káyasths and Bábhans. One village is known in which all the inhabitants were Bábhans two or three generations ago. This part has for a long time been a centre of Muhammadan influence. Daudkhan, after whom Daudnagar is named, was a Risaldar of Aurangzeb, who gave him three parganas in this direction as a reward for conquering Palamau. It is not strange, therefore, to find vague stories that many Hindus to the north-west of the district became perverts to Islam during the reign of Aurangzeb. Besides the descendants of Daudkhan and his followers, the most noticeable Muhammadans of foreign extraction are found to the south of the district, where one village *kothi* is comprised of the descendants of Pathans from the Afghan Valley of Kohat. The Patháns to the south are subdivided into Rohilla Patháns and Magahya Patháns. The former of whom Muhammad Baksh Khan, of an old and pure lineage, is the chief representative, trace back their descent to Rohilla soldiers of fortune; the latter claim to be descendants of Afghan military adventurers, of whom the chief was one Qazi Ibu Walid, and attribute the name Magahya to their long residence in Magah.

Conversion to Islam at the present time is a rare event. It is said that during the time of the Kings of Oudh several influential Hindus became Muhammadans, probably in hopes of

* Written by a Hindu.
† The writer is an Englishman.

preferment. In this district there is no organised propaganda. The faithful receive a periodical stimulus from the visits of up-country maulavis, but their influence and preaching do not extend beyond the circle of true Muhammadans. In the whole of my census tours I only found one man entered as a new Musalman, *i.e.*, a recent convert. Cases, however, of individual conversion are by no means unknown: it is reported that many poor Hindus became Muhammadans in famine years to get a subsistence from the charity of Muhammadans, and even in ordinary years, poor persons of low castes, *e.g.*, a Pasin deserted by her husband embraces Islam to become dependent on the charity of rich Muhammadan zamindars, such as Nanhe Nawab and the late Abu Sabh. I have also found instances of conversion among Káyasths, in which the motive power of conversion seems to have been study of the Muhammadan religion and sincere conviction of its truth. In many instances such converts are Muhammadans secretly for fear of complete excommunication by their families. One notable case is known in which one Munshi Ganesh Dutta, a servant of the Maharaja of Deo, embraced Islam, and has been followed by his sons. In another case a Káyasth living in a Moslem village changed his religion to that of his neighbours and his caste to Sheikh. I have only heard of two cases in which a Brahman became a Muhammadan—one a constable; the other a pandit, whose reading of Muhammadan scriptures, led to his conversion. Generally Káyasths, especially towards Daudnagar and, to a certain extent, Babhans furnished the material for conversion. Káyasths, *e.g.*, at Amas, Majhaulia, Deo, Daudnagar, Hurna, not infrequently become Muhammadans simply from reading. One case, however, is known in which a whole family of Káyasths became converted by the preaching of a Muhammadan. The most frequent cause of conversion is that of a Hindu prostitute or mistress who is kept by a Muhammadans who first is admitted to Islam and then is married by *nika* to her lover. A somewhat similar instance is that of the outcaste Hindu who embraces Islam in compensation for the loss of his caste, *e.g.*, a Káyasth who was an outcaste through an intrigue with a Dom woman, and then proclaimed himself a convert to Islam. A curious case of simulated conversion was recently observed at Gaya town, where some *badmashes* claimed to be converted in order to set up a claim to respectability.

*Muzaffarpur.**—There is no regular missionary organisation of Muhammadans in this district. Individual maulavis occasionally preach the gospel of Islam in mosques and thoroughfares in towns. They also occasionally make preaching tours in the villages as well, and a few Hindus (both high caste and low) continue to become Muhammadans. The number of low-caste Hindu converts is comparatively much larger, but high-caste Hindus also adopt the Islamic faith. The conversion of high-caste Hindus is generally a matter of honest change of conviction. Amongst the instances of high-caste Hindus having recently joined the ranks of the faithful are– (1) Maulavi Abdul Aziz, private tutor to the sons of the late Babu Nandan Lal, zamindar of Muzaffarpur. This gentleman was a Rájput before he became a Muhammadan; (2) Maulavi Abdulla, who was formerly a Káyasth and has now settled at Rahimabad; (3) Maulavi Abdur Rahman of Sheohur. He was formerly a Rajput, and is well versed in Sanskrit. He is a learned maulavi and pandit, and has taken part in many religious controversies with Hindu pandits about the preferability of Islam.

The causes of fresh accessions to the faith from outside are—(1) the taking of low-class Hindu widows by both the Ashraf and Ajláf classes as second wives and concubines. These Hindu women often bring their Hindu offspring along with them, who all become converts to Muhammadanism; (2) the outcaste or run-away Hindu men and women becoming man-servants or maid-servants in Muhammadan and European families, or taking to prostitution; (3) conversion of Hindus and others, in consequence of the greater purity and simplicity of the Moslem faith. The above causes have been arranged in the order of their efficacy.

*Darbhanga.*†—Fresh accessions to the Muhammadan faith are still being received from outside, though in a limited degree. There is no organised propaganda for this purpose; no missionaries to spread the religion of Mahomet. Formerly the Kazi, who knew the code of religion, had the authority to proselytise a man. As the influence of the Kazi is disappearing, a Musalman has the injunction to proselytise a man who wishes to embrace the Muhammadan faith by reading to him the *Kalma* passages from the *Koran*. A Brahman, by name Babnai Jha, of Soondarpur, has become a Muhammadan and married a Muhammadan widow. A Christian female compounder from Lucknow at the Dufferin Hospital, Darbhanga, fell in love with a Muhammadan peon attached to the same hospital, became a Muhammadan, and married him. The other instances of such proselytism are as follow :—

| | | | |
|---|---|---|---|
| 1. | Mussamut Chunya ... ... | ... | A woman, *mehtrani*, at Maulaviganj. |
| 2. | Chanchaliya ... ... | ... | Sunri woman, Ditto. |
| 3. | Bachia ... ... ... | ... | Mallahin, Ditto. |
| 4. | Wife of Bhaglu chaukidar | ... | Itama, Ditto. |
| 5. | Munniya ... ... | ... | A woman, caste unknown, at Karkaoli. |
| 6. | Wife of Zulfan ... | ... | Sunri, Rohillaganj |
| 7. | Just Sanje ... ... | ... | Bantar, Ditto. |
| 8. | Dukha ... ... | ... | |
| 9. | Dutta ... ... | ... | ..... Ditto. |
| 10. | Billat ... ... | ... | |
| 11. | Chandu ... ... | ... | |

*Saran.*†—Fresh accessions as a rule appear to me to be actuated by mixed motives. A few cases only of what appear genuine conversions have come to my knowledge. One, a

* Written by a Muhammadan.
† Ditto by an Englishman.

Kahár who with his whole house became a Muhammadan; the other of a Káyasth. The others that have come to my notice are of two classes—

(1) A very low-caste Hindu has become a Muhammadan.

(2) Even less reputable recruits—outcastes of Hindu castes; most Hindu women outcasted for sexual irregularities or becoming prostitutes also call themselves Muhammadans.

Of organised propaganda there are practically none in this subdivision.

*Champaran.**—Fresh accessions to the Muhammadan faith are still being received from without. Islam, like Christianity, appeals to every human soul. It is not like the Hindu religion, which cannot admit converts.

It has been estimated by a maulavi, who is one of the religious preceptors in this district, that within his knowledge a little over thousand persons became Muhammadans during the last 15 or 16 years. The most important cause of conversion is poverty. During the time of famine or scarcity, poor people became Muhammadans or Christians by hundreds. Any Hindu who takes the food cooked by a Muhammadan does not remain a Hindu, and his place of shelter is only among the Muhammadans or the Christians.

Many persons embrace the Muhammadan faith in order to raise their social rank. Conversion for the sake of women is comparatively rare, and the number of persons who become Muhammadans from conviction is still less. There are no organised propaganda, but fresh accessions to the faith are slowly going on. Converts to Islam at first are called "Nau Muslims" (new Moslems), and in course of time this epithet disappears. Munshi Ram Nath, an old amlah of the collectorate, who has lately retired from service, had a son-in-law named Ram Narayan. This man accepted Islam with all his children several years ago. There is also one Waliullah at Dariapore, who was originally a Káyasth. At present he is said to work as a munshi. In village Jhumka there is one Abdur Rashid, son of Hafiz Abdul Karim. The latter is said to have been the son of a convert. Hafiz Abdul Karim and his brother, Abdur Rahim, were regular maulavis, and their family made many converts. It is said that gradually almost the entire village of Jhumka turned Muhammadan owing to their preaching. The two brothers were Ghair Mukallids. There are many Ghair Mukallids at Jhumka. An important point worth notice here is that a son of Abdur Kashid is said to have been married to a daughter of a Mir.

Several more cases can be given in which it is believed that the acceptance of Islam was due to conviction.

*Monghyr.*†—Fresh accessions to the Muhammadan faith are still being received from outside. The mullas, such as Maulavi Muhammad Ashraf, Maulavi Abdulla, and others usually come and preach on Islam. Their preachings have produced much effect on the audience. Non-Islamic notions and misconceptions of Muhammadan faith which had hitherto prevailed among the wild tribes, who were nominally Muhammadans, are giving way, and the true Islamic faith is being implanted in their minds to such an extent that now they are in a position to comprehend the golden qualities of the Almighty God and his Prophet. There are numerous instances showing persons of other religions becoming Muhammadans, amongst which the conversion of the brother of Raja Ram Naryan Singh of Khaira is the most notable. This man's name is now Maulavi Abdul Rahaman Khan, residing at mauzah Morcha in thana Sikandra.

*Purnea.*—Men of other persuasions, mostly low class people, sometimes embrace Muhammadanism. The causes of their renouncing their own faith are many—(1) their straitened circumstances, which lead them to marry Muhammadan widows having some property; (2) expulsion from their own society for some misdeed; (3) the falling in love with a Muhammadan, either male or female.

The year before last a Muhammadan woman of Khazanchi Hat fell in love with a Bania named Babu Lall, and the Bania embraced Muhammadanism. A well-to-do Brahman named Kumar Chowdhury of Dhubania, in the Raniganj thana, with his whole family, and a wealthy Káyasth of Gondwara thana also embraced Muhammadanism, as they were excommunicated from their society for some misdeeds. Intermarriages of these converts from the high-class Hindus take place without much difficulty with the educated class of Muhammadans who call themselves Ashrafs.

*Malda.*—Fresh accessions to the Muhammadan faith are still being received from other Hindu and Christian people. The principal cause of conversion at present is reported to be the falling in love of non-Muhammadans with Muhammadan women, and *vice versâ*. In former days people of the lowest class, in order to avoid their degraded position in the Hindu social system, welcomed a religion that proclaimed the equality of all men.

Hira Mani Adhikarini of Naidha falling in love with her Muhammadan servant, Ganga Shaikh, accepted Muhammadan faith. Bujguri Tiyarni of Bishunpur fell in love with a low-caste man and was outcasted; ultimately she embraced Muhammadanism. Manasuri of Marifpur in connection with the above case became Muhammadan. Ali Baurini of Bahadurtalla fell in love with Mahabir Shaikh and became Muhammadan. Jatan Mechuani fell in love with Akbar Shaikh and became Muhammadan

(1) Tuni Harini, (2) Sunduri, (3) Kurtina of Bogohara, (4) Bina Goneshin, (5) Baghu Harini, (6) wife of Sani Charan Beldar, (7) Jhuno Mechuani, (8) Chaman Beldari

* Written by a Muhammadan.
† Based on notes by a Muhammadan.

(9) Kanchan Harini, (10) Protima Keduani, and 12 or 13 other persons also became Muhammadans within the jurisdiction of Kharta thana.

*Sonthal Parganas.*—There are still fresh accessions to the Muhammadan faith from outside, *e.g.*, Chhedi Dhanuk of Deoghar is now Abdul Rahaman. This man turned a Muhammadan through a female Dom convert. Chhoti Ojha is now Dil Muhammad. A Halwai turned Musalman.

The following may be called the chief causes for such conversion into Muhammadanism:—

Men through women, and *vice versâ*.
Want.
Family quarrels.

*Cuttack.*—There are at present very few conversions or other accessions to the Muhammadan faith. The low-caste Hindus are not at all anxious to change their religion, and do not seem to find their degraded position in the Hindu social system so very galling. They even take a pride in being Hindus. Conversions of Hindu widows for marrying Muhammadam husbands are very rare. The lower castes of Hindus allow re-marriage of young widows, and the high-caste widows think it a great degradation to take a Muhammadan husband.

# APPENDIX III.—Showing the excess or defect in the number of married females of child bearing age in certain towns as compared with the general population.

| Town. | Population. | Number of females. | Number of married females between the ages of 15—40. | Corresponding number of females in general population. | Percentage of excess or deficiency of column 4, as compared with column 5. | Remarks. |

* This statement is for the districts that suffered from famine in 1896-97, *viz.*, Saran, Champaran, Muzaffarpur, Darbhanga, Bhagalpur, Palamau, and Manbhum.

# APPENDIX V.

*Note by* A. EARLE, ESQ., C.S., *Deputy Commissioner, Darjeeling, on polyandry in Sikkim and Tibet.**

1. *Preliminary.*—In speaking of Sikkim in connection with polyandry, the people of Tibetan origin only living in Sikkim are, of course, referred to. The indigenous Lepcha population of Sikkim is not, and never was, addicted to polyandry; while the immigrant Nepalese notoriously have no such custom. The inhabitants of Sikkim of Tibetan origin, called in Tibetan, Denjongpa, and, in English, Sikkim Bhotias, have derived their religion and customs from Tibet. In speaking, therefore, of polyandry in Sikkim, it is impossible not to consider simultaneously the same practice in Tibet. I shall, therefore, in the following notes, mention both countries, and state how far the custom of Sikkim differs from that of Tibet. I now proceed to reply *seriatim* to the questions put by Mr. Risley in his note of 4th November 1891.

2. *Mr. Risley's question No. 1.*—It is stated that polyandry was, in olden times much more prevalent in Sikkim than at present. It is said also to be on the decline in Tibet. The following form of polyandry exists in Sikkim and Tibet:—If the eldest of a group of brothers marries a woman, she is regarded as the common wife of all the brothers. It does not, however, necessarily follow that she will cohabit with all the younger brothers. She exercises much liberty in this respect, and it will depend on her pleasure as to whether she will cohabit with any particular younger brother. If the eldest brother (*i.e.*, the real husband) dies, the wife passes to one of the younger brothers according to her own selection. Should her choice fall on the next brother, she will still be the common wife of the younger brothers. Should, however, she select any of the younger brothers, she will be the common wife only of those younger than him, and, if he be the youngest, she will be his wife only. If the eldest brother of a group of brothers does not marry, but the second or third brother does so, then the wife will be the common wife of such second or third brother and his younger brothers only. Elder brothers, in such cases, will separate and leave the family, having no claim on the wives of the younger brothers. Cousins, both on the father's and mother's side and half-brothers may be admitted as members of the group of brothers *only if the husband agrees and has no brothers of his own.* Several cousins cannot take a wife between them except in the instance just quoted. There are instances in the Darjeeling district, but apparently not in Sikkim or Tibet, of a number of men, not brothers or near relations, taking a wife between them, but this appears to be a novel practice introduced for purposes of economy. There appears to be no tradition of any such custom in Sikkim and Tibet in former times.

3. *Mr. Risley's question No. 2.*—From close questioning those examined it would appear that the origin of polyandry is to be found in the desire to prevent the division of property, the country being poor. Every man, who separates from the family group and settles elsewhere, is assessed separately to revenue. Polyandry tends to check this, and, hence, is popular. Fantastic replies were given to this question to the effect that family love keeps groups of brothers together. There is no true property in land, as explained in reply to question 6 below, but only a customary right to use the same. Property in land, as thus understood, may be sub-divided in the same way as moveable property. Polyandry appears, as indicated above, to be primarily connected with the division of moveable property. The practice of polyandry arose in Tibet which, agriculturally speaking, is a poor country as compared even with Sikkim. It is apparently on this account less prevalent in the latter than in the former country.

4. *Mr. Risley's question No. 3.*—The eldest brother of the group is the real husband. It is only when he is absent from home that a younger brother can cohabit with the common wife. It is always entirely in the power of the wife to decide with whom she will sleep, and she need not sleep with any of the younger brothers unless she likes; she may, if she prefer it, sleep alone. There is no custom for brothers to spend the night with the common wife by turns. It is usual for one only of the group of brothers to remain at home, the others being away on business or travel. It never happens that the eldest brother or any particular one of the younger brothers always remains at home. This is arranged among themselves. There is no sexual intercourse by day. There is no such custom or device as that of leaving shoes or a stick at the door to secure privacy. The above answers apply to Tibet and Sikkim equally.

5. *Mr Risley's question No. 4.*—Sikkim Bhotias, as well as the Tibetans, have clan or sept names, but not nicknames, of the supposed ancestors, and practice exogamy. But marriages occasionally occur within the clan, if the parties are removed by at least seven or more generations. The children take the clan name of the father, which is the same as that of the group of brothers. There is no tradition that, in former times, they took the clan name of the mother. This answer applies to Sikkim and Tibet equally.

* This enquiry was made by Mr. Earle on the basis of a set of questions drawn up by Mr. Risley some years ago.

6. *Mr. Risley's question No. 5.*—If a younger brother of a polyandric household takes a separate wife, he leaves the family and lives in a separate house. He has no further claim on the common wife, and his other younger brothers will have no claim on his wife, unless he agrees and takes one or more of them with him to his new home. He has, in all cases, a right to a share of the moveable property, but will be allowed a share of the use of the land only if he remains in the same neighbourhood. Specific instances have been furnished by Rai Ugen Gyatcho Bahadur, and will be found in the Appendix to this note.

7. *Mr. Risley's question No. 6.*—

(*a*) It must be stated at once that there is no true property in land. The practice is as set forth in Mr. Edgar's book entitled "Sikkim and Tibet Frontier" pages 62-64. Land is assessed to revenue, but belongs to the State. It is only the customary right to make use of certain land and to pay revenue therefor that is, by practice, inherited. The only true property is moveable property.

(*b*) TIBET.—The ordinary custom is for property to pass, on the death of the eldest brother, to the remaining brothers and the sons as joint property. There are no traces of any custom that a man's sister's son should *necessarily* be his heir. A man's sister's son may inherit in the absence of nearer male relatives. Adoption of sons is allowed, and an adopted son is, for purpose of inheritance, in the same position as a real son. The adopted son becomes the husband of the daughters, if there are any. A near relative cannot be adopted, if there are daughters, as he cannot, on account of near relationship, become the husband of the daughters. Women can only inherit in the absence of male relatives. A woman, who has inherited property and marries, retains her right to her property as against her husband. Such property will, however, pass to her issue on her death, and to her husband only if she has no issue. If a widow with daughters, who has inherited property, re-marries, the property will pass to the daughters on her re-marriage. In the absence of heirs property passes, after the payment of funeral expenses, to the Lamas and the State, but in what proportions I have been unable to obtain satisfactory evidence.

(*c*) SIKKIM.—The customs described above as being in vogue in Tibet are modified as regards Sikkim. There women are, in no case, allowed to inherit the use of landed property, but inherit moveable property in the absence of male relatives.

8. *Mr. Risley's question No. 7.*—The proportion of men and women in Sikkim and Tibet is fairly equal. The cause of celibacy among the Lamas is not dearth of women, but religious zeal. Female infanticide is not practised. Polygamy, as well as polyandry, prevails, but the latter to a much larger extent. Superfluous women become nuns, prostitutes, or remain single. Polygamy does not take the form that it does in the plains of India, *viz.*, of keeping several wives in one house or compound, but that of keeping several wives in different houses in different places. This custom prevails only among the rich.

9. *Mr. Risley's question No 8.*—Groups of brothers do not marry groups of sisters. It sometimes, however, happens that after the eldest sister of a family has been married to a group of brothers, (or rather to the eldest brother), a younger sister of the common wife is married to a younger brother. In such cases the younger brother will separate from the family and live elsewhere.

10. *Mr. Risley's question No. 9.*—The father of a child, in a polyandric family in Sikkim and Tibet, is the eldest brother. The other brothers are called uncles (Akhu). It is not an insult to ask a man who is his father. A man is not spoken of as the son of such and such a family, nor as the son of his mother. After the death of the eldest brother the children will speak of the deceased as their father.

11. *Mr. Risley's question No. 10.*—

(*a*) TIBET.—The feeling of the people, men and women, as to children and child-bearing is that the more children (especially males) that are born, the better. The more children people have, the more they can please the ecclesiastical authorities by dedicating sons and daughters to monasteries and nunneries. Every family has to send one son (if there are sons) to a monastery. If there be only one son, he will be devoted to monastic life, and an adopted son will inherit the property. Everything, therefore, makes for child-bearing among the laity. On the other hand, Lamas are specially reverenced if they are celibate. The origin of polyandry is not, as suggested by Turner, to be found in the fact that the upper classes look on marriage as something odious and shameful. Probably he thought that the Lamas were drawn from the upper classes only; whereas, on the contrary, they are taken from among the families of all classes of the laity.

(*b*) SIKKIM.—The rule about sending sons to monasteries is less strict, and, if there is only one son, there is no obligation to devote him to monastic life.

(*a*) 12. *Mr. Risley's question No. 11.*—Individuals of mature age are allowed, as in Europe, to select their own partners in life. Marriages are also arranged by parents in the case of minors.

(*b*) Astrologers are consulted as to whether a marriage will prove felicitous or otherwise, and proposals for marriages are only proceeded with if the result be favourable. The calling in of astrologers is called Thuntsi—calculation. Astrologers class women as follows:

(1) YELI CHEN CHIK.—A person with a clean eye, *i.e.*, a virtuous woman. In such cases astrologers take particular pains.

(2) LHAZA THOOK KHYER—A person whose family name is poisoned, *i.e.*, a woman who has had intercourse with men. Less attention is paid in such cases by astrologers.

(3) Moza thoonj bhût.—A person whose ill (family) name has been noised abroad, *i.e.*, a woman of bad name or a widow. In such cases the astrologer is seldom consulted.

(*c*) After the astrologer has been consulted, and his verdict has proved favourable, Barmis,—go-betweens—are called in. These are, generally, the uncles of the proposed bridegroom and bride respectively. They are called to the house of the proposed bridegroom, and from there are sent to the house of the proposed bride in order to arrange the marriage. For their trouble they get presents of money (about Rs. 5), called *Barsen*.

(*d*) Nangchang and Khelen.—When the Barmis go to the house of the proposed bride, they take with them money (Rs. 5 to 50), Marwa, and white silk scarves as presents for the parents of the proposed bride. When they arrive, they offer the presents, and ask for the girl in marriage. The parents then consult their relatives. If the parents consent, the presents are accepted, a feast is given to the Barmis, and the blessings of heaven are invoked on the happy pair. The price to be paid for the bride is also settled on this occasion. It varies from Rs. 80 to Rs. 500 or more. The giving of presents to the parents of the proposed bride is called *Nangchang*—marwa-giving—while the invocation of the blessings of heaven on the happy pair is called *Khelen*. *Nangchang* and *Khelen* are the preliminaries to marriage, and, after they are over, the proposed bride and bridegroom, can see each other as much as they like, but it will be three years before they are finally married; the ceremony called *Nyen* taking place one year after the *Nangchang* and *Khelen*, that called *Changthoong* two years thereafter, and that called *Phalokh* three years thereafter.

(*e*) Nyen.—The Nyen, *i.e.*, marriage-feast, takes place one year after the *Nangchang* and *Khelen*. It is held in the house of the bride, the expense being borne by the parents of the bridegroom. All relations on either side are invited. The price of the bride is paid on this occasion.

(*f*) Changthoong.—A year after the *Nyen* comes the *Changthoong*, *i.e.*, drinking of murwa. The following is the procedure:—

(1) The astrologer is consulted as to what would be an auspicious day for the departure of the bride from her parents' house in the manner described in clause (5) below, what kind of pony she should ride, &c., &c., &c.

(2) A grand feast is held to which Lamas are invited, the Head Lama being called, for the time being, the Tashi Lama.

(3) Part of the ceremony is for two men called *Kunchan*—thieves—to attempt to force their way inside the house of the bride with the supposed intention of carrying off the bride. A sham fight then takes place between these men and the guardians of the bride. The supposed thieves are beaten with stinging nettles, and half-roasted meat with ground chillies is thrust into their mouths. They escape from this treatment by giving presents of money to the guardians of the bride. After two days the supposed thieves are honoured, and called Thapon, *i.e.*, successful strategists.

(4) During the feasting the guests give presents of money and silk scarves to the bride and her parents.

(5) The bride and bridegroom with their respective relatives and followers then leave for the house of the bridegroom, singing, dancing, firing guns, &c., &c., all the way.

(6) The parents of the bridegroom meet the party on the way, and after conducting them to their home, entertain them with feasting for two or three days.

(7) After this the bride and her party return to the bride's house.

(*g*) Phalokh.—A year after the ceremony called *Changthoong* the bride again goes to the house of the bridegroom—this time to stay. The parents of the bride now give her her dowry, which is, generally, double the price which has been paid for her, and, in the case of rich families, much more. The dowry is called Pizong.

(*h*) Sikkim.—The above ceremonies are not now-a-days practised in Sikkim in their entirety. The procedure in that country is usually much less elaborate and prolonged.

---

*Appendix to paragraph 6 of this note, giving instances of the division of property as furnished by Rai Ugen Gyatcho Bahadur in his own language.*

(*a*) "In Chongbung Busti in Sikkim there was a family of three brothers, Athup, Chaynga, and Passang, the two former being laymen, and the youngest, Passang, a novitiate monk of the Pamiongchi monastery. Athup married a wife in the joint names of all three brothers, and they all lived as joint husbands for some time. After some time Chaynga married a wife separately, and lived in another house. The youngest, Passang, lived as a joint husband of Chaynga's wife. The two younger brothers lived in a separate house with their joint wife, while Athup and his wife continued in the former house. A panchayat distributed the moveable property of the family in equal portions, giving the two brothers half and the eldest half. The land was not partitioned, but the fields which were cultivable, were divided equally, and the household servants were allowed free choice of masters, to serve whichever they preferred. Some time later Chaynga died, leaving Passang in sole possession of the wife and property which he is enjoying even now. But this open step of Passang's marriage coming to the notice of the elders of the Pamiongchi monastery, he was expelled from the priesthood. There are several instances of this kind."

(*b*) "Again in Lingdam there is a man called Lichook, who has two brothers, Dukda, and Golay Wangdi. Lichook married a wife in the joint names of all three brothers. They lived together for some time as joint husbands of Lichook's wife. After some time Dukda married a wife separately, and got his own share of the household properties apportioned by a panchayat. The youngest brother Golay Wangdi lived sometimes with one, and sometimes with the other brother's wife. But this uncertain mode of life was rendered impossible by the two wives' jealousy, and he also ended by marrying a wife for himself. The two elder brothers then gave him some property, whereupon he removed to Ralang, where he is at present. In this case there was no land to be divided. There may be several instances of this sort too.

(*c*) "In Lingnu there is a family of four brothers, 1st Nimsring, 2nd Lodan, 3rd Sengkyap and 4th Dubzang. They all four lived as joint husbands of Nimsring's wife. Last year the 3rd brother Sengkyap married a wife for himself, and went away to live in the house of his wife's parents at Gangla. He did not get any portion of the household property, as the property was very small and not worth dividing. Nimsring, Lodan and Dubzang are still living as joint husbands of Nimsring's wife. These are also common ryots, and had no land to divide, nor much property either."

# APPENDIX VI.—Abstract of Caste Table, with short explanatory notes.

| Caste. | Numerical strength. | | Where chiefly found. | Remarks. |
|---|---|---|---|---|
| | Male. | Female. | | |
| 1 | 2 | 3 | 4 | 5 |
| *Ahaṛia* ... ... | *2,035* | *2,010* | *Midnapore* ... | *Included in Namasudra.* |
| Abdál ... ... | 2,894 | 3,214 | Murshidabad, Rajshahi, Rangpur, Pabna and Purnea. | A low Muhammadan caste. The men castrate bullocks and the women act as midwives. |
| Aḷarki ... ... | 2,559 | 2,436 | Gaya ... ... | A Baniya caste. Sell vegetables and deal in grain. Some are cultivators. |
| Afghán ... ... | 211 | 300(M) | Patna ... ... | Traders from Afghánistan. |
| Afridi ... ... | 6 | ... (M) | Gaya and Khulna. | |
| Agariá ... ... | 6,754 | 6,463 | Chota Nagpur ... | The Agariás are a hill tribe who employ Bráhmans and claim Kshatriya descent. They must not be confounded with the Agariás who are a sub-tribe of Asurs. Some still speak their own language (Agariá). |
| Agarwála ... ... | 18,613 | 13,495 | Bihar and Upper India. | Traders and bankers. |
| *Agarwáni* ... ... | ... | ... | *Bhagalpur* ... ... | *Sawyers, probably immigrants from Nepal. Included in Agarwálas, as it was found impossible to separate them.* |
| Aghori or Aghora-panth | 2,524 | 2,591 | Bihar ... ... | The lowest class of Saivite religious mendicants. |
| Agradáni ... ... | 7,256 | 7,597 | Throughout Bengal | Bráhmans degraded for receiving presents at the first Sráddha. |
| Agrahári ... ... | 2,522 | 2,974 | Bihar and Upper India. | Traders and cultivators; allied to the Agarwálas. |
| Águri (Ugra Kshatriya.) | 44,667 | 45,702 | Western Bengal ... | Cultivators and traders. |
| Áhir ... ... | 1,934,715 | 1,894,223 | Bihar ... ... | Cowherds. Includes the figures for Goslá also. |
| Áhir Gaura ... ... | 305 | 298 | Orissa ... ... | Acrobats, jugglers and exhibitors of puppets. Similar to Kelá. Possibly the same as Aheriá or Gopál. |
| *Ajáṛ* ... ... | *145* | *270(F)* | *Bihar* ... ... | *Included in Kallar.* |
| Aját ... ... | 5,062 | 7,337(M) | Bihar ... ... | Muhammadans of very low social position who do not belong to any of the recognised functional groups. |
| Ajnási ... ... | 25 | 19 | Muzaffarpur ... | A term applied to teachers and others who know the Persian Alphabet as a token of respect. |
| Akhundji ... ... | 17 | 8(M) | Mymensingh ... | |
| Amát ... ... | 29,073 | 30,806 | Bihar ... ... | Cultivators; frequently employed as domestic servants. |
| *Amre* ... ... | *558* | *552* | *Hill Tippera* ... | *Included in Kuki.* |
| Aoghar ... ... | 141 | 49 | Gaya, Shahabad, Saran and Hazaribagh. | A sect of Saiva ascetics founded in Gujarat by a Dasnámi mendicant named Brahmagiri. |
| *Arakanese* ... ... | *20* | *1* | *Calcutta* ... ... | *Included in Magh.* |
| Aráin ... ... | 25 | 4 | Calcutta and Orissa. | |
| Arákh ... ... | 61 | 54 | Patna and Ranchi. | |
| Arya ... ... | 29 | 28(M) | Mymensingh ... | A title of Muhammadans of good social position. |
| Ashráf ... ... | 79 | 60 | Chittagong Hill and Hill Tippera. | |
| Assamese ... ... | | | | |
| Asur ... ... | 1,828 | 1,664 | Chota Nagpur ... | Iron smelters. The Asur language is still spoken in many parts. |
| Atashbáz ... ... | 37 | 24(M) | Dinajpur and Patna | Muhammadan firework-makers: they are reported to form an endogamous group. |
| Atith ... ... | 23,130 | 26,912 | Bihar ... ... | Devotees. |
| Atraf (Ajláf) ... | 234,716 | 220,485 | Throughout Bengal | A general name for Muhammadans who are not Shaikhs, Saiads, Moghals or Pathans, *i.e.*, for the lower classes. |
| Bábhan ... ... | 572,475 | 571,687 | Bihar and Chota Nagpur. | Landholders and agriculturists; often call themselves Zamindar Bráhmans or Bhuinhar Bráhmans. |
| *Bágál* ... ... | *5,525* | *5,536* | *Midnapore* ... ... | *Included in Ahir and Goálá.* |
| | *999* | *530* | *Bankura* ... ... | *Ditto Báuri.* |
| Bágdi ... ... | 509,912 | 522,151 | Western and Central Bengal. | Labourers and fishermen. |
| Bághuti ... ... | 3,859 | 4,038 | Orissa ... ... | Distinct from Bágdi, with which it seems to have been classed in 1891. |
| Baheliá ... ... | 4,441 | 3,718(H) | Bihar and North Bengal. | Catch birds and sell feathers, &c. Sometimes treated as a sub-caste of Dosadh. |
| *Baheliá* ... ... | *71* | *79(M)* | *Ditto* ... | *Included in Bediyá.* |
| *Bahrupi* ... ... | *14* | *19(M)* | *Nadia* ... ... | *Included in Bediyá.* |
| Baidya ... ... | 42,060 | 42,560 | Throughout Bengal | The physician caste. |
| *Bairágí* ... ... | *27,761* | *31,449* | *Ditto* ... | *Included in Baishnab.* |
| Báis Baniya ... ... | 21,016 | 19,568 | Bhagalpur ... ... | A trading caste. |
| Baishnab (Baistam) | 214,363 | 252,394 | Throughout Bengal | Converts to Vaishnavism who desert their original caste. Includes Bairági |
| Báiti ... ... ... | 8,750 | 8,490 | Western, Central and Eastern Bengal. | The same as Chunári, Lime-burners, mat-makers, etc. There is a Musalman caste of the same name. |
| Bákáli ... ... | 557 | 649(M) | Bhagalpur ... ... | Vegetable sellers and grain dealers. |
| Bakho ... ... | 1,515 | 1,543 | Bihar ... ... | Persons who sing at the birth of a child. |
| Bálija ... ... | 101 | 65 | Orissa. | |
| Banaudhiá ... ... | 573 | 586 | Patna and Muzaffarpur. | A sub-caste of Baniyas, Kurmis, Kumhárs, Dhánuks, Tántis, Sunris, Dosadhs and Kalwars; also a section of Rájputs and Kaserás. |

| Caste. | Numerical strength. | | Where chiefly found. | Remarks. |
|---|---|---|---|---|
| | Male. | Female. | | |
| 1 | 2 | 3 | 4 | 5 |
| *Banchar* ... ... | *119* | *94* | *Muzaffarpur* ... | *Included in Banpar.* |
| Bandáwat ... ... | 3,854 | 3,984 | Hazaribagh ... | A cultivating caste: claim to be Rájputs. |
| *Banya Banik* ... | *65* | *85* | *Dinajpur* ... ... | *Included in Baniya.* |
| *Bengadesi Banik* | *272* | *297* | *Purnea* ... ... | *Included in Baniya.* |
| Baniya ... ... | 103,006 | 106,515 | The whole Province | A generic name of various trading castes including Bais, Gandhabanik, Khatri, Maheswri, Rauniár, Subarnabanik, Kalwar, &c. |
| Banjárá (Labáná) ... | 161 | 149(H) | Tributary States of Chota Nagpur. | Forest pedlars and cattle graziers. Called Lambádi or Banjári in Madras. |
| | 3 | 3(M) | | |
| Banjógi ... ... | 347 | 349 | Chittagong Hill Tracts. | Live by jhuming. Language Banjógi. |
| Banpar ... ... | 2,599 | 2,841 | Bihar ... ... | A boating and fishing caste. From ban (wood) and phár (to split). |
| Bántar ... ... | 10,343 | 11,908 | Do. ... ... | Basket and mat-makers; thatchers. |
| Banwár ... ... | 426 | 425 | Santhal Parganas ... | A small Dravidian tribe. |
| Báola ... ... | 630 | 874 | Hooghly and Murshidabad. | A sect of Vaishnava devotees. |
| Barhi ... ... | 150,501 | 155,962(H) | Bihar, Orissa and Chota Nagpur. | Carpenters. |
| | 2,107 | 2,895(M) | | |
| Bári ... ... | 7,351 | 7,445 | Bihar ... | Leaf-plate makers. |
| Barna Bipra (Barna Bráhman). | 24,063 | 23,224 | Throughout Bengal | The Bráhmans who act as priests to the lower castes including Sutradhars, Sáhás, Chandáls, Bhuinmális, Dhobis, Kapális, Goálás, Bágdis, Kaibarttas, Kalus, Subarnabaniks, Kaseras, &c. |
| Barna Sankar ... | 3,378 | 3,019 | Bihar, Chota Nagpur and Midnapore. | Persons of mixed descent. |
| Barnawar ... ... | 12,392 | 12,184 | Bihar ... ... | A sub-caste of Baniyas engaged in trade agriculture and service in Bihar. |
| Bárui (Barai) ... | 145,379 | 147,384 | Bengal and Bihar... | Betel-leaf growers. Also called Páneri. |
| Bathudi ... ... | 22,641 | 22,899 | Orissa, including Tributary States. | A small aboriginal tribe. Language Báthudi. |
| Bauri ... ... | 293,594 | 301,296 | Orissa, Western Bengal and Chota Nagpur. | Pálki-bearers, earth-workers and cultivators. |
| Bedea ... ... | 10,733 | 12,163 | Chota Nagpur ... | A small agricultural tribe; allied to the Kurmis. |
| Bediyá (Bádiyá) ... | 6,574 | 5,757(H) | Bengal and Bihar | Gipsies, acrobats, etc.; not to be confused with the Bedeás of Chota Nagpur. There are several distinct groups of Bediyás including Babajiá, Mirshikári, Shándar, Mal and Sámperiá. |
| | 16,448 | 16,173(M) | | |
| Behárá ... ... | 23,753 | 23,559(M) | Eastern Bengal ... | Said to be a true caste in Kuch Bihar and among the Muhammadans of East Bengal. |
| | 6,054 | 5,051(H) | ..... | |
| | *7,731* | *6,663* | ..... | *Included in Dodi in Jalpaiguri, Rangpur and Dinajpur.* |
| Feldár ... ... | 49,238 | 48,817(H) | Bihar, Chota Nagpur and Eastern Bengal. | Earth-workers. In Backergunge this is the name of a Muhammadan caste of drummers. |
| | 2,817 | 2,855(M) | | |
| Bengali ... ... | 1,541 | 1,519 | The whole Province, except Chittagong Division. | Any native of Bengal. |
| Berwá ... ... | 2,455 | 2,308 | Eastern Bengal ... | Fishermen and cultivators; allied to the Chandáls. |
| Besáti ... ... | 273 | 251(M) | Bihar ... ... | Pedlars and vendors of miscellaneous goods. |
| Besyá ... ... | 1,462 | 13,231 | Throughout Bengal | Prostitutes. The term in no sense indicates caste, but, as the persons concerned have lost caste, there is no better heading. |
| Bhagawáni ... ... | 52 | 63 | Jessore ... ... | A sectarian group, partly Hindu and partly Muhammadan. |
| Bhakat ... ... | 1,528 | 1,766 | Midnapore ... ... | A Vaishnava sect. |
| Bhandári ... ... | 50,185 | 51,785 | Orissa ... ... | Barbers; also called Hajjám. |
| Bhánr ... ... | 449 | 538(M) | Bihar ... .. | A Muhammadan caste, also known as Bhárwa whose men and women dance and act. The men are often pimps. |
| Bhar ... ... | 21,706 | 180,607 | Bengal, Bihar and Chota Nagpur. | Cultivators. |
| *Bhárang* ... ... | *160* | *117* | *Khulna* ... ... | *Included in Namasudra.* |
| *Bhárati* ... ... | *17* | *5* | *Hazaribagh* ... | *Included in Gosain.* |
| *Bhárwá* ... ... | 67 | *109(M)* | *Shahabad* ... ... | *Included in Bhar.* |
| Bháskar ... ... | 231 | 184 | Calcutta and Palamau. | Make idols of stone, wood or metal. Also painters. |
| Bhát ... ... | 15,841 | 16,194(H) | Throughout Bengal | Genealogists and family bards. |
| | 6,304 | 6,968(M) | | |
| Bhathiárá ... ... | 976 | 1,300(M) | Bihar ... ... | A very low Muhammadan caste whose women cut grass, do syces's work and cook for Muhammadan travellers. |
| Bhátiyá ... ... | 144 | 116(H) | Calcutta and Rangpur. | A low mendicant caste. Live by dancing, juggling and singing. |
| | 695 | 1,056(M) | | |
| *Bheriár* ... ... | *3,495* | *3,703* | *Bihar* ... ... | *Included in Gareri.* |
| Bhisti ... ... | 222 | 276(M) | Champaran ... | |
| Bhogtá ... ... | 37,987 | 40,224 | Chota Nagpur ... | Parch rice. Sometimes said to be a subdivision of Kmarwár. |
| Bhoi ... ... ... | 167 | 167 | Midnapore, Cuttack and Balasore. | |
| *Bholla* ... ... | 2,328 | 2,221 | *Birbhum and Murshidabad.* | *Included in Bágdi.* |
| *Bhotan Bhotia (Drukpá or Dharma Bhotia.)* | *1,272* | *1,121* | *Darjeeling* ... ... | *Included in Bhotia.* |
| Bhotia ... ... | 11,960 | 10,660 | Jalpaiguri and Darjeeling. | |
| Bhuiamáli ... ... | 45,165 | 44,200 | Eastern and North Bengal. | A menial and scavengering caste; allied to the Háris. |

| Caste. | Numerical Strength. | | Where chiefly found. | Remarks. |
|---|---|---|---|---|
| | Male. | Female. | | |

| Turi ... ... | 23,657 | 25,785 | Chota Nagpur ... | Workers in bamboo and basket-makers; also cultivators. The Turia language is still spoken in Ranchi and Jashpur. Said to be a sub-caste of Dom in Manbhum. |
| Tutiá ... ... | 4,341 | 3,859 | Midnapore ... ... | Silk worm rearers. Muhammadans. |
| Ujiá ... ... | 3,247 | 3,361 | Balasore and Tributary States of Orissa. | A degraded caste of fishermen. |
| Vaisya ... ... | 4,112 | 4,117 | Bengal ... ... | Traders. |
| Yákhá ... ... | 1,334 | 1,043 | Jalpaiguri and Darjeeling. | A small agricultural tribe. Their language is Yákhá. Their title is Dewan. |

# APPENDIX VII.—Analysis of certain Subcastes.

## ÁGURI or UGRA KSHATTRIYA.

JÁNÁ ÁGURI (c) ... West Bengal. | SAT ÁGURI (c) ... West Bengal.

The head member of a Jáná Aguri family wears the sacred thread and he alone can take part in the performance of the religious and *Sradh* ceremonies, in which the other members are not allowed to join. The Sat Aguris have no such distinction and none of them wears the thread.

Each subcaste considers itself superior to the other. Intermarriage is absolutely forbidden. Dining and smoking together do not seem to be forbidden in Birbhum. In Burdwan they will eat, drink and smoke in the house of a Bráhman only. Members of one subcaste cannot gain admission to the other. Each has its own administration.

Each subcaste is divided into Kulin, Satgrihastha and Maulik. A Kulin is not forbidden to marry in the family of a Satgrihastha or Maulik, but to do so brings a certain amount of discredit on his family, and a series of such marriages would reduce it to the rank of the Satgrihastha or Maulik. The Jáná subcaste is further subdivided into four sections:—(i) Shagrami, (ii) Paschim Tarafi, (iii) Kasipuri, and (iv) Bargrami—named after their places of residence.

## BAGDI.

KHETRI ... West Bengal.
KUSMETIA (a) Ditto.
TENTULIA (a) West Bengal.
TRAYODAS (c) Ditto.
NODA (f) ... West Bengal.

The differentiation by subcastes arose partly from residence in different localities and partly from occupation. The Nodas who are generally fish-mongers rank low in consequence. The Tentuliá occupies the highest rank in Birbhum. In Birbhum intermarriage is not allowed, but the members of the different subcastes can smoke and eat cooked rice together. In Howrah intermarriage is allowed between the Tentuliá and Trayodas subcastes, but rarely between the Kusmetiá and Noda, who will not eat rice with each other. The period of mourning varies. It is observed for 31 days by the Kusmetiá and Tentuliá and for 13 and 11 days by the Trayodas and Noda respectively.

## BARAI.

MAGAHIA (t) ... Bihar.
JAISWAR (f) ... Do.
CHAURASIA (f) Do.
SEMERYA (f) Do.
SOKHWA (c) ... Do.
TAMBOLI (f) ... North Bihar.
UNAISWÁN (a) North Bihar.
BISWÁN (a) ... Ditto.
KANAUJIA (t) South Bihar.
MÁSAJIA ... Ditto.
EKUSÁ (a) ... Ditto.
BÁISÁ (a) ... Ditto.
BIRÁSIÁ (a) ... South Bihar.

The Chaurasia is so called for cultivating, and the Jaiswar and Semeryá for selling, betel-leaves. Sokhwa is named after Sokha, its tutelary deity. The Kanaujia and the Magahia are so called from the places where they originally resided. Each subcaste claims a higher rank than the others, but in some districts the Chaurasia is admitted to rank above the Magahia, because it abstains from drinking, in which the latter indulges freely. Intermarriage is strictly forbidden except in a few districts. All the subcastes will drink water from each other's hands and sometimes smoke, but they will not eat together. Admission to other sub-castes is not allowed, and each has a separate punchayat.

## BARHI.

MAGAHIA (t) ... Bihar and Chota Nagpur.
KANAUJIA (t) ... Ditto.
KOKÁS (d) ... Ditto.
KAMAR KALLA (a) Bihar.
LOHAR (f) ... North Bihar and Chota Nagpur.
AURANGIA LOHAR. (t) ... North Bihar.
MUNGERIA (t) ... Ditto.
TIRHUTIA (t) ... Ditto.
GURHA ... Ditto.

Tradition says, that while constructing the dwellings of Heaven Viswa Karma perspired, and the Magahias were born from the drops of sweat that fell from his forhead, and the Kámár Kallas from those that fell from his waist. The Kokás say that once, when they were ordered by a certain Raja to complete a piece of timber work within a specified time, having left their measuring tape behind, they cut their sacred thread and used it instead, for which they were degraded. The Barhis are also gun-makers in Monghyr. The Magahias are there the highest, and the Kámár Kalla the lowest in rank, the rest being all equal. In Bhagalpur Magahia is the first, Kanaujia the second, Kámár Kallas the third, and Aurangia Lohar the lowest in rank. Intermarriage amongst all the subcastes is strictly forbidden, on penalty of excommunication, but Magahias who intermarry with the members of the other subcastes, though degraded from their own, are accepted in the subcaste in which they have married. In Bhagalpur, intermarriage between the Magahias and the Aurangis Lohars is allowed.

The various subcastes drink and sometimes smoke, but, as a rule, do not eat, together. In Bhágalpur the Magahias will eat with the Aurangia Lohars and the Kanaujias will eat rice cooked by the Magahias. The Magahias and (in Bhagalpur) Aurangia Lohars alone, can gain admission to other sub-castes. Each subcaste has a separate punchayat, but in important cases, influential members of other subcastes are asked to assist.

---

Note.—The list of subcastes and of the places where they are found is not exhaustive. It contains merely the names of the subcastes actually reported on in certain districts. The object of these notes is to analyse the causes of caste differentiation and not to give a complete list of subcastes. For information on this point the Tribes and castes of Bengal should be consulted. The letters added after the name of subcaste indicate the cause of the distinction thus:—(a)=Ancestral. (c)=Ceremonial. (d)=Degraded. (f)=Functional. (t)=Territorial.

## BARUI.

| | | | |
|---|---|---|---|
| RÁRHI (*t*) | ... West, Central and East Bengal. | NÁTHÁN | ... West Bengal. |
| BÁRENDRA (*t*) | ... Bengal | JESSORI (*t*) | ... Ditto. |
| UTTAM | ... West Bengal. | SUKLI (*a*) | ... 24-Parganas. |
| ORIYÁ (*t*) | ... Ditto. | SANÁTAN (*a*) | ... Ditto. |
| GHAZIPURI (*t*) | ... Ditto. | HIRÁMOHAN (*a*) | Ditto. |
| GANGATIN | ... Ditto. | GAUTAM (*a*) | ... Ditto. |

The Baruis claim their descent from one Madhab, who was created by Brahmá, at the request of the Bráhmans, to relieve them of the labour of betel-vine cultivation. Madhab had four sons named Sukli, Sanátan, Hirámohan and Gautam, and the four sub-castes of the 24-Parganas took their names from the four sons. The two ordinary sub castes in Bengal are Rárhi and Bárendra which are purely geographical names. The Rárhis are further subdivided into two sections; Uttar Rárhi and Dakshin Rárhi. The former do Puja to their *Pás* gardens on the 9th day of Agrahayan, while the latter observe the ceremony on the 5th day of Baisakh. In Jessore the Bárendra has two subdivisions, Náthán and Kota. The women of the former wear nose-rings, but those of the latter do not. Intermarriage is permitted among the subsections. Oiryá is also a territorial name.

The relative rank of the two main sub-castes (Rárhi and Bárendra) varies according to their numerical strength. The Oriyá ranks higher than the Uttam. The Gangatin subcaste is looked on as superior in Howrah. In the 24-Parganas the Oriyá stands first.

Intermarriage is absolutely forbidden, except in Nadia, where it is gradually coming into vogue. In Nadia and 24-Parganas, all the subcastes freely eat, drink and smoke together, but in other districts, commensality is confined to *pakki* food. Each of the subcastes has a separate administration.

The practice of *kulinism* is in vogue. The Kulins take money when marrying a son or a daughter to a Maulik.

## BAURI.

| | | | |
|---|---|---|---|
| DHULIÁ | ... East, West and Central Bengal. | MÁLUÁ | .. East Bengal. |
| JHÁTIÁ (*c*) | ... West Bengal. | PATURIA | ... Ditto. |
| MALLÁ BHUMIÁ (*t*) | ... Ditto. | THATIA | ... Ditto. |
| KÁTHURIÁ (*f*) | ... East and West Bengal. | MALLA BHUMIA (*t*) | Ditto. |
| PANCHA KOTI (*t*) | Ditto. | MOLA | ... East and Central Bengal. |
| | | SIKHARIA (*t*) OR GOBARIA | ... West and Central Bengal. |

Mallá Bhumiá denotes a group who were originally residents of Manbhum, and Sikharia, those of Sikharbhum, the tract between the Kasai and Barakar rivers; Panchakoti is also a territorial name and refers to Pachet in Manbhum. The word Gobaria is said to refer to the practice of using cowdung to clean up the place where food has been eaten. Jhátiá is the name of a subcaste, whose members simply sweep away the fragments of a meal without washing the place.

The subcastes are all equal in rank, and local superiority generally depends on the numerical strength.

The social customs differ in various districts. In Burdwan, Hooghly and Birbhum intermarriage is forbidden on pain of social excommunication. In Faridpur and Nadia the same rule is in vogue, but the offending party may be readmitted to his own subcaste on paying a penalty. In Bankura intermarriage is freely allowed to all.

In Burdwan they neither drink nor smoke with each other, but in Hooghly they do so except on ceremonial occasions. In Birbhum and Faridpur they smoke, but will not eat or drink together. In Nadia and Bankura they freely eat, drink and smoke with each other. In Bankura a member of one sub-caste, by giving a feast, can gain admission to any other subcaste, and one single panchayat governs them all. This is not the case in other districts.

## BHANDARI.

| | | | |
|---|---|---|---|
| BENGALI (*t*) | ... Orissa. | GOLA (*d*) | ... Orissa. |
| DAKSHINI (*t*) | ... Do. | HÁTUÁ (*f*) | ... Do. |
| DESI (*t*) | ... Do. | SASANI (*c*) | ... Do. |
| KHARIÁ (*f*) | ... Do. | JHARIÁ (*t*) | ... Chota Nagpur Plateau. |
| KHARDÁ (*t*) | ... Do | ORYIÁ (*t*) | ... Ditto. |

Difference of locality or occupation account for the origin of several sub-castes. The Khariá Bhandáris are so called from having worked as coolies in the salt manufactories and are somewhat degraded. The Hátuás and Golas are lowest in social rank. The Golas shave the Muhammadans and also cut the nails of the fingers (not of the toes) of the Golas, who are a very low caste. The Hátuás are those who shave the Hátuás (*i.e.*, people who carry on trade and frequent hâts or markets), without any distinction of caste, such as Gurias, Telis, Gauras, etc. The Desis are said to be the original inhabitants of the country, and therefore were called by that name. They are further subdivided in Puri into Chamas and Kansamutias. When the Káyasths emigrated to Orissa, they brought with them Bengali Napits who afterwards came to be known as Bengali Bhandáris. The Sásani Bhandáris take their name from the fact that they serve the high class Bráhmans of that subcaste. The Dakshini Bhandáris lived originally in the south of Orissa. The Khardás claim superiority of rank, because the Rájá of Puri used to employ them. The rest are all equal in social rank. The Oriyá and Jhariá are reported from Angul only. The Oriyás are considered superior to the Jhariás.

Except in Puri where it is punished with social excommunication, intermarriage, though unusual, is not absolutely forbidden, and in any case the offending party has only to pay a fine to avoid serious consequences. Bengali Bhandáris, however, cannot as a rule, intermarry with the other sub-castes.

Except in Balasore and Puri, they drink and smoke together and eat pakki, but not cooked rice. In Balasore and Puri they neither eat, drink nor smoke together.

The subcastes have separate panchayats in Cuttack. In Balasore and Puri, where the panchayat system is not in vogue, each subcaste has its own head-man.

## BHUIYA.

| | | | |
|---|---|---|---|
| RAJKUAR (*a*) | ... Singhbhum | RIKHIASAN (*c*) | ... Manbhum. |
| BICHWAR | ... Ditto. | MUSHAHAR (*c*) | ... Ditto. |
| BATHURI | ... Ditto | RAIGHATWAR (*f*) | ... North Bihar. |
| KATRAS | ... Ditto. | | |
| GHATWAR OR GHATWAL (*f*) | ... Manbhum. | RAIMANJHI (*f*) | ... Ditto. |

In Singhbhum, the Rajkuars, who claim descent from the old kings of Singhbhum, are first in rank. Intermarriage between the subcastes is absolutely forbidden under penalty of being out-casted.

Bhuiyas of the northern part of Manbhum claim descent from the Solar Kshattriyas and wear the sacred thread. Others claim descent from Paban, the god of wind, and say that their ancestors were the soldiers of Hanumanth, the monkey general of Ram Chandra.

The Ghatwars, who rank first, are the keepers of ghats or mountain-passes, employed by the Rájás and zemindars. Rikhiasan is derived from Rikhya, a bear, and Asan, to eat. The members of this subcaste are said to have formerly eaten bear's flesh. Musahar probably means mouse-eater. Raighatwar ranks above Raimanjhi. In Birbhum, there are no subcastes.

Each subcaste is practically an independent caste and intermarriage or commensality is absolutely forbidden. No one can gain admission to another subcaste. They have no panchayats, but they follow the *Vyavastha* or decision of their Brahmans.

## BHUMIJ.

| | | | |
|---|---|---|---|
| KOL | ... Chota Nagpur. | BARABHUMIÁ (*t*) | ... Chota Nagpur. |
| MURA | ... Ditto. | SIKHARIÁ (*t*) | ... Ditto. |
| THÁKUR | ... Ditto. | PATKUMIÁ | ... Ditto. |
| MÁNKI | ... Ditto. | TAMÁRIÁ (*t*) | ... Ditto. |
| DESI (*t*) | ... Ditto. | | |

The first four sub-castes are found in Manbhum and they rank in the order in which they are entered The rest are found in Singhbhum where the Desi stands first, the Barabhumiá and Sikhariá second, and the Patkumiá third in rank. The Tamáriá ranks last. The Desis are the original inhabitants of the country. The Mura can intermarry with the Sikharia, Patkumiá and Barabhumiá. All of them, except the Tamáriá, drink together. The Barabhumiá can intermarry and drink with the Sikhariá only. The Patkumiás are not allowed to marry with the Desi or Tamáriá. No one of any sub-caste can gain admission to another.

In Manbhum, there is one panchayat for the whole caste, but in Singhbhum, every subcaste has its own panchayat.

## BIND.

| | | | |
|---|---|---|---|
| LODHIYÁ | ... North Bihar. | RAJWAR (*a*) | ... South Bihar. |
| GONR (*a*) | ... Bihar. | NUNIYA (*f*) | ... Ditto. |
| KHARIAT (*f*) | ... Ditto. | BINDKHARA (*f*) | Ditto. |
| JULÁNTIA | ... Ditto. | AWADHIÁ (*t*) | ... Ditto. |
| NUN (*f*) | ... South Bihar. | | |

The Awadhiá subcaste is said to have come from Oudh; the Khariat is so named from their making *khari* (saltpetre).

Juláutia means eldest or best, and Nun means salt. It is said in Monghyr that the Nun Binds are not Binds at all, but Nuniyas, whose hereditary occupation is to prepare salt and saltpetre. The Gonr subcaste ranks first, and the Khariat second, the rest being all equal. The Bindkhara claims to be a subcaste of the Nuniyas, but some say it is a subcaste of Mallâh and is so-called from its occupation, *i.e.*, making fishing nets.

The Binds of Saran say that they have no subcastes, but it appears that all belong to the Kharist subcaste. Intermarriage between the subcastes is strictly forbidden under penality of being outcasted. They neither eat, drink nor smoke together, except in Purnea, where they smoke and drink, but do not eat in company.

## BRAHMAN.

| | | | |
|---|---|---|---|
| RÁRHI (*t*) ... BÁRENDRA (*t*) ... | West, Central and East Bengal. | BAIDIK (*a*) | ... East Bengal. |
| VYASOKTA (*f*) ... | West Bengal. | MADHYA SRENI (*t*) ... | West Bengal. |
| BARNA BRÁHMAN (*f*) | ... Ditto. | KÁNYAKUBJA (*t*) ... | South Bihar and Chota Nagpur. |
| AGRADÁNI (*f*) ... | West and East Bengal. | KANAUJIA (*t*) | ... West Bengal. |
| JYOTISH OR GRAHÁCHÁRYA (*f*) ... | West Bengal. South Bihar and Chota Nagpur. | SARWARIA (*t*) ... TAILANGI (*t*) ... KARNATI (*t*) ... MAHÁRÁSHTRIYA (*t*) ... NAGOR (*t*) ... GURGURETA ... PANCHAGRAM (*t*) | Chota Nagpur. |
| MAITHIL (*t*) ... UTKAL (*t*) ... | West Bengal and Chota Nagpur. | JAIPURIA (*t*) ... DAKHINDIGNA (*t*) | Chota Nagpur, Plateau. |
| MAGHUA (*d*) | ... East Bengal. | GURJORA (*t*) | ... Ditto. |
| MAHÁ BRÁHMAN (*f*) | ... South Bihar. | GANGAPUTRA (*f*) | Ditto. |
| DRÁVIRI (*t*) | ... Ditto. | MAHÁPÁTRA (*f*) | Chota Nagpur. |
| SÁRASWAT (*t*) | ... South Bihar and Chota Nagpur. | PANCHADESI (*f*) | Ditto. |
| SANDWIPI (*t*) | ... East Bengal. | SASAN (*c*) | ... Orissa. |
| DHAMI (*f*) | ... South Bihar. | LAUKIK (*c*) | ... Do. |
| GÁYÁWÁL (*f*) | ... Ditto. | SARACHÁTIA (*t*) ... | Do. |
| GAURA (*t*) | ... South Bihar and Chota Nagpur. | | |
| SAROTRIA (*c*) | ... Ditto. | | |
| SAKADWIPI (*c*) | ... Ditto. | | |

Nearly all the sub-castes are territorial.

The Rárhi and Bárendra Bráhmans of Bengal, trace their origin from the five priests brought from Kanauj in the ninth century, by Adisur, for the purpose of performing some Vedic sacrifices. Although the priests brought their wives with them, they contracted marriages with the women in Bengal, and their children by the latter were the ancestors of the Bárendra subcaste, while the Rárhis represent the offspring of the original Hindustáni wives.

The Baidiks are divided into two sections. Páschátya, that is of Western India, and Dakhinátya that is of Southern India. They claim to be the original settlers in Bengal who refused matrimonial alliances with the new-comers. The Rarhi claims superiority over the other two subcastes, but in Dacca the Baidiks claim higher rank on the score of purity and learning and the fact that, until recently, no member of their class accepted service of any kind, though the Rárhis and Bárendras had done so long ago.

The Vyasokta, Barna-Bráhman, Agradáni, Jyotish or Graháchárya, and Mahá Bráhmans are functional subcastes who are regarded as degraded on account of their low occupations. Food and water touched by them are considered impure by other Bráhmans and even by all the clean castes. The descendants of Bráhmans who degraded themselves by officiating as priests at the religious ceremonies of the low-caste Hindus, are called Barna Bráhmans. Agradánis are called so, on account of their accepting the *dán* or offerings at a *Sradh* ceremony. Jyotish or Graháchárya (Jyotish means astrology, graha, a planet, and áchárya, a professor) means one versed in the science of astrology. They are looked down upon for receiving the *dán* or offerings made to propitiate the evil influence of the planets. It is doubtful if their origin is the same as that of the pure Bráhmans. A good Bráhman would not return the salutation of a Graháchárya but would say "*Nabagrahaya nama*" (I bow to the nine planets).

The Maghuás were originally good Bráhmans, but are now degraded because Maghs entered their houses and defiled them. Mahá Bráhman is an ironical nickname given on account of their officiating in funeral ceremonies. Their touch defiles and they are not allowed to enter the house. The Sandwipi Bráhmans rank low because in the time of Rájá Dilal, the people of Sandiwip were compelled to marry indiscriminately by breaking caste rules. The Dhámis and the Gayáwáls derive their names from *Gayá dhám*. They are priests who officiate at the offering of *Pindas* and take the offerings made. The Gauras are divided into two sub-classes, viz., (*i*) Madhya Gaura, and (*ii*) Adi Gaura. The Sarotrias derive their names from *Sruti*. Originally they were great Pandits, but now they are often quite illiterate.

The Sakadwipi, it is said, were brought from Sakadwipa by Srikrishna through Narada's advice to perform the worship of the Sun. They did so and the Prince recovered. Srikrishna then persuaded them to settle in India. The Kányakubja were present at a *Yajna* held by Rájá Dasarath and were offered *dán* or remuneration which they refused to accept, and so had to leave the place and settle elsewhere. They are now divided into many sub-classes viz.— (i) Kanaujia proper, (ii) Sarjupari, (iii) Sarwaria, (iv) Juhutia, and (v) Banaudhia, according to the places they settled in.

It is said that the Panchadesis were members of lower castes elevated by the Rájá of Orissa, who exercised full authority in caste questions. The Bráhmans imported to Orissa by the *Kesari* or Lion dynasty are called Sásan Bráhmans, and those who emigrated to Orissa previously and were subjected to Buddhist influences are called Laukik Bráhmans. Others say that the Rája of Puri divided the Bráhmans into two classes and that those who regarded all the injunctions of the *Shastras* were called Sásan and that those who did not were called Laukik. The Laukik Bráhman is further subdivided into three classes, *e.g.*, Sarka (whose occupation is to grow *saru* or *kachu*, a kind of vegetable), Saraibatia or Mastán (whose chief occupation is cultivation), and *Dánuá* (who accept offerings in religious ceremonies). Sarachátia is not a subcaste, but the name of the rich Bráhmans who live near the *Sukhi Gopal* temple and deal in cocoanuts.

It has already been said that the clean Bráhmans will not even smoke with those who are of low class. The higher classes will smoke, drink and eat pakki food together, but will not on any account take cooked rice in company.

Intermarriage is absolutely forbidden. No one can gain admission to a different subcaste of equal or higher status. The higher subcastes may, however, be degraded to lower ones by adopting their profession. Each subcaste has a separate Samaj of its own.

## CHAIN.

| | | | |
|---|---|---|---|
| BARA CHAIN | ... Malda. | CHOTA CHAIN | ... Malda. |

The Bara Chains rank above the Chota. The former will smoke and drink, but will not eat with the latter. If a Bara marry a Chota, he is degraded to that subcaste. Each subcaste has its own Panchayat.

## CHAMAR.

| | | | |
|---|---|---|---|
| CHAMÁR TÁNTI (*f*) | Bengal and North Bihar. | LARKOR | ... Bengal. |
| DOHÁR | ... Ditto. | RABIDAS | ... Do. |
| DHÁRH (*a*) | ... North Bengal and Bihar. | RISHI | ... Do. |
| DHUSIÁ | ... Bengal, Bihar and Chota Nagpur. | MAGHA (*d*) | ... East Bengal. |
| GORIA (*a*) | ... Bengal and Bihar. | KHUNTIA CHAMÁR. | Ditto. |
| JAISWAR | ... Ditto. | BARABHÁGIÁ (*a*) | North Bengal. |
| JANAKPURI (*t*) | North and East Bengal and Chota Nagpur. | KORI | ... Ditto. |
| JAUNPURI (*t*) | | KANAUJIÁ (*t*) | ... North Bengal and North Bihar. |
| MAGAHIA (*t*) | ... North and South Bengal and Bihar. | CHUNITTARN | ... North Bihar. |
| PACHHIÁN | ... North Bengal and South Bihar. | KUPGAN | ... Ditto. |
| KHATIMÁHÁRÁ | ... Bengal. | TIRHUTIA (*t*) | ... Ditto. |
| KURAR | ... Do. | KORACHAUN | ... Ditto. |
| | | MOCHI (*f*) | ... North Bihar. |

The Gorias claim to be descended from a Chamár father and Goálá mother. Magahia and Kanaujiá are mere geographical names. The Maghas were degraded because Maghs entered their zenanas.

Rabidás is superior to all in rank. In Dinajpur Barabhágia is superior to Goria, and Jaiswar to Dhusia; but in Mymensingh and Shahabad Dhusia is superior to all the other sub-castes. In Saran Kanaujiá stands first, Dhusia second, Jaiswar third, Chamár Tánti fourth, and Magahia fifth in rank. The rest are all equal.

Intermarriage between the subcastes is strictly forbidden on pain of being outcasted. But the son of a Rishi can marry the daughter of a Rabidás on payment of a fine. If a Jaiswar marries a Dhusia in Dinajpur, he or she becomes a Dhusia. Male Dhusias can marry Kanaujiá women, but if a Dhusia girl marries a Kanaujiá man, the latter must give a feast to the girl's relatives.

The members of different subcastes will not usually eat, drink or smoke together, but a Rabidás may eat and drink with Rishi, and the Jaiswar and Dhusia subcastes freely eat, drink and smoke with each other. In Mymensingh Goria and Dhusia only drink together. In Saran, Dhusia, Kanaujiá and Jaiswar may smoke together.

A Rishi can become a Rabidás on payment of a fine. No member of any other subcaste can gain admission to another, except in a few cases by intermarriage as noted above. Every subcaste has its own panchayat.

## CHANDAL OR NAMASUDRA.

| | | | |
|---|---|---|---|
| HÁLIÁ (*f*) | ... Central, East and North Bengal. | BAGGÁL | ... Central and East Bengal. |
| JALIÁ (*f*) | ... Ditto. | JIÁNI | ... Ditto. |
| SIALI | ... West, Central and East Bengal. | NÁLO | ... Central Bengal. |
| NUNIÁ (*f*) | ... West and Central Bengal | KORÁ | ... Ditto. |
| CHÁSI (*f*) | ... Ditto. | PANFALIÁ (*f*) | ...West Bengal. |
| GOLUK | ... Ditto. | MECHO (*f*) | ... Ditto. |
| KESHURA (*f*) | ... Ditto. | BÁRHAI (*f*) | ... East Bengal. |
| RÁJBANSI (*f*) | ... Ditto. | KARATI (*f*) | ... Ditto. |
| KOTALIA (*f*) | ... Ditto. | CHANDÁL | ... Ditto. |
| NAMASUDRA | ... Ditto | HAWA | ... Ditto. |
| TIYAR | ... Ditto. | KÁHÁR | ... Ditto. |
| DHANI (*d*) | ... Central and East Bengal. | BERUÁ (*f*) | ... Ditto. |
| KÁRÁL | ... Ditto. | KÁTURIÁ (*f*) | ... Ditto. |
| | | PACHIMÁ | ... Ditto. |

Most of the Chandál subcastes are functional.

Beruá is from *bar*, a bamboo fishing contrivance used by the subcaste so named. Bárhai and Karati are carpenters; the Káhár is a palki bearer; the Keshura deals in the root of that name; the Pánphalia deals in panphal and makes traps and snares; the Kotália is a village watchman; the Nunia prepares salt; the Káturiá makes wooden utensils and burns shells for lime; the Jáliyá is a fisherman; the Chási a cultivator, the Rájbansi a mason; the Baggál a pedlar, and so on. The Dhani sub-caste is said to have been degraded because of pollution by Maghs. The Háliá and Beruá are said to have become separated because they use different kinds of fishing nets. In some parts Siáli and Jiáni are looked on as sub-divisions of Háliá and not as independent subcastes.

The Namasudra, properly so called, ranks highest, and then in order the Rájbansi, Tiyar and Kotál. In Howrah the Chási subcaste forbids widow marriage and is on this account awarded the first place; it is followed by Háliá, Barhi, Beruá, Jáliyá, and Pachimá, while the Dhani, Nunia and Kárál are said to come last.

Intermarriage is generally forbidden. When it occurs the bride or bridegroom, as the case may be, is degraded to the subcaste of the other party, but the Namasudras, Rájbansis and Tiyars can intermarry on payment of a fine. The Háliás and Bárhais permit intermarriage between themselves, but not with other subcastes. A Pachimá can marry a Háliá on payment of a fine. A Jiáni marrying a Dhani will himself become a Dhani. In Faridpur, where the Jiánis are most numerous, a Jiáni girl, if married to a Namasudra proper, will be admitted to her husband's subcaste. In Nadia, a Jiáni can be readmitted to his own subcaste, after intermarriage with a lower subcaste, by giving a feast to the people of his own group.

The subcastes do not generally eat or drink together, but there are some exceptions. The Pachimás can dine with the Háliás. In Khulna and Nadia, a Háliá and a Siáli will eat together. The Korás and Nálos eat, drink, and smoke together. In Bankura the Pánfalias and the Kotálias freely eat, drink and smoke together, but in Midnapore they will only smoke. The Nuniás and the Siális will eat, drink, and smoke with others in Bankura, but they will do so only with the Mecho subcaste in Howrah. The Keshura will smoke only with the Pachimá subcaste. A Dhani may take food in the house of a Siáli but not *vice versá*. In the 24-Parganas the different subcastes will smoke and drink and eat sweet-meats, but will not partake of cooked rice, in each others company. In Backergunge they may freely drink and smoke together. A member of one subcaste can there gain admission to a higher one by paying money and by giving up his occupation and taking to that of the higher one, *e.g.* a rich Jáliyá by giving a feas may become a Háliá. The lowest subcastes, however, can by no means gain admission to higher ones.

Each subcaste has its own administration, usually with its priest at the head.

## CHASA.

| | | | |
|---|---|---|---|
| ORH (*f*) | ... Orissa. | SUKULIYÁ (*c*) | ... Orissa |
| BENÁTIYÁ (*g*) | ... Do. | KOLTHÁ (*a*) | ... Do. |
| CHUKULIYÁ (*f*) | Do. | | |

The Orh Chásás, it is said, were the first of the aboriginal tribes who settled in Orissa and began to cultivate the soil. They were very numerous and the country was called after them. The Benátiyá is said to have been created, from a tuft of the *Bena* grass or to be descended from those who first made the land fit for cultivation by clearing away the *Bena* grass. There is no material difference between the Chukuliyá and the Sukuliyá, save that the latter do not allow their females to appear in public; they both extract salt from the sea water.

The Benátiyá subcaste stands first in rank and the Sukuliyá and the Chukuliyá lowest. In Puri there is no restriction on intermarriage or eating together. In Cuttack a Benátiyá may intermarry with the other subcastes on payment of a fine to his Panchayat; all the subcastes may drink and smoke together but may not partake of cooked rice. In Balasore intermarriage and commensality are both prohibited, except between the Chukuliyá and Sukuliyá subcastes. Rich members of the Sukuliyá or Chukuliyá subcastes can obtain wives from the higher classes, but are not allowed to eat, drink or smoke with them. The Kolthá subcaste is reported from Angul, but it seems to be really a separate caste.

All the subcastes have separate Panchayats, except in Puri, where one single Panchayat governs the whole caste.

## DHANUK.

| | | | |
|---|---|---|---|
| DUDHWÁR | ... Bihar. | SIGHA | ... North Bihar. |
| JAISWAR | ... Do. | KANAUJIA (*t*) | ... Ditto. |
| MAGAHIA (*t*) | ... Do. | SURAI | ... Ditto. |
| BANAUDHIYA | ... North Bihar. | CHIRAUT (*t*) | ... Ditto. |
| KATHAUTIÁ | ... Ditto. | KHAPARIA | ... South Bihar. |
| SILHOTIA (*t*) | ... Ditto. | | |

Most of the subcastes are territorial. The Khaparias are so-called from their living in thatched huts. In Monghyr it is doubtful whether the Jaiswars are Dhánuks or Kurmis.

The Dudhwárs rank higher than the Jaiswars in Monghyr and Bhagalpur where they do not eat the leavings of higher castes as the Jaiswars do, but the latter rank above all the other subcastes in Bhagalpur. The Dudhwár and the Magahia are considered superior to all in Darbhanga. In Patna all are equal.

Inter-marriage is forbidden. Commensality is strictly prohibited, but in Monghyr they will drink water from each other's hands.

A member of one subcaste cannot gain admission to another except in Monghyr, where a Dudhwár can become a Jaiswar by intermarriage. Each subcaste has a separate punchayat.

## DHOBA.

| | | | |
|---|---|---|---|
| BÁNGLÁ | ... Bengal Proper. | TÁNTI (*a*) | ... West Bengal. |
| BALWAR (*a*) | ... North Bengal and Bihar. | BARA SAMÁJ (*a*) | Ditto. |
| MAGHAYÁ (*t*) | ... Ditto. | CHOTA SAMÁJ (*a*) | Ditto. |
| KANAUJIÁ (*t*) | ... Ditto. | 18-22 SAMÁJ (*a*) | ... Ditto. |
| TIRHUTIÁ (*t*) | ... North Bengal | BALUN SAMÁJ (*a*) | Ditto. |
| ORIYÁ (*t*) | ... West, and Central Bengal and Chota Nagpur Plateau. | SARO KHANA (*a*) | Ditto. |
| | | RÁRHI SAMÁJ (*t*) | Ditto. |
| | | RÁMA DHOBÁ (*a*) | East Bengal. |
| JHÁRUÁ | ... Chota Nagpur Plateau. | SITÁ DHOBÁ (*a*) | ... Ditto. |
| CHÁSA DHOBÁ (*t*) | Central Bengal. | BHULUA | ... Ditto. |
| DHOBASIN | ... Ditto. | JUGIDIA | ... Ditto. |
| NITISIN | ... Ditto. | SUNDIP (*t*) | ... Ditto. |
| BARSHAY | ... West Bengal. | GORSAR | ... Bihar. |
| ATERHAY | ... Ditto. | AWADHIYÁ (*t*) | ... Do. |
| KANDU | ... Ditto. | GADHYA | ... Do. |
| GADHPADYA | ... Ditto. | BATHAM | ... South Bihar. |
| KHOTTA (*t*) | ... Ditto. | | |

The Ráma Dhobá and Sitá Dhobá claim descent from the men who washed the clothes of Rám and his consort Sitá, respectively. There is a tradition that Siva created a Dhobá from a *Bel* fruit to wash his wife's clothes, and thus the Belwar Dhobá came into existence. Kanaujiá, Maghayá, Tirhutiá and Oriyá are geographical divisions. The Oriyá and Jháruá subcastes appear to have the same origin, but their residence in separate places caused them to become separate. Chásá Dhobás are so-called because they have taken to cultivation. The Khottas emigrated from Bihar to West Bengal. The Tánti Dhobás are Tántis who took to washing and gradually came to be classed as Dhobá. Others hold that they have been so named from the fact that they are employed by the Tántis. They wash only clothes fresh from the loom. In Hooghly there are two different Samájes. Bara Samáj, Chota Samáj. Originally there was one Samáj and one headman. After the death of a certain headman his two sons divided the Samáj between them. Those who joined the elder brother came to be known as members of the Bara Samáj and those who joined the younger brother were termed Chota Samáj. There is no hard and fast distinction between the 18-22 Samáj, Balun Samáj and Barakhána subcastes.

In West Bengal the subcastes are all of equal rank, but in Rajshahi the Maghayá stands first and the Kanaujiá lowest of all. The Chásá Dhobás are considered highest in rank in Central Bengal. They have three subdivisions, Uttar Rárhi, Dakhin Rárhi, and Bárendra, among whom intermarriage is forbidden, but they will eat together and smoke from the same *hukká*. In Noakhali, Bhulua stands first, Jugidia second, and Sundip third in rank. The Oriyá stands first in Angul. The Maghayá ranks first in Patna, second in Gaya, third in Shahabad, and below the Awadhiyá in Bhagalpur. The Kanaujiá stands first in Gaya and Sasaram, and second in Patna and Buxar. Generally the position and social rank of the subcastes vary from place to place according to their numerical strength.

Inter-marriage is forbidden among all the subcastes on pain of social ostracism, except in the following cases. In Angul, the Oriyás and the Jháruás have of late allowed inter-marriage on payment of a penalty to their respective communities. In Rajshahi, those who have inter-married are considered as a separate subcaste. In Hooghly inter-marriage is allowed between the Bara Samáj and the Chota Samáj. In Bhagalpur, the Maghayá and Awadhiyá subcastes can inter-marry and in Saran the Maghayá can do so with the Kanaujiá on payment of a fine. In Sasaram, though inter-marriage is uncommon, if a member of one subcaste happens to take a wife from another he will be admitted to his own subcaste, or to that of his wife, after paying a fine and giving a feast to his fellows.

The different subcastes do not generally eat, drink, or smoke together. But in Rajshahi the Bengali, Belwar, Maghayá, and Kanaujiá subcastes dine, smoke, and drink together. In Hooghly, commensality is allowed between the Bara Samáj and Chota Samáj. In the 24-Parganas, no member of one sub-caste will take cooked rice in the house of another, but he will partake of *pakki*, sweets, etc.; even a Chásá Dhobá, considered the foremost of all the subcastes, will not refuse to take *Jalpán* in the house of an ordinary Dhobá. The Dhobasin and the Nitisin will only drink and smoke together. In Bhagalpur, the Magahayá and the Awadhiyá may eat together. In Orissa the Oriyá and Jháruá and in West Bengal the Barshay, Atarhay, Kandu, and Gadhpadya will smoke and drink together. In Sasaram the Belwar and the Kanaujiá freely eat, smoke, and drink together.

No member of one subcaste can gain admission to another, except in Bhagalpur, where the Awadhiá and Maghayá can do so by inter-marriage, and in the Sasaram subdivision, where a member of one subcaste, can under special circumstances, be admitted to another, on payment of a fine and giving a feast.

All the subcastes have separate panchayats, except in Saran, where there is only one panchayat for the whole caste. In Sasaram, though they have separate panchayats, influential members of all the subcastes are asked to assist on important occasions.

## DOM.

| | | | |
|---|---|---|---|
| MAGAHIÁ (*t*) | ... West Bengal, Chota-Nagpur and Bihar. | KORA (*f*) | ... West Bengal. |
| BÁNSPHOR(*f*) | ... Ditto | KURMI (*a*) | ... Ditto. |
| TIRHUTIÁ (*t*) | ... Chota Nagpur and South Bihar. | KHARIÁ (*f*) | ... Ditto. |
| DAKHINÁLLÁ (*t*) | Chota Nagpur. | GHARÁMI (*f*) | ... Ditto. |
| ANKURIÁ (*f*) | ... West Bengal. | BANS | ... Ditto. |
| BISDELIÁ (*f*) | ... Ditto. | BETRA (*f*) | ... Ditto. |
| BÁJÁNIÁ (*f*) | ... Ditto. | HÁRI (*a*) | ... North Bengal and Bihar. |
| TURI | ... Ditto. | DHÁPRÁ | ... Bihar. |
| PANDIT (*f*) | ... Ditto. | CHAPARIYÁ | ... Do. |
| DÁI DOM (*f*) | ... Ditto. | DHARKÁR (*f*) | ... Do. |
| MARDAFARÁSH(*f*) | Ditto. | BHAGALPURIÁ(*t*) | North Bihar. |
| SÁNCHI (*f*) | ... Ditto. | DOMCHI | ... Ditto. |
| KALINDI (*f*) | ... Ditto. | DOMRA | ... South Bihar. |
| | | DOMAHRA | ... Ditto. |
| | | HARKÁR | ... Ditto. |

One Kalu Bir is said to be the progenitor of the Dom cáste. He had four sons, and from them the Ankuriá, the Biadeliá, the Bájániá and the Magahiá subcastes claim to be descended. The other subcastes arose principally from the different callings pursued by the members. The Bánsphors work in bamboo, and the Dharkárs were executioners under the Hindu Kings. The Ankuriá and the Sánchi generally work in bamboo. The Bájániá and the Kalindi are drummers. The Koras are earth-cutters. The Ankuriás serve as priests in Midnapore. The Gharámis construct thatched huts.

The Dái Dom practises midwifery. The Mardafarash is an undertaker. The Khariás weave their baskets with a sort of reed called *khari*. The Betra Dom manufacture cane chairs. The Kurmi Doms are said to be descended from Kurmis. Magahiá and Tirhutiá are geographical names.

In Midnapore, every subcaste claims to rank above the others, but the Báns Doms seem to be the highest, and are followed by the Betras, the Khariás, and last of all the Kurmis. The Bánsphors are generally considered to rank comparatively high, as they do not remove dead bodies or eat the leavings of others, but in Patna and Sasaram they are placed below the Magahiá from their eating food cooked by Dhobis and cutting the umbilical cord. The Dháprá ranks lowest in Monghyr, where he removes dead bodies. In Bhagalpur and Patna the Magahiá stands highest, and second in Gaya and Shahabad. In Shahabad the Domra is considered lowest in rank, as he eats the carcases of dogs and donkeys. The Dharkár stands first in Sasaram, because he disdains the leavings of a feast of which the other subcastes freely partake.

Inter-marriage is generally forbidden on pain of being outcasted, but in Hooghly this depends on the discretion of the panchayat. In Monghyr a Dháprá does not lose his position by marrying a Bánsphor. In Sasaram a member of any subcaste can take his wife from another and still retain his subcaste if he pays a fine to the panchayat and gives a feast to his caste-people. In Gaya inter-marriage is allowed between the Bánsphor and Magahiá.

In Howrah the Ankuriá and Sánchi smoke from the same *hukká* and the Kalindi, the Sánchi and the Kora eat food cooked by the Ankuriá, but not *vice-versâ*. In Patna, the Bánsphor and Magahiá sometimes smoke together. Commensality is allowed in Purnea. With these exceptions, the subcastes may not eat, drink, or smoke together.

The members of one subcaste cannot gain admission to any other. A Dharkár, however, may be admitted to other subcastes, and so also can the Bánsphor in Monghyr.

Each subcaste has its own separate panchayat or administration.

## DOSÁDH.

| | | | |
|---|---|---|---|
| MAGAHIÁ (*t*) | ... Bihar and Chota Nagpur. | DHAR (*a*) | ... Bihar |
| BHOJPURIÁ (*t*) | ... Ditto. | KÁMÁR (*f*) | ... North Bihar. |
| SIRANTI (*t*) | ... Chota Nagpur. | KURMI (*f*) | ... Ditto. |
| BAHALIÁ (*r*) | ... Bihar. | KANAUJIÁ (*t*) | ... South Bihar. |
| PAILWÁR | ... Do. | GADAR | ... Ditto. |
| SIROTIÁ (*t*) | ... Do. | BHEDAR | ... Ditto. |
| KURI | ... Do. | KOPBUDHWA | ... Ditto. |

The Dosádhs claim to be descended from the soldiers of the Pándava Prince Bhim.

Magahiá, Kanaujiá, Bhojpuriá and Srisanti are geographical names: Baheliá is said to be derived from *Bahal*, an appointment.

The Magahiás stand first in rank in Chota Nagpur, Bhagalpur and Patna, the Sirantis, second in Patna, and the Kurmis first in Saran. Each subcaste claims higher rank than the others in Shahabad. All are equal in Monghyr and other places.

Intermarriage is generally forbidden on pain of loss of caste. But in Sasaram if a Magahiá takes a wife from a Dharh or Gadar, he may retain his subcaste on payment of a fine and by giving a feast; in Saran the same rule applies. In Monghyr a member of any subcaste, marrying a girl of another subcaste is received into that of his wife.

The members of different subcastes do not generally eat together, except in Saran. In Purnea the male members of the Magahiá and the Pailwár subcastes will eat together. In Darbhanga all but the Pailwár eat, drink, and smoke together. No one can change his subcaste, and each group has its own administration or panchayat.

## GANDHABANIK.

| | | | |
|---|---|---|---|
| DESÁ(*a*) | ... West. Central and North Bengal. | ÁUT ÁSRAM(*a*) | ... Central, North and East Bengal. |
| CHHATTRIS(*a*) | ... Ditto. | TRIS | ... West Bengal. |
| SANKHA (*f*) | ... Bengal. | | |

The Desás claim their descent from the famous Chánd Sadágar who quarrelled with Manasá Devi, the goddess of serpents, and the Áutásram from Srimanta Sadágar, the popular hero of the 'Chandi Mangal' who made a voyage to Ceylon in search of his lost father Dhanapati Sadágar. According to another tradition Siva being in need of spices for his marriage, with Durga, created the first of the Desá Gandhabaniks from his forehead, the Sankha from his armpit, the Áut from his navel and the Chhattris

from his foot. The Sankhabaniks are a functional subcaste who sell bracelets made from conch shells. The Desá ranks above the others in the 24-Parganas and below them in Midnapore, while Chhattris, which is lowest in the 24-Parganas, is highest in Midnapore. The Sankha subcaste stands third everywhere except in Rajshahi, where it holds the lowest place. In Dacca again Áut stands first, while in the 24-Parganas it is second, and in Rajshahi it is inferior to Desá. In Nadia all are equal in rank.

In West Bengal, Noakhali and Mymensingh intermarriage among the subcastes is absolutely forbidden on the pain of loss of caste, but in Bankura it is allowed between Sankha and Chhattris. Elsewhere the rule is less stringent. In the 24-Parganas the Desá, Áut and Chhattris subcastes intermarry and the bride becomes a member of her husband's subcaste. Intermarriage between the higher subcastes is usual in Rajshahi, Murshidabad, Dacca and Jessore, and it is not absolutely forbidden in Dinajpur.

In Birbhum commensality is allowed, but in Midnapore and Rajshahi, the subcastes may not eat cooked rice together. In Howrah they use the same *Aukkd*, but eating together is forbidden. In the 24-Parganas the Desá, Chhattris and Áut subcastes eat together, but they will smoke only with the Sankhas. In Nadia all subcastes may smoke and drink, but not eat, in company; while in Murshidabad, Dacca and Dinajpur commensality is freely allowed In no case can a member of one subcaste gain admission to another, save only by intermarriage as noted above. Where this is allowed, the bride goes to the husband's subcaste.

In Midnapore each subcaste has its own governing body. In the 24-Parganas a single panchayat now presides over the Desá, Áut and Chhattris subcastes, but the Sankha has got a separate one Everywhere else, each subcaste usually has its own panchayat.

This caste is divided into Kulins and Mauliks, but the two classes freely intermarry, a bride-price being paid by the Mauliks. The families bearing the titles Haldar, Dutt, Khan, Mallik, Nag and Laha are Kulins. A Maulik by acts of great liberality and feasting his caste people may become a Kulin.

## GARERI.

| | | | |
|---|---|---|---|
| NIKHAR | ... Shahabad. | GANGÁJALI | ... Shahabad. |
| DHENGAR | ... Ditto. | | |

The three subcastes rank in the order in which they stand. Inter-marriage is prohibited on pain of excommunication. Commensality is also forbidden. No member of one subcaste can gain admission to another, and each has a separate panchayat.

## GOÁLA.

| | |
|---|---|
| PALLAB (*f*) | ... Bengal, Bihar and Orissa. |
| GAURA (*f*) | ... Ditto. |
| GOP (*a*) and (*b*) | ... North and East Bengal and Chota Nagpur. |
| BÁGRE (*t*) | ... North Bengal. |
| KOERPALAS (*a*) | ... Ditto. |
| NANDA OR NANDAGHOSH (*a*) | ... Ditto. |
| RÁRHI (*t*) | ... East, North and Central Bengal. |
| BÁRENDRA (*t*) | ... Ditto. |
| ÁHIR (*a*) | .. Throughout Bengal. |
| MAGAHIÁ (*t*) | ... Bengal, Bihar and Orissa. |
| MAJURHATI OR MAGAI | ... West Bengal. |
| RANLI | ... Ditto. |
| MIRALI | ... Ditto. |
| GODAGA | ... Ditto. |
| KISNAUT (*t*) | ... Ditto and Bihar. |
| BHOGA OR DAGA GOALA (*f*) | ... North, Central and East Bengal. |
| SADGOP | ... East and North Bengal. |
| DUSRA | ... Chota Nagpur. |
| NURIA | ... Chota Nagpur. |
| KHANDAL | ... Ditto. |
| BANCHUA | ... Ditto. |
| MATHURÁBÁSI (*t*) | Ditto. |
| KARAUJA | ... Ditto. |
| GORIÁ | ... Bihar. |
| MAJRÁUT (*f*) | ... Do. |
| KANAUJIÁ (*t*) | ... Do. |
| CHANTHÁ | ... Do. |
| SEPÁRI | ... Do. |
| JAT ... | ... Do. |
| BARGAWAR | ... North Bihar. |
| GUJIAR | ... Ditto. |
| GHASI BIAHUT (*c*) | Ditto. |
| DHANOHAR | ... Ditto. |
| CHIRAUT | ... Ditto. |
| BARQUAMAR | ... Dtto. |
| GHOSIN | ... North Bihar, West Bengal and Chota Nagpur. |
| DUMALA | ... Orissa. |
| MATHURÁPURIÁ (*t*). | ... Do. |
| GOPAPURIÁ (*t*) | ... Do. |
| BHUIYÁ (*f*) | ... Do. |

A few of the subdivisions are territorial such as Rárhi, Bárendra, Bagre, Magahiá, Kananjiá Mathurápuriá and Gopapuriá. The Pallabs follow the degrading occupation of branding cattle. The name is derived from a red dye formerly used by their females for adorning the feet. The Koerpalas claim to be Vaisyas of royal descent. It is said that Srikrishna forebade the Goálás to sell milk and its preparations, and those who obeyed his mandate were styled Sadgops. The Nandaghosh claim to be descended from the foster father of Krishna. The Áhir traces its descent from one of the sons of Syamghosh. The Kisnauts were originally residents of Brindaban and say that Krishna spent his childhood in their family. The Biahuts are so called because they forbid widow marriage. The Gouras are *palki*-bearers.

The Bhuiyá Gaurs are really Bhuiyás who have adopted the occupation of Goálás. The Bhogas (also called Dagas), brand cattle with a red-hot iron and castrate bullocks, and are looked down upon in consequence. In Monghyr, the Majraut subcaste has a degraded section known as Pariaha Majraut (Piri means yellow) who manufactured cakes (for painting) out of the urine of cows. In Orissa, the Mathurápuriás are also called Chalisghariá, as 40 families emigrated thither from Mathurá.

In Faridpur the local subcastes are of equal rank. Kisnauts consider themselves superior in rank, and in Gaya they do not eat food cooked even by Bráhmans. Their claim is generally admitted, except in Buxar and Bhagalpur. The Majraut also rank high. The Nanda, Kisnáut and Mathurábási are generally admitted to rank first owing to their origin. The Bárendra subcaste considers itself superior to the Pallabs. The rank of the latter varies; it is high in Dinajpur, Midnapore and 24-Parganas, but inferior in Rajshahi and Khulna. In Dinajpur the Bárendras and the Bágres are regarded as cleaner than the Rárhis. The Rárhis are regarded as inferior, owing to their branding bulls with red-hot iron. In Nadia all the subcastes, except the Áhir and the Bhoga, occupy the same position. The Gorias generally occupy a low place because, unlike the other subcastes, they do not scald the milk before making butter. The Ját and Separi subcastes are held in low estimation.

Intermarriage is, as a rule, absolutely forbidden on pain of social excommunication. In Murshidabad however, intermarriage, though not usual, is only penalized by temporary excommunication, which ceases after the offender has made atonement and given a feast. In Backergunge and Midnapore, if a Sadgop marries a woman of another subcaste, he has to find shelter in the lower subcaste. In Howrah a Mandavan male can marry a Pallab female, but not *vice versâ*. Intermarriage is not altogether unknown between Majrauts and Kisnauts.

Commensality is absolutely prohibited, except in a few instances. In Faridpar, Nadia and Purnea the subcastes may smoke from the same *hukka* and drink, but not dine together. In West Bengal *pakki* may be eaten in company, but not *kachhi*. In Howrah dining together is gradually being introduced. In Monghyr all subcastes, except the Játs, smoke and drink, and when away from home they may even eat together. In Darbhanga and Patna the Majrauts and the Kisnauts may eat together, but in Gaya only the males do so.

All the subcastes have separate panchayats, except in Balasore and Puri.

Traces of Kulinism are to be found, and families who are wealthy, or who have at one time or another received marks of royal favour, or held office, are regarded as Kulins.

## GONRHI.

| | | | |
|---|---|---|---|
| BANPAR (*a*) | ... Bihar. | KOLH | ... North Bihar. |
| KURIN (*a*) | ... Do. | CHHOTAH | ... Do. |
| BAILANÁTH (*f*) | Do. | KULAR | ... Do. |
| DHÁRH (*a*) | ... Do. | MUDIASI (*f*) | ... South Bihar. |
| CHÁB | ... North Bihar. | KEWAT (*f*) | ... Do. |

The Banpar and Kurin subcastes are alleged to be the descendants of Gonrhis, who fled from the battle field of Kuruk-shetra and concealed themselves in woods and ditches. The Bailanáth is degraded for boring the nostrils of bullocks, Mudiaris are so called, because in fishing they seize the head of the fish. Kewats are boatmen. In most places all are about equal in rank.

Intermarriage is strictly forbidden on pain of social excommunication. Commensality is also prohibited, except in Darbhanga. In Purnea they take water from each other's hands, and the Kurins and Chhotahs smoke together. No member of any subcaste can gain admission to another.

They all have separate panchayats.

## HAJJAM.

| | | | |
|---|---|---|---|
| AWADHIÁ (*t*) | ... North and South Bihar and Chota Nagpur. | SRIBÁSTAB (*t*) | ... South Bihar. |
| KANAUJIÁ (*t*) | ... Ditto | SEONARNI | ... Ditto. |
| MAGAHIÁ (*t*) | ... Ditto | BENGALI (*t*) | ... Ditto. |
| BIAHUT (*c*) | ... Ditto | RIKHUSAT | ... North Bihar. |
| TIRHUTIÁ (*t*) | ... North and South Bihar. | AITHÁNÁ | ... Ditto. |

Most of the subcastes are of the territorial type, *e.g.*, Awadhiá Kanaujiá, Tirhutiá, Sribástab (from Srinagar) and Magahiá. The Biahuts do not allow widow marriage. The Biahuts claim to be the offspring of the first, or Biáhi wife of the common ancestor of the caste.

The rank of the various subcastes varies from place to place according to their local strength.

Intermarriage is absolutely forbidden on pain of social ostracism.

Commensality is generally prohibited, but in Patna all the subcastes can smoke, drink and eat *pakki* together. In Purnea they smoke and drink together, and in Monghyr they accept water from each other's hands.

No member of any subcaste can gain admission to another, and each has its own separate panchayat except in Saran, where the Aithánás and the Awadhiás have a joint panchayat.

## HALUADAS.

| | | | |
|---|---|---|---|
| HALUÁ | ... East Bengal. | GÁZIÁ | ... East Bengal. |
| | | KESTIA | ... East Bengal. |

The Haluas and the Gazias rank higher than the Kestias. Intermarriage and commensality are allowed between the first two, but not with the Kestias.

No member of any subcaste can gain admission to another, and each has its own panchayat.

## HALWAI.

| | | | |
|---|---|---|---|
| MADHESIÁ (*t*) | ... Bihar. | KANAUJIÁ (*t*) | ... Bihar. |
| | MAGAHIÁ (*t*) ... | ... Bihar. | |

The Madhesiás drink wine and rank below the Kanaujiás. Intermarriage is strictly forbidden on pain of being outcasted.

They do not eat, drink or smoke together. No member of one sub-caste can gain admission to another and each has its own administration.

## HARI.

| | | | |
|---|---|---|---|
| KANTÁI (*f*) | ... North Bihar. | PHUL HÁRI | ... West Bengal. |
| MACHHUA (*f*) | ... Ditto. | METHAR HÁRI | Ditto. |
| BENGALI (*t*) | ... Ditto. | KENGHARIÁ | ... Ditto. |
| KHARAKPURIÁ (*t*) | Ditto. | RAUT | ... Ditto. |
| | | KATKI | ... Ditto. |

The word Kantai means an iron utensil for cooking. The Háris were, formerly employed to clean the utensils in the houses of high class Hindus. The Machhuas are so called because they trade in fish, and the Bengalis, owing to their having come originally from East Bengal.

The Kantais claim to be highest in rank. The Kharakpurias stand highest in rank in Bhagalpur.

Intermarriage is forbidden amongst all the subcastes and they do not take cooked food from each other. Each has a separate administration of its own.

## JUGI.

| | | | |
|---|---|---|---|
| MAHATMÁ | ... Central and East Bengal. | TÁNTI (*f*) | ... West Bengal. |
| KHELENDÁ | ... Ditto. | BÁOL (*f*) | ... Ditto. |
| BÁRENDRA (*t*) | ... North Bengal. | NÁTH (*a*) | ... East Bengal. |
| RÁRHI (*t*) | ... Central Bengal. | EKÁDASI (*c*) | ... Ditto. |
| BAGRA (*t*) | ... Ditto. | MÁSYA (*c*) | ... Ditto. |
| MAGENTA | ... Ditto. | HÁLWA (*f*) | ... Ditto. |
| GIRIKULIA | ... Ditto. | BANIACHANGI | Ditto. |
| PANCHNORA | ... Ditto. | MAGHUA (*d*) | ... Ditto. |
| JALESWAR (*a*) | ... Ditto. | SYAMVEDI (*c*) | Ditto. |
| ASIGHORIA (*a*) | ... Ditto. | JAJUR VEDI (*c*) | Ditto. |
| SIVAKUL (*c*) | ... West Bengal. | | |

Some of the Jugis claim descent from the Yogis. They say that Yogibar, a great Pandit, was the Mahant of Jaleswar Mahadeo. On a certain Siva Chaturdashi night, after the Puja was over, there was a dispute between the Mahant Yogibar and Baladeva Bhatta, the priest of Rájá Ballala Sena, who wished the offerings to be distributed amongst all the Bráhmans, on which Yogibar turned him out of the Temple. This enraged the Rájá. Yogibar was degraded and his descendants formed a separate caste. They serve as their own priests in many instances, and some wear the sacred thread.

The Sivakuls claim their descent from a Jugi who was a votary of Siva. They were originally beggars and had no fixed habitation, but roamed from one cremation ground to another, where they practised their peculiar form of worship. In Midnapore they are no better than the other sub-castes, the only distinction being that they assume the sacred thread at the time of marriage and then retain it or cast it off again as they please. The Tanti-Jugis are weavers. The Báols are professional beggars and some earn their living by snake-charming. The Bárendra and Rárhi subcastes are of course territorial. Maghs are said to have passed through the house of the Maghuas and so caused their degradation. The Syamvedi and the Jajurvedi are so named on account of the Vedic rites which they observe. The Ekadasi and the Másya mourn for 11 and 30 days, respectively. The Syamvedi subcaste is again divided into four territorial sub-sections Chandradipi, Bangronai, Barahazri and Songshábási; they do not intermarry.

The Bárendras and Rárhis are equal in rank. In Mymensingh the Ekádasi stands 1st, Másya 2nd, Khelendrá 3rd, Hálwa 4th, and Baniachangi 5th in rank. The Maghuas are looked on as the lowest. In Nadia the Jugis do not admit the existence of any subcastes.

Intermarriage between different subcastes is strictly prohibited on pain of loss of caste. In Faridpur a man taking his wife from an inferior sub-caste is degraded to her level, *e.g.* if a Náth marries a Maghua girl, he himself becomes a Maghua. In Khulna a Rárhi may take his wife from any other subcaste except Khelenda and Magenta, who are regarded as very low. The Ekádasis, who alone follow the rites of Bráhmans, the others never marry beyond their own circle.

Commensality is generally forbidden, but not drinking or smoking in company. The Rárhis and Bárendras, however, eat together. In Dacca the Máhatmás will not touch food cooked by Náths, but will smoke with them. The Másyas have no objection to take food from the Ekádasis and water from the other sub-castes. In the 24-Parganas a Rárhi will not eat or drink freely but will smoke with others. In Khulna, the Khelenda and Magenta are not allowed to drink or smoke with others.

No member of one subcaste can gain admission to another except in the following instances. In Dacca a Náth may become a Mahátma if he follows the occupation and mode of living of this subcaste. In Faridpur admission can be obtained to any lower subcaste. The Másyas and Khelendas only can gain admission to the Ekádasi subcaste in Mymensingh, if allowed by the Panchayat.

All subcastes have separate administrations.

## KADAR.

| | | | |
|---|---|---|---|
| NAIYA | ... Bhagalpur. | DURHAI | ... Bhagalpur. |
| HAZARI | ... Ditto. | BAREI | ... Ditto. |

These sub-castes are not yet fully established as such. All are equal in rank. Intermarriage and commensality are allowed. They can gain admission to any subcaste by intermarriage, but each group has a separate administration.

## KAHAR.

| | | | |
|---|---|---|---|
| RAWÁNI | .. Bihar and Chota Nagpur. | DHUSIA | ... Chota Nagpur. |
| TURÁHÁ | ... Ditto. | KHARWÁR (*a*) | ... Ditto. |
| MAGAHIÁ (*t*) | ... Ditto. | GAYARA | ... Ditto. |
| GÁRHUK | ... North Bihar and Chota Nagpur. | DHURIA | ... Bihar. |
| | | KOCH (*a*) | ... North Bihar. |
| JAISWÁR | ... Ditto. | KHATWE | ... Ditto. |
| DHIMÁR (*a*) | ... Ditto. | DHUSIA | ... South Bihar. |

The Rawánis of Monghyr are divided into two sections, Magahiá and Mongiriá. The former are degraded because they allow their females to render personal service to other castes; they also eat the leavings of other castes and carry dead bodies.

In Monghyr all the subcastes seem to be equal in rank, except the Turáhás who are not recognised as Kahárs owing to their selling fish. The Magahiás are second in Patna and fourth in Shahabad, the Kharwárs are second in Buxar and third in Sasaram, and the Katwe is held lowest in Darbhanga.

Intermariage is generally forbidden on penalty of being outcasted, but in Palamau it is allowed with the sanction of the Panchayat: in Gaya and Sasaram an offender against the rule may be readmitted to his own subcaste on payment of a fine and on giving a feast.

Commensality is generally forbidden, but in Monghyr they can smoke and drink together, and in Purnea they can only take water from each other's hands. In Sasaram all the subcastes except the Turáhá eat, drink and smoke together.

A transfer from one subcaste to another is not possible, except in Palamau, where it is allowed with the permission of the Panchayat.

Each subcaste has its own Panchayat.

## KAIBARTTA.

| | | | |
|---|---|---|---|
| ÁDI | ... North Bengal. | ANTA OR JALIYÁ OR MÁCHHI (*f*) | West, North and East Bengal. |
| MADHYA OR HÁLIÁ OR CHÁSI (*f*) | West, North and East Bengal. | DÁS | ... West Bengal. |

The Madhyas were separated from the other subcastes owing to the favour of Ballála Sena. They found his son for him and he rewarded them by ordering that water touched by them might be used by the high-class Hindus. They then gave up plying boats and took to cultivation, whence they are also known as Háliá or Chási. They now claim to be called Máhisya.

Each of the three subcastes Ádi, Anta and Madhya is divided into two sections, Rárhi and Bárendra, between whom intermarriage is not allowed. Each claims higher rank than the other. They drink and smoke together and may eat *pakki* food in each other's company

The Madhya is highest in rank, and next comes the Dás, while the Máchhis or Antas are regarded as the lowest. In North Bengal the Ádi ranks next to the Madhya.

Intermarriage is absolutely forbidden on pain of excommunication. Commensality is also forbidden, but in Howrah all the subcastes can smoke together. No member of one subcaste can gain admission to another, and each has a separate Panchayat.

Kulinism, among the Chási Kaibartta is in vogue. Families who enjoyed respect on account of their opulence or ancestry, are regarded as Kulins There are four kinds of Kulins among the Kaibarttas, 1st the Fulchatiya, 2nd the Eksidhia, 3rd the Sidhia and 4th the Mukinda. Marriage may take place with the Mauliks for some pecuniary consideration, but a Kulin suffers in the estimation of the community if he gives his daughter in marriage to a Maulik.

## KALWAR.

| | | | |
|---|---|---|---|
| BIÁHUT (*e*) | ... Chota Nagpur, North Bengal, and Bihar. | TANK | ... South Bihar. |
| JAISWÁR (*a*) | ... Ditto. | SAGAHUT (*e*) | ... Ditto. |
| KHARIDÁHÁ (*f*) | ... Bihar and North Bengal. | DESWÁR | ... Ditto. |
| BANAUDHIÁ (*f*) | ... South Bihar. | MAIDARA | ... Ditto. |
| | | JANAKPURI (*f*) | ... North Bihar. |

The Jaiswárs, it is alleged, have got their name from their mother Jaso. Some of the Jaiswárs who took to selling liquor, were outcasted and were called Kalwárs. Others say that they were so called for making copper. In a caste meeting the Jaiswárs of Karida did not attend and were therefore outcasted, and afterwards got the name of Kharidáhá. The first progenitor of this caste had two wives, one a virgin and the other a widow. Sons of the wedded wife are called Biáhuts, while from the *sagai* wife descended the other subcastes. The Biáhuts never allow widow-marriage, but the Sagahuts permit the practice. The Biáhuts are generally considered highest and the Sagahuts lowest in rank, the rest being all equal. Intermarriage is strictly forbidden under penalty of being outcasted. Commensality is also prohibited, but in some places they may smoke or drink together. No member of any subcaste can gain admission to any other, and each has a separate Panchayat.

## KANSABANIK.

| | | | |
|---|---|---|---|
| SAPTAGRAMI (*f*) | ... Central Bengal. | MAITI | ... Central Bengal. |
| MAINDOBAZI (*d*) | ... Ditto. | MAINAGORI (*f*) | ... Ditto. |

Saptagrami and Mainagori are names derived from their original places of residence. Some of the Saptagramis were degraded and formed a separate subcaste, called Maindobazi. The Saptagramis are highest in rank, and do not intermarry with any other subcaste; if the rule is broken, the offender is degraded to the subcaste into which he marries. Intermarriage among the other subcastes, though not strictly forbidden, is unusual.

They won't eat or drink with one another, but they may smoke together. The members of one subcaste cannot gain admission to another, except in the case of the Saptagrami, who may be degraded to any other subcaste by intermarriage. Each subcaste has a separate administration of its own.

There are Kulins and Maulíks, but the distinction involves no restriction on marriage.

## KANU.

| | | | |
|---|---|---|---|
| KARAINCH | ... Bhagalpur. | MAGAHIA (*f*) | ... Bhagalpur. |
| MADHESIA (*f*) | ... Ditto. | | |

They rank in the same order in which they stand. Intermarriage and commensality are absolutely forbidden. A member of one subcaste can not gain admission to another, and each has a separate administration.

## KEWAT.

| | | | |
|---|---|---|---|
| DHIBAR (*a*) | ... West Bengal. | SÁGHÁR | ... North Bihar. |
| GONR (*f*) | Ditto. | GARBAST | ... Ditto. |
| KAIBARTTA | ... Ditto. | RASI (*f*) | ... Chota Nagpur Plateau. |
| GHIWA | ... North Bihar. | SENLI (*f*) | ... Ditto. |

The Rasi and Senli appear to have come originally from the same stock. They are all of equal rank. Intermarriage is not allowed, and commensality is forbidden, except in West Bengal, where all the subcastes inter-dine.

## KHYAN.

| | | | |
|---|---|---|---|
| KANTI | ... Rangpur. | MARIKA | ... Rangpur. |

Intermarriage and commensality are not allowed between the subcastes.

## KOCH.

| | | | |
|---|---|---|---|
| KÁNTÁI DULIA (*f*) | North Bengal. | DOBHÁSIÁ | ... North Bengal. |
| DAKAI | ... Ditto. | KOCH (*a*) | ... Ditto. |
| RÁJBANSI (*a*) | ... Ditto. | DESI (*a*) | ... Ditto. |
| PALIYÁ | ... Ditto. | BABU (*a*) | ... Ditto. |
| JÁLUÁ | ... Ditto. | | |

Namo, son of Kashyapa Muni, is said to have married Hirá, Jirá, Udiyá and Turá. The offsprings of Hirá are Koches, those of Turá, Sádhu Paliyás or Rájbansis, those of Jirá, Babus, and those of Udya, Desis. The Kántáis are called Duliás, because they carry the pálki. The Desis are so called because their forefathers were the earliest settlers. The subcaste Rájbansi is further subdivided into (*a*) Rájbansi, (*b*) Bhagawan Rájbansi. The latter is higher in rank. So also Paliyá has three subdivisions (*a*) Sádhu, (*b*) Desi, (*c*) Balái. The Paliyás are highest in rank, while the Dokái, Jáluá, and Dobhásiá are regarded as of low rank.

Intermarriage, though not usual, is not forbidden; in Jalpaiguri, it is said to be punished by degradation to the lower sub caste, but the penalty is not, however, rigidly enforced.

The general practice is, that the subcastes drink and smoke together, but wont eat. The Dakai subcaste is, however, looked on as degraded and therefore excluded. In Jalpaiguri they may take *pakki* together, but not cooked rice.

No member of any subcaste can gain admission to another except by marriage; in Dinajpur the subcastes have separate *panchayats*.

## KOIRI.

| | | | |
|---|---|---|---|
| BARKI-DÁNGI (*a*) | Bihar and Chota Nagpur. | GURIA | ... Chota Nagpur. |
| CHHOKKI-DÁNGI (*a*) | Ditto. | CHIRMÁIT | ... North Bihar. |
| BANAPÁR | ... Ditto. | TIRHUTIÁ (*t*) | ... Ditto. |
| JARUHÁR | ... Ditto. | JALAKUR | ... Ditto. |
| KANAUJIÁ (*t*) | ... Ditto. | GOITA | ... Ditto. |
| MAGAHIÁ (*t*) | ... Ditto. | HARDI (*t*) | ... South Bihar. |
| DAKINI (*t*) | ... Chota Nagpur. | DHÁRH | ... Ditto. |

It is said that once five Koiri brothers on being attacked ran away and hid themselves, one in a drain the second in a jungle, and the third under the roots of a tree; the fourth fled to Magadha and the fifth across the river. They were, therefore, termed Dhángi, Banapár, Jaruhár, Magahiá, and Chirmáit, respectively. The Dhángis also claim their origin from the *Yagna* of a Rájá named Dángi, from which their common ancestor was born. Hardis came from Hardi, in the district of Ballia.

The Barki-Dángis are highest in rank, because they never allow widow-marriage, and do not eat flesh, or drink wine. Next come Chhoki-Dángi and Banapár, while the Magahiás are regarded as the lowest. In Patna and Shahabad all the subcastes are equal in rank.

Intermarriage is absolutely forbidden under penalty of social excommunication. Commensality is also not usually allowed; but in Monghyr, the Magahiás and the Kanaujiás, and in Purnea, the Barkidángis, Magahiás and Tirhutiás, smoke and drink with one another.

No member of any subcaste can gain admission to another. Each has a separate Panchayat of its own, except in the Southal Parganas where disputes are settled at a general meeting of the caste people.

## KURMI.

| | | | |
|---|---|---|---|
| JAISWÁR (*t*) | ... Bihar and Chota Nagpur. | BARAKURMI(*a*) | ... Chota Nagpur. |
| SAINTHWAR | ... Ditto. | CHOTA KURMI(*c*) | Ditto. |
| AWADHIYÁ (*t*) | ... Bihar. | CHAUR | ... Ditto. |
| SAMASWAR | ... Do. | KHARCHWÁR | ... Ditto. |
| CHANDEL | ... North Bihar and Chota Nagpur. | JALBANWAR | ... Ditto. |
| | | JALBHANDA | ... Ditto. |
| KACHAISÁ | ... South Bihar and Chota Nagpur | CHILBANDA | ... Ditto. |
| | | KESWAR | ... Ditto. |
| GHAMELA | ... Ditto. | DAMARIAR | ... Ditto. |
| MAGAHIÁ (*t*) | ... North Bihar. | KOIRWAR | ... Ditto. |
| DHAN KURMI | ... Ditto. | KECHIKESSRI | ... Ditto. |
| DHELAPHOR(*f*) | ... Ditto. | MUTARWAR | ... Ditto. |
| TERAHGHARIA (*a*) | Ditto. | BAGESRI(*c*) | ... Ditto. |
| CHANAUR(*t*) | ... South Bihar. | MEGISRI | ... Ditto. |
| BIÁHUT(*c*) | ... Ditto. | NASATWAR | ... Ditto. |
| PATANWAR(*t*) | ... Ditto. | KURUNI(*c*) | ... Ditto. |
| ANTHASIA | ... Ditto. | KURMI PROPER | Ditto. |
| PATHARIA | ... Ditto. | ADHKURMI(*c*) | ... Ditto. |

The Jaiswárs are said to have emigrated from Jaispur in the United Provinces, and the Awadhiás and Patanwars from Oudh and Patna, respectively. The Biáhuts are so named from the fact that they never allow widow marriage. This pretice is also forbidden by the Channurs and Awadhiás.

The Awadhiá sub-caste is generally regarded as the highest, and the Sainthwár subcaste as the lowest in rank. The Bara Kurmis are superior to the Chota Kurmis. The Jaiswár, though it usually ranks high, is looked down upon in Darbhanga for eating the leavings of a feast and cleansing the dishes of high caste Hindus. Intermarriage is strictly forbidden on pain of loss of caste, or, in some cases, degradation to the lower of the two subcastes, except in Hazaribagh where all subcastes freely intermarry.

Commensality is also prohibited, except in Hazaribagh where all sub-castes freely dine with one another. A Jaiswár may always take cooked rice from an Awadhiá.

No member of one subcaste can gain admission to another, except in certain cases of intermarriage. Each sub-caste has usually a separate panchayat, but in Hazaribagh there is a single panchayat for the whole caste.

## LAHIRI.

| | | | |
|---|---|---|---|
| DESI(*t*) | ... Bihar. | MAGAHIÁ(*t*) | ... Bihar. |
| TIRHUTIÁ(*t*) | ... Do. | | |

These are all territorial names. The *Desi* ranks below the Tirhutiá. Intermarriage is absolutely forbidden on loss of caste. Commensality is also not permitted. No one can change his subcaste and each group has a separate administration.

## MADAK.

| | | | |
|---|---|---|---|
| BÁRASAMÁJ | ... Mymensingh. | AJA(*t*) ... | ... Sonthal Parganas. |
| TERASAMÁJ | ... Ditto. | DHARMA SAT ÁSRAMA | ... Ditto. |
| BARA ÁSRAMA | ... Sonthal Parganas. | | |
| MURA ... | ... Ditto. | | |

In Mymensingh intermarriage is allowed, but in the Sonthal Parganas it is forbidden under penalty of fine or excommunication. Commensality is permitted and they freely eat, drink and smoke together. Members of one sub-caste can gain admission to another in Mymensingh. In the Sonthal Parganas caste questions are decided by the members of the caste or subcaste in meeting, and in Mymensingh each subcaste has a separate administration of its own.

## MADHUNAPIT.

| | | | |
|---|---|---|---|
| BISWAS (*a*) | ... Central and West Bengal. | MADHU (*a*) | ... Central and West Bengal. |
| JATI (*a*) | ... Ditto. | RELATI (*t*) | ... Ditto. |

The Madhu is alleged to be descended direct from a man who shaved Chaitanya. The Játi appears to spring from intermarriages with the Mayra caste. Reláti, also known as Septagrami, is a local division. The Madhus are first and the Játis second in social position; the other two stand lower. Intermarriage is absolutely forbidden, but in Midnapore the rule is not strictly enforced. Commensality is freely allowed in Midnapore, but in Nadia they only drink and smoke together. Members of a lower, cannot gain admission to a higher, subcaste. Usually each subcaste has a separate administration.

Kulinism is in vogue. A Maulik has to pay money if he wishes to intermarry with a Kulin.

## MAL.

| | | | |
|---|---|---|---|
| RAJBANSI | ... West Bengal. | DHALIA | ... West Bengal. |
| MALEVA | ... Ditto. | GOBRA | ... Ditto. |
| KUSMETIA | ... Ditto. | KHERA | ... Ditto. |
| MALLIK | ... Ditto. | SANAGANTHA | ... Ditto. |

In Birbhum intemarriage is allowed between the Maleva, Kusmetiá and Mallik subcastes and in Bankura it is allowed between the Dhaliá, Gobrá, Khierá and Sánágánthá subcastes. The Rájbansis, however, do not intermarry with any other subcaste. In Birbhum there is no restriction on commensality, but in Bankura the different subcastes will eat only, *pakki* and not cooked rice. Each subcaste has its own administration.

## MALI.

| | | | |
|---|---|---|---|
| PHUL (*f*) | ... Birbhum. | KHANDAL (*c*) | ... Angul. |
| DOKANIA | ... Ditto. | SANKHUA (*c*) | ... Do. |
| TELNOPA | ... Ditto. | BANSPHOR | ... Manbhum |
| POCHA | ... Ditto. | PATAR | ... Ditto. |
| DEULIA (*c*) | ... Angul. | SULANKI | ... Ditto. |
| TUHIRI (*c*) | ... Do. | MALI OR MAHULI | Ditto. |

In Angul all are said to come from the same stock, but were separated owing to their taking part in different ceremonies. The Deuliás are those who perform the worship of Siva in the temple; the Tuhiris collect flowers for the worship, the Khandals carry a sword, and the Sankhuas blow the conch shell at the time of worship.

Intermarriage is absolutely forbidden. Commensality is also prohibited, except in Birbhum. No member of one subcaste can gain admission to another. There is a separate administration for each subcaste in Manbhum.

## MECH.

| | | | |
|---|---|---|---|
| AGNIA MECH | ... Jalpaiguri. | JATI MECH | ... Jalpaiguri. |

The Agniá Mech is higher in rank than the Játi Mech. Intermarriage is not usual. An Agniá Mech may marry the daughter of a Játi Mech, but in that case she may no longer eat at her father's house. An Agniá Mech sometimes gives his daughter in marriage to a Játi Mech, but in such a case the bride's people would not eat food cooked by her after the marriage, unless the bridegroom becomes an Agniá by giving a feast to the Panchayat.

The Agniá Mech do not eat food cooked by the Játi Mech, nor do they smoke in their *hukkd*. But they will drink water from the hand of a Játi Mech. A Játi Mech may become an Agniá Mech by intermarriage as stated above, and an Agniá Mech may by degradation become a Játi Mech. The two subcastes have different Panchayats.

## MUSAHAR.

| | | | |
|---|---|---|---|
| MAGHAYA (*t*) | ... Bihar, and Chota Nagpur | RÁJBANSI | ... North Bihar. |
| DHARWÁR | ... Chota Nagpur. | DESWÁR | ... Ditto. |
| BHUNAHÁR | ... Ditto. | CHAURWÁR | ... South Bihar. |
| BHAIBÁR ... | ... Ditto. | RAJWÁR | ... Ditto. |
| RIKHIASAN | ... Ditto. | KHARWÁR | ... Ditto. |
| MAHTWÁR | ... Ditto. | DHÁRH | ... Ditto. |
| BICHWÁR | ... Ditto. | KANAUJIA (*t*) | ... Ditto. |
| TIRHUTIÁ (*t*) | ... Bihar and Chota Nagpur. | BHATWÁR | ... Ditto. |
| DAKHINAHA (*t*) | ... Bihar. | PACHHAISÁ | ... Ditto. |

There is no particular rank among them but the Bhatwárs and Kharwárs are generally considered superior to the rest, because they do not eat snakes.

In Bhagalpur and Hazaribagh, intermarriage and commensality prevail. In Shahabad there is no regular intermarriage, but when it occurs it is condoned on payment of a fine, and giving a feast.

Elsewhere the subcastes do not intermarry or dine with one another.

A person of one subcaste cannot gain admission to another, except in Bhagalpur and Hazaribagh, where he can do so freely. In these two districts there is a single panchayat for the whole caste, but elsewhere each subcaste has got a separate panchayat.

## NAPIT.

| | | | | | |
|---|---|---|---|---|---|
| SATGHARIÁ (*t*) | ... | Bengal Proper. | DESI NAPIT | ... | West Bengal. |
| RÁRHI (*t*) ... | ... | Ditto. | HÁLDAR (*f*) | ... | North and Central Bengal. |
| BÁRENDRA (*t*) | ... | Ditto. | KHOTTA | ... | Ditto. |
| SAPTAGRÁMI (*t*) | ... | Ditto. | BHULUÁ | ... | Central Bengal. |
| ANARPURIÁ (*t*) | ... | Ditto. | SANDIPA (*t*) | ... | Ditto. |
| BURDOWANI (*t*) | ... | West Bengal. | HANSDAHA | ... | Ditto. |
| MADHYASRENI (*a*) | ... | Ditto. | BAMAN BANE | ... | Ditto. |
| MANDARANI | ... | Ditto. | KOTA | ... | Ditto. |
| RAJHATI (*t*) | ... | Ditto. | MUSGANJ | ... | Ditto. |
| PHULNÁPIT | ... | Ditto. | SHAHAR NAPIT (*f*) | | East Bengal. |
| DRIANAPIT | ... | Ditto. | BHUIA | ... | Ditto. |
| GAURIANAPIT | ... | Ditto. | BANGALI NAPIT (*t*) | | Santhal Parganas. |

Most of the subcastes are territorial.

The higher class Nápits, *e.g.* Rárhi, do not shave low castes. The Háldars who do so are degraded in consequence. Those subcastes who allow widow marriage are also looked down upon. In Midnapore the Phulnápit is first in rank, and is followed by the Madhyasreni, Oriyá and Gauriá.

Intermarriage is absolutely forbidden except in Mymensingh and Murshidabad. In Nadia and Rangpur there is no restriction of intermarriage among the Rárhis and Bárendras. In Midnapore it is not allowed, and if a man of a higher subcaste gives his daughter in marriage to a man of a lower one, he himself becomes a member of the latter.

Commensality is also forbidden, except in Nadia, Mymensingh, and Murshidabad. In Birbhum and Bankura, they smoke the same *hukká*, and partake of pakki together but not cooked rice. They smoke and drink together in Howrah and Dacca.

Each subcaste has a separate panchayat.

## PASI.

| | | | |
|---|---|---|---|
| BEHADA (*t*) | ... Bhagalpur. | MAGAHIÁ (*t*) | ... Bhagalpur. |

The Behada is higher in rank than the Magahiá. Inter-marriage is forbidden and also commensality. No one can change his subcaste, and each has a separate administration.

## PATNI.

| | | | | | |
|---|---|---|---|---|---|
| JÁT PATNI (*a*) ... | North and East Bengal. | | BAKLAI (*f*) | ... | East Bengal. |
| GHÁT PATNI (*a*) | Ditto. | | SHONESHABAZI (*f*) | ... | Ditto. |
| DOM PATNI (*f*) | Ditto. | | MURADIÁ (*f*) | ... | Ditto. |
| BÁNSPHOR (*a*) ... | Ditto. | | AGLI (*f*) | ... | Ditto. |
| BHÁLO PATNI (*c*) | East Bengal. | | KAPORDAI (*f*) | | Ditto. |
| MAGHUÁ (*d*) ... | Ditto. | | | | |

The Bhálo Patni came to be a separate subcaste owing to the degradation of the Maghuńa, whose houses were entered by Maghs. The four subcastes, Ját, Ghát, Dom, and Bánsphor, are said to have descended from the four brothers, Jadab, Kalubir, Madhab, Narhari. Difference of occupation is the cause of separation of the subcastes. Baklai, Shoneshabazi, Muradiá, Agli and Kapordai.

In Mymensingh the Ját stands first, Ghát second, Dom third, and Bánsphor fourth in rank. The Ját Patnis have retained their original caste, while the others are degraded. The Dom Patnis keep pigs and the Bánsphors dispose of dead bodies. In Backergunge the Baklai stands first, Shoneshabazi second, Muradiá third, Agli fourth, and Kapordai fifth in rank. The Ját and Bhálo are also superior classes of Patnis.

Inter-marriage is absolutely forbidden, but in Faridpur this bar applies to the Bhálo Patnis only. Commensality is also forbidden, but in Dinajpur it is allowed between the Játs and Ghátis.

No person of one sub-caste can gain admission to another, except in Nadia, where a Ghát may become a Ját, with the permission of the panchayat. Each subcaste has a separate administration of its own.

## POD.

| | | | | | |
|---|---|---|---|---|---|
| CHÁSI (*f*) | ... West Bengal. | | BASUDEB PAUNDRA (*a*) | ... Central Bengal. | |
| CHHANCHI (*f*) | Ditto. | | SANTAPARH | ... | Ditto. |
| JASURI (*f*) ... | Ditto. | | | | |

The Basudeb Paundras claim descent from the family of Pundra, the son of Basudeb, while the Santaparhs say that they are descended from Bali Raja, the son of Sutopa. The Basudeb Paundras are divided into two sections, the Uttar Rarhi and Dakshin Rarhi. The Santaparhs are also divided into two sections, the Utkal or Oryá and the Bangaja.

Among the Chási and the Chhanchi subcastes, those who employ themselves as cart-drivers or fishmongers are degraded to the Jasuri subcastes, and are regarded as lowest in rank.

No inter-marriage can take place among the different subcastes. The Uttar Rarhi and the Dakshin Rarhi sections of the Basudeb Paundras do not eat cooked rice in each others houses, but may take *pakki* food together. The Oryá sections of the Santraparhs will take cooked rice in the house of the Uttar Rarhi or Dakshin Rarhi Pods, but not *vice versâ*.

No member of any subcaste can gain admission to another, and each subcaste has its own Pradhán or headman, who deals with all social and ceremonial matters.

## RAJWAR.

MÁL
ANGWÁR
SIKHARIÁ
RÁJBANSI } Manbhum.

The Rájbansi Rájwars are said to be the first in rank. Inter-marriage and commensality are absolutely forbidden. No member of one subcaste can gain admission to another, and each has a separate panchayat.

## SADGOP.

KUMAR (*a*) ... Burdwán and Birbhum. | PURBAKUL (*t*) ... Burdwan and Birbhum.
PACHHIMKUL (*t*) ... Burdwan and Birbhum.

The Kumars profess to be the descendants of eight Rajas who had their seats in Gopbhum, Suer-Kanksa, Khatangarh, and Dignagar. Pachhimkul and Purbakul are territorial names, referring to the west and east banks of the river Hooghly. The former refused to accept Kulinism, whereas the latter accepted it. They are all equal in rank. Intermarriage is not allowed in Birbhum, but in Burdwan, the Purbakuls and Pachhimkuls now intermarry. In Birbhum the Kumars won't eat rice with the others, but in Burdwan they may dine together in the house of a Bráhman. Each subcaste has a separate administration.

## SANKHÁRI.

RAGHUNATHPURIA (*t*)... West Bengal. | BALGUMA (*t*) ... West Bengal.
BISHNUPURIA (*t*) ... Ditto. | BARA (*t*) ... Ditto.

The subcastes are all territorial. Intermarriage and commensality are allowed and a member of any one subcaste can gain admission to another, by giving a feast. Each has its own administration.

## SARNAKAR.

UTTAR RÁRHI (*t*)... West, Central and East Bengal. | BASANDALI OR BASANTARI ... West and Central Bengal.
DAKHINRÁRHI (*t*) Ditto. | SONAR (*f*) ... West Bengal.
BÁRENDRA (*t*) ... Central and East Bengal. | KÁMÁR (*f*) ... Ditto.
SAPTAGRAMI (*t*)... West and Central Bengal. | BURSUTYA ... Ditto.
BURDWANI (*t*) ... Central Bengal.

Most of the subcastes have territorial names. The Rárhis are generally regarded as highest in rank and next come the Bárendras, but a good deal depends upon their local strength. In Howrah the Saptagramis stand last, and in the 24 Parganas the Burdwanis claim superiority over the others.

Intermarriage is strictly forbidden, except in Hooghly. In Howrah it is gradually coming into vogue. Commensality is prohibited, except in Birbhum. In Howrah there is no restriction in the matter of smoking, and the practice of eating together is gradually coming into vogue. The Rárhis and Bárendras will dine together in Nadia. In the 24-Parganas they will not eat cooked rice, in company, but there is no restriction to partaking of sweetmeats, and drinking and smoking from the same *hooka*.

No member of one subcaste can gain admission to another, and each has a separate panchayat of its own. Kulinism is in vogue. Kulins receive payment when marrying in a Maulik family.

## SONAR.

AJODHYÁBÁSI (*t*) Bihar and Chota Nagpur. | BAIS ... Bihar.
KANAUJIA (*t*) ... Ditto. | CHARHA ... South Bihar.
BHOJPURIA (*t*) ... Ditto. | CHANSWAR (*t*) ... Ditto.
KAMÁR KÁLLÁ (*a*) Bihar. | BARHA (*t*) ... Ditto.
TETHIRI OR THATHERA (*f*) ... Ditto. | MAIR ... North Bihar.

The names of the subcastes are mostly territorial. The subcaste Kanaujia is further divided into two sections, the Biáhut and Sagahut, among whom intermarriage and commensality are forbidden. The Tethiris or Thatheras are so named from their preparing brass utensils.

All the subcastes are equal in rank in Patna, Monghyr, and Palamau. The Kanaujia ranks highest in Gaya and is followed by the Ajodhyabasi. In Shahabad the Charha is first, Bhojpuria second, Barha third, and Chansawar fourth in rank. Intermarriage is absolutely forbidden among all the subcastes. Commensality is also prohibited; but in Monghyr they will drink water from each other, and in Purnea the Ajodhyabásis and Tethiris will smoke in the same *hooka*.

Each subcaste has a separate panchayat of its own.

# APPENDIX VIII.

No. 265C., dated Ranchi, the 1st October 1901.

From—H. C. Streatfeild, Esq., Deputy Commissioner, Ranchi,
To—The Superintendent of Census Operations, Bengal.

With reference to your No. 184T., dated 25th May last, I have the honour to submit the following report on the precedence of castes in this district, and to express my extreme regret at the delay that has occurred. Having prepared a preliminary note and consulted Babu Krishna Kali Mukherji, Personal Assistant to the Commissioner, on it, I lost sight of the matter until reminded by you recently.

2. The list of tribes given in your letter under reply is as follows:—

(1) Agoria, (2) Asur, (3) Bandawat, (4) Banjara, (5) Baraik (chik), (6) Bedia, (7) Beyar, (8) Bhar, (9) Bhuinya, (10) Binjhia, (11) Birjia, (12) Birhor, (13) Chers, (14) Dhenuar, (15) Dherkor, (16) Ghasi, (17) Gond, (18) Gorait, (19) Gulgulia, (20) Ho, (21) Jhora, (22) Kondra, (23) Kaur, (24) Khaira, (25) Kharia, (26) Kherwar, (27) Kora, (28) Korwa, (29) Koshta, (30) Kurmi, (31) Lohar, (32) Mahli, (33) Mallar, (34) Mar, (35) Maulik, (36) Munda, (37) Nagesia, (38) Nizari, (39) Oraon, (40) Pan, (41) Parhaiya, (42) Rautia and (43) Sarak. Of these, the Bandawat, Banjara, Beyar, Bhar, Dhenuar, Dherkor, Gulgulia, Kandra, Mar, Maulik, Niyari, Parhaiya castes are either non-existent in this district or of such infrequent occurrence that I am unable to assign them a social position in relation to the other tribes. The classification of the remaining tribes and castes according to their accepted social position is by no means an easy task, the status of the several castes varying greatly in local estimation from place to place according to the numbers of the caste in a particular locality, and especially according to the standing of its leading numbers. Thus in the Bassia and Palkot Parganas the hereditary zamindars are Rautias, in Bhaur Pahar Pargana the zamindar is a Bhogta, in Biru Kesalpur the zamindar is a Jhora, in Parbaorga a Binjhia, and in these particular parganas and their neighbourhood the castes concerned undoubtedly take a far higher position than elsewhere in the district. Similarly the Mundas in the south-east of the district, where they form almost the entire population, occupy a distinctly higher social position than where they are scattered about in isolated families; and in that tract their leading families are being to claim Kshatriya rank and call themselves Manki Chattris. The Bhuiyás again in the south of the district are connected with ruling families in the Native States, and are often themselves land-holders; they call themselves Khandait Paiks, and deny any connection with the Bhuiyás of the north of the district and Palamau, who rank with the Musahars of Bihar. On the other hand, the Kherwars and Cheros in Palamau, where they have great traditions, rank much higher than they do in Ranchi.

3. I have, in attempting to arrange the tribes of this district according to their social position, divided them into the following classes:—

(*a*) Castes served by regular Bráhmans, andf rom whom orthodox Hindus will take water;
(*b*) Castes served by inferior Bráhmans or Gosains, from whom the local Hindu castes will usually take water;
(*c*) Castes which claim to be Hindu, but are to all intents and purposes outside the Hindu pale;
(*d*) Purely animistic tribes,

and endeavoured within these classes to place each tribe according to the estimation in which it is generally held. I cannot be absolutely sure of my facts, since I am at present practically devoid of subordinates who have made any study of the castes peculiar to this district, but they are as nearly correct as it is possible to make them without the detailed and minute enquiries which the subject really deamands. Babu Krishna Kali Mukherji, Personal Assistant to Commissioner, has kindly assisted me in the preparation of this list.

4. An annotated list of the tribes arranged on the above principle is attached.

---

Sarák or Sarawak.

1. This caste I place in a class by itself since it is purely Aryan with no suspicion of aboriginal blood or aboriginal origin. The name is said to be a corruption of the Sanskrit Srávak (disciple), a name of the Jain laity, and the caste would seem to have been originally Jain. They worship Hindu gods, but touch no animal food, even fish, and have priests of their own caste, though also occasionally employing Bráhmans. They will not take water even from a Bráhman, nor will Hindus take water from them. They are well-to-do land-holders and money-lenders as a rule, and take the title "*Mánjhi*"; they say they came from Mymensingh.

## Class A.

Binjhia.

2. To all appearances purely Hindu, though in many cases they appear to have intermarried with aboriginals. They claim to have come from the sources of the Vindhyas, whence their name. In the south of the district they are well-to-do and talk Oriya, pointing to their having come in from the south, take the title "*Mánjhi*," and do not call themselves "Singh," or claim to be Rájputs.

3. A well-to-do land-owning caste, divided into three exogamous sub-castes. All call themselves Singh, but do not, as far as I have heard, seriously claim to rank as Chhatri. In appearance they are non-Aryans. The better class conform to Hindu usages. The inferior families eat fowls and, I believe, pork, though this is denied, and would properly come under class B or C. The caste is said to have come into this district from the Rohtasgarh plateau, and the two main subdivisions of the caste represent two different migrations; but the difference in customs appears to me to be due more to the accident of social and pecuniary position of particular families, than to any racial distinction.

Rautia.

4. The Bhogtas of this district claim to be Hindu and to have been brought into this district by one of the Maharajas of Chota Nagpur from Brindaban. In appearance and customs they closely resemble the *Rautias* and frequently call themselves Singh. They claim to be quite distinct from, and superior to, the Kherwar Bhogtas of Palamau.

Bhogta.

5. In this district there is now only one family of any position which is of Kherwar origin. They call themselves Singh, and I have known a Kherwar cultivator to call himself a Rájput. They have by no means a good reputation here, and but for their standing in Palamau I shall place them much lower.

Kherwar.

A tribe talking a form of Mundári, but now Hinduized and calling themselves Sadán (non-aboriginal); are cultivators and workers in wood and bamboo.

Turi.

## Class B.

6. There is only one family of this caste in the district, that of Bakhtaur Singh Manjhi of Kulakera. He claims that he is quite apart from and above the ordinary Gonds, and I am informed that Hindus generally recognize the distinction.

Raj Gond.

7. A tribe claiming to be Aryan, not aboriginal in appearance, but usually found in very jungly villages.

Nagesia.

8. There are very few Cheros here, and Palamau is their real home: appear to be purely aboriginal, who have been, to a certain extent, Hinduized since they began to rule in Palamau.

Chero.

9. The history of this tribe is peculiar. Their caste profession is gold-washing. They are absolutely non-Aryan in appearance, and seem to be connected with the Gonds. The head of their family, the jagirdar of parganas Biru, Kesulpur, has for several generations claimed to be a Rájput, and has gradually been accepted as such, and would now deny that he is a Jhora. The other members of the caste, not to be left behind by their chief, now claim to be purely Hindu, and call themselves Gangbansi Rájput.

Jhora.

10. This caste is, I believe, really not distinct from the Bhuinyás. They do not mind calling themselves Bhuinyás, but say that the Bhuinyás of Gangpur and Orissa are quite distinct from the degraded caste of that name found in Palamau, Hazaribagh and Gaya, which is frankly non-Hindu. They follow Hindu customs, and are recognized by the other tribes in this class as Hindus.

Khandait paik. (Bhuinyás.)

11. A weaving class calling themselves Das and abstaining from animal food.

Koshta.

12. This and the following four castes eat fowls and pork, except when brought in contact with orthodox Hindus, and are not really Hindu except in name and in their worship. I believe, however, that the other castes of this class take water from them. There are several sub-castes, of which some are more Hindu than others, but they all take the title Mahto, and I see no reason to doubt that they are identical with the Kurmis of Bihar, but have adopted many of the customs of the aborigines.

Kurmi.

13. Also call themselves Mahto. They are more or less Aryan in appearance, and have several subdivisions. Their history is probably the same as that of the Kurmis, whom they closely resemble in habits.

Ahir.

14. A cultivating class in the north of the district, who go in largely for trapping big game, more or less Aryan in appearance.

Bedia.

15. A well known jungly tribe, who claim to be Hindus, but are to all intents and purposes aboriginals. They are not numerous in this district, and their proper position is not easy to ascertain.

Gond.

16. A weaving caste claiming to be Aryan and Hindu. They appear to be quite distinct from the Pans or rather Panrs, being fairer and more Aryan in appearance. Probably immigrants from Bengal.

Chik Baraik.

17. Usually said to be identical with the preceding, but neither caste admits this, and the Panrs are far more like the Mundas than the Chik Baraiks in appearance and habits.

Panr or Sawasi or Panr Sawasi.

18. A land-holding caste in the south-west of the district, call themselves Singh and Roy, but are generally believed to be Korwas in origin. They claim to be Hindu, but are not, I believe, generally recognized as such.

Kaura.

19. There are in the district a certain number of Lohars belonging to the Sad Lohar caste, and this caste the Lohars of the local origin are always striving to attain and with some success. In purely aboriginal villages, however, the Lohars are undoubtedly of purely aboriginal origin, and make no pretence to any other language or religion than that of the rest of the village. They were undoubtedly originally members of the aboriginal tribes, who have taken to blacksmith work from taste, and I am told that among the Mundas to this day a man can work as blacksmith and retain his caste until his vanity induces him to show his skill by making an iron needle; after that he becomes a *Lohra*. Being artizans and village servants they are generally reckoned as distinctly below the aboriginal tribe to which they are attached, but I have placed them at the bottom of the *quasi*-Hindu castes as the only possible place for their caste as a whole.

Lohar and Lohra.

20. Village watchmen and runners, apparently closely resemble the Dosádhs of Bihar. I have my suspicions that they are in fact Dosádhs, who have assumed a new title from their employment, eat beaf, pork and fowls.

Gorait.

21. Fishermen, láthiáls and musicians. Have a very bad all-round reputation. Also do bamboo work.

Ghasi.

22. Subdivided into Patar Mahlis, who press oil and Or and Bans Mahlis, who work in bamboo; the former consider themselves much superior to the two latter—the Ors claim in places to be distinct from and above the Mahlis, but I think they are only a sub-caste. It is a question whether the Mahlis are not degraded offshoot of the Mundas. They often talk Mundári as their mother-tongue, but that proves nothing, as Baraiks and Panrs often do the same, but the Khangar Mundas, a sub-caste that is said to have been turned out of the Munda community for unclean eating, are also called Mahli Mundas, and Mahlis come into very old Munda traditions and even into their mythology. They have a thieves' slang of their own, and a bad all-round reputation.

Mahli.

23. A strange caste which I am unable to locate properly. I know of one or two families living among the Mundas, and practically indistinguishable from them, but the genuine Mallars do not acknowledge them. The caste profession is casting in brass from sand moulds, brass grain, measures, stirrups, walking-stick heads, powder-horns, ornamental rings on spears and axes, and similar things are cast in brass by them, the decorative patterns being often obtained by pressing string into the wet mould. The women also tattoo. They talk among themselves, a dialect made by deliberately perverting Hindi, but though this forms a regular thieves' slang, they are not, as far as I know, dishonest; they have no priests and settled homes, wandering from village to village as they find work, and where a Mallar dies, there he is buried and forgotten. Local tradition asserts that the original Mallar was elder brother of the original Oraon, and took to brass-casting by chance, but the Mallars, while admitting the prevalence of the tradition, deny its correctness and claim to be *Sádan* (*i.e.*, non-Kol) by extraction.

Mallar.

## Class D.

The genuine aboriginals are placed at the bottom of the list, because I do not know how else to place them, but no Munda or Oraon would admit that he was other than infinitely superior to Ghasis, Goraits, Mahlis and the weaving classes, and as a matter of fact they are so according to all the ordinary tests of respectability.

24. The Mundas have a universally admitted precedence over the other aboriginals in virtue of their older occupation of the country, their traditions of rule in it, and their establishment of the Nágbansi Maharajas. They appear to have had Rájas—rulers of *parganas*—and rulers of twelve villages and a regular tribal Government, which none of the other aborigines ever had or claim to have had. The Hos or fighting Kols are only found in Singhbhum, and so I have not entered them in my list; they are undoubtedly only a subdivision of the Mundas, and claim superiority over the Konkpát Mundas of the Ranchi plateau. The Khangar Mundas or Mahli Mundas are a sub-caste excommunicated in the days of tradition for eating something unclean; they have a bad reputation for dishonesty.

Mundas.

25. Though more numerous than the Mundas, and as far as moral standard of comfort goes, superior to them in my opinion; they admit a social inferiority due to later arrival in the district and to the fact that they have no traditions of national or tribal as opposed to village organization. I know one Oraon family with the title Manjhi, and this is the only case in the district, to the best of my belief, of any Oraon holding a title denoting more than mere village status.

Oraon.

26. Much more closely resemble the Mundas than the Oraons, and their language is Kolarian. Have a bad reputation for conceit, obstinacy and personal uncleanliness. Appear to have no traditions.

Kharias.

27, 28, & 29. These three tribes all talk a language practically the same as Mundári; they all smelt iron and live in the remotest jungly villages. They are the only tribes that will voluntarily call themselves Kol, and I am unable to distinguish them socially. A theory has been put forward that the Asurs were the original owners of the country, and that the Munda legend of the struggle between Singbonga and the Asur arose from the sanguinary war, in which the latter were ousted by the Mundas. It seems to me far more probable that they are of Munda origin, having separated from the Mundas merely on account of their profession. The legend of the war between the gods and the Titans is probably far older than the Munda occupation of

Asur. | Agoria. | Birjia.

Chota Nagpur, and it is natural that the iron-smelting branch of the tribe should have assumed the name given to the iron-smelting Titans in the legend.

Bhuiyá.

30. The Bhuiyá although they have no sort of tribal organization nor any language of their own, make no pretence of Hinduism, and must therefore be classed among the purely animistic tribes. I have placed them absolutely at the bottom of the list of settled tribes, as without having gained anything from contact with civilization, they have lost the free independent spirit which characterizes the aboriginals generally. They are the only aboriginal tribe which receives outsiders into their community. Cheros who have joined Bhuiyá (generally on account of a love affair with a Bhuiyá woman) are not uncommon in Palamau, and keep the surname Singh, and I have known a Kherwar boy who had a *Baisan* with a Bhuiyá to join the Bhuiyá community, the ceremony including the eating of pork from the woman's hands.

Birhor.

31. A jungly tribe with no fixed habitation, roaming from forest to forest, living on game and monkeys, and by the manufacture and sale of drums and wooden vessels. They talk almost pure Mundari, and the fact that their name Birhor means jungly man in Mundári includes the word Horo meaning man, which the Mundas apply exclusively to themselves, points to their being merely an off-shoot of the Mundas that has preferred the jungly to settled life.

Korwa.

32. I put the Korwa at the bottom of the list, as though they have traditions of rule in the land, and are in fact probably the nearest to true aborigines of any of the so-called aboriginal tribes, and though they are less wandering than the Birhors, and do a certain amount of cultivation in a spasmodic way, their physique and manners are distinctly inferior, and their occasional relapses into predatory savagery mark them out as the one tribe in Chota Nagpur to which the stereotyped newspaper description of the Chota Nagpur aboriginals as little removed from animals to a small extent applies. I have met very intelligent Korwas, however.

---

No. 762, dated Cuttack, the 11th September 1901.

From—Babu Jamini Mohan Das, Deputy Superintendent of Census, Cuttack,
To—The Superintendent of Census Operations, Bengal.

I have the honor to submit the following report on the classification of tribes found in the Orissa Tributary States in the order of their social precedence.

2. The Tributary States contain a considerable population of Hindu and semi-Hinduised castes which do not socially intermix with the pure aboriginal tribes and cannot, therefore, be grouped together with them on the basis of social rank. I propose, therefore, to deal in this report, only with the pure aboriginal tribes found in large numbers in the Orissa Tributary States.

3. I enclose copy of a circular letter addressed by me to the officers noted in the margin, on this subject. Replies received from (2), (3), (4) and (5) are submitted herewith in original.

1. Babu Gopal Ballav Das, Deputy Magistrate, now Manager of Keonjhar State.
2. Babu Ras Behari Naik, Deputy Magistrate, now Manager of Dhenkanal.
3. Manager, Mourbhanj State.
4. Babu Ajoy Chandra Das, Sub-Deputy Collector, now Government Agent, Nayagarh State.
5. Babu Narain Chandra Naik, Deputy Magistrate, now Officiating Deputy Commissioner, Angul, and
6. Babu Sudam Chandra Naik, Assistant Superintendent of Tributary States, Orissa.

4. Two important facts should be borne in mind in dealing with this question; 1st, that the tribes are not uniformly distributed over the different States, and 2nd, that unlike Hindus who form a more or less compact society in every province with traditions of origin connected with their hereditary occupations, the independent aboriginal tribes form separate communities with hardly any intercourse which leads to social gradation. In short, although there is "caste precedence," I doubt very much whether there is any "tribal precedence." Where a tribe is influentially connected with land and strong in numbers, it holds its own against any other tribe, however influential it may be, in some other place. Thus the Kandh holds a very high rank in Kandhmal although, in other states into which he has immigrated, in small numbers, he holds a very low rank. The Kol, again, has been assigned a very low place by all the reporting officers but I am not disposed to take this as an index to his position in Singhbhum from which this tribe has spread into other places. In page 57 of Hunter's Statistical Account of Singhbhum, Mr. Risley (the compiler of this volume) observes—"They (Hos) are in my opinion physically and morally superior to the Mundas, Bhumij and Santals."

The Bhumij similarly has been assigned a very low place in Nayagarh, where the tribe is weak in number, but a much higher place in Mourbhanj, where he is more influential.

Broadly speaking all pure tribes to whom tradition assigns a local home, and an early connection with land, must be put in the same rank, irrespective of their position in any particular place, and all subsidiary tribes derived from them who have degraded themselves by occupation should be put in lower gradations according to the degree of degradation suffered by each.

5. On the principles indicated above I have prepared a statement placing in Group I all the tribes influentially connected with land or having traditions of past connection with land.

It will be seen from the Mourbhanj report that the Bathuris, Dhamas and Kharias were once very influentially connected with land in that State. The Bhuiyás, including the

Bhanja Purans, are also powerful in that State as well as in Keonjhar. The Bhumijas hold a rather low position in Mourbhanj but in Dhalbhum they are still very powerful. The Sabar and Sahars, probably of the same origin, were once the owners of Dhenkanal and the Sahars still hold very high rank in Mourbhanj and Puri.

The Kandhs in Kandhmal, the Mundas and Oraons in Chota Nagpur, the Santhals in Santal Parganas, the Kols in Singhbhum and the Gonds in the Central Provinces, are still very influential.

It is very doubtful whether Kurmis and Lodhas are aboriginal tribes, and I have not, therefore, included them in the list.

The Taulas and Bauris who are of about the same rank should not, I think, be treated as aboriginal tribes. The Taulas are found only in Orissa and are evidently a sub-tribe. Both Taulas and Bauris are semi-Hinduized and as such should be grouped with Hindus.

6. I do not think the tests prescribed for determining the social position of Hindus apply to aborigines any more than they apply to other civilized or uncivilized races. The same tribe is differently treated by the Hindus in different places, according to their local position and habits. I think the degree to which the Hindus associate with a tribe shows the extent to which it has advanced towards conversion to the Hindu faith. Such semi-Hinduized aboriginal tribes may be classed with Hindus on considerations which apply to Hindus, but the pure aborigines who are, strictly speaking, yet Animists should be viewed from other standpoints. It would be well, I think, to leave them unclassified.

7. The occupational groups, below the first group of pure aboriginal tribes, have been classed rather by their occupations and habits than by the rank which they themselves accord to each other in society. I cannot attempt any further subdivisions on the basis of the information available.

In conclusion I beg to say that the subject is too complicated to be adequately dealt with amid the press of heavy routine duties and within the short time available for its consideration. The information collected is very meagre, but I doubt very much whether more useful information can be collected without local enquiry by an officer interested in the question.

*Statement showing the classification of aboriginal tribes in the Orissa Tributary States according to their social precedence.*

| No. of group. | Name of caste. | Characteristic determining the position of the group. | Common characteristics of castes in each group. |
|---|---|---|---|
| I | Bathuri ... | Purity of occupation and influential connection with land of the main bodies of each tribe. | All these tribes are influentially connected with land in some place or other, and still hold high rank where they are strong in numbers. Within the group, they may be all taken as of equal rank. |
| | Bhuiyá ... | | |
| | Bhumij ... | | |
| | Dharuá ... | | |
| | Gond ... | | |
| | Kandh ... | | |
| | Khariá ... | | |
| | Kol ... | | |
| | Munda ... | | |
| | Oráon ... | | |
| | Savar ... | | |
| | Sahar ... | | |
| | Santál ... | | |
| II | Khairá ... | Position of artisans in Hindu society. | These are all artisans and as such may be taken as of equal rank. |

## GENERAL DEPARTMENT.

### MISCELLANEOUS.

CALCUTTA, THE 4TH NOVEMBER 1902.

### RESOLUTION—No. 3180Mis.

READ—

The Report by E. A. Gait, Esq., I.C.S., Superintendent of Census Operations, Bengal, on the census of Bengal taken on the 1st March 1901.

The fourth complete census of the Lower Provinces of Bengal, which was taken on the night of the 1st March 1901, shows the population of the Provinces within the Lieutenant-Governorship of Bengal, including the Feudatory States, to have been on that date 78,493,410 persons, of whom 39,278,186 were males and 39,215,224 were females.

The Superintendent of the Census Operations in Bengal, Mr. E. A. Gait, I.C.S., has submitted his Report within twenty months from the date of the census or after an interval six months shorter than that occupied in compiling the figures and writing the Report of the Census of 1891.

2. The Report is contained in four volumes, of which the first three form Volumes VI to VIB of the Imperial Series. The first volume comprises the Report Proper, the second contains the Imperial Tables in which the district is the unit, and the third the Provincial Tables, in which the unit is the Police circle; the fourth volume, which is the Administrative Report, gives a full account of the procedure adopted in taking the census and in compiling the results, matter which on the occasion of each previous census has been included in the Report Proper. In addition to the abovenamed volumes the Census Superintendent has supplied to each district manuscript volumes of village Census Tables, with an index, giving for each "village" and "mauza" the population by sex and religion. Volumes have also been prepared showing in alphabetical order the classification adopted under the heads (*a*) language, (*b*) caste, (*c*) occupations; these volumes, and another which contains specimens of all forms used throughout the operations, are likely to prove most useful at the next census. Mr. Gait also reports that he has caused to be paged, indexed and bound up, the various reports on the subjects of caste, sub-caste, marriage customs, language, Hindu religion, and Muhammadanism which contain much information that has not been utilised in the Census Report, but which may hereafter prove to be useful.

The Report, tables and other information compiled.

3. Mr. Gait has summarised in the Introduction to his Report the important facts connected (1) with the work of the enumeration, and (2) with the compilation of the figures recorded in the schedules; and it will suffice to mention here under the first head that the arrangements made were very similar to those of 1891, but that the number of enumerators excluding Calcutta and the Feudatory States in 1901 was 384,000 against 315,000 in 1891, and of supervisors 28,000 as against 26,000. Under the head of compilation it must be mentioned that the "slip system" which has long been in use in census work in other countries was, for the first time, adopted under the orders of the Census Commissioner, Mr. Risley, in a Bengal Census in 1901; the innovation was a complete success both in expediting the work of compilation and also in reduction of cost.

Work of Enumeration, Compilation, Check and Cost.

A very detailed examination of the district tables was made by the Superintendent and by his head office. Mr. Gait himself classified all castes, languages and occupations, as he explains in his Administrative Report, and also made a detailed check of the figures of marriage by caste for all castes and all districts. The tabulation for all the earlier tables was checked throughout

item by item, and the testing of the caste and occupation tables, though not so complete, was still very thorough; lastly, all entries which disclosed marked differences in comparison with those of 1891, or which seemed to be open to doubt, were worked out *de novo*.

The total cost of the census just taken in Bengal has been about Rs. 3,90,000 as against about Rs. 7,00,000 expended over the census of 1891. The large reduction of cost is due mainly to the introduction of the slip system, but partly also to the employment of establishment on lower pay and to improved record room arrangements.

The Report Proper.

4. The Report is well arranged, and lucidly written and it indicates remarkable knowledge of the Province and its people. The general description of the Province and the historical retrospect in Chapter I, the account of the religions of Bengal in Chapter IV, the learned disquisition on the languages and castes of the Province in Chapters X and XI especially deserve the attention of scholars and will attract very general interest. The Report is longer than usual, but it is not diffuse and its length is amply vindicated on page V of the Introduction where Mr. Gait points out the vastness of the population of Bengal which is a quarter of that of the whole of India and the greatly varying conditions of caste, language, religion and social customs which distinguish the different parts of the Province. The Report is not only a store-house of information, but it is suggestive and inspiring, and it will undoubtedly prove the starting point of much future research.

In the Imperial Tables the districts have been grouped according to Commissioners' Divisions, but in the Report Proper and in the subsidiary tables, the districts have been arranged in eight natural divisions which correspond nearly but not exactly with the divisions adopted by Mr. O'Donnell in his Census Report for 1891, save that Mr. Gait takes the Presidency Division excluding Khulna away from Western Bengal, and makes it into a division which he calls Central Bengal. This is a suitable arrangement; Mr. Gait's reasons for departing from Mr. O'Donnell's arrangement are given in paragraph 40 of his Report. The statistics for the eight natural divisions are ordinarily taken in the Report as the units for discussion, and the figures for individual districts are dealt with only in Chapter II which treats of the variations in the population, and also in special places where such separate treatment is required.

Another feature of the Report which is deserving of special notice consists of the small maps and diagrams printed with the letter-press. Those which illustrate the Chapter on castes have been prepared on the system recommended by Mr. Jacques Bertillon as explained in paragraph 622 of the Report. These diagrams illustrate the statistics very graphically, and the use of similar diagrams in future reports may be commended.

Density and variations of the population.

5. Turning to the results of the census, it has first to be noticed that of the natural divisions Central Bengal has the greatest density of population, viz., 775 persons to the square mile. Of districts, Howrah with 1,668 persons to the square mile is the most thickly peopled and then follow Dacca with 952 persons, and Muzaffarpur and Saran with 917 and 907 persons to the square mile, respectively: the Chota Nagpur plateau is the area of least dense population, with only 152 to the square mile. The general increase of the population during the decade has been 5·1 per cent. against 7 per cent. in the previous decade. East Bengal with an increase of 10·4 per cent. is the most progressive part of the Province and the general result of this census and of the preceding census is to show that the centre of population of the Province is moving towards the east and south.

It appears from the Report that from 1872 to 1891 there was a steady improvement in the accuracy of the enumeration, and that part of the increases brought out by the Censuses of 1881 and 1891 was therefore unreal: on the other hand that disclosed by the present census is attributable solely to the growth of the population. Mr. Gait writes:—

"The standard of accuracy in 1891 had reached a stage which left but little room for further improvement and, as compared with that census, it is probable that the general gain on this account at the present enumeration does not at the outside exceed 100,000, while in

the districts where plague was prevalent, the census of 1901 was less complete than its predecessor. Taking the gain and loss together, it may be concluded that there has been no appreciable improvement in the matter of accuracy at the present census."

A close approximation between the growth of the total population as ascertained by the census and that indicated by the vital statistics of the Province is noticed in paragraph 90 of the report; and paragraphs 235 and 396 to 398 discuss a general fall in the birth-rate.

To the mass of the people the most important events of the decade were the scarcities of the years 1891-92, 1896-97 and 1899-1900, the outbreaks of plague which began in the Province in 1898 and the development of the mining and mill industries which led to a great increase in the industrial population therein employed. To Chittagong the cyclone and storm-wave of 1897, which caused directly or indirectly 50,000 deaths, was a grievous calamity. No connection appears to exist between famine and variations in the population in Bihar (paragraphs 176, 181, 186 and 229 of the report); but it would seem that in Chota Nagpur a certain amount of the mortality is possibly attributable to famine (paragraphs 199, 203 and 206).

Seven districts have decreased in population since 1891, viz., Jessore, Patna, Gaya, Shahabad, Saran, Champaran and Purnea, the decrease ranging from 8·4 per cent. in Patna to 2·2 per cent. in Saran. There can be no doubt that the decrease in Patna is mainly due to mortality from plague, to the flight of the people from their homes on account of that disease, and to incomplete enumeration in certain places due to the disorganisation of the census arrangements by plague. In Saran the loss of population is also accounted for by the plague epidemic which was more virulent there than in any other district of this Province, except Patna. In Jessore, Champaran and Purnea, the decrease is due to the prevalence of fever and in Purnea also to a very severe outbreak of cholera which occurred in the year 1900. In South Bihar generally, Mr. Gait finds a diminished birth-rate (paragraph 396).

That Bengal like the rest of India is a land of villages and not towns has long been known, and it appears that at the present time out of every 100 persons in the Province, 95 live in villages and 5 in towns. In the statistics for towns the most striking features are the increase in the population of Calcutta and Howrah and their suburbs, and the decrease in the towns of Bihar, which was due to plague mortality and to temporary desertion caused by plague.

Migrations of the people.

6. The great and growing immigration to Bengal Proper from Bihar and the United Provinces, the emigration from Chota Nagpur to the Assam tea gardens and from the Sonthal Parganas to the Barind tract of Northern Bengal are the most noticeable features of the "migration" statistics. The immigrants from Bihar and the United Provinces come to work in the mines of the coal area, and in the mills of the Metropolitan districts, while in the districts of Bengal proper generally they are employed as field labourers, on earthwork on railways, roads and tanks in the towns (and especially in Calcutta, where 40 per cent. of the inhabitants are Hindi-speaking), they are mostly day-labourers, servants and palki-bearers. Chota Nagpur, though the most sparsely populated tract of the Province, sends out not only the greatest number of emigrants but also the largest proportion as compared with its population; next to Chota Nagpur the districts of Bankura, Hooghly, and Saran send out the greatest proportion of emigrants. More than 10 per cent. of the persons born in these districts were enumerated away from their homes. It has generally been supposed that, except in Chota Nagpur, pressure on the soil was the chief factor in determining the extent of migration, but Mr. Gait strikes a new note and makes the following interesting remarks as to the capacity of rice-growing tracts to support large populations:—

"Speaking generally, it may be said that Eastern Bengal is capable of supporting a much greater population per square mile than Bihar and that in Bihar the tracts which can support most people are those where rice is grown. This explains why Muzaffarpur and Durbhanga with their extensive rice tracts are less dependent on earnings outside the district than Saran which is reported to be very fertile and is highly cultivated and well irrigated but which has a comparatively small area under rice cultivation. Purnea, whence the emigration is least, is almost wholly devoted to the growth of rice."

The theory is ingenious, but, on the other hand, it is to be remembered that it is the rice-growing tracts of Bihar which are most liable to famine, and that Saran, which is a "three harvest" district, is the district of North Bihar most immune from famine.

Europeans and Eurasians.

7. The number of Europeans in the Province has increased from 22,773 in 1891 to 27,489 in 1901 and the number of Eurasians from 15,162 to 23,114. The Superintendent considers this return to be more accurate than that of the last census when the Eurasians amounted to only 39 per cent. of the combined population of the two races compared with 46 per cent. on the present occasion. About half of the Europeans and nearly two-thirds of the Eurasians were enumerated in Calcutta. Amongst the Europeans the males aged 15 and over are more than twice the number of the females.

Religions.

8. Nearly two-thirds of the population are Hindus by religion and rather less than one-third are Muhammadans. Next in number at a long interval are those who are classed as Animists, of whom two and three quarters millions have been recorded, chiefly in the Chota Nagpur plateau; the Christians, who are over a quarter of a million, stand fourth, and are followed by the Buddhists, who are under a quarter of a million in number. The aggregate of persons of all other religions is less than fifteen thousand.

The Hindus are predominant in Bihar and Orissa, on the eastern edge of the Chota Nagpur plateau, and on the western fringe of Bengal proper; the Muhammadans, who have increased in number nearly twice as rapidly as the Hindus during the past decade, are almost as numerous as the Hindus in Central Bengal, are half as many again in North Bengal, and are more than twice as many in East Bengal. Christians have increased 45 per cent. in the last ten years, and are three times as numerous as they were at the census of 1872; the converts in the Ranchi district amount to nearly half the Christians in the Province.

It is not possible in this place to do more than mention the interesting discussions in Chapter IV of the Report on the origin of the Muhammadans of Bengal, the Muhammadan sects, the Hindu sects and godlings, and the traces of Buddhism in Bengal. Mr. Gait mentions in paragraph 380 the valuable researches made by Pandit Hara Prashad Shastri with regard to the last-mentioned subject

The ages of the people.

9. The age returns, as in former censuses, are probably the least trustworthy of all the statistics collected. This inaccuracy is due to ignorance, to a preference for certain numbers, and in a lesser degree to wilful misstatements. In view of the admitted inaccuracy of the figures, which is especially noticeable among females, Mr. Gait has used the age statistics chiefly for purposes of comparison: a more elaborate treatment of these statistics will be forthcoming, it is understood, in the Imperial Census Report. It is suggested that the birth- and death-rates were over-estimated in 1891 (paragraph 392), and reasons are given which carry conviction for the contention that there has been a decline in the general birth-rate since 1891 (paragraphs 396 to 398).

Sex and marriage.

10. With regard to the proportion of the sexes, Mr. Gait writes:—

"At the census of Bengal taken in 1872 there was an equal number of each sex, but in 1881 the females exceeded the males by 8 per 1,000. Ten years later the excess fell to 5 per mille, and now the females are fewer than the males by 2 per mille. The actual deficiency in the number of the weaker sex at the present census is 62,962, but this result is due to migration. If only persons born in Bengal are taken into consideration, the females outnumber the males by 160,375, or about 3 per mille."

As was noticed in the census of 1891, the female sex is proportionately more numerous than the male in Bihar, in Chota Nagpur, and in Western Bengal, but males are in excess in the eastern half of the Province, and especially in the districts where the Mongoloid element in the population is strongest, viz., in Jalpaiguri, Cooch Behar, Dinajpur, the Chittagong Hill Tracts, and Hill Tippera.

It is a commonplace that every one in Bengal marries. The average age of marriage for girls all over the Province was stated in 1891 to be eleven

years. Doubtless because of the inaccuracy of the age statistics, Mr. Gait has not attempted to state the average age of marriage for the Province or for particular areas except Chota Nagpur, where, he says, that the usual age of marriage for a girl is between 17 and 18. But the general conclusions of the census of 1891 stand good for the later census. Hindu girls, except in Orissa, are married earlier than Muhammadan girls. The marriage of infants below ten years is most common in Bihar and specially in the Darbhanga district and parts of Muzaffarpur and Bhagalpur. The proportion of widows and of married girls under ten years of age is declining slightly.

The marriage customs of the different Hindu castes are examined in detail, and Mr. Gait arrives at the conclusion that the price paid for a bride or bridegroom depends ultimately on the laws of supply and demand (paragraph 424), and that the age at which a girl is married varies to a great extent with the sum which has to be paid for her (paragraph 438). A former theory that infant-marriage in India is based on the practice of hypergamy amongst the higher castes which leads a man to seek to marry his daughter to a suitable bridegroom at the earliest possible moment, and that the lower castes have copied the practice of the higher castes in this matter was contested by Mr. O'Donnell in his report for 1891. Mr. Gait supports Mr. O'Donnell's conclusions and finds that as a rule the lower castes marry their daughters earliest. The differences are, however, in the main local rather than personal (paragraphs 439 and 440).

It is usually thought that infant marriage and the prohibition of widow remarriage go together; but this is not the case. Where infant marriage is most common, widows freely remarry and (in some cases) fetch a higher price than virgin brides, owing to their greater skill in the caste occupation (paragraphs 441 and 424).

Infirmities.

11. The infirmities recorded at the census as on former occasions were insanity, deafmutism, blindness and leprosy. The number of persons afflicted with these infirmities shows a progressive decline due, as is believed, in the main to more accurate enumeration and more careful exclusion of persons whose infirmities, whatever they might be, did not fall within the scope of the sanctioned definition.

The maps given in paragraphs 457, 463, 470 and 476 of the Report show in very striking manner the local prevalence of infirmities. Insanity is most prevalent in North Bengal and in Chittagong and the Chittagong Hill Tracts, and Mr. Gait finds that the prevalence is a matter of race and that the Koch is specially liable to this infirmity. Deafmutism is generally associated with cretinism and goitre: it is most common in the Himalayan and sub-Himalayan districts, and it is especially prevalent along the course of certain moribund rivers near the foot of the Himalayas. Deaf mutes are very short-lived (paragraph 466). Blindness is most common in the hot and dry districts of South Behar and Chota Nagpur. In connection with the decrease in the number of blind persons recorded, Mr. Gait notices that 15,987 successful operations for cataract were performed in the public hospitals and dispensaries in the last decade as against 2,434 during the previous ten years. The great centre of leprosy in these Provinces lies in the three western districts of the Burdwan Division, viz., Bankura, Birbhum and Burdwan and in the adjoining district of Manbhum. In the Province generally the census shows a decrease in the number of lepers, who number 48 for every 100,000 as compared with 60 in the last census; but there appears to have been a spread of the disease in Manbhum and the Sonthal Parganas. The decrease is probably due to more careful enumeration resulting in the exclusion of those who are affected merely with leucoderma.

Education.

12. At the census of 1891 the population was divided into three categories, viz., literate, learning and illiterate, but at the census of 1901 the population was broadly divided into two great classes only, the literate and the illiterate, *i.e.*, of those who are or are not able both to read and write. This change of system, though it has simplified the work, has obscured the results and made a detailed comparison difficult. Comparing the figures, however, for persons over 15 years of age, the number of literate males in the whole Province is 146 per 1,000 as against 137 in 1891, and the number of literate females 7 per 1,000 against

4 only in 1891. It will be noticed that the figures given in the 484th paragraph of the report show the absolute and not the proportional increase of literacy since 1891.

Wide as is the field for the improvement of primary education among the male population, still more remains to be done among the female population, and the progress during the last decade has been proportionately greater among females than among males, though not absolutely so great. Mr. Gait urges in his 485th paragraph that female education has made great strides during the decade; but looking to the very small number of educated females in the whole Province, this seems too confident a statement, and it can hardly be accepted for any area except Calcutta.

The continued and increasing superiority of the Hindus over the Muhammadans in literacy, the large amount of literacy among converts to Christianity, and the marked superiority of the metropolitan area over the rest of the Province are the most striking features of the chapter dealing with the statistics of education. The most backward part of the Province in education, in spite of the efforts of the Christian Missionaries, is Chota Nagpur, and next lowest is North Bihar.

The statistics of knowledge of English may with advantage be more fully examined than has been done in paragraph 486 of the Report. Table VIII shows that in the whole Province 351,704 males and 22,966 females are "literate in English," *i.e.*, are able to read and write English. Deducting from these numbers 24,156 males and 15,089 females who returned English only as their "language ordinarily used," *i.e.*, the European and Eurasian population, it appears that there are 327,548 males and 7,877 females among the native population who can read and write English. So far as these figures can be compared with the statistics of the last census, it would appear that, as might be expected, there has been a considerable increase in the number of English-knowing persons among the native population of the Province since 1891.

Language.

13. Mr. Gait's chapter on the languages of the Province is of the highest interest.

Omitting Europeans and Eurasians but including all other immigrants, the people of the Province speak 74 languages, viz., 15 grouped under the Aryan Family, 16 under the Munda Family, 9 under the Dravidian Family, and 34 under the Tibeto-Burman Family. That there has been no unnecessary sub-division of languages in this category will be understood when it is mentioned that Hindi includes Urdu and Bihari the latter of which Dr. Grierson once divided into seven dialects. Out of every 1,000 persons in the Province 528 speak Bengali, 341 Hindi (including Bihari), 79 Uriya and 1 speaks Khas (or Nepali-Hindi) leaving 51 persons per 1,000 for all the other 70 languages put together. It is in the Chota Nagpur plateau with its Munda and Dravidian dialects, in Darjeeling and Sikkim with their Tibeto-Himalayan dialects, and in the Chittagong Hill Tracts where the Kuki, Chin and Bodo dialects are spoken that the great congeries of non-Aryan languages are found. Mr. Gait has avoided a detailed examination of Aryan dialects partly in order to curtail his report, and also because Dr. Grierson is dealing with these dialects; but he has discussed the Himalayan, Sikkim and Nepal groups of languages more fully than the others, because they have not yet formed the subject of any reports in the linguistic survey.

The conclusion at which Mr. Gait arrives in his 545th paragraph as to the absence of any necessary connection between race and language is noticeable.

Castes.

14. The chapter on castes is the longest in the volume, and takes up nearly one-fourth of the Report. Much labour was given to this part of the enumeration. A caste index largely based on Mr. Risley's "Caste and Tribes" was circulated to Census Officers of higher grades, and greatly facilitated the work, but even with this help, the classification of doubtful entries gave immense trouble. The discussions on the origin of caste (paragraphs 550 to 574), and on the social precedence of castes (paragraphs 575 to 621) have been inserted in accordance with directions given by the Census Commissioner.

With insufficient time at his disposal for working up the results of his enquiries, or for following up the numerous and difficult side issues which arose in the examination of the caste figures, Mr. Gait has nevertheless made a most important contribution in this chapter to the ethnography of the Province, and has presented several obscure questions in a clearer light than has before been shed on them.

The origin of existing castes is discussed in paragraphs 566—574 of the report and the origin of the restrictions which characterise the institution of caste is distinguished from the question as to how the existing castes were recruited. The views held by M. Senart that the sub-caste is the true caste, and that caste was a natural development of the family and tribal organization of the Aryans are cited in paragraph 562; but Mr. Gait holds that caste is more likely to be due to the influence of the panchayats of the functional groups. He quotes the definitions of "caste" given by his predecessors in this field of enquiry—Messrs. Nesfield, Baines and Risley, and propounds the following careful definition of his own:—

"A caste is an endogamous group or a collection of such groups bearing a common name who, by reason of similarity of traditional occupation and reputed origin, are generally regarded, by those of their countrymen who are competent to give an opinion, as forming a single homogenous community, the constituent parts of which are more nearly related to each other than they are to any other section of the society."

Mr. Gait adds that the decision as to caste must rest with enlightened public opinion, and not with public opinion generally, as it often happens that a Hindu knows little about any caste other than his own.

The orders issued with regard to arrangement of castes according to their social status gave rise to many acrimonious disputes, *e. g.*, specially with reference to the relative precedence of the Baidyas and the Kayasths and the position of the Chasi-Kaibarttas. In order to avoid as far as possible giving offence to rival castes, Mr. Gait has made his different groups fairly wide, and as a rule has avoided mention of the relative position of castes in the same group.

Of the castes other than Muhammadan there are fifteen having more than a million members, viz., (in order of numbers) the Ahirs (or Goalas), Brahmans, Kaibarttas, Rajbansis (or Koches), Namasudras (Chandals), Santals, Chamars (Muchis), Rajputs, Kurmis, Telis, Kayasths, Koiris, Dosadhs, Babhans and Bagdis. The Ahirs who are nearly four millions are a long way the most numerous; next follow the Brahmans with nearly three millions, the Kaibarttas who are nearly two and-a-half millions, the Rajbansis with over two millions, the Namasudras and the Santals each with over eighteen hundred thousand; the Chamars with sixteen hundred and twenty-six thousand; while the other eight castes named are each between a million and a million-and-a-half strong. The distribution of the main castes is illustrated by a series of maps which show in a very striking way how strictly local are many of the main groups. The Babhans, Dhanuks and Koiris for instance are confined to Bihar, the Bagdis and Sadgops to West Bengal, the Chasas and Khandaits to Orissa, the Chandals to East Bengal, the Pods to Central Bengal and the Rajbansis to North Bengal.

Among the notes on particular castes and tribes possessing special interest are to be mentioned those regarding the Saraks (paragraphs 778—780) an interesting archaic community, probably of Jain or Buddhist origin, found in Western Bengal, Chota Nagpur and Orissa, the notes on the disputed question of the origin of the Rajbansis (paragraph 617), on the Sectarian castes (paragraphs 782—787), on Muhammadan castes and tribes (paragraphs 812—817), and on the Nepali tribe of Newars (paragraphs 886—894).

Occupations.

15. The scheme of occupations prescribed for the census was very elaborate, comprising, as it did, eight classes, twenty-four orders, seventy-nine sub-orders and five hundred and twenty groups, and the preparation of the returns under this head was therefore very laborious. The Superintendent states (paragraph 905) that from one-third to a quarter of the entire expenditure on the census operations was incurred in compiling the occupation tables. The arguments used by Mr. Gait in paragraph 905 in favour of having a simpler classification in

future are well worthy of attention, and seem to be conclusive against the attempt to collect statistics of occupation in such elaborate detail as has hitherto been done. This seems to be a case where elaboration defeats itself and where the truth is to be obtained only by a broad and general classification of occupations.

Changes of system which are noticed in paragraph 906 and following paragraphs of the Report have confused comparison with the corresponding return for 1891, and make detailed examination useless. Speaking generally, however, it appears that nearly 57 millions or 72·5 per cent. of the population are classed under the main head as employed on "Pasture and Agriculture;" nor is this an exhaustive statement of persons occupied with agriculture as it is probable that a considerable number of the five-and-a-half million general labourers returned as non-agricultural are at some seasons of the year employed in agriculture, and it will be safe to say that over three-fourths of the population are dependent on the land. Artisans and others classed under the head "Preparation and supply of material substances" make up over 9½ millions or 12 per cent., and unskilled labourers, not, agricultural, are over 6 millions or 7½ per cent. of the population. The statistics which have been collected showing the small share of high appointments in Government service which are held by Muhammadans, and the practical monopoly of all such appointments held by Hindus by members of the Kayasth, Brahman and Baidya castes may be mentioned as a feature of this chapter.

16. In conclusion, the Lieutenant-Governor desires to record his high appreciation of the labours of the Superintendent and the District Officers, as well as of a large number of officials and non-officials, which have resulted in a most successful census of the people, and he has in addition to thank Mr. Gait for a Report of singular merit and ability. Mr. Gait's commendation of the work of his Assistants, Mr. Howard, Mr. Moberly, Babu Jamini Mohan Das, Babu Mon Mohan Ray, and Mr. Manmatha Nath Ghosh, will be recorded in the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

*Offg. Secretary to the Government of Bengal.*
