PREFACE.

The Áín i Akbarí is the third volume of the Akbar-na'mah, by Shaikh Abulfazl, and is by far the greatest work in the whole series of Muhammadan histories of India. The first volume of this gigantic work contains the history of Timur's family as far as it is of interest for the Indian reader, and the reigns of Bábar, the Súr kings, and Humáyún, whilst the second volume is devoted to the detailed history of nearly forty-six years of the reign of the Great Emperor. The concluding volume, the A'ín i Akbarí, contains that information regarding Akbar's reign which, though not strictly historical, is yet essential to a correct understanding of the times, and embodies, therefore, those facts for which, in modern times, we would turn to Administration Reports, Statistical compilations, or Gazetteers. It contains the *áín* (*i. e.*, mode of governing) of Akbar, and is, in fact, the Administration Report and Statistical Return of his government, as it was about 1590 A. D. The contents, therefore, of the A'ín are naturally varied and detailed. The first of its five books treats of Akbar's household and court, and of the emperor himself, the soul of every department, who looks upon the performance of his duties as an act of divine worship, and who enters into the details of government, in order to create a harmonious whole. Vouchsafed as king with a peculiar light from on high, his person is prominently put forward as the guide of the people in all matters temporal and spiritual; in

whose character and temper the governed find that rest and peace which no constitution can give, and in whom, as the author of a new and advanced creed, the dust of intoleration is for ever allayed.

The second book treats of the servants of the throne, the military and civil services, and the attendants at court whose literary genius or musical skill receives a lustre from the encouragement of the emperor, and who in their turn reflect a brilliant light on the government.

The third book is entirely devoted to regulations for the judicial and executive departments, the establishment of a new and more practical era, the survey of the land, the tribal divisions, and the rent-roll of the great Finance minister whose name has become proverbial in India.

The fourth book treats of the social condition and literary activity, especially in philosophy and law, of the Hindus, who form the bulk of the population, and in whose political advancement the emperor saw the guarantee of the stability of his realm. There are also a few chapters on the foreign invaders of India, on distinguished travellers, and on Muhammadan saints and the sects to which they respectively belong.

The fifth book contains the moral sentences and epigrammatical sayings, observations, and rules of wisdom of the emperor, which Abulfazl has gathered as the disciple gathers the sayings of the master.

In the Á'ín, therefore, we have a picture of Akbar's government in its several departments, and of its relations to the different ranks and mixed races of his subjects. Whilst in most Muhammadan histories we hear of the endless turmoil of war and dynastical changes, and are only reminded of the existence of a people when authors make a passing allusion to famines and similar calamities, we have Á'ín the governed classes brought to the foreground: id move before us, and the great questions of the

time, axioms then believed in and principles then followed, phantoms then chased after, ideas then prevailing, and successes then obtained, are placed before our eyes in truthful, and therefore vivid, colours.

It is for this reason that the Á'ín stands so unique among the Muhammadan histories of India, and we need not wonder that long before curious eyes turned to other native sources of history and systematically examined their contents, the Á'ín was laid under contribution. Le Père Tieffentaller, in 1776, published in his 'Description Géographique de l'Indostan' long extracts from the rent-roll given in the Third Book; Chief Sarishtahdár Grant used it largely for his Report on Indian Finances; and as early as 1783, Francis Gladwin, a thorough Oriental scholar, dedicated to Warren Hastings his "Ayeen Akberi," of which in 1800 he issued a printed edition in London. In his translation, Gladwin has given the greater part of the First Book, more than one-half of the Second and Third Books, and about one-fourth of the Fourth Book; and although in modern times inaccuracies have been discovered in the portions translated by him—chiefly due, no doubt, to the fact that he translated from MSS., in every way a difficult undertaking—his translation has always occupied a deservedly high place, and it may confidently be asserted that no similar work has for the last seventy years been so extensively quoted as his. The magnitude of the task of translating the Á'ín from uncollated MSS. will especially become apparent, when we remember that, even in the opinion of native writers, its style is "not intelligible to the generality of readers without great difficulty."

But it is not merely the varied information of the Á'ín that renders the book so valuable, but also the trustworthiness of the author himself. Abulfazl's high official position gave him access to any document he wished to consult, and his long career and training in various departments of the

State, and his marvellous powers of expression, fitted him eminently for the composition of a work like the Akbarnámah and the A'ín. His love of truth and his correctness of information are apparent on every page of the book, which he wished to leave to future ages as a memorial of the Great Emperor and as a guide for enquiring minds; and his wishes for the stability of the throne and the welfare of the people, his principles of toleration, his noble sentiments on the rights of man, the total absence of personal grievances and of expressions of ill-will towards encompassing enemies, shew that the expanse of his large heart stretched to the clear offing of sterling wisdom. Abulfazl has far too often been accused by European writers of flattery and even of wilful concealment of facts damaging to the reputation of his master. A study, though perhaps not a hasty perusal, of the Akbarnámah will shew that the charge is absolutely unfounded; and if we compare his works with other historical productions of the East, we shall find that while he praises, he does so infinitely less and with much more grace and dignity than any other Indian historian or poet. No native writer has ever accused him of flattery; and if we bear in mind that all Eastern works on Ethics recommend unconditional assent to the opinion of the king, whether correct or absurd, as the duty of man, and that the whole poetry of the East is a rank mass of flattery, at the side of which modern encomiums look like withered leaves,—we may pardon Abulfazl when he praises because he finds a true hero.

The issue of the several fasciculi of this translation has extended over a longer time than I at first expected. The simultaneous publication of my edition of the Persian Text, from which the translation is made, the geographical difficulties of the Third Book, the unsatisfactory state of the MSS., the notes added to the translation from various Muhammadan historians and works on the history of literature, have rendered the progress of the work unavoidably slow.

I am deeply indebted to the Council and the Philological Committee of the Asiatic Society of Bengal for placing at my disposal a full critical apparatus of the A'ín and entrusting me with the edition of the text, for which the Indian Government had most liberally sanctioned the sum of five thousand Rupees. My grateful acknowledgments are also due to Dr. Thomas Oldham, Superintendent of the Geological Survey of India and late President of the Asiatic Society, for valuable advice and ever ready assistance in the execution of the work; and to Col. H. Yule, C. B., and to H. Roberts Esq., of the Doveton College, for useful hints and corrections.

I have thought it advisable to issue the first volume with a few additional notes, and two indexes, one of persons and things, and the other of geographical names, without waiting for the completion of the whole work. I have thus had an opportunity of correcting some of the errors and inconsistencies in the spelling of names, and supplying other deficiencies. That defects will still be found, notwithstanding my endeavours to remove them, none of my readers and critics can be more sensible than I myself am.

LIST OF PLATES

IN THE

FIRST VOLUME

OF THE

ÁÍN I AKBARÍ.

PLATES I TO III. THE WORKMEN OF THE MINT, pp. 20 to 27.

1, 2. Preparation of acids.—3. Washing of ashes.—4, 9, 10, 12, melting and refining.—5. Weighing.—6, 8. Making of plates.

7. Work of the *zarráb*, p. 21.—11. Engraving.—12. The *Sikkachí*, p. 22.

PLATE IV. THE IMPERIAL CAMP, (p. 47).

a, b, c, d, f, g, roads and bázárs. "The principal bázár is laid out into "the form of a wide street, running through the whole extent of the army, "now on the right, now on the left, of the Díwán i kháç." *Bernier.*

1. The Imperial Harem (*shabistán i iqbál*). At the right hand side is the *Dúáshyánah Manzil*; *vide* p. 54, 3.
2. Open space with a canopy (*shámyánah*).
3. Private Audience Hall (*daulat-khánah i kháç*), p. 46.
4. The great camp light (*ákásdiah*), pp. 47, 50.

"The *aquacy-die* resembles a lofty mast of a ship, but is very slender, "and takes down in three pieces. It is fixed towards the king's quarters, "near the tent called *Nagar-kane*, and during the night a lighted lantern "is suspended from the top. This light is very useful, for it may be seen "when every object is enveloped in impenetrable darkness. To this spot "persons who lose their way resort, either to pass the night secure from all "danger of robbers, or to resume their search after their own lodgings. "The name 'Aquacy-die' may be translated 'Light of Heaven,' the lantern "when at a distance appearing like a star." *Bernier.*

5. The *Naqqárah-khánah*, pp. 47, 50.

AB, or distance from the Harem to the Camp Light, = 1530 yards; AC = 360 yards; p. 47.

6. The house where the saddles were kept (*zainkhánah*).
7. The Imperial stables (*içṭabal*).
8. Tents of the superintendents and overseers of the stables.
9. Tents of the clerk of the elephant stables.
10. The Imperial Office (*daftar*).

11. Tent for pálkís and carts.
12. Artillery tent (*topkhánah*).
13. Tent where the hunting leopards were kept (*chítah-khánah*).
14. The Tents of Maryam Makání (Akbar's mother), Gulbadan Begum (Humáyún's sister, p. 615), and Prince Dányál; p. 40.
15. The tents of Sulṭán Salím (Jahángír), to the right of the Imperial Harem.
16. The tents of Sulṭán Murád, to the left of the Imperial Harem; p. 48.
17. Store rooms and workshops (*buyútát*).
18. Tent for keeping basins (*áftábchí-khánah*).
19. Tent for the perfumes (*khushbú-khánah*).
20. Tent for storing mattress (*toshak-khánah*).
21. Tent for the tailors, &c.
22. Wardrobe (*kurkyaráq-khánah*), pp. 87, 616.
23. Tent for the lamps, candles, oil, &c. (*chirágh-khánah*).
24. Tents for keeping fresh Ganges water (*ábdár-khánah*), p. 55.
25. Tent for making *sharbat* and other drinks.
26. Tent for storing *pán* leaves.
27. Tent for storing fruit (*mewah-khánah*).
28. Tent for the Imperial plate (*rikáb-khánah*).
29. The Imperial kitchen (*maṭbakh*).
30. The Imperial bakery (*nánbá-khánah*).
31. Storeroom for spices (*hawej-khánah*).
32. The Imperial guard.
33. The Arsenal (*qur-khánah*).
34. Women's apartments.

35 to 41. Guard houses.

Round about the whole the nobles and Mançabdárs with their contingents pitched their tents.

"The king's private tents are surrounded by small *kanats* (*qanáts*, standing screens), of the height of a man, some lined with Masulipatam chintz, worked over with flowers of a hundred differents kinds, and others with figured satin, decorated with deep silken fringes." *Bernier.* Bernier's description of the Imperial camp (second letter, dated Láhor, 25th February, 1665) agrees in minute details with the above.

PLATE V. CANDLESTICKS, p. 49.

1. Double candlestick (*dúshákhah*).—2. Fancy candlestick with pigeons.—3. Single candlestick (*yakshákhah*).
4. The *Akásdiah*, or Camp-light; *vide* Pl. IV, No. 4.

PLATE VI. THE EMPEROR AKBAR WORSHIPS FIRE.

In front of Akbar twelves candles are placed, and the singer of sweet melodies sings to the praise of God, as mentioned on p. 49, l. 10 ff.

The faces of the emperor and the singer are left blank, in accordance with the Muhammadan dislike to paint likenesses of anything on, below, or above the earth. The emperor sits in the position called *dúzánú*.

PLATE VII. THRONES.

1, 2. Different kinds of thrones (*aurang*) with pillows (*masnad*) to lean against, the royal umbrella (*chatr*), and the footstool (*çandalí*).

PLATE VIII. THE NAQQA'RAH KHA'NAH, pp. 50, 51.

1. Cymbals (*sanj*).—2. The large drum (*kuwargah* or *damámah*).—3, 4, 5. The *Karaná*.—6. The *Surná*.—7. The Hindí *Surná*.—8. The *Nafír*.—9. The *Singh*, or horn.—10. The *Naqqárahs*.

PLATE IX. THE ENSIGNS OF ROYALTY, p. 50.

1. The Jhanḍá, or Indian flag. "The Royal standard of the great Mogul is a *Couchant Lion* shadowing part of the body of a sun." *Terry*.
2. The *Kaukabah*.
3. *Sáibán* or *A'ftábgír*.
4. The *Tumantoq* (from the Turkish *toq*, or *togh*, a flag, and *tuman* or *túmán*, a division of ten thousand).
5. The *Chatr*, or (red) royal umbrella.
6. A standard, or *'alam*.
7. The *Chatrtoq*. As Abulfazl says that this standard is *smaller* than the preceding, it is possible that the word should be pronounced *chuturtoq*, from the Turkish *chutur*, or *chútúr*, short. The flag is adorned with bunches of hair (*quṭás*) taken from the tails and the sides of the Tibetan Yak.

PLATES X & XI. THE IMPERIAL TENTS.

Plate X. The three tents on the top, commencing with the left, are (1) the *Shámyánah*; (2) A *yakdarí Khargáh*, or tent of one door; (3) the *Dúdarí*, or tent of two doors; p. 54, 8. Rolled up over the door is the *chigh*; p. 226, Áín 88.

Below these three tents, is the *Sarápardah* and *Gulálbár*, p. 54. At the foot of the plate is the *Namgírah* (*pr.* dew-catcher), with carpet and pillow (*masnad*); p. 46.

Plate XI. On the top, the *bárgáh*, p. 53. Below it, on the left, is the *Dúáshyánah Manzil*, or two-storied house; *vide* Pl. IV, No. 1. At the window of the upper story, the emperor shewed himself; *vide* Index, darsan and jharokah. To the right of this two-storied tent, is the *Chobín Ráwaṭí* (as the word ought to be spelt, from *chobín*, wooden, and *ráwaṭí*, a square tent), pp. 46, 53. Below it, the common conical tent, tied to pegs stuck in the ground; hence it is called *zamíndoz*, with one tent pole (*yak-surughah*, from the Turkish *surugh*, or *surúgh*, a tent pole).

Below is a *Zamíndoz* with two poles (*dúsurughah*). At the bottom of the plate, to the left, is the *Manḍal*, p, 54, 6; and to the right, the *'Ajáibí*, 54, 5.

PLATE XII. WEAPONS; pp. 110 to 112.

The numbers in brackets refer to the numbers on pp. 110 to 112.

1. The sword, *shamsher* (1).
2. The straight sword, *k'hándah* (2).
3, 3*a*. The *guptí 'aṣá* (3).
4. The broad dagger, *jamdhar* (4).
5. The bent dagger, *khanjar* (5).
6. The *jamk'hák*, or curved dagger (7).
7. The bent knife, *báṇk* (8).
8. The *jhaṇbwah*, or hiltless dagger (9).
9. The *katárah*, a long and narrow dagger (10).
10. The *narsinkmoth* (*narsing mot'h*?), a short and narrow dagger (11).
11. The bow, *kamán* (12).
12, 13. The small bow and arrow, *takhsh kamán* and *tír* (13).
14*a*. Arrow.
14*b*. The *paikánkash*, or arrow-drawer (19).
15. The quiver, *tarkash* (16).
16. The lance, *naizah* (20).
17. The Hindústání lance, *barchhah* (21).
18. The *sánk*, or broad-headed lance (22).
19, 20. The *saint'hí* (23) and *selarah* (24).
21. The *shushbur*, or club. This I believe to be the correct name (instead of *shashpar*, p. 111, No. 26), from *shush*, lungs, and *bur*, tearing.
22. The axe, *tabar*.
23. The club, *gurz* (25). On p. 111, No. 29, the word *piyází* has been translated by 'club,' and this seems to be the correct meaning; but the plates in some MSS. call 'piyází' a long knife with straight back, ending in a point.
24. The pointed axe, *zághnol*, *i. e.* crow-bill (30).
25. The *chakar* (wheel) and *basolah* (31).
26. The double axe, *tabar-zághnol* (32).
27. The *tarangálah* (33).
28. The knife, *kárd* (34).

PLATE XIII. WEAPONS (CONTINUED).

29. The *guptí kárd*, or knife concealed in a stick (35).
30. The whip, *qamchí kárd* (36).
31. The clasp knife, *cháqú* (37).
32. A bow, unstrung.
33. The bow for clay bullets, *kamt'ha*, or *kamán i gurohah* (38).
34. The tube, or pea-shooter, *tufak i dahán* (40).
35. The *pushtkhár* (41).
36. A lance called *girih-kushá*, *i. e.* knot-unraveller (43).
37. The *khár i máhi*, *i. e.* fish-spine (44).
38. The sling, *gohhan* (45).
39. The *gajbág'h*, or *ánkus*, for guiding elephants (46); *vide* p. 129, No. 27.

40. The shield, *sipar* (47).
41. Another kind of shield, *dhál* (48).
42. The plain cane shield, *pahrí*, or *pharí* (50).
43. The helmet, *dubalghah* (52).
44. The *g'hug'hwah*, a mail coat for head and body, in one piece (55).
45. The helmet, with protection for the neck, *zirih-kuláh* (54).
46. The mailed coat, *zirih* (57).
47. The mailed coat, with breast-plate, *bagtar* (58).
48. An armour for chest and body, *joshan* (59).
49. The breast and back-plates, *chahár-áinah* (60).

PLATE XIV. WEAPONS AND ARMOURS (CONTINUED).

50. The coat with plates and helmet, *koṭ'hí* (61).
51. An armour of the kind called *çádiqí* (62).
52. A long coat worn over the armour, *angirk'hah* (63).
53. An iron mask, *chihrah-zirih i áhaní* (65).
54. A doublet worn over the armour, *chihil-qad* (67).
55. The long glove, *dastwánah* (68).
56. The small one is the *mozah i áhaní*, or iron stocking (71); and the large one, the *rák* (69).
57. The *kajem*, or *kejam*, a mailed covering for the back of the horse (72).
58, 59. The *artak i kajem*, the quilt over which the preceding is put (73).
60. The *qashqah*, or head protection for the horse (74).
61. The *kaṇt'hah sobhá* (07)
62. The rocket, *bán* (77).

PLATE XV. AKBAR'S MACHINE FOR CLEANING GUNS: *vide* p. 115, Aín 38, of the 1st Book.

PLATE XVI. HARNESS FOR HORSES. Aín 52, p. 136.

PLATE XVII. GAMES; pp. 303, 304.

The upper figure shews the board for *Chaupaṛ*, p. 303, and the lower figure is the board for the Chandal Maṇḍal game. Both boards were made of all sizes; some were madè of inlaid stones on the ground in an open court yard, as in Fathpúr Síkrí, and slave girls were used instead of pieces. The players at Chandal Maṇḍal sat on the ground, round the circumference, one player at the end of each of the sixteen radii.

BIOGRAPHY

OF

SHAIKH ABULFAZL I 'ALLÁMÍ.

Shaikh Abul Fazl, Akbar's minister and friend, was born at Ágrah on the 6th Muharram, 958,* during the reign of Islám Sháh.

The family to which he belonged traced its descent from Shaikh Músá, Abul Fazl's fifth ancestor, who lived in the 9th century of the Hijrah in Siwistán (Sindh), at a place called Rel (ريل). In "this pleasant village," Shaikh Músá's children and grandchildren remained till the beginning of the 10th century, when Shaikh Khizr, the then head of the family, following the yearnings of a heart imbued with mystic lore, emigrated to Hindústán. There he travelled about visiting those who, attracted by God, are known to the world for not knowing it; and after passing a short time in Hijáz with the Arabian tribe, to which the family had originally belonged, he returned to India, and settled at Nágor, N. W. of Ajmír, where he lived in the company of the pious, enjoying the friendship of Mír Sayyid Yahyá of Bukhárá.

The title of Shaikh, which all the members of the family bore, was to keep up among them the remembrance of the home of the ancestors.

Not long afterwards, in 911, Shaikh Mubárak, Abul Fazl's father, was born. Mubárak was not Shaikh Khizr's eldest child: several children had been born before and had died, and Khizr rejoicing at the birth of another son, called him Mubárak, *i. e.*, the blessed, in allusion, no doubt, to the hope which Islám holds out to the believers, that children gone before bless those born after them, and pray to God for the continuance of their earthly life.

Shaikh Mubárak, at the early age of four, gave abundant proofs of intellectual strength, and fashioned his character and leanings in the company of one Shaikh 'Aṭan (عطن), who was of Turkish extraction and

* 14th January, 1551.

had come during the reign of Sikandar Lodí to Nágor, where he lived in the service of Shaikh Sálár, and died, it is said, at the advanced age of one hundred and twenty years. Shaikh Khizr had now resolved permanently to settle at Nágor, and with the view of bringing a few relations to his adopted home, he returned once more to Siwistán. His sudden death during the journey left the family at Nágor in great distress; and a famine which broke out at the same time, stretched numbers of the inhabitants on the barren sands of the surrounding desert, and of all the members of the family at Nágor only Mubárak and his mother survived.

Mubárak grew up progessing in knowledge and laying the foundation of those encyclopedial attainments, for which he afterwards became so famous. He soon felt the wish and the necessity to complete his education and visit the great teachers of other parts; but love to his mother kept him in his native town, where he continued his studies, guided by the teachings of the great saint Khwájah Ahrár,* to which his attention had been directed. However, when his mother died, and when about the same time the Máldeo disturbances broke out, Mubárak carried out his wish, and went to Ahmadábád in Gujarát, either attracted by the fame of the town itself, or by that of the shrine of his countryman Ahmad of Khaṭṭú.† In Ahmadábád, he found a second father in the learned Shaikh Abul Fazl, a khaṭíb, or preacher, from Kázarún in Persia, and made the acquaintance of several men of reputation, as Shaikh 'Umar of Tattah and Shaikh Yúsuf. After a stay of several years, he returned to Hindústán, and settled, on the 6th Muharram, 950, on the left bank of the Jamuná, opposite Ágrah, near the Chárbágh Villa,‡ which Bábar had built, and in the neighbourhood of the saintly Mír Rafí'uddín Safawí of Injú (Shíráz), among whose disciples Mubárak took a distinguished place. It was here that Mubárak's two eldest sons, Shaikh Abul Faiz,§ and four years later, Shaikh Abul-Fazl, were born. Mubárak had now reached the age of fifty, and resolved to remain at Ágrah, the capital of the empire; nor did the years of extraordinary drought which preceded the first year of Akbar's reign,

* Died at Samarqand, 29th Rabí' I, 895, or 20th February, 1490.

† *Vide* p. 507, note. Ahmad of Khaṭṭú is buried at Sark'hich near Ahmadábád. He died in 849 (A. D. 1445).

‡ Later called Hasht Bihisht, or the Núrafshán Gardens. It is now called the Rám Bágh.

§ Born A.H. 954, or A.D. 1547. *Vide* p. 490.

and the dreadful plague, which in 963 broke out in Ágrah and caused a great dispersion among the population, incline him to settle elsewhere.

The universality of learning which distinguished Mubárak attracted a large number of disciples, and displayed itself in the education he gave his sons; and the filial piety with which Abul Fazl in numerous passages of his works speaks of his father, and the testimony of hostile writers as Badáoní, leave no doubt that it was Mubárak's comprehensiveness that laid in Abul Faiz and Abul Fazl the foundation of those cosmopolitan and, to a certain extent, anti-Islamitic views, for which both brothers have been branded by Muhammadan writers as atheists, or as Hindús, or as sunworshippers, and as the chief causes of Akbar's apostacy from Islám.

A few years before 963 A. H., during the Afghán rule, Shaikh Mubárak had, to his worldly disadvantage, attached himself to a religious movement, which had first commenced about the year 900, and which continued under various phases during the whole of the tenth century. The movement was suggested by the approach of the first millennium of Islám. According to an often quoted prophecy, the latter days of Islám are to be marked by a general decadence in political power and in morals, which on reaching its climax is to be followed by the appearance of Imám Mahdí, 'the Lord of the period',* who will restore the sinking faith to its pristine freshness. Christ also is to appear; and after all men, through his instrumentality, have been led to Islám, the day of judgment will commence. Regarding this promised personage, the Rauzat ul-Aimmah, a Persian work on the lives of the twelve Imáms,† has the following passage—

Muslim, Abú Dáúd, Nisáí, Baihaqí, and other collectors of the traditional sayings of the Prophet, state that the Prophet once said, "Muhammad Mahdí shall be of my family and of the descendants of Fáṭimah [the Prophet's daughter and wife of 'Alí]." And Ahmad, Abú Dáúd, Tirmizí, and Ibn Májah state that the Prophet at some other time said, "When of time one day shall be left, God shall raise up a man from among my descendants, who shall fill the world with justice, just as before him the world was full of oppression;" and again, "The world shall not come to

* Ṣáhib i zamán. He is the 12th Imám. The first eleven succeeded the Prophet. 'Mahdí' (which in India is wrongly pronounced Mehndí, 'myrtle') means 'guided'; Hádí means 'a guide'.

† By Sayyid 'Izzat 'Alí, son of Sayyid Pír Alí of Rasúlpúr. Lithographed at Lak'hnau, 1271, A. H., 144 pp., royal 8vo.

an end till the King of the earth shall appear, who is a man of my family, and whose name is the same as mine." Further, Ahmad and other collectors assert that the Prophet once said, "Muhammad Mahdí belongs to my family, eight and nine years." Accordingly, people believe in the coming of Mahdí. But there is also a party in Islám who say that Imám Mahdí has already come into the world and exists at present: his patronymic is Abul Qásim, and his epithets are "the elect, the stablisher, Mahdí, the expected, the Lord of the age." In the opinion of this party, he was born at Surraman-raá [near Baghdád] on the 23rd Ramazán, 258, and in 265 he came to his Sardábah [prop. 'a cool place,' 'a summer villa'], and disappeared whilst in his residence. In the book entitled 'Shawáhid' it is said that when he was born, he had on his right arm the words written, 'Say, the truth has come and error has vanished, surely error is vanishing' [Qorán, xvii, 83]. It is also related that when he was born into the world, he came on his knees, pointed with his fingers to heaven, sneezed, and said, "Praise be to God, the Lord of the world." Some one also has left an account of a visit to Imám Hasan 'Askarí [the eleventh Imám], whom he asked, "O son of the Prophet, who will be Khalífah and Imám after thee?" 'Askarí thereupon went into his room, and after some time came back with a child on his shoulders, that had a face like the full moon and might have been three years old, and said to the man, "If thou hadst not found favour in the eyes of God, He would not have shewn you this child: his name is that of the Prophet, and so is his patronymic." The sect who believe Mahdí to be alive at present, say that he rules over cities in the far west, and he is even said to have children. God alone knows the truth!

The alleged prophecies of the Founder regarding the advent of the Restorer of the Faith, assumed a peculiar importance when Islám entered on the century preceding the first millennium, and the learned everywhere agitated the question till at last the Mahdí movement assumed in India* a definite form through the teaching of Mír Sayyid Muhammad, son of Mír Sayyid Khán, of Jaunpúr. This man was a

* Badáoní, in his 'Najáturrashíd,' gives a few particulars regarding the same movement in Badakhshán, from where the idea seems to have spread over Persia and India. In Badakhshán, it was commenced by Sayyid Muhammad Núrbakhsh, a pupil of Abú Is-háq Khatlání, who gained numerous adherents and created such disturbances, that troops were sent against him. He was defeated and fled to 'Iráq, in the mountainous districts of which country he is said to have gained thirty thousand followers. He had often to fight with the governors, but defied them all. Badáoní has preserved a copy of the proclamation which Núrbakhsh sent unto all the saints. One of his disciples was Shaikh Muhammad Láhijí, the commentator of the 'Gulshan i Ráz.'

descendant of the Prophet, and bore his name; the fall of Jaunpúr was to him a sign that the latter days had come; extraordinary events which looked like miracles, marked his career; and a voice from heaven had whispered to him the words, "Anta Mahdí," 'thou art Mahdí.' Some people indeed say that Mír Sayyid Muhammad did not mean to declare that he was the promised Mahdí; but there is no doubt that he insisted on his mission as the Lord of the Age. He gained many adherents, chiefly through his great oratorical powers, but pressed by enemies he went to Gujarát, where he found an adherent in Sulṭán Mahmúd I. From Gujarát he proceeded, at the request of the king and to the joy of numerous enemies, on a pilgrimage to Makkah. From there also he seems to have been driven away. On his return, it was revealed to him that his teaching was vexatious, and he said to the disciples that accompanied him, "God has removed from my heart the burden of Mahdí. If I safely return, I shall recant all." But when he reached the town of Faráh in Balochistán, where his arrival had created a great sensation, he died (911, A. H.; 1505, A. D.). His tomb became a place of general pilgrimage, although Sháh Ismá'íl and Sháh Ṭahmásp tried to destroy it. The movement, however, continued. Some of his followers adhered to their belief that he was Mahdí; and even the historian Badáoní, who was strongly attached to the cause, speaks of him as of a great saint.

Other Mahdís appeared in various parts of India. In 956 (A. D., 1549), a Mahdí of great pretensions arose in Biánah, S.W. of Ágrah, in the person of Shaikh 'Aláí. This man was a Bangálí Musalmán. His father had been looked upon in his country as a learned saint, and after visiting Makkah, he had settled, in 935, with his younger brother Naçrullah, likewise a learned man, at Biánah, where they soon became respected and influential men. Shaikh 'Aláí had shewn from his youth the learning of the lawyer and the rigour of the saint; and on the death of his father, he gathered numerous pupils around himself. 'But the love of power issues at last from the heads of the just,' and on the day of the 'Íd, he kicked an influential Shaikh from his *haudah*, and, supported by his brothers and elder relatives, he proclaimed that he alone was worthy of being the Shaikh of the town.

About the same time, one Miyán 'Abdullah, a Niyází Afghán and disciple of Mír Sayyid Muhammad of Jaunpúr, arrived from Makkah, and settled at a retired spot near Biánah. Like his master, he was a man of oratorical powers and was given to street preaching; and in a

short time he gained numerous followers among the woodcutters and water-carriers. Shaikh 'Aláí also was overawed by the impressive addresses of Miyán 'Abdullah; he gave up teaching and struggling for local influence, turned faqír, told his wife either to follow him to the wilderness or to go, distributed his whole property, even his books, among the poor adherents of the Niyází, and joined the fraternity which they had formed. The brethren had established among themselves community of property, divided the earnings obtained by begging, and gave up all work, because it was said in the Qorán, 'Let not men be allured by trade or selling to give up meditating on God.' Religious meetings, the object of which was to prepare people for the advent of the promised Mahdí, were daily held after the five prayers, which the brethren said together, and wherever they went they appeared armed to the teeth. They soon felt strong enough to interfere with municipal matters, and inspected the bázárs and removed by force all articles forbidden in the law, defying the magistrates, if opposed to them, or assisting them, if of their opinion. Their ranks increased daily, and matters in Biánah had come to such a pass, that fathers separated themselves from their children and husbands from their wives. Shaikh 'Aláí's former position and the thoroughness of his conversion had given him the rank of second leader; in fact, he soon outdid Miyán 'Abdullah in earnestness and successful conversions, and the latter at last tried to rid himself of his rival by sending him with six or seven hundred armed men towards Makkah. 'Aláí marched with his band over Basáwar to Khawáçpúr, converting and preaching on the way, but on account of some obstacles they all returned to Biánah.

Shaikh 'Aláí's fame at last reached the ear of Islám Sháh, who summoned him to Ágrah; and although the king was resolved to put him to death as a dangerous demagogue, and was even offended at the rude way in which 'Aláí behaved in his presence, he was so charmed by an impromptu address which 'Aláí delivered on the vanities of the world and the pharisaism of the learned, that he sent cooked provisions to 'Aláí's men. To the amusement of the Afghán nobles and generals at court, 'Aláí on another occasion defeated the learned on questions connected with the advent of Mahdí, and Islám Sháh was day after day informed that another of his nobles had gone to 'Aláí's meetings and had joined the new sect.

It was at this time that Shaikh Mubárak also became a 'disciple,' and professed Mahdawí ideas. It is not clear whether he joined the sect

from religious or from political motives, inasmuch as one of the objects of the brethren was to break up the party of the learned at Court, at whose head Makhdúm ul Mulk stood; but whatever may have been his reason, the result was, that Makhdúm became his inveterate enemy, deprived him of grants of land, made him flee for his life, and persecuted him for more than twenty years, till Mubárak's sons turned the tables on him and procured his banishment.*

The learned at Court, however, were not to be baffled by 'Alái's success, and Makhdúm's influence was so great, that he at last prevailed on the king to banish the Shaikh. 'Alái and his followers readily obeyed the command, and set out for the Dak'hin. Whilst at Handiah on the Narbadá, the frontier of Islám Sháh's empire, they succeeded in converting Bahár Khán A'zam Humáyún and half his army, and the king on hearing of this last success cancelled his orders and recalled Shaikh 'Alái.

---

* 'Makhdúm ul-Mulk' was the title of 'Abdullah of Sulṭánpúr, regarding whom the reader may consult the index for references. The following biographical notice from the Khazínatul Açfiá (Láhor, pp. 443, 464) shews the opinion of good Sunnís regarding Makhdúm.

'Máuláná 'Abdullah Ançárí of Sulṭánpúr belongs to the most distinguished learned men and saints of India. He was a Chishtí in his religious opinions. From the time of Sher Sháh till the reign of Akbar, he had the title of 'Makhdúm-ul-Mulk' (*prop.* served by the empire). He was learned in the law and austere in practice. He zealously persecuted heretics. When Akbar commenced his religious innovations and converted people to his 'Divine Faith' and sunworship, ordering them to substitute for the creed the words 'There is no God but Allah, and Akbar is the viceregent of God,' Mauláná 'Abdullah opposed the emperor. Driven at last from Court, he retired to a mosque; but Akbar said that the mosque belonged to his realm, and he should go to another country. Makhdúm therefore went to Makkah. On his return to India, Akbar had him poisoned. He has written several works, as the كشف الغمة, *Kashf ul-ghummah*; the عفة الانبياء, *'Iffat ul-Anbiyá*, the منهاج الدين *Minhájuddín*, &c. He was poisoned in A. H. 1006.

'His son Hájí 'Abdul Karím went after the death of his father to Láhor, where he became a religious guide. He died in 1045, and lies buried at Láhor, near the Zíb-unnisá Villa, at Mauza' Koṭ. His sons were Shaikh Yahyá, Iláh Núr, 'Abdul Haq and A'lá Huzúr. Shaikh Yahyá, like his father, wrought miracles.'

In this account the date is wrong; for Makhdúm ul-Mulk died in 990, and as Badáoní, Makhdúm's supporter, says nothing of poison (Bad. II., 311), the statement of the Khazínat ul Açfiá may be rejected. Badáoní also says that Makhdúm's sons were worthless men.

The titles of Makhdúm ul-Mulk's works are not correctly given either; *vide* p. 544.

About the same time (955), Islám Sháh left Ágrah, in order to put down disturbances in the Panjáb caused by certain Niyází Afgháns, and when he arrived in the neighbourhood of Biánah, Makhdúm ul-Mulk drew the king's attention to Miyán 'Abdullah Niyází, who after Shaikh 'Aláí's departure for the Dak'hin roamed about in the hills of the Biánah district with three or four hundred armed men, and was known to possess great influence over men of his own clan, and consequently over the Niyází rebels in the Panjáb. Islám Sháh ordered the governor of Biánah, who had become a Mahdawí, to bring Miyán 'Abdullah to him. The governor advised his religious leader to conceal himself; but Miyán 'Abdullah boldly appeared before the king, and so displeased him by his neglect of etiquette, that Islám Sháh gave orders to beat him to death. The king watched on horseback for an hour the execution of the punishment, and only left when Miyán 'Abdullah lay apparently lifeless on the ground. But he was with much care brought back to life. He concealed himself for a long time, renounced all Mahdawí principles, and got as late as 993 [A. D., 1585] from Akbar a freehold, because he, too, had been one of Makhdúm ul-Mulk's victims. He died more than ninety years old, in 1000, at Sarhind.*

Islám Sháh after quelling the Niyází disturbances, returned to Ágrah, but almost immediately afterwards his presence was again required in the Panjáb, and it was there that Shaikh 'Aláí joined the royal camp. When Islám Sháh saw the Shaikh, he said to him in a low voice, "Whisper into my ear that you recant, and I will not trouble you." But Shaikh 'Aláí would not do so, and Islám Sháh, to keep up the appearance of authority, ordered a menial to give him by way of punishment a few cuts with the whip in his presence. Shaikh 'Aláí had then scarcely recovered from an attack of the plague, which for several years had been raging in India, and had a few badly healed wounds on his neck. Whilst he got the cuts, one of the wounds broke open, and 'Aláí fainted and died. His body was now thrown under the feet of an elephant, and orders were given that no one should bury him, when all at once, to the terror of the whole camp and the king who believed

* Badáoní visited him in Sarhind, and it was from 'Abdullah that he heard of Mír Sayyid Muhammad's repentance before death. Among other things, 'Abdullah also told him that after the Mír's death in Faráh, a well-known man of that town seized on lands belonging to Balochís and proclaimed himself Christ; and he added that he had known no less than thirteen men of respectable parentage, who had likewise claimed to be Christ.

that the last day had dawned, a most destructive cyclone broke forth. When the storm abated, 'Aláí's body was found literally buried among roses and other flowers, and an order was now forthcoming to have the corpse interred. This happened in 957 [A. D., 1550]. People prophesied the quick end of Islám Sháh and the downfal of his house.*

Makhdúm ul-Mulk was never popular after that.

The features common to all Mahdawí movements, are (1) that the preachers of the latter days were men of education and of great oratorical powers, which gave them full sway over the multitudes; and (2) that the Mahdawís assumed a hostile position to the learned men who held office at Court. Islám has no state clergy; but we find a counterpart to our hierarchical bodies in the 'Ulamás about Court, from whom the Sadrs of the provinces, the Mír 'Adls, Muftís, and Qázís were appointed. At Dihlí and Ágrah, the body of the learned had always consisted of stanch Sunnís, who believed it their duty to keep the kings straight. How great their influence was, may be seen from the fact that of all Muhammadan emperors only Akbar, and perhaps 'Aláuddín Khiljí, succeeded in putting down this haughty set.

The death of Shaikh 'Aláí was a great triumph for the Court 'Ulamás, and a vigorous persecution of all Mahdawí disciples was the immediate result. The persecutions lasted far into Akbar's reign. They abated only for a short time when the return of Humáyún and the downfal of the Afghán power brought about a violent political crisis, during which the learned first thought of their own safety, well knowing that Humáyún was strongly in favour of Shí'ism; but when Akbar was firmly established, and the court at Ágrah, after the fall of Bairám Khán, who was a Shí'ah, again teemed with Hindústání Sunnís, the persecutions commenced. The hatred of the court party against Shaikh Mubárak especially rose to such a height, that Shaikh 'Abdunnabí and Makhdúm ul-Mulk represented to the emperor that inasmuch as Mubárak also belonged to the Mahdawís and was, therefore, not only himself damned, but led also others into damnation, he deserved to be killed. They even obtained an order to bring him before the

* The circumstances connected with 'Aláí's death resemble the end of Sídi Múlah during the reign of Jalál-uddín Fírúz Sháh.

The place in the Panjáb, where the scene took place, is called Ban. (Bad. I., 408.)

The fact that Badáoní spent his youth at Basáwar near Biánah, *i.e.*, in the very centre of the Mahdawí movement, accounts perhaps for his adherence, throughout his life, to Mahdawí principles.

emperor. Mubárak wisely fled from Ágrah, only leaving behind him some furniture for his enemies to reek their revenge on. Concealing himself for a time, he applied to Shaikh Salím Chishtí of Fathpúr Síkrí for intercession; but being advised by him to withdraw to Gujarát, he implored the good offices of Akbar's foster-brother, the generous Khán i A'zam Mírzá Kokah, who succeeded in allaying all doubts in the mind of the emperor by dwelling on the poverty of the Shaikh and on the fact that, different from his covetous accusers, he had not cost the state anything by way of freeholds, and thus obtained at least security for him and his family. Mubárak some time afterwards applied indeed for a grant of land for his son Abul Faiz, who had already acquired literary fame, though he was only twenty years old, and waited personally with his son on Shaikh 'Abdunnabí. But the latter, in his theological pride, turned them out his office as men suspected of Mahdawí leanings and Shí'ah tendencies. Even in the 12th year of Akbar's reign, when Faizí's poems* had been noticed at court,—Akbar then lay before Chítor—and a summons had been sent to the young poet to present himself before his sovereign, the enemies at Ágrah saw in the invitation a sign of approaching doom, and prevailed on the governor to secure the victim this time. The governor thereupon sent a detachment of Mughul soldiers to surround Mubárak's house. Faizí was accidentally away from home, and the soldiers suspecting a conspiracy, subjected Mubárak to various sorts of ill-treatment; and when Faizí at last came, he was carried off by force to Chítor.† Nor did his fears for his father and his own life vanish, till his favourable reception at court convinced him both of Abkar's good will and the blindness of his personal enemies.

Abul Fazl had in the meantime grown up zealously studying under the care of his father. The persecutions which Shaikh Mubárak had to suffer for his Mahdawí leanings at the hands of the learned at Court, did not fail to make a lasting impression on his young mind. There is no doubt that it was in this school of misfortune that Abul Fazl learned the lesson of toleration, the practice of which in later years formed the basis of Akbar's friendship for him; while, on the other hand, the same pressure of circumstances stimulated him to unusual exertions in studying, which subsequently enabled him during the religious discussions at Court to lead the opposition and overthrow by superior learning and

* Abul Faiz wrote under the nom-de-plume of Faizí.

† 20th Rabí' I, 975, or 24th September, 1567. The ode which Faizí presented will be found in the Akbarnámah.

broader sentiments the clique of the 'Ulamás, whom Akbar hated so much.

At the age of fifteen, he showed the mental precocity so often observed in Indian boys ; he had read works on all branches of those sciences which go by the name of *hikamí* and *naqlí*, or *ma'qúl* and *manqúl*.* Following the footsteps of his father, he commenced to teach long before he had reached the age of twenty. An incident is related to shew how extensive even at that time his reading was. A manuscript of the rare work of Içfahání happened to fall into his hands. Unfortunately, however, one half of each page, vertically downwards from top to bottom, was rendered illegible, or was altogether destroyed, by fire. Abul Fazl, determined to restore so rare a book, cut away the burnt portions, pasted new paper to each page, and then commenced to restore the missing halves of each line, in which attempt after repeated thoughtful perusals he succeeded. Some time afterwards, a complete copy of the same work turned up, and on comparison it was found that in many places there were indeed different words, and in a few passages new proofs even had been adduced ; but on the whole the restored portion presented so many points of extraordinary coincidence, that his friends were not a little astonished at the thoroughness with which Abul Fazl had worked himself into the style and mode of thinking of a difficult author.

Abul Fazl was so completely taken up with study that he preferred the life of a recluse to the unstable patronage of the great and to the bondage which attendance at court in those days rendered inevitable. But from the time Faizí had been asked by Akbar to attend the court, hopes of a brighter future dawned, and Abul Fazl, who had then completed his seventeenth year, saw in the encouragement held out by the emperor, in spite of Mubárak's numerous enemies at court, a guarantee that patient toil, on his part, too, would not remain without fruit. The skill with which Faizí in the meantime acquired and retained Akbar's friendship, prepared the way for Abul Fazl ; and when the latter, in the very end of 981 (beginning of 1574, A. D.), was presented to Akbar as Faizí's brother, the reception was so favorable that he gave up all thoughts of leading a life among manuscripts. "As fortune did not at first assist me," says Abul Fazl in the Akbarnámah, "I almost became selfish and conceited, and resolved to tread the path of proud retirement. The number of pupils that I had gathered around

* Page 540, note.

me, served but to increase my pedantry. In fact, the pride of learning had made my brain drunk with the idea of seclusion. Happily for myself, when I passed the nights in lonely spots with true seekers after truth, and enjoyed the society of such as are empty-handed, but rich in mind and heart, my eyes were opened and I saw the selfishness and covetousness of the so-called learned. The advice of my father with difficulty kept me back from outbreaks of folly; my mind had no rest, and my heart felt itself drawn to the sages of Mongolia or to the hermits on Lebanon; I longed for interviews with the lamas of Tibet or with the pádrís of Portugal, and I would gladly sit with the priests of the Pársís and the learned of the Zendavesta. I was sick of the learned of my own land. My brother and other relatives then advised me to attend the Court, hoping that I would find in the emperor a leader to the sublime world of thought. In vain did I at first resist their admonitions. Happy, indeed, am I now that I have found in my sovereign a guide to the world of action and a comforter in lonely retirement; in him meet my longing after faith and my desire to do my appointed work in the world; he is the orient where the light of form and ideal dawns; and it is he who has taught me that the work of the world, multifarious as it is, may yet harmonize with the spiritual unity of truth. I was thus presented at Court. As I had no worldly treasures to lay at the feet of his Majesty, I wrote a commentary to the *Áyat ul-Kursí*,* and presented it when the emperor was at Ágrah. I was favourably received, and his Majesty graciously accepted my offering."

Akbar was at that time busily engaged with his preparations for the conquest of Bihár and Bengal. Faizí accompanied the expedition; but Abul Fazl naturally stayed in Ágrah. But as Faizí wrote to his brother that Akbar had enquired after him, Abul Fazl attended Court immediately on the emperor's return to Fathpúr Síkrí, where Akbar happened to notice him first in the Jámi' Mosque. Abul Fazl, as before, presented a commentary written by him on the opening of a chapter in the Qorán, entitled 'Súrat ul Fath,' 'the Chapter of Victory.'†

The party of the learned and bigoted Sunnís at Court, headed by Makhdúm ul-Mulk and Shaikh 'Abdunnabí, had every cause to feel sorry

† The details of Abul Fazl's introduction at Court given in Badáoní differ slightly from Abul Fazl's own account.

at Faizí's and Abul Fazl's successes;* for it was now, after Akbar's return from Bihár, that the memorable Thursday evening discussions commenced, of which the historian Badáoní has left us so vivid an account. Akbar at first was merely annoyed at the "Pharaoh-like pride" of the learned at court; stories of the endless squabbles of these pious casuits had reached his ear; religious persecutions and a few sentences of death passed by his Chief-Justice on Shí'ahs and "others heretics" affected him most deeply; and he now for the first time realized the idea that the scribes and the pharisees formed a power of their own in his kingdom, at the construction of which he had for twenty years been working. Impressed with a favourable idea of the value of his Hindú subjects, he had resolved when pensively sitting in the mornings on the solitary stone at Fathpúr Síkrí, to rule with even hand men of all creeds in his dominions; but as the extreme views of the learned and the lawyers continually urged him to persecute instead of to heal, he instituted the discussions, because, believing himself to be in error, he thought it his duty as ruler to 'enquire.' It is not necessary to repeat here the course which these discussions took.† The unity that had existed among the learned disappeared in the very beginning; abuse took the place of argument, and the plainest rules of etiquette were, even in the presence of the emperor, forgotten. Akbar's doubts instead of being cleared up only increased; certain points of the Hanafí law, to which most Sunnís cling, were found to be better established by the dicta of lawyers belonging to the other three sects; and the moral character of the Prophet was next scrutinized and was found wanting. Makhdúm ul-Mulk wrote a spiteful pamphlet against Shaikh 'Abdunnabí, the Sadr of the empire, and the latter retorted by calling Makhdúm a fool and cursing him. Abul Fazl, upon whom Akbar from the beginning had fixed as the leader of his party, fanned the quarrels by skilfully shifting the disputes from one point to another, and at last persuaded the emperor that a subject ought to look upon the king not only as the temporal, but also as the only spiritual guide. The promulgation of this new doctrine was the making of Abul Fazl's fortune. Both he and Akbar held to it to the end of their lives. But the new idea was in opposition to Islám, the law of which stands above every king, rendering what we call a constitution

* Badáoní ascribes to Makhdúm ul-Mulk an almost prophetic insight into Abul Fazl's character; for the first time he saw Abul Fazl, he said to his disciples, "What religious mischief is there of which that man is not capable?" Bad. III, 72.

† *Vide* pp. 170 *ff.*

impossible ; and though headstrong kings as 'Aláuddín Khiljí had before tried to raise the law of expediency (مصلحت وقت, *maçlahat i waqt)* above the law of the Qorán, they never fairly succeeded in separating religion from law or in rendering the administration of the empire independent of the Mullá. Hence when Abul Fazl four years later, in 986, brought up the question at the Thursday evening meetings, he raised a perfect storm ; and while the disputations, bitter as they were, had hitherto dwelt on single points connected with the life of the Prophet, or with sectarian differences, they henceforth turned on the very principles of Islám. It was only now that the Sunnís at Court saw how wide during the last four years the breach had become ; that " the strong embankment of the clearest law and the most excellent faith had been broken through" ; and that Akbar believed that there were sensible men in all religions, and abstemious thinkers and men endowed with miraculous power among all nations. Islám, therefore, possessed in his opinion no superiority over other forms of worship.* The learned party seeing their official position endangered, now shewed signs of readiness to yield, but it was too late. They even signed the remarkable document which Shaikh Mubárak in conjunction with his sons had drafted, a document which I believe stands unique in the whole Church History of Islám. Badáoní has happily preserved a complete copy of it.† The emperor was certified to be a just ruler, and was as such assigned the rank of a ' Mujtahid', *i. e.* an infallible authority in all matters relating to Islám. The ' intellect of the just king' thus became the only source of legislation, and the whole body of the learned and the lawyers bound themselves to abide by Akbar's decrees in religious matters. Shaikh 'Abdunnabí and Makhdúm ul-Mulk signed indeed the document against their will, but sign they did ; whilst Shaikh Mubárak added to his signature the words that he had most willingly subscribed his name, and that for several years he had been anxiously looking forward to the realization of the progressive movement. " The document," says Abul Fazl in the Akbarnámah, " brought about excellent results,—(1) The Court became a gathering place of the sages and learned of all creeds ; the good doctrines of all religious systems were recognized, and their defects were not allowed to obscure their good features ; (2) perfect toleration (*çulh-i-kul*, or ' peace with all') was established ; and (3) the perverse and evil-minded were covered with shame on seeing the disinterested motives of

* Pages 178, 179.

† *Vide* p. 186.

his Majesty, and thus stood in the pillory of disgrace." The copy of the draft which was handed to the emperor, was in Shaikh Mubárak's own handwriting, and was dated Rajab, 987 (September, 1579).

A few weeks afterwards, Shaikh 'Abdunnabí and Makhdúm ul-Mulk were sent to Makkah, and Shaikh Mubárak and his two sons triumphed over their enemies. How magnanimous Abul Fazl was, may be seen from the manner in which he chronicles in the Akbarnámah the banishment of these men. Not a sentence, not a word, is added indicative of his personal grievances against either of them, though they had persecuted and all but killed his father and ruined his family; the narrative proceeds as calm and statesmanlike as in every other part of his great work, and justifies the high praise which historians have bestowed upon his character that "neither abuse nor harsh words were ever found in his household."

The disputations had now come to an end (A. D. 1579), and Faizí and Abul Fazl had gained the lasting friendship of the emperor. Of the confidence which Akbar placed in Faizí, no better proof can be cited than his appointment, in the same year, as tutor to Prince Murád; and as both brothers had entered the military, then the only, service and had received *mansabs*, or commissions, their employment in various departments gave them repeated opportunities to gain fresh distinctions. Enjoying Akbar's personal friendship, both remained at court in Fathpúr Síkrí, or accompanied the emperor on his expeditions. Two years later, Faizí was appointed Sadr of Ágrah, Kálpí, and Kálinjar, in which capacity he had to enquire into the possibility of resuming free tenures (*sayurghál*), which in consequence of fraudulent practices on the part of government officers and the rapaciousness of the holders themselves had so much increased as seriously to lessen the land revenue; and Abul Fazl, in the very beginning of 1585,* was promoted to the mansab of Hazárí, or the post of a commander of one thousand horse, and was in the following year appointed Díwán of the Province of Dihlí. Faizí's rank was much lower; he was only a commander of Four Hundred. But he did not care for further promotion. Devoted to the muse, he found in the appointment as Poet Laureate, with which Akbar honored him in the end of 1588, that satisfaction which no political office, however high, would have given him. Though the emperor did not pay much attention to poetry, his appreciation of Faizí's genius was

* Akbarnámah, III, 463.

but just; for after Amír Khusrau of Dihlí, Muhammadan India has seen no greater poet than Faizí.*

In the end of 1589, Abul Fazl lost his mother, to whose memory he has devoted a page in the Akbarnámah. The emperor, in order to console him, paid him a visit, and said to him, "If the people of this world lived for ever and did not only once die, kind friends would not be required to direct their hearts to trust in God and resignation to His will; but no one lives long in the caravanserai of the world, and hence the afflicted do well to accept consolation."†

Religious matters had in the meantime rapidly advanced. Akbar had founded a new religion, the Dín i Iláhí, or 'the Divine Faith,' the chief feature of which, in accordance with Shaikh Mubárak's document mentioned above, consisted in belief in one God and in Akbar as His viceregent (*khalífah*) on earth. The Islamitic prayers were abolished at court, and the worship of the 'elect' was based on that of the Pársís and partly on the ceremonial of the Hindús. The new era (*táríkh i iláhí*), which was introduced in all government records, as also the feasts observed by the emperor, were entirely Pársí. The Muhammadan grandees at court shewed but little resistance: they looked with more anxiety on the elevation of Hindú courtiers than on Akbar's religious innovations, which after all affected but a few. But their feeling against Abul Fazl was very marked, and they often advised the emperor to send him to the Dak'hin, hoping that some mismanagement in war or in administration would lessen his influence at court. Prince Salím [Jahángír] also belonged to the dissatisfied, and his dislike to Abul Fazl, as we shall see below, became gradually so deep-rooted, that he looked upon him as the chief obstacle to the execution of his wild plans. An unexpected visit to Abul Fazl gave him an excellent opportunity to charge him with duplicity. On entering the house, he found forty writers busy in copying commentaries to the Qorán. Ordering them to follow him at once, he took them to the emperor, and shewing him the copies, he said, "What Abul Fazl teaches me is very different from what he practises in his house." The incident is said to have produced a temporary estrangement between Akbar and Abul Fazl. A similar, but less credible, story is told by the author of the *Zakhírat-ul Khawánín*. He says that

---

* For his works, *vide* p. 548.

† اگر جهانیان طراز پایندگي داشتے و جزیکے راه نیستي نسپردے دوستان شناسادل را از رضا و تسلیم مگزیر نبود . هرگاه درین کاروانسرا هیچکس دیر نمانده نکوهش ناشکیبائي را کجا اندازه توان گرفت ||

Abul Fazl repented of his apostacy from Islám, and used at night to visit *incognito* the houses of dervishes, and, giving them gold muhurs, requested them "to pray for the stability of Abul Fazl's faith," sighing at the same time and striking his knees and exclaiming, "What shall I do!" And just as writers on the history of literature have tried to save Faizí from apostacy and consequent damnation, by representing that before his death he had praised the Prophet, so have other authors succeeded in finding for Abul Fazl a place in Paradise; for it is related in several books that Sháh Abul Ma'álí Qádirí of Láhor, a man of saintly renown,* once expressed his disapproval of Abul Fazl's words and deeds. But at night, so runs the story, he saw in his dream that Abul Fazl came to a meeting held by the Prophet in Paradise; and when the Prophet saw him enter, he asked him to sit down, and said, "This man did for some time during his life evil deeds, but one of his books commences with the words, 'O God, reward the good for the sake of their righteousness, and help the wicked for the sake of Thy love,' and these words have saved him." The last two stories flatter, in all probability, the consciences of pious Sunnís; but the first, if true, detracts in no way from that consistency of opinion and uniform philosophic conviction which pervades Abul Fazl's works; and though his heart found in pure deism and religious philosophy more comfort and more elements of harmony than in the casuistry of the Mullás, his mind from early youth had been so accustomed to hard literary work, that it was perfectly natural for him, even after his rejection of Islám, to continue his studies of the Qorán, because the highest dialectical lore and the deepest philological research of Muhammadan literature have for centuries been concentrated on the explanation of the holy book.

To this period also belong the literary undertakings which were commenced under the auspices of the Emperor himself. Abul Fazl, Faizí, and scholars as Badáoní, Naqíb Khán, Shaikh Sulṭán, Hájí Ibráhím, Shaikh Munawwar and others, were engaged in historical and scientific compilations and in translations from the Sanskrit or Hindí into Persian.† Faizí took the Líláwatí, a well-known book on mathematics, and Abul Fazl translated the Kalílah Damnah under the title of *'Ayár Dánish* from Arabic into Persian. He also took a part in the translation of the Mahábhárat and in the composition of the *Táríkh i Alfí*, the 'History of the Millennium.' The lastmentioned work, curious to say, has an

* Born A. H. 960; died at Láhor, 1024. *Khazínat ul-Aṣfiá*, p. 139.

† *Vide* pp. 104, 105.

intimate connection with the Mahdawí movement, of which particulars have been given above. Although from the time of Shaikh 'Aláí's death the disciples of the millennium had to suffer persecution, and the movement to all appearances had died out, the idea of a restorer of the millennium was revived during the discussions in Fathpúr Síkrí and by the teachings of men of Sharíf i Ámulí's stamp,* with this important modification that Akbar himself was pointed to as the 'Lord of the Age,' through whom faded Islám was to come to an end. This new feature had Akbar's full approval, and exercised the greatest influence on the progress of his religious opinions. The Táríkh i Alfí, therefore, was to represent Islám as a thing of the past; it had existed thousand *(alf)* years and had done its work. The early history, to the vexation of the Sunnís, was related from a Shí'ah point of view, and worse still, the chronology had been changed, inasmuch as the death of the Prophet had been made the starting point, not the *hijrah*, or flight, of the Prophet from Makkah to Madínah.

Towards the middle of A.H. 1000 (begining of 1592, A.D.), Akbar promoted Abul Fazl to the post of Dúhazárí, or commander of two thousand horse. Abul Fazl now belonged to the great Amírs (*umará i kibár*) at court. As before, he remained in immediate attendance on the emperor. In the same year, Faizí was sent to the Dak'hin as Akbar's ambassador to Burhán ul-Mulk and to Rájah 'Alí Khán of Khándesh, who had sent his daughter to Prince Salím. Faizí returned after an absence of more than sixteen months.

Shaikh Mubárak, who after the publication of his famous document had all but retired from the world, died in the following year at Láhor, (Sunday, 17th Zí Qa'dah, 1001, or 4th September, 1593). He had reached the age of ninety, and had occupied himself in the last years of his life with the compilation in four volumes of a gigantic commentary to the Qorán, to which he had given the title of *Manba'u Nafáis ul 'Uyún*. He completed it, in spite of failing eyesight, a short time before his death.

---

* Page 452. We hear the last of the Mahdawí movement in 1628, at the accession of Sháhjahán. Akbar was dead and had not restored the Millennium; during Jahángír's reign, especially in the beginning, the court was indifferent to religion, and the king retained the ceremony of *sijdah*, or prostration, which Muhammadans believe to be due to God alone. But Sháhjahán, on his accession, restored many Muhammadan rites that had fallen in abeyance at court; and as he was born in 1000 A. H., he was now pointed to as the real restorer. Since that time the movement has found no disciples.

The historian Badáoní speaks of him as follows:—

Shaikh Mubárak belonged to the most distinguished men of learning of the present age. In practical wisdom, piety, and trust in God, he stood high among the people of his time. In early life he practised rigorous asceticism; in fact, he was so strict in his views regarding what is lawful and unlawful, that if any one, for example, came to a prayermeeting with a gold ring on his finger, or dressed in silk, or with red stockings on his feet, or red or yellow coloured clothes on him, he would order the offending articles to be removed. In legal decisions he was so severe as to maintain that for every hurt exceeding a simple kick, death was the proper punishment. If he accidentally heard music while walking on the street, he ran away, but in course of time he became, from divine zeal, so enamoured of music, that he could not exist without listening to some voice or melody. In short, he passed through rather opposite modes of thought and ways of life. At the time of the Afghán rule, he frequented Shaikh 'Aláí's fraternity; in the beginning of his Majesty's reign, when the Naqshbandís had the upper hand, he settled matters with that sect; afterwards he was attached to the Hamadáni school; and lastly, when the Shí'ahs monopolized the court, he talked according to their fashion. 'Men speak according to the measure of their understanding'—to change was his way, and the rest you know. But withal he was constantly engaged in teaching the religious sciences. Prosody also, the art of composing riddles, and other branches, he understood well; and in mystic philosophy he was, unlike the learned of Hindústán, a perfect master. He knew Sháṭibí* by heart, explained him properly, and also knew how to read the Qorán in the ten different modes. He did not go to the palaces of the kings, but he was a most agreeable companion and full of anecdote. Towards the end of his life, when his eyesight was impaired, he gave up reading and lived in seclusion. The commentary to the Qorán which he composed, resembles the *Tafsír i Kabír* [the "Great Commentary"], and consists of four thick volumes, and is entitled *Manba'u Nafáis ul 'Uyún*. It is rather extraordinary that there is a passage in the preface in which he seems to point to himself as the renovator of the new century.† We know what this 'renovating' means. About the time he finished his work, he wisely committed the Fárizí Ode (in *t*) which consists of seven hundred verses, and the Ode Bardah, the Ode by Ka'b ibn Zubair, and other Odes to memory, and recited them as daily homilies, till on the 17th Zí Qa'dah, 1001, he left this world at Lahor for the judgment-seat of God.

---

* A writer on 'Tajwíd,' 'the art of reading the Qorán correctly'.

† Badáoní says in his 'Naját urrashíd' that Jaláluddín Suyúṭí, in his time the most universal scholar of all Arabia, pointed likewise to himself as the renovator of the 10th century.

I have known no man of more comprehensive learning; but alas! under the mantle of the dervish there was such a wicked love of worldly preferment, that he left no tittle of our religion in peace. When I was young, I studied at Ágrah for several years in his company. He is indeed a man of merit; but he committed worldly and irreligious deeds, plunged into lust of possession and rank, was timeserving, practised deceit and falsehood, and went so far in twisting religious truth, that nothing of his former merit remains. "Say, either I am in the correct path or in clear error, or you" [Qorán, xxxiv, 23]. Further, it is a common saying that the son brings the curse on the head of his father; hence people have gone beyond Yazíd and say, 'Curse on Yazíd,* and on his father, too.'

Two years after Shaikh Mubárak's death, Abul Fazl also lost his brother Faizí, who died at the age of fifty after an illness of six months on the 10th Safar, 1004 (5th October, 1595). When in his last moments, Akbar visited him at midnight, and seeing that he could no longer speak, he gently raised his head and said to him, "Shaikh Jío, I have brought Hakím 'Alí with me, will you not speak to me?" But getting no reply, the emperor in his grief threw his turban to the ground, and wept loud; and after trying to console Abul Fazl, he went away.† How deeply Abul Fazl loved his elder brother, is evident from the numerous passages in the Akbarnámah and the Áín in which he speaks of him, and nothing is more touching than the lines with which he prefaces the selections in the Áín made by him from his brother's poems. "The gems of thought in his poems will never be forgotten. Should leisure permit and my heart turn to worldly occupations, I would collect some of the excellent writings of this unrivalled author of the age, and gather, with the eye of a jealous critic, yet with the hand of a friend, some of his poems. But now it is brotherly love alone, which does not travel along the road of critical nicety, that commands me to write down some of his verses."‡ Abul Fazl, notwithstanding his onerous duties, kept his promise, and two years after the death of his brother, he collected the stray leaves of Faizí's *Markiz ul-Adwár*, not to mention the numerous extracts which he has preserved in the Akbarnámah.

---

* Husain, in whose remembrance the Muharram lamentations are chanted, was murdered by Yazíd; hence the latter is generally called *Yazíd i mal'ún*, 'Yazíd, the accursed.' Badáoní here calls Abul Fazl Yazíd. Poor Badáoní had only the thousand bíg'hahs which Akbar had given him rent-free, but his school follow, Yazíd Abul Fazl, was a commander of two thousand and the friend of the emperor.

† Badáoní, II, 406. ‡ Page 549.

It was about the same time that Abul Fazl was promoted to the post of a Commander of two thousand and five hundred horse. Under this rank he has entered his own name in the list of grandees in the Áín i Akbarí, which work he completed in the same year when he collected his brother's literary remains (1596-97).

In the following year, the forty-third of Akbar's reign, Abul Fazl went for the first time on active service. Sultán Murád* had not managed matters well in the Dak'hin, and Akbar now despatched Abul Fazl with orders to return with the Prince, whose excessive drinking caused the emperor much anxiety, provided the officers of the imperial camp made themselves responsible to guard the conquered territory. If the officers were disinclined to guarantee a faithful conduct of the war, he was to see the Prince off, and take command with Sháhrukh Mírzá.† The wars in the Dak'hin, from their first commencement under Prince Murád and the Khán Khánán, are marked by a most astounding duplicity on the part of the imperial officers, and thousands of men and immense stores were sacrificed, especially during the reign of Jahángír, by treacherous and intriguing generals. In fact, the Khán Khánán himself was the most untrustworthy imperial officer. Abul Fazl's successes, therefore, were chiefly due to the honesty and loyalty with which he conducted operations. When he arrived at Burhánpúr, he received an invitation from Bahádur Khán, king of Khándesh, whose brother had married Abul Fazl's sister. He consented to come on one condition, namely, that Bahádur Khán should vigorously assist him and thus aid the cause of the emperor. Bahádur was not inclined to aid the imperialists in their wars with the Dak'hin, but he sent Abul Fazl rich presents, hoping that by this means he would escape the penalty of his refusal. Abul Fazl, however, was not the man to be bribed. "I have made a vow," said he in returning the presents, "not to accept presents till four conditions are fulfilled—(1) friendship; (2) that I should not value the gift too high; (3) that I should not have been anxious to get a present; and (4) necessity to accept it. Now supposing that the first three are applicable to the present case, the favour of the emperor has extinguished every desire in me of accepting gifts from others."

Prince Murád had in the meantime retreated from Ahmadnagar to Ílichpúr, and as the death of his infant son Mírzá Rustam made him

---

* Page 335. † Page 312.

melancholy, he continued to drink, though dangerously ill with delirium tremens. When informed of Abul Fazl's mission, he returned at once towards Ahmadnagar, in order to have a pretext for not going back to his father, and he had come to the banks of the Púrná,* twenty kos from Daulatábád, when death overtook him. Abul Fazl arrived the same day, and found the camp in the utmost confusion. Each commander recommended immediate return; but Abul Fazl said that he was determined to march on: the enemy was near, the country was foreign ground, and this was no time for returning, but for fighting. Several of the commanders refused to march on, and returned; but Abul Fazl, nothing daunted, after a delay of a few days, moved forward, humoured the officers, and supplied in a short time all wants. Carefully garrisoning the country, he managed to occupy and guard the conquered districts with the exception of Násik, which lay too far to the west. But he sent detachments against several forts, and conquered Baitálah, Taltum, and Satondá. His headquarters were on the Godáwarí. He next entered into an agreement with Chánd Bíbí, that, after punishing Abhang Khán Habshí, who was at war with her, she should accept Janír as fief and give up the fort of Ahmadnagar.

Akbar had in the meantime gone to Ujjain. The Dak'hin operations had also become more complicated by the refusal of Bahádur Khán to pay his respects to Prince Dányál, and war with Khándesh had been determined on. Akbar resolved to march on Asír, Bahádur Khan's stronghold, and appointed Prince Dányál to take command at Ahmadnagar. Dányál sent immediate instructions to Abul Fazl to cease all operations, as he wished to take Ahmadnagar personally. When the Prince therefore left Burhánpúr, Abul Fazl, at Akbar's request, left Mírzá Sháhrukh, Mír Murtazá, and Khwájah Abul Hasan in charge of his corps, and hastened to meet the emperor. On the 14th Ramazán, 1008 (beginning of the 44th year of Akbar's reign), he met Akbar at K'hargon, near Bíjágarh. The emperor received him with the following verse—

فرخندہ شبے باید و خوش مہتابے تا با تو حکایت کنم از ہر بابے

Serene is the night and pleasant is the moonlight, I wish to talk to thee on many a subject.

* The southern Púrná is meant. The northern Púrná flows into the Taptí in Khándesh; whilst the southern Púrná, with the Dúdná, flows into the Godáwarí. Prince Murád had gone from Ilichpúr to Narnálah, and from there to Sháhpúr, which he had built about eight miles south of Bálápúr. It is now in ruins.

and promoted him for his excellent management to a command of four thousand. The imperial army now marched on Ásír and commenced the siege.* One day, Abul Fazl inspected some of his trenches, when one of the besieged, who had deserted to Akbar's camp, offered to shew him a way by which the Imperialists might get over the wall of the Málai Fort, an important fortification below Ásírgarh itself. Half way up the mountain, to the west and slightly to the north, were two renowned outworks, called the Málai and Antar Málai, which had to be conquered before Ásír itself could be reached; and between the north-west and north, there was another bastion called Chúnah Málai. A portion of its wall was not finished. From east to south-west there were hills, and in the south was a high mountain called Korhiah. A hill in the south-west, called Sápan, was occupied by the Imperialists. Abul Fazl determined on availing himself of the information given by the deserter, and selected a detachment to follow him. Giving orders to the officer commanding the trench to watch for the sound of the trumpets and bugles, when he was to hasten to his assistance with ladders, he went in the dark of night, whilst it was raining, with his selected men on Mount Sápan, and sent a few of his men under Qará Beg along the road that had been pointed out to him. They advanced, broke open a gate of Málai Fort, and sounded the bugle. The besieged rose up to

---

* "Akbar had no sooner crossed the Nerebada [Narbadá], when Radzia Bador-xa [Rájah Bahádur Sháh], who had possession of the fortress of Hasser [Ásír], fortified the same against the king, and collected provisions from the neighbourhood. The king, thinking it dangerous to leave this fortress in his rear, considered how it might be captured. This fortress has three castles, of which the first is called *Cho-Tzanin*, the second *Commerghar*: and the third is placed on the very summit of the hill, so that it is a conspicuous object at the distance of six coss. The king with no delay surrounded it on all sides; and so energetically pressed the siege night and day, that at the end of six months it was on the point of being captured. Bador-xa however perceiving his danger, having obtained a pledge that his life and property should be safe, came as suppliant to the king and surrendered himself****. Whilst the king was at this place, Abdul Fazel [Abul Fazl] came to him, and so worked upon his mind, that he fully determined to set out for the war in the Deccan." From Prof. Lethbridge's 'Fragment of Indian History,' translated from De Laët's 'India Vera,' and published in the Calcutta Review for 1873.

De Laët is wrong in a few minor details. I cannot identify the name Cho-Tzanin. 'Commerghar' is the Persian 'Kamargáh', 'the middle of a mountain.' The names of Fort Chúnah Málai and of Mount Korhiah are doubtful, the MSS. having Khwájah Málai and Korthah, Kortah, Koḍhiah, and similar variations.

Vide also Gazetteer, Central Provinces, p. 8.

oppose them, and Abul Fazl hastened to his men and joined them at break of day when the besieged withdrew in confusion to Ásír. On the same day, other detachments of the army occupied Chúnah Málai and Mount Korhiah, and Bahádur Khán, unable to resist longer, sued for pardon (1009). Prince Dányál, who had in the meantime conquered Ahmadnagar,* now joined his father at Ásír.

About this time disturbances broke out in the Dak'hin, caused by Rájú Manná, and a party set up the son of 'Alí Sháh as king. As the latter found numerous adherents, the Khán Khánán was ordered to march against him, and Abul Fazl was sent to Násik; but a short time afterwards, he was told to join the Khán Khánán. Akbar returned, in the 46th year, to Ágrah, leaving Prince Dányál in Burhánpúr. Abul Fazl had no easy life in the Dak'hin. The Khán Khánán stood idle at Ahmadnagar, because he was disinclined to fight, and left the operations to Abul Fazl, who looked upon him as a traitor. Abul Fazl vigorously pushed on operations, ably assisted by his son 'Abdurrahmán. After coming to terms with the son of 'Alí Sháh, he attacked Rájú Manná, recovered Jálnahpúr and the surrounding district, and inflicted several defeats on him. Manná found a temporary asylum in Daulatábád, and in a subsequent engagement he was nearly captured.

As early as during the siege of Ásír, Prince Salím, who had been sent against the Ráná of Udaipúr, had rebelled against his father, and had moved to Iláhábád, where he had assumed the title of king. Though on Akbar's return from Burhánpúr a reconciliation had been effected, the prince, in the forty-seventh year, shewed again signs of rebellion, and as many of Akbar's best officers appeared to favour Salím, the emperor recalled Abul Fazl, the only trustworthy servant he had. As his presence at Court was urgently required, Akbar sent him orders to leave the troops of his contingent in the Dak'hin. Putting his son 'Abdurrahmán in charge of his corps, Abul Fazl set out for Ágrah, only accompanied by a few men. Salím, who looked upon him with little concealed hatred, thought Abul Fazl's journey, unprotected as he was, an excellent opportunity to get rid of him. He, therefore, persuaded Rájah Bir Singh, a Bundelá chief of Urchah (Uṇḍchhá),† through whose territory Abul Fazl was likely to pass, to lay in wait for him and kill

* Among the plunder taken at Ahmadnagar was a splendid library. Faizí's library, having on his death lapsed to the state, had been incorporated with the Imperial Library.

† *Vide* p. 488.

him. Bir Singh, who was in disgrace at Court, eagerly seized the opportunity of pleasing the Prince, who no doubt would substantially reward him on his accession, and posted a large body of horse and foot near Narwar. When arrived at Ujjain, Abul Fazl wâs warned of Salím's intention, and his men tried to persuade him to go viâ Ghátí Chándá; but Abúl Fazl said that thieves and robbers had no power to stop him on his way to Court. He, therefore, continued his journey towards Narwar. On Friday, the 4th Rabí' I, 1011 (12th August, 1602), at a distance of about half a *kos* from Sarái Bar, which lies six *kos* from Narwar, Bir Singh's men came in sight. The few men that Abul Fazl had with him, strongly advised him to avoid a fight, and an old servant, Gadáí Khán Afghán, told him quickly to retreat to Antrí, which was three *kos* distant, as Rái Ráyán and Súraj Singh were stationed there with three thousand Imperial horse: he might first join them, and then punish Bir Singh. But Abul Fazl thought it a disgrace to fly. He defended himself bravely; but in a short time he was surrounded, and, pierced by the lance of a trooper, he fell dead to the ground. Bir Singh cut off Abul Fazl's head, and sent it to Salím in Iláhábád, who, it is said, had it thrown "into an unworthy place," where it lay for a long time.

The Dutch traveller De Laët gives the following account of Abul Fazl's death.*

Salím returned to Halebassa [Iláhbás, the old form of Iláhábád], and began to coin gold and silver money in his own name, which he even sent to his father, to irritate him the more. The king, enraged at this, wrote an account of all that had happened to Abul Fazl, who bade the king be of good courage, for he would come to him as quickly as possible; and added that his son should be brought bound to him, either by fair means or by foul. Accordingly, a little afterwards, having obtained leave of absence from Daniel Xa [Dányál Sháh], he took to the road with about two or three hundred horsemen, leaving orders for his baggage to follow him. Xa-Selim, to whom all these things were known, recalling how hostile Fazl had always been towards him, and hence justly fearing that his father would be more exasperated than ever against him, judged it best to intercept him on his journey. So he begged Radzia Bertzingh Bondela, who lived in his

* From Prof. E. Lethbridge's 'Fragment of Indian History', Calcutta Review, 1873.

The place near which Abul Fazl was killed, is called in the MSS. سراي بر *Sarái Bar*. De Laët's Soor appears to be a bad reading for Narwar.

province of Osseen [Ujjain], to lie in wait for Fazl near Soor [Narwar?] and Gualer [Gwáliár], and to send his head to him, promising that he would be mindful of so great a benefit, and would give him the command of five thousand cavalry. The Radzia consented, and waited with a thousand cavalry and three thousand infantry about three or four coss from Gualer, having sent out scouts into the neighbouring villages, to give him early warning of the approach of Fazl. Accordingly when the latter, ignorant of the ambuscade, had come as far as Collebaga [Kálábágh], and was going towards Soor, Radzia Bertzingh and his followers fell upon him on all sides. Fazl and his horsemen fought bravely, but being overpowered by numbers, they were gradually worn out. Fazl himself, having received twelve wounds in the fight, was pointed out by a captive slave under a neighbouring tree, and was taken and beheaded. His head was sent to the prince, who was greatly pleased."

Prince Salím, with that selfish nonchalance and utter indifference that distinguished him throughout life, openly confesses in his 'Memoirs' that he brought about Abul Fazl's murder, because he was his enemy, and, with a naïveté exclusively his own, represents himself as a dutiful son who through the wickedness of others had been deprived of his father's love. He says—

"On my accession, I promoted Rájah Bir Singh, a Bundelá Rájpút, to a command of three thousand. He is one of my favourites, and he is certainly distinguished among his equals for his bravery, good character, and straightforwardness. My reason for promoting him was this. Towards the end of my father's reign, Shaikh Abul Fazl, a Hindústání Shaikh by birth, who was well known for his learning and wisdom, and who had externally ornamented himself with the jewel of loyalty, though he sold himself at a high price to my father, had been called from the Dak'hin. He was no friend of mine, and damaged openly and secretly my reputation. Now about that time, evil-minded and mischievous men had made my father very angry with me, and I knew that, if Abul Fazl were to come back to Court, I would have been deprived of every chance to effect a reconciliation. As he had to pass on his way through the territory of BirSingh Bundelá, who at that time had rebelled against the emperor, I sent a message to the latter to say that, if he would waylay Abul Fazl and kill him, I would richly reward him. Heaven favoured him, and when Abul Fazl passed through his land, he stopped him on his way, dispersed after a short fight his men, and killed him, and sent his head to me at Iláhábád. Although my father was at first much vexed, Abul Fazl's death produced one good result: I could now without further annoyance go to my father, and his bad opinion of me gradually wore away."

At another place in his 'Memoirs', when alluding to the murder, he says, as if an afterthought had occurred to him, that he ordered Bir Singh to kill Abul Fazl, because 'he had been the enemy of the Prophet.'

When the news of Abul Fazl's death reached court, no one had the courage to break it to the emperor. According to an old custom observed by Timur's descendants, the death of a prince was not in plain words mentioned to the reigning emperor, but the prince's vakíl presented himself before the throne with a blue handkerchief round his wrist; and as no one else would come forward to inform Akbar of the death of his friend, Abul Fazl's vakíl presented himself with a blue handkerchief before the throne. Akbar bewailed Abul Fazl's death more than that of his son; for several days he would see no one, and after enquiring into the circumstances he exclaimed, "If Salím wished to be emperor, he might have killed me and spared Abul Fazl," and then recited the following verse—

شیخ ما از شوق بیحد چون سوی ما آمدہ ز اشتیاق پاےبوسی بےسر و پا آمدہ

My Shaikh in his zeal hastened to meet me,
He wished to kiss my feet, and gave up his life.

Akbar, in order to punish Bir Singh, sent a detachment under Patr Dás and Ráj Singh* to Uṉḍchá. They defeated the Buudelá chief in several engagements, drove him from Bhánder and shut him up in Irich. When the siege had progressed, and a breach was made in the wall, Bir Singh escaped by one of Ráj Singh's trenches, and withdrew to the jungles closely pursued by Patr Dás. As it seemed hopeless to catch him, Akbar called Patr Dás to Court; but ordered the officers stationed about Uṉḍchá to kill the rebel wherever he shewed himself. In the beginning of the last year of Akbar's reign, Bir Singh was once surprised by Rájah Ráj Singh, who cut down a good number of his followers. Bir Singh himself was wounded and had a narrow escape. But the emperor's death, which not long afterwards took place, relieved Bir Singh of all fears. He boldly presented himself at Jahángír's Court, and received Uṉḍchá and a command of three thousand horse as his reward.

"It has often been asserted," says the author of the *Maásir ul-Umará*, "that Abul Fazl was an infidel. Some say, he was a Hindú, or a fire-worshipper, or a free-thinker, and some go still further and

* Pages 469 and 458.

call him an atheist; but others pass a juster sentence, and say that he was a pantheist, and that, like other Súfís, he claimed for himself a position above the law of the Prophet. There is no doubt that he was a man of lofty character,* and desired to live at peace with all men. He never said anything improper. Abuse, stoppages of wages, fines, absence on the part of his servants, did not exist in his household. If he appointed a man, whom he afterwards found to be useless, he did not remove him, but kept him on as long as he could; for he used to say that, if he dismissed him, people would accuse him of want of penetration in having appointed an unsuitable agent. On the day when the sun entered Aries, he inspected his whole household and took stock, keeping the inventory with himself, and burning last year's books. He also gave his whole wardrobe to his servants, with the exception of his trowsers, which were burnt in his presence.

"He had an extraordinary appetite. It is said that, exclusive of water and fuel, he consumed daily twenty-two sers of food. His son 'Abdurrahmán used to sit at table as *safarchí* (head butler); the superintendent of the kitchen, who was a Muhammadan, was also in attendance, and both watched to see whether Abul Fazl would eat twice of one and the same dish. If he did, the dish was sent up again the next day. If anything appeared tasteless, Abul Fazl gave it to his son to taste, and he to the superintendent, but no word was said about it. When Abul Fazl was in the Dak'hin, his table luxury exceeded all belief. In an immense tent (*chihilráwaṭí*) one thousand rich dishes were daily served up and distributed among the Amírs; and near it another large tent was pitched for all-comers to dine, whether rich or poor, and *k'hichrí* was cooked all day and was served out to any one that applied for it."

"As a writer, Abul Fazl stands unrivalled. His style is grand and is free from the technicalities and flimsy prettiness of other Munsháís;† and the force of his words, the structure of his sentences, the suitableness of his compounds, and the elegance of his periods, are such that it would be difficult for any one to imitate them."

It is almost useless to add to this encomium bestowed on Abul Fazl's style. 'Abdullah, king of Bukhárá, said that he was more afraid of Abul Fazl's pen than of Akbar's arrow. Everywhere in India he is known as 'the great Munshí.' His letters are studied in all Madrasahs,

---

* I may remark here that Abul Fazl never accepted a title.

† This is also the opinion of the author of the Haft Iqlím (*vide* p. 508).

and though a beginner may find them difficult and perplexing, they are perfect models. But a great familiarity, not only with the Persian language, but also with Abul Fazl's style, is required to make the reading of any of his works a pleasure. His composition stands unique, and though everywhere studied, he cannot be, and has not been, imitated. The writers after him write in the style of the Pádisháhnámah, the 'Alamárái Sikandarí, or in the still more turgid manner of the 'Alamgírnámah, the Ruq'át Bedil, and other standard works on Inshá.

A praiseworthy feature of Abul Fazl's works lies in the purity of their contents. Those who are acquainted with Eastern literature will know what this means. I have come across no passage where woman is lightly spoken of, or where immorality is passed over with indifference. Of his love of truth and the nobility of his sentiments* I have spoken in the Preface.

Abul Fazl's influence on his age was immense. It may be that he and Faizí led Akbar's mind away from Islám and the Prophet—this charge is brought against them by every Muhammadan writer; but Abul Fazl also led his sovereign to a true appreciation of his duties, and from the moment that he entered Court, the problem of successfully ruling over mixed races, which Islám in but few other countries had to solve, was carefully considered, and the policy of toleration was the result. If Akbar felt the necessity of this new law, Abul Fazl enunciated it and fought for it with his pen, and if the Khán Khánáns gained the victories, the new policy reconciled the people to the foreign rule; and whilst Akbar's apostacy from Islám is all but forgotten, no emperor of the Mughul dynasty has come nearer to the ideal of a father of the people than he. The reversion, on the other hand, in later times to the policy of religious intoleration, whilst it has surrounded in the eyes of the Moslems the memory of Aurangzíb with the halo of sanctity and still inclines the pious to utter a *rahimahu-lláhu* (May God have mercy on him!) when his name is mentioned, was also the beginning of the breaking up of the empire.

Having elsewhere given numerous extracts from Badáoní to shew that Akbar's courtiers ascribed his apostacy from Islám to Faizí and Abul Fazl, I need not quote other works, and will merely allude to a couplet by 'Urfí† from one of his Odes in which he praises the Prophet—

* Let the reader consult Gladwin's rendering of Abul Fazl's introduction to the fourth book of the Aín. Gladwin's Aín, II, pp. 285 to 291. The passage is anti-Islamitic.

† For 'Urfí *vide* p. 569. The metre of the couplet is Long *Ramal.*

یوسف نفس مرا ز آسیب اخوان دور دار کاین حسودان مروت سوز با این بےگناه /
با فریبت غول همزادند در راه سلوك با فساد گرگ‌انبازند در نزدیك چاه

O Prophet, protect the Joseph of my soul (*i. e.* my soul) from the harm of the brothers; for they are ungenerous and envious, and deceive me like evil sprites and lead me wolf-like to the well (of unbelief).

The commentators unanimously explain this passage as an allusion to the brothers Faizí and Abul Fazl. I may also cite the Táríkh of Abul Fazl's death, which the Khán i A'zam Mírzá Kokah is said to have made—

تیغ اعجاز نبی الله سر باغی برید

The wonderful sword of God's Prophet cut off the head of the rebel.*

But Abul Fazl appeared to him in a dream and said, "The date of my death lies in the words بنده ابو الفضل, 'The slave Abul Fazl'—which likewise gives 1011 A. H.

Abul Fazl's works are the following—

(1) The Akbarnámah with the Á'ín i Akbarí, its third volume. The Á'ín i Akbarí was completed in the 42nd year of Akbar's reign; only a slight addition to it was made in the 43rd year on account of the conquest of Barár (1596-97, A. D.). The contents of the Akbarnámah have been detailed in the Preface. The second volume contains an account of the first forty-six years of Akbar's reign.† There exists a continuation up to the end of Akbar's reign by 'Ináyatullah Muhibb 'Alí. Thus at least the continuator is called in two MSS. that I have seen. Elphinstone says that the name of the continuator is Muhammad Salia, which seems to be a corruption of Muhammad Sálih.

(2) The Maktúbát i 'Allámí, also called Inshá i Abul Fazl. This book contains letters written by Abul Fazl to kings and chiefs. Among them are the interesting letters written to the Portuguese priests, and to 'Abdullah of Bukhárá, in reply to his question whether Akbar had renounced Islám. Besides, there are prefaces and reviews, a valuable essay on the progress of the art of writing, portions of which are given in the Á'ín, &c. The collection was made after Abul

---

* The word باغی *bághí*, a rebel, has the numerical value of 1013; but the head (of the word, the letter ب) is cut off; hence 1013—2 = 1011, the year of the Hijrah in which Abul Fazl was murdered. The metre of the hemistich is Long Ramal.

† The 46th year lasted from the 15th Ramazán, 1009, to 26th Ramazán, 1010, *i. e.* to about five months before Abul Fazl's death.

Fazl's death by 'Abduççamad, son of Afzal Muhammad, who says that he was a son of Abul Fazl's sister and also his son-in-law. The book, as above remarked, is frequently read in Madrasahs, and there exist many lithographed editions. In all of them, the contents constitute three books; but Amír Haidar Husainí of Bilgrám says in the preface to his 'Sawánih i Akbarí'* that he had a collection of four books, remarking at the same time that MSS. of the fourth are very rare. It looks, indeed, as if Amír Haidar's copy was unique.

(3) The Ayár Dánish,† which is mentioned on p. 106.

Besides, I have seen in different books that Abul Fazl also wrote a Risálah i Munáját, or 'Treatise on Prayers'; a Jámi'ul-lughát, a lexicographical work; and a 'Kashkol'. The last word means a 'beggar's cup,' or rather the small basket or bowl in which beggars in the East collect rice, dates, &c., given as alms, and hence the term is often applied to collections of anecdotes or short stories. But I have seen no copies of these works. It was also mentioned above that Abul Fazl presented, on his introduction at Court, two commentaries, of which no MSS. seem to exist at present. Nor need I again refer to the part which he took in the translations from Sanskrit and the compilation of the Táríkh i Alfí.

The 'Durar ul Manshúr', a modern Tazkirah by Muhammad 'Askarí Husainí of Bilgrám, selects the following inscription written by 'Abul Fazl for a temple in Kashmír‡ as a specimen both of Abul Fazl's writing and of his religious belief. It is certainly very characteristic, and is easily recognized as Abul Fazl's composition.

---

* Regarding this valuable work, *vide* p. 316, note.

† As the word is pronounced in India, instead of 'Iyár i Dánish,' 'the test of wisdom.' The author of the Haft Iqlím seems to allude to this work; for he says that Abul Fazl, when he saw him in 1000 A. H., was engaged in re-writing the *Nawádir i Hikáyát.*

‡ Abul Fazl says in the fourth book of the Aín—"The best people in Kashmír are the Brahmans. Although they have not yet freed themselves from the fetters of blind belief and adherence to custom, they yet worship God without affectation. They do not sneer at people of other religions, utter no desires, and do not run after lucre. They plant fruit trees and thus contribute to the welfare of their fellow-creatures. They abstain from meat, and live in celibacy. There are about two thousand of them in Kashmír."

Akbar seems to have looked upon these Kashmírí Rishis as model men.

الٰهی بهر خانه که می نگرم جویای تو اند و بهر زبان که می شنوم گویای تو

O God, in every temple I see people that seek Thee, and in every language I hear spoken, people praise Thee!

Polytheism and Islám feel after Thee,
Each religion says, 'Thou art one, without equal.'

If it be a mosque, people murmur the holy prayer, and if it be a Christian Church, people ring the bell from love to Thee.

Sometimes I frequent the Christian cloister, and sometimes the mosque,
But it is Thou whom I search from temple to temple.

Thy elect have no dealings with either heresy or orthodoxy; for neither of them stands behind the screen of Thy truth.

Heresy to the heretic, and religion to the orthodox,
But the dust of the rosepetal* belongs to the heart of the perfume-seller.

---

* This line is Súfistic. The longing of the heart after God is compared to the perfume which rises from the rose petals. The perfume-seller, *i. e.* the Unitarian, is truly religious, and is equally removed from heresy and orthodoxy.

This temple was erected for the purpose of binding together the hearts of the Unitarians in Hindústán, and especially those of His worshippers that live in the province of Kashmír,

By order of the Lord of the throne and the crown, the lamp of creation, Sháh Akbar,

"In whom the seven minerals find uniformity, in whom the four elements attain perfect mixture.*

He who from insincere motives destroys this temple, should first destroy his own place of worship; for if we follow the dictates of the heart, we must bear up with all men, but if we look to the external, we find everything proper to be destroyed.

O God, Thou art just and judgest an action by the motive;

Thou knowest whether a motive is sublime, and tellest the king what motives a king should have.

I have a few notes on Abul Fazl's family, which may form the conclusion of this biographical notice. The Áín gives the following list of Shaikh Mubárak's sons.

1. Shaikh Abul Faiz, better known under his poetical name of Faizí. He was born in A. H. 954 (A. D. 1547), and seems to have died childless.

2. Shaikh Abul Fazl, born 14th January, 1551, murdered 12th August, 1602.

3. Shaikh Abul Barakát, born 17th Shawwál, 960 (1552). "Though he has not reached a high degree of learning, he knows much, is a practical man, and well versed in fencing. He is good-natured and fond of dervishes." He served under Abul Fazl in Khándesh.

4. Shaikh Abul Khair, born 22nd Jumáda I, 967. "He is a well informed young man, of a regulated mind." He, too, must have entered the Imperial service; for he is mentioned in the Akbarnámah as having been sent by the emperor to the Dak'hin to fetch Prince Dányál.

5. Shaikh Abul Makárim, born 23rd Shawwál, 976. He was wild at first, but guided by his father he learned a good deal. He also studied under Sháh Abul Fath Shírází.

The above five sons were all by the same mother, who, as remarked above, died in 998.

6. Shaikh Abú Turáb, born 23rd Zil Hijjah, 988. "Though

---

* *I. e.* Akbar is the *insán i kámil*, or perfect man.

his mother is another one, he is admitted at Court, and is engaged in self-improvement."

Besides the above, Abul Fazl mentions two posthumous sons by *gummá*, or concubines, *viz.*! Shaikh Abul Hámid, born 3rd Rabí' II, 1002, and Shaikh Abú Ráshid, born 1st Jumáda I, 1002. "They resemble their father."

Of Mubárak's daughters, I find four mentioned in the histories—

1. One married to Khudáwand Khán Dak'hiní; *vide* p. 442. Badáoní calls her husband a *Ráfizí*, *i. e.*, a Shí'ah, and says he died in Karí in Gujarát.

2. One married to Husámuddín; *vide* p. 441.

3. One married to a son of Rájah 'Alí Khán of Khándesh. Their son Safdar Khán* was made, in the 45th year of Akbar's reign, a commander of one thousand.

4. Láḍlí Begum, married to Islám Khán; *vide* p. 493, note 1. Mr. T. W. Beale of Ágrah, the learned author of the *Miftáh uttawárikh*, informs me that Láḍlí Begum died in 1017, or five years before the death of her husband. Her mausoleum, called the 'Rauzah i Láḍlí Begum,' is about two miles to the east of Akbar's mausoleum at Sikandrah, near Ágrah. The interior was built of marble, and the whole was surrounded by a wall of red Fathpúr sandstone. It was completed in 1004. In 1843, Mr. Beale saw in the Rauzah several tombs without inscriptions, and a few years ago the place was sold by government to a wealthy Hindú. The new owner dug up the marble stones, sold them, and destroyed the tombs, so that of the old Rauzah nothing exists now-a-days but the surrounding wall. Mr. Beale thinks that the bodies of Shaikh Mubárak, Faizí, and Abul Fazl were likewise buried there, because over the entrance the following inscription in Ṭughrá characters may still be seen—

بسم الله الرحمن الرحيم و به ثقتی * هذه الروضة للعالم الربانی والعارف الصمدانی مجامع العلوم شيخ مبارك الله قدس سره قد وقف ببنائه بحر العلوم شيخ ابوالفضل سلم الله تعالى فی ظل دولة الملك العادل يطلبه المجد و الاقبال و الكرم جلال الدنيا و الدين اكبر پادشاه غازی خلد الله تعالى ظلال سلطنته باهتمام حضرت ابی البركات فی سنة اربع و الف ||

In the name of God the merciful, the clement, in whom I trust! This mausoleum was erected for the divine scholar, the sage of the

---

* The Lak'hnau edition of the Akbarnámah (III, 830) calls him Sundar Khán.

eternal, the gatherer of knowledge, Shaikh Mubárak ullah (may his secret be sanctified!), in filial piety by the ocean of sciences, Shaikh Abul Fazl—may God Almighty preserve him!—in the shadow of the majesty of the just king, whom power, auspiciousness, and generosity follow, Jaláluddunyá waddín Akbar Pádisháh i Ghází,—may God Almighty perpetuate the foundations of his kingdom!—under the superintendence of Abul Barakát, in 1004 [A. D. 1595-96].

Thus it will appear that the Rauzah was built in the year in which Faizí died. Shaikh Mubárak, as was mentioned above, died in 1593 A. D. It seems, however, as if Shaikh Mubárak and Faizí had been buried at a place opposite to Ágrah, on the left bank of the Jamuná, where he first settled in 1551; for Abul Fazl says in his description of Ágrah in the Áín*—"On the other side of the river is the Chár Bágh Villa, built by Firdaus Makání [the emperor Bábar]. There the author was born, and there are the resting places of his father and his elder brother. Shaikh 'Aláuddín Majzúb and Mír Rafí'uddín Safawí and other worthies are also buried there." We have no information regarding a removal of the bodies to the other side of the Jamuná, though Abul Fazl's inscription no doubt shews that such a removal was intended. It is a pity, however, that the Rauzah was sold and destroyed.

Abul Fazl's son is the wellknown

SHAIKH 'ABDURRAHMAN AFZAL KHA'N.

He was born on the 12th Sha'bán, 979, and received from his grandfather the Sunní name of 'Abdurrahmán. In the 35th year of Akbar's reign, when twenty years of age, Akbar married him to the daughter of Sa'ádat Yár Kokah's brother. By her 'Abdurrahmán had a son, to whom Akbar gave the name of Bishotan.†

When Abul Fazl was in command of the army in the Dak'hin, 'Abdurrahmán was, what the Persians call, the *tír i rúi tarkash i ú*, 'the arrow at hand at the top of the quiver', ever ready to perform duties from which others shrank, and wisely and courageously settling matters of importance. He especially distinguished himself in Talingánah. When Malik 'Ambar, in the 46th year, had caught 'Alí Mardán Bahádur (p. 496) and had taken possession of the country, Abul Fazl despatched 'Abdurrahmán and Sher Khwájah (p. 459) to oppose the enemy. They

---

* My text edition, p. 441. *Vide* also p. 539; Keene's Agra Guide, p. 47, and regarding Ládlí Begum, p. 45. 'Ládlí' means in Hindústání 'a pet.'

† Which name was borne by the brother of Isfandiyár, who is so often mentioned in Firdausí's Sháhnámah.

crossed the Godáwarí near Nánder, and defeated 'Amber at the Mánjará.

Jahángír did not transfer to the son the hatred which he had felt for the father, made him a commander of two thousand horse, gave him the title of Afzal Khán, and appointed him, in the third year of his reign, governor of Bihár, *vice* Islám Khán (the husband of Abu'l Fazl's sister), who was sent to Bengal. 'Abdurrahmán also received Gorák'hpúr as jágír. As governor of Bihár, he had his head-quarters at Patna. Once during his absence from Patna, a dervish of the name of Qutbuddín appeared in the district of Bhojpúr, which belonged to the then very troublesome Ujjainiyah Rájahs (p. 513, note), and gave out that he was Prince Khusrau, whom his unsuccessful rebellion and imprisonment by Jahángír had made the favorite of the people. Collecting a large number of men, he marched on Patna, occupied the fort which Shaikh Banárasí and Ghiyás, 'Abdurrahmán's officers, cowardly gave up, and plundered Afzal Khán's property and the Imperial treasury. 'Abdurrahmán returned from Gorák'hpúr as soon as he heard of the rebellion. The pretender fortified Patna, and drew up his army at the Pun Pun River. 'Abdurrahmán charged at once, and after a short fight dispersed the enemy. Qutb now retreated to the fort, followed by 'Abdurrahmán, who succeeded in capturing him. He executed the man at once, and sent his head to Court, together with the two cowardly officers. Jahángír, who was always minute in his punishments, had their heads shaved and women's veils put over the faces; they were then tied to donkeys, with their heads to the tails, and paraded through the towns *(tashhír)* as a warning to others.

Not long after this affair, 'Abdurrahmán took ill, and went to Court, where he was well received. He lingered for a time, and died of an abscess, in the 8th year of Jahángír's reign (A. H. 1022), or eleven years after his father's murder.

Bishotan, son of 'Abdurrahmán, son of Shaikh Abul Fazl.

He was born on the 3rd Zí Qa'dah, 999. In the 14th year of Jahángír's reign, he was a commander of seven hundred, with three hundred horse. In the 10th year of Sháh Jahán's reign, he is mentioned as a commander of five hundred horse, which rank he held when he died in the 15th year of the same reign.

☞ The translation will be accompanied by a preface, a biographical account of 'Abul Fazl, and several plates. The work, it is hoped, will be completed by the end of next year.

CORRECTIONS.

Page 32, note, line 2, Read:

He appears to have entered Akbar's service in the eighth year of the emperor's reign (*vide* Badáoní II., p. 80), and held first important post in the eighteenth year, when he was employed to settle the affairs of Gujrát.

ABU'L FAZL'S PREFACE.

ALLÁHU AKBAR!

O Lord, whose secrets are for ever veiled
And whose perfection knows not a beginning,
End and beginning, both are lost in Thee,
No trace of them is found in Thy eternal realm.
My words are lame; my tongue, a stony tract;
Slow wings my foot, and wide is the expanse.
Confused are my thoughts; but this is Thy best praise,
In ecstasy alone I see Thee face to face!

It is proper for a man of true knowledge to praise God not only in words, but also in deeds, and to endeavour to obtain everlasting happiness, by putting the window of his heart opposite the slit of his pen, and describing some of the wondrous works of the Creator. Perhaps the lustre of royalty may shine upon him, and its light enable him to gather a few drops from the ocean, and a few atoms from the endless field of God's works. He will thus obtain everlasting felicity, and render fertile the dreary expanse of words and deeds.

I, Abulfazl, son of Mubárik, return thanksgiving to God by singing the praises of royalty, and by stringing its kingly pearls upon the thread of description; but it is not my intention to make mankind, for the first time, acquainted with the glorious deeds and excellent virtues of that remarkable man,[1] who clothes our wonderful world in new colours, and is an ornament to God's noble creation. It would be absurd on my part to speak about that which is known; I should make myself the butt of the learned. It is only my personal knowledge of

[1] Akbar.

him, a priceless jewel, which I send to the market place of the world, and my heart feels proud of being engaged in such an undertaking. But it could not have been from self-laudation that I have taken upon myself to carry out so great a task—a work which even heavenly beings would find beset with difficulties; for such a motive would expose my inability and shortsightedness. My sole object in writing this work was, first, to impart to all that take an interest in this auspicious century, a knowledge of the wisdom, magnanimity, and energy of him who understands the minutest indications of all things, created and divine, striding as he does over the field of knowledge; and, secondly, to leave future generations a noble legacy. The payment of a debt of gratitude is an ornament of life, and a provision for man's last journey. There may be some in this world of ambitious strife, where natures are so different, desires so numerous, equity so rare, and guidance so scarce, who, by making use of this source of wisdom, will escape from the perplexities of the endless chaos of knowledge and deeds. It is with this aim that I describe some of the regulations of the great king, thus leaving for far and near, a standard work of wisdom. In doing so, I have of course, to speak of the exalted position of a king, and also to describe the condition of those who are assistants in this great office.

No dignity is higher in the eyes of God than royalty; and those who are wise, drink from its auspicious fountain. A sufficient proof of this, for those who require one, is the fact that royalty is a remedy for the spirit of rebellion, and the reason why subjects obey. Even the meaning of the word Pádisháh shews this; for *pád* signifies stability and possession, and *sháh* means origin, lord. A king is therefore the origin of stability and possession. If royalty did not exist, the storm of strife would never subside, nor selfish ambition disappear. Mankind, being under the burden of lawlessness and lust, would sink into the pit of destruction; the world, this great market place, would lose its prosperity, and the whole earth become a barren waste. But by the light of imperial justice, some follow with cheerfulness the road of obedience, whilst others abstain from violence through fear of punishment; and out of necessity make choice of the path of rectitude. *Sháh* is also a name given to one who surpasses his fellows, as you may see from words like *sháh-suwár*, *sháh-ráh*; it is also a term applied to a bridegroom—the world, as the bride, betrothes herself to the king, and becomes his worshipper.

Silly and shortsighted men cannot distinguish a *true* king from a *selfish* ruler. Nor is this remarkable, as both have in common a large treasury, a numerous army, clever servants, obedient subjects, an abundance of wise men, a multitude of skilful workmen, and a superfluity of means of enjoyment. But men of deeper insight remark a difference. In the case of the former, the things just now enumerated, are lasting; but in that of the latter, of short duration. The former does not attach himself to these things, as his object is to remove oppression, and provide for every thing which is good. Security, health, chastity, justice, polite manners, faithfulness, truth, an increase of sincerity, &c., are the result. The latter is kept in bonds by the external forms of royal power, by vanity, the slavishness of men, and the desire of enjoyment; hence everywhere there is insecurity, unsettledness, strife, oppression, faithlessness, robbery.

Royalty is a light emanating from God, and a ray from the sun, the illuminator of the universe,[1] the argument of the book of perfection, the receptacle of all virtues. Modern language calls this light *farr i izidi* (the divine light), and the tongue of antiquity called it *kiyán khwarah* (the sublime halo). It is communicated by God to kings without the intermediate assistance of any one, and men, in the presence of it, bend the forehead of praise towards the ground of submission. Again, many excellent qualities flow from the possession of this light. 1. *A paternal love towards the subjects.* Thousands find rest in the love of the king; and sectarian differences do not raise the dust of strife. In his wisdom, the king will understand the spirit of the age, and shape his plans accordingly. 2. *A large heart.* The sight of anything disagreeable does not unsettle him; nor is want of discrimination for him a source of disappointment. His courage steps in. His divine firmness gives him the power of requital, nor does the high position of an offender interfere with it. The wishes of great and small are attended to, and their claims meet with no delay at his hands. 3. *A daily increasing trust in God.* When he performs an action, he considers God as the real doer of it, (and himself as the medium,) so that a conflict of motives can produce no disturbance. 4. *Prayer and devotion.* The success of his plans will not lead him to neglect; nor will adversity cause him to forget God, and madly trust in man. He puts the reins of desire

[1] Akbar worshipped the sun as the visible representative of God, and the immediate source of life. Regarding his form of worship, *vide* below.

into the hands of reason; in the wide field of his desires he does not permit himself to be trodden down by restlessness, nor will he waste his precious time in seeking after that which is improper. He makes wrath, the tyrant, pay homage to wisdom, so that blind rage may not get the upper hand, and inconsiderateness overstep the proper limits. He sits on the eminence of propriety, so that those who have gone astray have a way left to return, without exposing their bad deeds to the public gaze. When he sits in judgment, the petitioner seems to be the judge, and he himself, on account of his mildness, the suitor for justice. He does not permit petitioners to be delayed on the path of hope; he endeavours to promote the happiness of the creatures in obedience to the will of the Creator, and never seeks to please the people in contradiction to reason. He is for ever searching after those who speak the truth, and is not displeased with words that seem bitter, but are in reality sweet. He considers the nature of the words and the rank of the speaker. He is not content with not committing violence, but he must see that no injustice is done within his realm.

He is continually attentive to the health of the body politic, and applies remedies to the several diseases thereof. And in the same manner that the equilibrium of the animal constitution depends upon an equal mixture of the elements,[1] so also does the political constitution become well tempered by a proper division of ranks; and by means of the warmth of the ray of unanimity and concord, a multitude of people become fused into one body.

The people of the world may be divided into four classes.[2]— 1. *Warriors*, who in the political body have the nature of fire. Their flames, directed by understanding, consume the straw and rubbish of rebellion and strife, but kindle also the lamp of rest in this world of disturbances. 2. *Artificers* and *merchants*, who hold the place of air. From their labours and travels, God's gifts become universal, and the breeze of contentment nourishes the rose-tree of life. 3. *The learned*, such as the philosopher, the physician, the arithmetician, the geometrician, the

[1] Thus, according to the medical theories of the middle ages.

[2] This passage resembles one in Firdausí's Sháhnámah, in the chapter entitled *dar dástán i Jamshéd;* vide also Vullers' Persian Dictionary, II., 756, s. *kátúzí*. It is also found in the *Akhláq i Muhsiní*, chapter XV., *dar 'adl*, in the *Akhláq i Jaláli*, and the *Akhláq i Náçirí*, the oldest of the three Akhláqs mentioned.

astronomer, who resemble water. From their pen and their wisdom, a river rises in the drought of the world, and the garden of the creation receives from their irrigating powers a peculiar freshness. 4. *Husbandmen* and *labourers*, who may be compared to earth. By their exertions, the staple of life is brought to perfection, and strength and happiness flow from their work.

It is therefore obligatory for a king to put each of these in its proper place, and by uniting personal ability with a due respect for others, to cause the world to flourish.

And as the grand political body maintains its equilibrium by the above four ranks of men, so does royalty receive its final tint from a similar fourfold division.

1. *The nobles of the state*, who in reliance on their position lead everything to a happy issue. Illuminating the battle-field with the halo of devotedness, they make no account of their lives. These fortunate courtiers resemble fire, being ardent in devotion, and consuming in dealing with foes. At the head of this class is the *Vakíl*, who from his having attained by his wisdom the four degrees of perfection,[1] is the emperor's lieutenant in all matters connected with the realm and the household. He graces the Council by his wisdom, and settles with penetration the great affairs of the realm. Promotion and degradation, appointment and dismissal, depend on his insight. It requires therefore an experienced man, who possesses wisdom, nobility of mind, affability, firmness, magnanimity, a man able to be at peace with any one, who is frank, single-minded towards relations and strangers, impartial to friends and enemies, who weighs his words, is skilful in business, well-bred, esteemed, known to be trustworthy, sharp and farsighted, acquainted with the ceremonies of the court, cognizant of the State secrets, prompt in transacting business, unaffected by the multiplicity of his duties. He should consider it his duty to promote the wishes of others, and base his actions on a due regard to the different ranks of men, treating even his inferiors with respect, from the desire of attaching to

[1] Akbar said that perfect devotedness consisted in the readiness of sacrificing four things,—*ján* (life), *mál* (property), *dín* (religion), *námús* (personal honour). Those who looked upon Akbar as a guide in spiritual matters (*pír*)—an honour which Akbar much coveted—promised to shew this devotedness, and then belonged to the *dín i iláhí*, or the Divine Faith, the articles of which Akbar had laid down, as may be seen below.

himself the hearts of all. He takes care not to commit improprieties in conversation, and guards himself from bad actions. Although the financial offices are not under his immediate superintendence, yet he receives the returns from the heads of all financial offices, and wisely keeps abstracts of their returns.

The Mír-mál,[1] the Keeper of the seal, the Mír-bakhshí,[2] the Bárbégí,[3] the Qurbégí,[4] the Mír-tózak,[5] the Mír-bahrí,[6] the Mír-barr,[7] the Mír-Manzil,[8] the Khwánsálár,[9] the Munshí,[10] the Qush-bégí,[11] the Akhtah-bégí[12], belong to this class. Every one of them ought to be sufficiently acquainted with the work of the others.

2. *The assistants of victory*, the collectors and those entrusted with income and expenditure, who in the administration resemble wind, at times a heart-rejoicing breeze, at other times a hot, pestilential blast. The head of this division is the *Vizier*, also called *Diwán*. He is the lieutenant of the Emperor in financial matters, superintends the imperial treasuries, and checks all accounts. He is the banker of the cash of the revenue, the cultivator of the wilderness of the world. He must be a member of the *Divine Faith*, a skilful arithmetician, free from avarice, circumspect, warm-hearted, abstinent, active in business, pleasing in his style, clear in his writings, truthful, a man of integrity, condescending, zealous in his work. He is in reality a book-keeper. He explains all matters which appear too intricate for the *Mustaufí*;[13] and whatever is beyond his own ability he refers to the *Vakíl*. The Mustaufí, the Sáhib i Taujíh,[14] the Awárjah Nawís,[15] the Mír-Sámán,[16] the Názir i Buyútát,[17] the Díwán i Buyútát,[18] the Mushrif[19] of the Treasury, the Wáqi'ah

---

[1] Perhaps an officer in charge of the Emperor's Private purse.

[2] Paymaster of the Court.

[3] An officer who presents people at Court, their petitions, &c. He is also called *Mír 'Arz*.

[4] Bearer of the Imperial insignia.

[5] Master of Ceremonies.

[6] Harbour Master General and Admiral.

[7] Superintendent of the Imperial Forests.

[8] Quarter Master General of the Court. Akbar's court was frequently travelling.

[9] Superintendent of the Imperial Kitchen.

[10] Private Secretary.

[11] Superintendent of the aviaries (falcons, pigeons).

[12] Superintendent of the Stud.

[13] Deputy Díwán.

[14] The Accountant of the Army.

[15] The Accountant of the daily expenditure at Court.

[16] The officer in charge of the Court-furniture, stores, &c.

[17] Superintendent of the Imperial workshops.

[18] The Accountant of the Imperial workshops.

[19] Clerk.

Nawís,[1] the 'Ámil[2] of the domains, are under his orders, and act by the force of his wisdom.

Some princes consider the office of the Vizier as a part of that of the *Vakíl*, and are anxious to find in their realm a man who possesses the excellent qualities of these two pillars of the edifice of the State. But as they are not always able to find a person qualified for the office of a Vakíl, they make choice of a man who has some of his qualities, and appoint him as *Mushrif i Diwán*, which office is higher in rank than that of the Díwán, but lower than that of the Vakíl.

3. *The companions of the king*, who are the ornaments of the court by the light of their wisdom, the ray of their sharpsightedness, their knowledge of the times, their intimate acquaintance with human nature, their frankness and polite address. Through the excellence of their religious faith and good will, thousands open in the market place of the world the stores of virtue. Wisely fettering ambition on the battle-field of the world, they extinguish the sparks of wrath by the rain of their wisdom; whence they resemble water in the affairs of the body political. When they are of a mild temperament, they remove the dust of affliction from the hearts of men, and bestow freshness upon the meadow of the nation; but if they depart from moderation, they inundate the world with a deluge of calamity, so that numbers are driven by the flood of misfortunes into the current of utter extinction.

At the head of this class stands the philosopher, who with the assistance of his wisdom and example purifies the morals of the nation, and girds himself with the noble aim of putting the welfare of mankind upon a sound basis. The Sadr,[3] the Mír-'Adl, the Qází,[4] the physician, the astronomer, the poet, the soothsayer, belong to this class.

4. The *servants* who at court perform the duties about the king. They occupy in the system of the State the position of earth. As such, they lie on the high road of submission, and in dust before the majesty of the king. If free from chaff and dross, they are like an elixir for the body; otherwise they are dust and dirt upon the face of success. The table servant, the armour bearer, the servants in charge of the *sharbat* and the water, the servant in charge of the mattresses and the wardrobe, belong to this class.

---

[1] The Recorder. [2] Collector.

[3] Also called *Sadr i Jahán*, the Chief-Justice and Administrator General of the empire.

[4] The Qází hears the case: the Mír 'Adl passes the sentence.

If the king be waited on by servants to whom good fortune has given excellent qualities, there arises sometimes a harmony, which is like a nosegay from the flower-bed of auspiciousness.

Just as the welfare of the whole world depends upon the successful working of the above mentioned four classes, as settled by kings, so does the body politic depend upon the proper formation of the latter four divisions.

The sages of antiquity mention the following four persons as the chief supports of the State—1. *An upright collector;* who protects the husbandman, watches over the subjects, develops the country, and improves the revenues. 2. *A conscientious commander* of the army, active and strict. 3. *A chief justice*, free from avarice and selfishness, who sits on the eminence of circumspection and insight, and obtains his ends by putting various questions, without exclusively relying on witnesses and oaths. 4. *An intelligencer*, who transmits the events of the time without addition or diminution, always keeping to the thread of truth and penetration.

It is moreover incumbent on a just king to make himself acquainted with the characters of the following five kinds[1] of men of whom the world is composed, and act accordingly. 1. The most commendable person is *the sagacious man* who prudently does that which is proper and absolutely necessary. The fountain of his virtues does not only run along his channel, but renders verdant the fields of other men. Such a one is the fittest person for a king to consult in State affairs. After him comes, secondly, *the man of good intentions.* The river of his virtues does not flow over its bed, and does not therefore become an irrigating source for others. Although it may be proper to shew him kindness and respect, yet he does not merit so high a degree of confidence. Inferior to him is, thirdly, *the simple man*, who does not wear the badge of excellence upon the sleeve of his action, yet keeps the hem of his garment free from the dust of wicked deeds. He does not deserve any distinction; but ought to be allowed to live at his ease. Worse than he is, fourthly, *the inconsiderate man*, who fills his house with furniture for his own mischief, without, however, doing harm to others. Him the king should keep in the hot place of disappointment, and bring him into the road of virtue by good advice and severe reprehension. The last of all is *the*

[1] The following is a free paraphrase of a passage in the Akhláq i Muhsiní, Chapter XXXII., entitled *dar siyásat.*

vicious man, whose black deeds alarm others and throw, on account of their viciousness, a whole world into grief. If the remedies employed in the case of men of the preceding class, do not amend him, the king should consider him as a leper, and confine him separate from mankind; and provided this harsh treatment does not awaken him from his sleep of error, he should feel the torture of grief, and be banished from his dwelling; and if this remedy produce no effect either, he should be driven out of the kingdom, to wander in the wilderness of disappointment; and if even this should not improve his vicious nature, he should be deprived of the instruments of his wickedness, and lose his sight, or his hand, or his foot. But the king ought not to go so far as to cut the thread of his existence; for enquiring sages consider the human form as an edifice made by God, and do not permit its destruction.

It is therefore necessary for just kings, to make themselves first acquainted with the rank and character of men, by the light of insight and penetration, and then to regulate business accordingly. And hence it is that the sages of ancient times have said that princes who wear the jewel of wisdom, do not appoint every low man to their service; that they do not consider every one who has been appointed, to be deserving of daily admittance; that those who are thus favoured, are not therefore deemed worthy to sit with them on the carpet of intercourse; that those who are worthy of this station, are not necessarily admitted to the pavilion of familiar address; that those who have this privilege, are not therefore allowed to sit in the august assembly; that those upon whom this ray of good fortune falls, are not therefore let into their secrets; and that those who enjoy the happiness of this station, are not therefore fit for admission into the Cabinet Council.

Praise be to God, the Giver of every good gift! The exalted monarch of our time is so endowed with these laudable dispositions, that it is no exaggeration to call him their *exordium*. From the light of his wisdom, he discerns the worth of men, and kindles the lamp of their energy; whilst ever clear to himself, and without an effort, he adorns his wisdom with the beauty of practice. Who can measure, by the rules of speech, his power as a spiritual leader, and his works in the wide field of holiness;[1] and even if it were possible to give a description of it,

[1] Akbar as the spiritual leader of the members belonging to the Divine Faith, wrought many miracles, of which some are related in the seventy-seventh *Aín* of this book.

who would be able to hear and comprehend it? The best thing I can do is to abstain from such an attempt, and to confine myself to the description of such of his wonderful doings as illustrate the worldly side of his nature, and his greatness as a king. I shall speak—

First, of his regulations concerning *the household; secondly*, of the regulations concerning *the army; thirdly*, of the regulations concerning *the empire*, as these three contain the whole duty of a king. In doing so, I shall leave practical enquirers a present, which may seem difficult to understand, but which is easy; or rather, which may seem easy, but is in reality difficult.

Experienced men who are acquainted with the art of governing, and versed in the history of the past, cannot comprehend, how monarchs have hitherto governed without these wise regulations, and how the garden of royalty could have been fresh and verdant, without being irrigated by this fountain of wisdom.

This sublime volume then, is arranged under three heads: it enables me, in some measure, to express my feelings of gratitude for favours received.

Remark by the Author. As I had sometimes to use Hindí words, I have carefully described the consonants and vowels. Enquirers will therefore have no difficulty in reading; nor will any confusion arise from mistakes in copying. Letters like *alif*, *lám*, and a few more, are sufficiently clear from their names. Some letters I have distinguished as *manqúṭah*, and letters similar in form, without such a limitation. Letters which are purely Persian, have been distinguished as such; thus the *p* in *padíd*, the *ché* in *chaman*, the *gáf* in *nigár*, the *zh* in *muzhdah*. Sometimes I have added to the names of these letters, the phrase *having three points*. Letters peculiar to the Hindí language I have distinguished as Hindí. The letter *yá*, as in *rúy*, I have called *tahtáni*, and the *té*, as in *dast*, *fauqáni*. The *b* in *adab*, I have merely called *bé*. Similarly, the letters *nún*, *wáw*, *yá*, and *hé*, when clearly sounded, have been merely described as *nún*, *wáw*, &c. The nasal *nún* I have called *nún i khafí*, or *nún i pinhán*. The final and silent *h*, as in *farkhundah*, I have called *maktúb*, *i. e.*, written, but not pronounced. The *i* and *u*, when modified to *é* or *ó*, I have called *majhúl*. As consonants followed by an alif have the vowel *a*, it was not necessary to specify their vowels.

BOOK FIRST.

THE IMPERIAL HOUSEHOLD.

ÁÍN 1.

THE HOUSEHOLD.

He is a man of high understanding and noble aspirations who, without the help of others, recognizes a ray of the Divine power in the smallest things of the world; who shapes his inward and outward character accordingly, and shews due respect to himself and to others. He who does not possess these qualifications, ought not to engage in the struggle of the world, but observe a peaceable conduct. If the former be given to retirement, he will cultivate noble virtues; and if his position be a dependent one, he will put his whole heart in the management of his affairs, and lead a life free from distressing cares.

True greatness, in spiritual and in worldly matters, does not shrink from the minutiæ of business, but regards their performance as an act of Divine worship.[1]

If he cannot perform every thing himself, he ought to select, guided by insight and practical wisdom, one or two men of sagacity and understanding, of liberal views in religious matters, possessing diligence and a knowledge of the human heart, and be guided by their advice.

The wise esteem him not a king who confines his attention to great matters only, although some impartial judges excuse a king that does so, because avaricious sycophants who endeavour by cunning to obtain the position of the virtuous, often remind him of the difference of ranks, and succeed in lulling asleep such kings as are fond of external greatness, their only object being to make a trade of the revenues of the country, and to promote their own interests. But good princes make no difference between great and small matters; they take, with the assistance of God, the burden of this world and the responsibility of the world to come on the shoulder of resolution, and are yet free and independent, as is the case with the king of

[1] A phrase which Akbar often used.

our time. In his wisdom, he makes himself acquainted with the successful working of every department, which, although former monarchs have thought it derogatory to their greatness, is yet the first step towards the establishment of a good government. For every branch he has made proper regulations, and he sees in the performance of his duty a means of obtaining God's favour.

The success of this vast undertaking depends upon two things: *first*, wisdom and insight, to call into existence suitable regulations; *secondly*, a watchful eye, to see them carried out by men of integrity and diligence.

Although many servants of the household receive their salaries on the list of the army, there was paid for the household in the thirty-ninth year of the Divine era, the sum of 309,186,795 dáms.[1] The expenses on this account, as also the revenues, are daily increasing. There are more than one hundred offices and workshops, each resembling a city, or rather a little kingdom; and by the unremitting attention of his Majesty, they are all conducted with regularity, and are constantly increasing, their improvement being accompanied by additional care and supervision on the part of his Majesty.

Some of the regulations I shall transmit, as a present, to future enquirers, and thus kindle in others the lamp of wisdom and energy.

As regards those regulations which are of a general nature, and which from their subject matter, belong to each of the three divisions of the work, I have put them among the regulations of the Household.

ÁÍN 2.

THE IMPERIAL TREASURIES.

Every man of sense and understanding knows that the best way of worshipping God, consists in allaying the distress of the times, and in improving the condition of man. This depends, however, on the advancement of agriculture, on the order kept in the king's household, on the readiness of the champions of the empire, and the discipline of the army. All this again is connected with the exercise of proper care on the part of the monarch, his love for the people, and with an intelligent management of the revenues and the public expenditure. It is only when cared for, that the inhabitants of the towns, and those of the rural districts, are able to satisfy their wants, and to enjoy prosperity. Hence it is incumbent on just kings, to care for the former, and to protect the latter class of men. If some say that to collect

---

[1] Or, 7,729,669¾ Rupees. One rupee (of Akbar) = 40 dáms. The Divine era, or Táríkh i Iláhí, is Akbar's solar era, the commencement of which falls on the 19th February 1556; hence the thirty-ninth year corresponds to A.D. 1595.

wealth, and to ask for more than is absolutely necessary, is looked upon as contemptible by people given to retirement and seclusion, whilst the opposite is the case with the inhabitants of the towns, who live in a dependent position, I would answer that it is after all only shortsighted men who make this assertion; for in reality both classes of men try to obtain that which they think necessary. Poor, but abstemious people take a sufficient quantity of food and raiment, so as to keep up the strength necessary for the pursuit of their enquiries, and to protect them against the influence of the weather; whilst the other class think to have just sufficient, when they fill their treasuries, gather armies, and reflect on other means of increasing their power.

It was from such views, when lifting the veil and beginning to pay attention to these weighty concerns, that his Majesty entrusted his inmost secrets to the Khájah sarái I'timád Khán,[1] a name which his Majesty had bestowed upon him as a fitting title. On account of the experience of the Khájah, the reflections of his Majesty took a practical turn, widened by degrees, and shone at last forth in excellent regulations. An enquiry regarding the income of the different kinds of land was set on foot, and successfully concluded by the wisdom of upright and experienced men. With a comprehensiveness which knew no difference between friends and strangers, the lands which paid rents into the imperial exchequer were separated from the Jágír lands; and zealous and upright men were put in charge of the revenues, each over one krór of dáms. Incorruptible *bitakchis*[2] were selected to assist them, and intelligent treasurers were appointed, one for each. And from kindness and care for the agricultural classes, it was commanded that the collectors should not insist upon the husbandman paying coin of full weight, but to give him a receipt for whatever species of money he might bring. This

---

[1] *I'timád* means *trustworthiness*. Khájah sarái is the title of the chief eunuch. His real name was Phúl Malik. After serving Salím Sháh (1545 to 1553)' who bestowed upon him the title of *Muhammad Khán*, he entered Akbar's service. Akbar, after the death of Shamsuddín Muhammed Atgah Khán, his foster father, commenced to look into matters of finance, and finding the Revenue Department a den of thieves, he appointed I'timád Khán, to remodel the finances, making him a commander of One Thousand (*vide* Abulfazl's list of Akbar's grandees, in part second, No. 119), and conferring upon him the title of *I'timád Khán*. He appears to have performed his duties to Akbar's satisfaction. In 1565, he conveyed the daughter of Mírán Mubárik, king of Khándésh (1535 to 1566), to Akbar's harem, took afterwards a part in the conquest of Bengal, where he distinguished himself, and was, in 1576, appointed governor of Bhakkar. When in 1578 Akbar's presence was required in the Panjáb, I'timád Khán desired to join him. In order to equip his contingent, he collected his rents and outstandings, as it appears, with much harshness. This led to a conspiracy against his life. In the same year he was murdered by a man named Maqçúd 'Alí. *Maásir ul umará*.

[2] Writers.

laudable regulation removed the rust of uncertainty from the minds of the collectors, and relieved the subjects from a variety of oppressions, whilst the income became larger, and the state flourished. The fountain of the revenues having thus been purified, a zealous and honest man was selected for the general treasurership, and a dárógah and a clerk were appointed to assist him. Vigilance was established, and a standard laid down for this department.

Whenever a (provincial) treasurer had collected the sum of two lákhs of dáms, he had to send it to the Treasurer General at the Court, together with a memorandum specifying the quality of the sum.

A separate treasurer was appointed for the *péshkash*[1] receipts, another for receiving heirless property, another for *nazar* receipts,[2] and another for the monies expended in weighing the royal person,[3] and for charitable donations. Proper regulations were also made for the disbursements; and honest superintendents, dárógahs and clerks were appointed. The sums required for the annual expenditure, are paid at the General Treasury to each cashkeeper of the disbursements, and correct receipts granted for them. A proper system of accounts having thus been inaugurated, the empire began to flourish. In a short time the treasuries were full, the army was augmented, and refractory rebels led to the path of obedience.

In Irán and Túrán, where only one treasurer is appointed, the accounts are in a confused state; but here in India, the amount of the revenues is so great, and the business so multifarious that twelve treasuries are necessary for storing the money, nine for the different kinds of cash-payments, and three for precious stones, gold, and inlaid jewellery. The extent of the treasuries is too great to admit of my giving a proper description with other matters before me. From his knowledge of the work, and as a reward for labour, his Majesty very often expresses his satisfaction, or conveys reprimands; hence everything is in a flourishing condition.

Separate treasurers were also appointed for each of the Imperial workshops, the number of which is nearly one hundred. Daily, monthly, quarterly, and yearly accounts are kept of the receipts and disbursements, so that in this branch also the market-place of the world is in a flourishing condition.

Again, by the order of his Majesty, a person of known integrity keeps in the public audience hall some gold and silver for the needy, who have their wants relieved without delay. Moreover a krór of dáms is kept in readiness within the palace, every thousand of which is kept in bags made of a coarse material. Such a bag is called in Hindí *sahsah*, and many of

---

[3] *Vide* the eighteenth Aín of the second book.

them put up in a heap, *ganj*. Besides, his Majesty entrusts to one of the nobility a large sum of money, part of which is carried in a *purse*.[1] This is the reason, why such disbursements are called in the language of the country *kharj i bahlah*.

All these benefits flow from the wonderful liberality of his Majesty, and from his unremitting care for the subjects of the empire. Would to God that he might live a thousand years!

ÁÍN 3.

THE TREASURY FOR PRECIOUS STONES.

If I were to speak about the quantity and quality of the stones, it would take me an age. I shall therefore give a few particulars, "gathering an ear from every sheaf."

His Majesty appointed for this office an intelligent, trustworthy, clever treasurer, and as his assistants, an experienced clerk, a zealous dárógah, and also skilful jewellers. The foundation therefore of this important department rests upon those four pillars. They classified the jewels, and thus removed the rust of confusion.

Rubies.—1st class rubies, not less than 1000 muhurs in value; 2nd class, from 999 to 500 muhurs; 3rd class, from 499 to 300; 4th class, from 299 to 200; 5th class, from 199 to 100; 6th class, from 99 to 60; 7th class, from 59 to 40; 8th class, from 39 to 30; 9th class, from 29 to 10; 10th class, from $9\frac{3}{4}$ to 5; 11th class, from $4\frac{3}{4}$ to 1 muhur; 12th class, from $\frac{3}{4}$ muhur to $\frac{1}{4}$ rupee. They made no account of rubies of less value.

Diamonds, emeralds, and the *red* and *blue yáqúts,* were classified as follows: 1st class, from 30 muhurs upwards; 2nd class, from $29\frac{3}{4}$ to 15 muhurs; 3rd class, from $14\frac{3}{4}$ to 12; 4th class, from $11\frac{3}{4}$ to 10; 5th class, from $9\frac{3}{4}$ to 7; 6th class, from $6\frac{3}{4}$ to 5; 7th class, from $4\frac{3}{4}$ to 3; 8th class, from $2\frac{3}{4}$ to 2; 9th class, from $1\frac{3}{4}$ to 1 muhur; 10th class, from $8\frac{3}{4}$ rupees to 5 rupees; 11th class, from $4\frac{3}{4}$ to 2 rupees; 12th class, from $1\frac{3}{4}$ to $\frac{1}{4}$ rupee.

The *Pearls* were divided into 16 classes, and strung by scores. The first string contained twenty pearls, each of a value of 30 muhurs and upwards; 2nd class pearls varied from $29\frac{3}{4}$ to 15 muhurs; 3rd class, from $14\frac{3}{4}$ to 12; 4th class, from $11\frac{3}{4}$ to 10; 5th class, from $9\frac{3}{4}$ to 7; 6th class, from $6\frac{3}{4}$ to 5; 7th class, from $4\frac{3}{4}$ to 3; 8th class, from $2\frac{3}{4}$ to 2; 9th class, from $1\frac{3}{4}$ to 1; 10th class, less than a muhur, down to 5 rupees; 11th class, less than 5, to 2 rupees; 12th class, less than 2 rupees, to $1\frac{1}{4}$ rupees; 13th class, less than $1\frac{1}{4}$

[1] A *purse* in Hindi is called *bahlah*.

rupees, to 30 dáms; 14th class, less than 30 dáms, to 20 dáms; 15th class, less than 20 dáms, to 10 dáms; 16th class, less than 10 dáms, to 5 dáms. The pearls are strung upon a number of strings indicating their class, so that those of the 16th class are strung upon 16 strings. At the end of each bundle of strings the imperial seal is affixed, to avoid losses arising from unsorting, whilst a description is attached to each pearl, to prevent disorder.

The following are the charges for boring pearls, independent of the daily and monthly wages of the workmen. For a pearl of the 1st class, $\frac{1}{4}$ rupee; 2nd class, $\frac{1}{8}$; 3rd class, $\frac{1}{16}$ rupee; 4th class, 3 dáms; 5th class, 1 súkí; 6th class, 1 dám; 7th class, $\frac{3}{4}$ dáms; 8th class, $\frac{1}{2}$ dám; 9th class, $\frac{1}{4}$ dám; 10th class, $\frac{1}{5}$; 11th class, $\frac{1}{6}$; 12th class, $\frac{1}{7}$; 13th class, $\frac{1}{8}$; 14th class, $\frac{1}{9}$; 15th class, $\frac{1}{10}$; 16th class, $\frac{1}{11}$ dám, and less.

The value of jewels is so well known that it is useless to say anything about it; but those which are at present in the treasury of His Majesty may be detailed as follows:—

Rubies weighing 11 tánks, 20 surkhs,[1] and diamonds of $5\frac{1}{4}$ tánks, 4 surkhs, each one lakh of rupees; emeralds weighing $17\frac{3}{4}$ tánks, 3 surkhs, 52,000 rupees; yáqúts of 4 tánks, $7\frac{3}{4}$ surkhs, and pearls of 5 tánks, each 50,000 rupees.

ÁÍN 4.

THE IMPERIAL MINT.

As the successful working of the mint increases the treasure, and is the source of despatch for every department, I shall mention a few details.

The inhabitants of the towns and the country perform their transactions by means of money. Every man uses it according to the extent of his necessities; the man whose heart is free from worldly desires sustains by it his life, and the worldly man considers it the final stage of his objects—the wants of all are satisfied by it. The wise man looks upon it as the foundation, from which the fulfilment of his worldly and religious wishes flows. It is absolutely necessary for the continuance of the human race, as men obtain by money their food and clothing. You may indeed gain these two things by undergoing some labour, as sowing, rearing, reaping, cleaning, kneading,

---

[1] *Surkh* means *red*; also, *a little seed with a black dot on it*, called in Hind. *ghungchi*, Abrus precatorius. The Persians called it *chashm i khurús*, cock's eye. The seeds are often used for children's bracelets. Abulfazl means here the weight called in Hind. *ratí*, vulgo *rattee*. 8 surkhs, or 8 ratís, = 1 máshah; 12 máshahs = 1 tólah, and 80 tólahs = 1 sér. A tánk is valued at 4 máshahs; but it must have weighed a little more, as in the tenth Áín, Abulfazl states that the weight of 1 dám was 5 tánks, *or* 1 tólah, 8 máshahs, 7 surkhs; *i. e.*, 1 tánk = $\frac{107}{40}$ máshahs = 4 máshahs, $1\frac{2}{5}$ surkhs.

cooking; twisting, spinning, wearing, &c.; but these actions cannot well be performed without several helpers; for the strength of a single man is not sufficient, and to do so day after day would be difficult, if not impossible. Again, man requires a dwelling, for keeping his provisions. This he calls his *home*, whether it be a tent, or a cave. Man's existence, and the continuance of his life, depend on five things—a father, a mother, children, servants, food, the last of which is required by all. Moreover, money is required, as our furniture and utensils break; they last in no case very long. But money does last long, on account of the strength and compactness of its material, and even a little of it may produce much It also enables men to travel. How difficult would it be to carry provisions for several days, let alone for several months or years!

By the help of God's goodness this excellent precious metal (gold) has come to the shore of existence, and filled the store of life without much labour on the part of man. By means of gold, man carries out noble plans, and even performs Divine worship in a proper manner.[2] Gold has many valuable qualities: it possesses softness, a good taste, and smell. Its component parts are nearly equal[1] in weight; and the marks of the four elements are visible in its properties. Its colour reminds us of fire, its purity of air, its softness of water, its heaviness of earth; hence gold possesses many life-giving rays. Nor can any of the four elements injure it; for it does not burn in the fire; it remains unaffected by air; retains for ages its appearance although kept in water; and does not get altered when buried in the ground, whereby gold is distinguished from the other metals. It is for this reason that in old books on philosophy in which man's intellect is termed *the greater principle*, gold is called *the lesser principle*, as the things required for human life depend upon it. Among its epithets I may mention 'the guardian of justice;' 'the universal adjuster;'—and indeed the adjustment of things depends on gold, and the basis of justice rests upon it. To render it service, God has allowed silver and brass to come into use, thus creating additional means for the welfare of man. Hence just kings and energetic rulers have paid much attention to these metals, and erected mints, where their properties may be thoroughly studied. The success of this department lies in the appointment of intelligent, zealous and upright workmen, and the edifice of the world is built upon their attention and carefulness.

---

[1] According to the chemists of the middles ages, gold consists of quicksilver and sulphur taken in equal proportions; the latter must, however, possess colouring properties. Vide the thirteenth Ain.

[2] "Were it not for piety, I would bow down to gold and say, 'Hallowed be thy name!' *Hariri.*

THE WORKMEN OF THE MINT.

ÁÍN 5.

1. The *Dárógah.* He must be a circumspect and intelligent man, of broad principles, who takes the cumbrous burden of his colleagues upon the shoulder of despatch. He must keep every one to his work, and shew zeal and integrity.

2. The *Sairafí.* The success of this important department depends upon his experience, as he determines the degrees of purity of the coins. On account of the prosperity of the present age, there are now numbers of skilful sarráfs ;[1] and by the attention of his Majesty, gold and silver are refined to the highest degree of purity. The highest degree of purity is called in Persia *dahdahí,* but they do not know above ten degrees of fineness ; whilst in India it is called *bárahbání,* as they have *twelve* degrees. Formerly the old *Jitan,* which is a gold coin current in the Deccan, was thought to be pure, and reckoned at ten degrees ; but his Majesty has now fixed it at 8½ : and the round, small gold dínár of 'Aláuddín, which was considered to be 12 degrees, now turns out to be 10½.

Those who are experienced in this business have related wonderful stories of the purity of gold at the present time, and referred it to witchcraft and alchemy ; for they maintain, that gold ore does not come up to this fineness. But by the attention of his Majesty, it has come up to this degree ; hence the astonishment of people acquainted with this branch. It is, however, certain, that gold cannot be made finer, and of a higher degree. Honest describers and truthful travellers have indeed never mentioned this degree ; but, when gold is put into fusion, small particles separate from it, and mix with the ashes, which ignorant men look upon as useless dross, whilst the skilful recover the metal from it. Although malleable gold ore be calcined and reduced to ashes, yet by a certain operation, it is brought back to its original state ; but a part of it is lost. Through the wisdom of his Majesty, the real circumstances connected with this loss, were brought to light, and the fraudulent practices of the workmen thus put to the test.

ÁÍN 6.

BANWÁRÍ.[2]

An abbreviation for *bánwárí.* Although in this country clever Sairafis are able from experience to tell the degree of fineness by the colour and the

[1] The same as Sairafí ; hence a *shroff,* a money lender.

[2] This Hind. word which is not given in the dictionaries, means the *testing of gold.*

brightness of the metal, the following admirable rule has been introduced, for the satisfaction of others.

To the ends of a few long needles, made of brass or such like metal, small pieces of gold are affixed, having their degree of fineness written on them. When the workmen wish to assay a new piece of gold, they first draw with it a few lines on a touchstone, and some other lines with the needles. By comparing both sets of lines, they discover the degree of fineness of the gold. It is, however, necessary that the lines be drawn in the same manner, and with the same force, so as to avoid deception.

To apply this rule, it is necessary to have gold of various degrees of fineness. This is obtained as follows. They melt together one máshah of pure silver with the same quantity of the best copper; and let it get solid. This mixture they again melt with 6 máshahs of pure gold of 10½ degrees of fineness. Of this composition one máshah[1] is taken, and divided into sixteen parts of half a surkh each. If now 7½ surkhs of pure gold (of 10½ degrees) are mixed with one of the sixteen parts of the composition, the touch of the new mixture will only be 10¼ *bán.*[2] Similarly, 7 surkhs pure gold and 2 parts of the composition melted together, will give gold of 10 bán; 6½ *s.* pure gold and 3 parts composition, 9¾ bán; 6 *s.* gold and 4 parts composition, 9½ bán; 5½ *s.* gold and 5 parts composition, 9¼ bán; 5 *s.* gold and 6 parts composition, 9 bán; 4½ *s.* gold and 7 parts composition, 8¾ bán; 4 *s.* gold and 8 parts composition, 8½ bán; 3½ *s.* gold and 9 parts composition, 8¼ bán; 3 *s.* gold and 10 parts composition, 8 bán; 2½ *s.* gold and 11 parts composition, 7¾ bán; 2 *s.* gold and 12 parts composition, 7½ bán; 1½ *s.* gold and 13 parts composition, 7¼ bán; 1 *s.* gold and 14 parts composition, 7 bán; and lastly, ½ *s.* gold and 15 parts composition, 6¾ bán. Or *generally*, every additional half surkh (or one part) of the composition diminishes the fineness of the gold by a quarter bán, the touch of the composition itself being 6½ bán.

If it be required to have a degree less than 6½ bán, they mix together ½ surkh of the first mixture which consisted, as I said, of silver and copper, with 7½ surkhs of the second composition (consisting of gold, copper and silver), which, when melted together, gives gold of 6¼ bán; and if 1 surkh of the first mixture be melted together with 7 surkhs of the second composition, the result will be 6 bán; and if they require still baser compositions, they increase the mixtures by half surkhs. But in the Banwárí, they reckon to 6 báns only, rejecting all baser compositions.

All this is performed by a man who understands the tests.

3. *The Amín.* He must possess impartiality and integrity, so that

---

[1] This máshah contains 6 parts gold, 1 part silver, and 1 part copper, *i. e.*, ¾ gold and ¼ alloy.

[2] The Hind. term *bán* means *temper, degree.*

friends and enemies can be sure of him. Should there be any differences, he assists the dárógah and the other workmen, maintains that which is right, and prevents quarrels.

4. The *Mushrif.* He writes down the daily expenditure in an upright and practical manner, and keeps a systematic day-book.

5. *The Merchant.* He buys up gold, silver and copper, by which he gains a profit for himself, assists the department, and benefits the revenues of the State. Trade will flourish, when justice is everywhere to be had, and when rulers are not avaricious.

6. *The Treasurer* who watches over the profits, and is upright in all his dealings.

The salaries of the first four and the sixth officers differ from each other, the lowest of them holding the rank of an *Ahadí.*[1]

7. *The Weighman,* who weighs the coins. For weighing 100 *jaláli* goldmuhurs, he gets $1\frac{3}{4}$ dáms; for weighing 1000 rupees, $6\frac{1}{2}\frac{2}{5}$ dáms; and for weighing 1000 copper dáms, $\frac{1}{2}\frac{1}{5}$ of a dám; and, after this rate, according to the quantity.

8. *The Melter of the ore.* He makes small and large trenches in a tablet of clay which he besmears with grease, and pours into them the melted gold and silver, to cast them into ingots. In the case of copper, instead of using grease, it is sufficient to sprinkle ashes. For the above mentioned quantity of gold, he gets $2\frac{3}{5}$ dáms; for the same quantity of silver, 5 dáms and $13\frac{1}{2}$ jétals;[2] for the same quantity of copper, 4 dáms and $21\frac{1}{2}$ jétals.

9. *The Platemaker.* He makes the adulterated gold into plates of six or seven máshahs each, six fingers in length and breadth; these he carries to the assay master, who measures them in a mould made of copper, and stamps such as are suitable, in order to prevent alterations, and to shew the work done. He receives as wages for the above mentioned quantity of gold, $42\frac{1}{3}$ dáms.

ÁÍN 7.

THE MANNER OF REFINING GOLD.

When the abovementioned plates have been stamped, the owner of the gold, for the weight of every 100 jaláli goldmuhurs, must furnish 4 sérs of

---

[1] The *Ahadís* correspond to our *Warranted officers.* Most clerks of the Imperial offices, the painters of the court, the foremen in Akbar's workshops, &c., belonged to this corps. They were called *Ahadís,* or *single men,* because they stood under Akbar's immediate orders. The word *Ahadí,* the *h* of which is the Arabic ح, was spelt in official returns with the Persian ه. So deep-rooted, says Badáoní, was Akbar's hatred for every thing which was Arabic.

[2] Twenty-five *jétals* make one dám. *Vide* the 10th Áín.

saltpetre, and 4 sérs of brickdust of raw bricks. The plates after having been washed in clean water, are stratified with the above mixture (of the saltpetre and brickdust), and put one above the other, the whole being covered with cowdung, which in Hindi is called *uplah*. It is the dry dung of the *Wild Cow*. Then they set fire to it, and let it gently burn, till the dung is reduced to ashes, when they leave it to cool; then these ashes being removed from the sides, are preserved. They are called in Persian *khák i khaláç*, and in Hindí *salóní*. By a process to be mentioned hereafter, they recover silver from it. The plates, and the ashes below them, are left as they are. This process of setting fire to the dung, and removing the ashes at the sides, is twice repeated. When three fires have been applied, they call the plates *sitái*. They are then again washed in clean water, and stratified three times with the above mixture, the ashes of the sides being removed.

This operation must be repeated, till six mixtures and eighteen fires have been applied, when the plates are again washed. Then the assay master breaks one of them; and if there comes out a soft and mild sound, it is a sign of its being sufficiently pure; but if the sound is harsh, the plates must undergo three more fires. Then from each of the plates one máshah is taken away, of which aggregate a plate is made. This is tried on the touchstone; if it is not sufficiently fine, the gold has again to pass through one or two fires. In most cases, however, the desired effect is obtained by three or four fires.

The following method of assaying is also used. They take two tólahs of pure gold, and two tólahs of the gold which passed through the fire, and make twenty plates of each, of equal weight. They then spread the above mixture, apply the fire, wash them, and weigh them with an exact balance. If both kinds are found to be equal in weight, it is a proof of pureness.

10. *The Melter of the refined metal.* He melts the refined plates of gold, and casts them, as described above, into ingots. His fee for 100 gold muhurs is three dáms.

11. The *Zarráb*. He cuts off the gold, silver and copper ingots, as exactly as he can, round pieces of the size of coined money. His fees are, for 100 gold muhurs, 21 dáms, 1¼ jétals; for the weight of 1000 rupees 53 dáms, 8¾ jétals, if he cuts rupees; and 28 dáms in addition, if he cuts the same weight of silver into quarter rupees. For 1000 copper dáms his fee is 20 dáms; for the same weight of half and quarter dáms, 25 dáms; and for half quarter dáms, which are called *dumrís*, 69 dáms.

In Írán and Túrán they cannot cut these pieces without a proper anvil; but Hindustani workmen cut them without such an instrument, so exactly, that there is not the difference of a single hair, which is remarkable enough.

12. *The Engraver*. He engraves the dies of the coins on steel, and such like metals. Coins are then stamped with these dies. At this day, Maulánd

'Alí Ahmad of Delhi, who has not his equal in any country, cuts different kinds of letters in steel, in such a manner as equals the copyslips of the most skilful caligraphers. He holds the rank of a *yúzbáshí*;[1] and two of his men serve in the mint. Both have a monthly salary of 600 dáms.

13. The *Sikkachí*. He places the round pieces of metal between two dies; and by the strength of the hammerer *(putkchí)* both sides are stamped. His fees are for 100 goldmuhurs, $1\frac{2}{5}$ dáms; for 1000 rupees, 5 dáms, $9\frac{1}{2}$ jétals; and for the weight of 1000 rupees of small silver pieces, 1 dám, 3 jétals in addition; for 1000 copper dáms, 3 dáms; for 2000 half dáms, and 4000 quarter dáms, 3 dáms, $18\frac{3}{4}$ jétals; and for 8000 half-quarter dáms, $10\frac{1}{2}$ dáms. Out of these fees the sikkachí has to give one-sixth to the hammerer, for whom there is no separate allowance.

14. The *Sabbák* makes the refined silver into round plates. For every 1000 rupees weight, he receives 54 dáms.

The discovery of alloy in silver. Silver may be alloyed with lead, tin and copper. In Irán and Túrán, they also call the highest degree of fineness of silver *dahdahí;* in Hindustán, the sairafis use for it the term *bist biswah.* According to the quantity of the alloy, it descends in degree; but it is not made less than five, and no one would care for silver baser than ten degrees. Practical men can discover from the colour of the compound, which of the alloys is prevailing, whilst by filing and boring it, the quality of the inside is ascertained. They also try it by beating it when hot, and then throwing it into water, when blackness denotes lead, redness copper, a white greyish colour tin, and whiteness a large proportion of silver.

THE METHOD OF REFINING SILVER.

They dig a hole, and having sprinkled into it a small quantity of wild cow dung, they fill it with the ashes of *Mughilan*[2] wood; then they moisten it, and work it up into the shape of a dish; into this they put the adulterated silver, together with a proportionate quantity of lead. First, they put a fourth part of the lead on the top of the silver, and having surrounded the whole with coals, blow the fire with a pair of bellows, till the metals are melted, which operation is generally repeated four times. The proofs of the metal being pure are, a lightning-like brightness, and its beginning to harden at the sides. As soon as it is hardened in

[1] This Turkish word signifies *a commander of one hundred men*, a captain. *Ahadís* of distinction were promoted to this military rank. The salary of a Yúzbáshí varied from five to seven hundred rupees *per mensem; vide* the third Aín of the second book.

[2] Called in Hind. *babúl*, a kind of acacia. Its bark is used in tanning.

the middle, they sprinkle it with water, when flames resembling in shape the horns of wild goats, issue from it. It then forms itself into a dish, and is perfectly refined. If this dish be melted again, half a surkh in every tólah will burn away, *i. e.*, 6 máshahs and 2 surkhs in 100 tólahs. The ashes of the dish, which are mixed with silver and lead, form a kind of *litharge*, called in Hindí *k'haral*, and in Persian *kuhnah*;[1] the use of which will be hereafter explained. Before this refined silver is given over to the Zarráb, 5 máshahs and 5 surkhs are taken away for the Imperial exchequer out of every hundred tólahs of it; after which the assay master marks the mass with the usual stamp, that it may not be altered or exchanged.

In former times silver also was assayed by the banwárí system; now it is calculated as follows:—if by refining 100 tolahs, of *sháhí* silver, which is current in 'Iráq and Khurásán, and of the *lárí* and *misqálí*, which are current in Túrán, there are lost three tólahs and one surkh; and of the same quantity of the European and Turkish *narjíl*, and the *mahmúdí* and *muzaffarí* of Gujrát and Málwah, 13 tólahs and 6½ máshahs are lost, they become of the imperial standard.

15. The *Qurçkúb* having heated the refined silver, hammers it till it has lost all smell of the lead. His fee for the weight of 1000 rupees, is 4½ dams.

16. The *Cháshnigír* examines the refined gold and silver, and fixes its purity as follows:—Having made two tólahs of the refined gold into eight plates, he applies layers of the mixture as above described, and sets fire to it, keeping out, however, all draught; he then washes the plates, and melts them. If they have not lost anything by this process, the gold is pure. The assay-master then tries it upon the touchstone, to satisfy himself and others. For assaying that quantity, he gets 1⅔ dáms. In the case of silver, he takes one tólah with a like quantity of lead, which he puts together into a bone crucible, and keeps it on the fire till the lead is all burnt. Having then sprinkled the silver with water, he hammers it till it has lost all smell of the lead; and having melted it in a new crucible, he weighs it; and if it has lost in weight three[2] *birinj* (rice grains), it is sufficiently pure; otherwise he melts it again, till it comes to that degree. For assaying that quantity, his fee is 3 dáms, 4½ jótals.

17. The *Niáriyah* collects the *kháki khalág*, and washes it, taking two sérs at the time; whatever gold there may be amongst it, will settle, from its weight, to the bottom. The *kháki*, when thus washed, is called in Hindí *kukrah*, and still contains some gold, for the recovery of which, directions shall hereafter be given. The abovementioned adulterated sediment is rubbed together with quicksilver, at the rate of six máshahs *per sér*. The

[1] Some MSS. have *katah*.

[2] One MS. has *six*.

quicksilver from its predilective affinity, draws the gold to itself, and forms an amalgam which is kept over the fire in a retort, till the gold is separated from the quicksilver.

For extracting the gold from this quantity of *khák*, the *Niyáriyah* receives 20 dáms, 2 jétals.

The process of Kukrah.

They mix with the *kukrah* an equal quantity of *punhar*, and form a paste of *rasí* (aqua fortis), and wild cowdung. They then pound the first composition, and mixing it with the paste, work it up into balls of two sérs weight, which they dry on a cloth.

Punhar is obtained as follows:—

They make a hole in the earth, and fill it with the ashes of *Babúl*-wood at the rate of six fingers of ashes for every maund of lead. The lead itself is put at the bottom of the hole, which has been smoothed; then they cover it with charcoals, and melt the lead. After that, having removed the coals, they place over it two plates of clay, fixed by means of thorns, and close up the bellows hole, but not the vent. This they keep covered with bricks, till the ashes have thoroughly soaked up the lead. The bricks they frequently remove, to learn the state of the lead. For the abovementioned quantity of lead, there are 4 máshahs of silver mixed up with the ashes. These ashes they cool in water, when they are called *punhar*. Out of every man of lead two sérs are burnt; but the mass is increased by four sérs of ashes, so that the weight of the whole mass will be one man and two sérs.

Rasí is a kind of acid, made of *ashkhár*[1] and saltpetre.

Having thus explained what *punhar* and *rasí* are, I return to the description of the process of *Kukrah*. They make an oven-like vessel, narrow at both ends, and wide in the middle, one and a half yards in height, with a hole at the bottom. Then having filled the vessel with coals within four fingers of the top, they place it over a pit dug in the earth, and blow the fire with two bellows. After that, the aforementioned balls being broken into pieces, they throw them into the fire and melt them, when the gold, silver, copper and lead, fall through the hole in the bottom of the vessel into the pit below. Whatever remains in the vessel, is softened and washed, and the lead separated from it. They likewise collect the ashes, from whence also by a certain process profit may be derived. The metal is then taken out of the pit, and melted according to the *punhar* system. The lead will mix with the ashes,

---

[1] The margins of some of the MSS. explain this word by the Hind. *sijjí*, impure carbonate of soda.

from which thirty sérs will be recovered, and ten sérs will be burnt. The gold, silver and copper, remain together in a mass, and this they call *bugráwatí*, or according to some, *gubráwatí*.

The process of Bugráwatí.

They make a hole, and fill it with the ashes of *babúl*-wood, half a sér for every 100 tólahs of *bugrawátí*. These ashes they then make up in form of a dish, and mix them up with the bugráwatí, adding one tólah of copper, and twenty-five tólahs of lead. They now fill the dish with coals, and cover it with bricks. When the whole has melted, they remove the coals and the bricks, and make a fire of *babúl*-wood, till the lead and copper unite with the ashes, leaving the gold and silver together. These ashes are also called *k'haral*, and the lead and copper can be recovered from them by a process, which will be hereafter explained.

AIN 8.

THE METHOD OF SEPARATING THE SILVER FROM THE GOLD.

They melt this composition six times; three times with copper, and three times with *sulphur*, called in Hind. *chhachhiyá*. For every tólah of the alloy, they take a máshah of copper, and two máshahs, two surkhs of sulphur. First, they melt it with copper, and then with sulphur. If the alloy be of 100 tólahs weight, the 100 máshahs of copper are employed as follows:—they first melt fifty máshahs with it, and then twice again, twenty-five máshahs. The sulphur is used in similar proportions. After reducing the mixture of gold and silver to small bits, they mix with it fifty máshahs of copper, and melt it in a crucible. They have near at hand a vessel full of cold water, on the surface of which is laid a broomlike bundle of hay. Upon it they pour the melted metal, and prevent it, by stirring it with a stick, from forming into a mass. Then having again melted these bits, after mixing them with the remaining copper in a crucible, they set it to cool in the shade: and for every tólah of this mixture, two máshahs and two surkhs of sulphur are used, *i. e.*, at the rate of one and one half quarter sér (1⅛ sér) *per* 100 *tólahs*. When it has been three times melted in this manner, there appears on the surface a whitish kind of ashes, which is silver. This is taken off, and kept separate; and its process shall hereafter be explained. When the mixture of gold and silver has thus been subjected to three fires for the copper, and three for the sulphur, the solid part left is the gold. In the language of the Panjáb, this gold is called *kail*, whilst about Dihlí, it is termed *pinjar*. If

the mixture contained much gold, it generally turns out to be of 6½ *bán*, but it is often only five, and even four.

In order to refine this gold, one of the following methods must be used: Either they mix fifty tólahs of this with 400 tólahs of purer gold, and refine it by the *Salóní* process; or else they use the *Alóní* process. For the latter they make a mixture of two parts of wild cowdung, and one part of saltpetre. Having then cast the aforesaid *pinjar* into ingots, they make it into plates, none of which ought to be lighter than 1½ tólahs, but a little broader than those which they make in the *saloni* process. Then having besmeared them with sesame-oil, they strew the above mixture over them, giving them for every strewing two gentle fires. This operation they repeat three or four times; and if they want the metal very pure, they repeat the process till it comes up to nine *bán*. The ashes are also collected, being a kind of *k'haral*.

ÁIN 9.

THE METHOD OF EXTRACTING THE SILVER FROM THESE ASHES.

Whatever ashes and dross have been collected, both before and after the process of *alóní*, they mix with double the quantity of pure lead, put them into a crucible, and keep them for one watch over the fire. When the metal is cold, they refine it as described under the article *Sabbák*, p. 22. The ashes of it are also *k'haral*. The *salóní* process is also performed in other ways well known to those conversant with the business.

18. The *Paniwár* having melted the k'haral, separates the silver from the copper. His fee for every tólah of silver is 1½ dáms. As a return for the profit he makes, he pays monthly 300 dáms to the díwán. Having reduced the *k'haral* to small bits, he adds to every *man* of it 1½ sérs of *tangár* (borax), and three sérs of pounded natrum, and kneads them together. He then puts this mass, sér by sér, into the vessel above described, and melts it, when lead mixed with silver collects in the pit. This is afterwards refined by the process of the *sabbák*, and the lead which separates from this, and mixes with the ashes, turns *punhar*.

19. The *Paikár* buys the *salóní* and *k'haral* from the goldsmiths of the city, and carries them to the mint to be melted, and makes a profit on the gold and silver. For every *man* of *salóní*, he gives 17 dáms, and for the same quantity of k'haral 14 dáms, to the exchequer.

20. The *Nichóíwálah* brings old copper-coins which are mixed with silver, to be melted; and from 100 tólahs of silver, 3½ rupees go to the

díwán; and when he wishes to coin the silver, he pays a fixed quantity for it as duty.

21. The *Khakshóe.* When the owners of the metals get their gold and silver in the various ways which have now been described, the Khakshóe sweeps the mint, takes the sweepings to his own house, washes them, and gains a profit. Some of the sweepers carry on a very flourishing trade. The state receives from this man a monthly gift of 12½ rupees.

And in like manner all the officers of the mint pay a monthly duty to the state, at the rate of three dáms for every 100 dáms.

ÁÍN 10.

THE COINS OF THIS GLORIOUS EMPIRE.

As through the attention of his Majesty, gold and silver have been brought to the greatest degree of purity, in like manner the form of the coins has also been improved. The coins are now an ornament to the treasury, and much liked by the people. I shall give a few particulars.

A. *Gold Coins.*

1. The *S'hansah* is a round coin weighing 101 tólahs, 9 máshahs, and 7 surkhs, in value equal to 100 *la'l i jaláli*-muhurs. On the field of one side is engraved the name of his Majesty, and on the five arches in the border, *alsultánu ala'zamu alkhákánu almu'azzamu khallada alláhu mulkahu wa sultánahu zarbu dari-lkhiláfati Ágrah*,—"The great sultán, the distinguished emperor, may God perpetuate his kingdom and his reign! Struck at the capital Ágrah." On the field of the reverse is *the beautiful formula*,[1] and the following verse of the Qorán:[2]—*Alláhu yarzaqu man yasháu bighairi hisábin*,—"God is bountiful unto whom He pleaseth, without measure;"—and roundabout are the names of the first four califs. This is what was first cut by Maulánú Maqçúd, the engraver; after which Mullá 'Alí Ahmad made with great skill the following additions. On one side, *Afzalu dinárin yanfuquhu alrajulu, dinárun yanfuquhu 'ala aṣhábihi fi sabililláh*,—"The best coin which a man expends, is a coin which he spends on his co-religionists in the path of God."

And on the other side he wrote,

Alsultánu al'áli alkhalifatu almuta'áli khallada alláhu ta'ála mulkahu wa sultánahu, wa abbada 'adlahu wa ihsánahu,—"The sublime sultán, the exalted

---

[1] Also called *Kalimah*, or the Confession of Faith, *lá iláha ill-alláh, Muhammadun rasúl-ulláh.*

[2] Qor. Sur. II, 208.

calif, may God the Almighty perpetuate his kingdom and his reign, and give eternity to his justice and bounty!"

Afterwards all this was removed, and the following two Rubá'ís of the court-poet and philosopher *Shaikh Faizí* were engraved by him. On one side,

Khurshéd kih haft bahr azú gauhar yáft
Sang é siyah az partaw i án jauhar yáft
Kán az nazar é tarbiyat é ú zar yáft
Wán zar sharaf az sikkah i Sháh Akbar yáft.

"It is the Sun[1] from which the seven oceans get their pearls,
The black rocks get their jewels from his lustre.
The mines get their gold from his fostering glance,
And their gold is ennobled by Akbar's stamp."

and, *Alláhu akbar, jalla jaláluhu*,—"God is great, may his His glory shine forth!" in the middle. And on the other side,

Ín sikkah kih pirúyah i umméd buwad
Bá naqsh i dawám u nám i jáwíd buwad
Símá i sa'ádatash hamín bas kih badahr
Yak zarrah nazar-kardah i khurshéd buwad.

"This coin, which is an ornament of hope,
Carries an everlasting stamp, and an immortal name.
As a sign of its auspiciousness, it is sufficient
That once for all ages the sun has cast a glimpse upon it."

and the date, according to the *Divine era*, in the middle.

2. There is another gold coin, of the same name and shape, weighing 91 tólahs and 8 máshahs, in value equal to 100 *round* muhurs, at 11 máshahs each. It has the same impression as the preceding.

3. The *Rahas* is the half of each of the two preceding coins. It is sometimes made square. On one side it has the same impression as the *s'hansah*, and on the other side the following Rubá'í by *Faizí*:—

Ín naqd i rawán i ganj i sháhinsháhí
Bá kaukab i iqbál kunad hamráhí
Khurshéd biparwarash azánrá kih badahr
Yábad sharaf az sikkah i Akbarsháhí.

"This current coin of the imperial treasure
Accompanies the star of good fortune.
O sun, foster it, because for all ages
It is ennobled by Akbar's stamp!"

---

[1] According to the Natural Philosophers of the Middle Ages, the influence of the sun calls the metals, the pearls and precious stones into existence; *vide* the thirteenth Aín. The allusion to the sun is explained by the note to page 111.

4. The *Átmah* is the fourth part of the *s'hansah*, round and square. Some have the same impression as the *s'hansah*; and some have on one side the following Rubá'í by Faizí—

I'n sikkah kih dast i bakht rá zéwar bád
Pirávah i nuh sipihr u haft akhtar bád
Zarrín naqdést kár azú chún zar bád
Dar dahr rawán banám i sháh akbar bád.

"This coin—May it adorn the hand of the fortunate,
And may it be an ornament of the nine heavens and the seven stars!—
Is a gold coin,—May golden be its work!
Let it be current for all ages to the glory of Sháh Akbar."

And on the other side the preceding Rubá'í.

5. The *Binsat*, of the same two forms as the *átmah*, in value equal to one-fifth of the first coin.

There are also gold coins of the same shape and impression, in value equal to one-eighth, one-tenth, one-twentieth, one twenty-fifth, of the *s'hansah*.

6. The *Chugul*,[1] of a square form, is the fiftieth part of the *s'hansah*, in value equal to two muhurs.[2]

7. The *round La'l i Jaláli*,[3] in weight and value equal to two *round muhurs*, having on one side "*Alláhu akbar*," and on the other *Yá mu'inu*—"O helper."

8. The *Áftábi* is round, weighs 1 tólah, 2 máshahs and $4\frac{3}{4}$ surkhs, in

---

[1] Or *Jugul*. Abulfazl's spelling in the text is ambiguous.

[2] The MSS. differ. Most of them place the *Chugul* as the sixth coin, *after* the *Binsat*, and read:—

"The *Chugul*, of a square form, weighing 3 tólahs, $5\frac{1}{4}$ surkhs; its value is thirty rupees. Also, of a *round* form, weighing 2 tólahs, 9 máshahs, having a value of *three round muhurs*, of 11 máshahs each, (*i. e.*, 27 rupees). But the impression of both is the same. They are the *fiftieth* part of the *S'hansah*."

The last sentence does not agree with the value and weight of the *S'hansah*; for the two Chuguls, as given by Abulfazl, would each be the $\frac{1}{3}\frac{0}{9}$th part of the two kinds of *S'hansah*, not the *fiftieth* part.

Mr. Thomas in his excellent edition of Prinsep's Useful tables, pp. 5 and 6, gives an *extract* from a MS. of the *Ain* in his possession, which appears to agree with the above reading; but he only mentions the *square* form of the *Chugul*, weighing 3 tólahs, $5\frac{1}{4}$ surkhs, worth 30 rupees; and then passes on to the *eighth* coin, the *Aftábi*.

Two other MSS.—among them Col. Hamilton's—read *after* the *Binsat*, (*i. e.*, after the twenty-fifth line of p. 24 of my text edition)—

"6. The *Chahárgóshah* (or *square*), weighing 3 tólahs, $5\frac{1}{4}$ surkhs, worth 30 rupees."

"7. The *Gird* (or *round*); weighing 2 tólahs, 9 máshahs, in value equal to the 3 *round muhurs* of 11 máshahs each."

"Both have the same impression."

"8. The *Chugul*, of a square form, the fiftieth part of a *S'hansah*, in value equal to two *La'l i Jálalí muhurs*."

This reading obviates all difficulties. But the real question is whether the *Chahárgóshah*, the *Gird*, and the *Chugul* are *three* distinct coins.

[3] For *the round La'l i Jaláli*, some MSS. only read, "*The Gird*," *i. e.*, round, taking the words *La'l i Jaláli* to the preceding. *Vide* the tenth coin.

value equal to 12 rupees. On one side, "*Alláhu akbar, jalla jalláluhu,*" and on the other the date according to the Divine era, and the place where it is struck.

9. The *Iláhí* is round, weighs 12 máshahs, $1\frac{3}{4}$ surkhs, bears the same stamp as the *Aftábí*, and has a value of 10 rupees.

10. The *square La'l i Jaláli* is of the same weight and value; on one side "*Alláhu akbar,*" and on the other "*jalla jaláluhu.*"

11. The *'Adlgutkah* is round, weighs 11 máshahs, and has a value of nine rupees. On one side "*Alláhu akbar,*" and on the other, "*Yá mu'inu.*"

12. The *Round muhur*, in weight and value equal to the *'Adlgutkah*, but of a different[1] stamp.

13. *Mihrábí*[2] is in weight, value, and stamp, the same as the *round muhur.*

14. The *Mu'íní* is both square and round. In weight and value it is equal to the *La'l i jaláli*, and the *round muhur.* It bears the stamp "*yá mu'ínu.*"

15. The *Chahárgóshah*, in stamp and weight the same as the *Aftábí.*

16. The *Gird* is the half of the *Iláhí*, and has the same stamp.

17. The *D'han*[3] is half a *La'l i Jaláli.*[4]

18. The *Salímí* is the half of the *'Adlgutkah.*

19. The *Rabí* is a quarter of the *Aftábí.*

20. The *Man*, is a quarter of the *Iláhí*, and *Jaláli.*

21. The *Half Salimí* is a quarter of the *'Adlgutkah.*

22. The *Panj* is the fifth part of the *Iláhí.*

23. The *Pandau* is the fifth part of the *La'l i Jaláli;* on one side is a lily, and on the other a wild rose.

24. The *Sumní*, or *Ashtsiddh*, is one-eighth of the *Iláhí;* on one side "*Alláhu akbar,*" and on the other "*jalla jaláluhu.*"

25. The *Kalá* is the sixteenth part of the *Iláhí.* It has on both sides a wild rose.

26. The *Zarah* is the 32nd part of an *Iláhí*, and has the same stamp as the *kalá.*

As regards gold coins, the custom followed in the imperial mint is to coin *La'l i jalális*, *D'hans*, and *Mans*, each coin for the space of a month. The other gold coins are never stamped without special orders.

---

[1] It has the *Kalimah.* (Sayyid Ahmad's edition of the Ain).

[2] The figure called *mihrábí*, is 
[3] In Forbes's Dictionary, *duhan.*

[4] Several MSS. read—"*Half a quarter* Iláhí and La'l i Jaláli." Forbes gives *six* rupees (?).

[5] Several MSS. have *Rabí'.* Perhaps we should write *Rabbí.*

B. *Silver Coins.*

1. The *Rupee* is round, and weighs eleven and one half máshahs. It was first introduced in the time of *Shér Khán*. It was perfected during this reign, and received a new stamp, on one side "*Alláhu akbar, jalla jaláluhu*," and on the other the date. Although the market price is sometimes more or less than forty dáms, yet this value is always set upon it in the payment of salaries.

2. The *Jaláhah* is of a square form, which was introduced during the present reign. In value and stamp it is the same as No. 1.

3. The *Darb* is half a *Jaláhah*.

4. The *Charn* is a quarter *Jaláhah*.

5. The *Pandau* is a fifth of the *Jaláhah*.

6. The *Asht* is the eighth part of the *Jaláhah*.

7. The *Dasá* is one-tenth of the *Jaláhah*.

8. The *Kalá* is the sixteenth part of the *Jaláhah*.

9. The *Sikí* is one-twentieth of the *Jaláhah*.

The same fractional parts are adopted for the [round] *Rupee*, which are however different in form.

C. *Copper Coins.*

1. The *Dám* weighs 5 tánks, *i. e.*, 1 tólah, 8 máshahs, and 7 surkhs; it is the fortieth part of the rupee. At first this coin was called *Paisah*, and also *Bahlóli;* now it is known under this name (dám). On one side the place is given where it was struck, and on the other the date.

For the purpose of calculation, the dám is divided into twenty-five parts, each of which is called a *jétal*.[1] This imaginary division is only used by accountants.

2. The *Adhélah* is half of a *dám*.

3. The *Páulah* is a quarter *dám*.

4. The *Damrí* is one-eighth of a *dám*.

In the beginning of this reign, gold was coined to the glory of his Majesty in many parts of the empire; now gold coins are struck at four places only, *viz.*, at the seat of the government, in Bengal, Ahmadábád (Gujrát), and Kábul. Silver and copper are likewise coined in these four places, and besides in the following ten places,—Iláhabás, Ágrah, Ujain, Súrat, Dihlí, Patana, Kashmír, Láhór, Multán, Tándah. In twenty-eight towns copper coins only are struck, *viz.*, Ajmír, Audh, Atak, Alwar, Badáon, Banáras, Bhakkar, Bahrah, Patan, Jaunpúr, Jálandhar, Hardwár, Hisár Fírúzah,

---

[1] Often misspelt *chétal*. The text gives | the correct spelling.

Kálpí, Gwáliár, Górak'hpúr, Kalánwar, Lak'hnau, Mandú, Nágór, Sarhind, Siyálkót, Sarónj, Saháranpúr, Sárangpúr, Sambal, Qanauj, Rantanbhúr.

Mercantile affairs in this country are mostly transacted in *round muhurs, rupees*, and *dáms*.

Unprincipled men cause a great deal of mischief by rubbing down the coins, or by employing similar methods; and in consequence of the damage done to the nation at large, his Majesty continually consults experienced men, and from his knowledge of the spirit of the age, issues new regulations, in order to prevent such detrimental practices.

The currency underwent several changes. *First*, when (in the 27th year) the reins of the government were in the hands of Rájah Tódarmal,[1] *four* kinds of muhurs were allowed to be current: *A.* There was a *La'l i Jaláli*, which had the name of his Majesty stamped on it, and weighed 1 tólah, $1\frac{3}{4}$ surkhs. It was quite pure, and had a value of 400 dáms. Again, there existed from the beginning of this glorious reign, a muhur with the imperial stamp, of which *three* degrees passed as current, *viz.*, *B.* This muhur, when perfectly pure, and having the full weight of 11 máshahs. Its value was 360 dáms. If from wear and tear it had lost in weight within three grains of rice, it was still allowed to be of the same degree, and no difference was made. *C.* The same muhur, when it had lost in weight from four to six rice grains; its value was 355 dáms. *D.* The same

[1] Rájah Tódarmal, a K'hetrí by caste, was born at Láhór. He appears to have entered Akbar's service during the eighteenth year of the emperor's reign, when he was employed to settle the affairs of Gujrát. In the 19th year, we find him in Bengal in company with *Mun'im Khán*; and three years later, again in Gujrát. In the 27th year, he was appointed *Diwán* of the empire, when he remodelled the revenue system. After an unsuccessful attempt on his life made by a K'hetrí in the 32nd year, he was sent against the Yúsufzais, to avenge the death of *Bír Bar*. In the 34th year, old age and sickness obliged him to send in his resignation, which Akbar unwillingly accepted. Retiring to the banks of the Ganges he died—or, *went to hell*, as Badáoní expresses himself in the case of Hindus—on the eleventh day A. H. 998, or 10th November 1589, the same year in which Rájah Bhagawán Dás died. Tódarmal had reached the rank of a *Chahárhazárí*, or commander of Four Thousand, and was no less distinguished for his personal courage, than his financial abilities. His eldest son *D'hárú*, a commander of seven hundred, was killed in the war with T'hat'hah.

Abulfazl did not like Tódarmal personally, but praises him for his strict integrity and abilities; he charges him with vindictiveness of temper and bigotry. Aurangzéb said, he had heard from his father, that Akbar complained of the rájah's *independence, vanity*, and *bigoted adherence to Hinduism*. Abulfazl openly complained of him to Akbar; but the emperor with his usual regard for faithful services, said that he could not drive away an old servant. In his adherence to Hinduism, Tódarmal may be contrasted with *Bír Bar*, who a short time before his death had become a member of the *Divine Faith*. Once when accompanying Akbar to the Panjáb, in the hurry of the departure, Todarmal's idols were lost; and as he transacted no business before his daily worship, he remained for several days without food and drink, and was at last with difficulty cheered up by the emperor.

muhur when it had lost in wright from six to nine rice grains; its value was 350 dáms.

Muhurs of less weight than this were considered as bullion.

Of *Rupees*, three kinds were then current, *viz.*, *A.* one of a square form, of pure silver, and weighing 11½ máshahs; it went under the name of *Jaláláh*, and had a value of 40 dáms. *B.* The round, old *Akbarsháhí* Rupee, which, when of full weight, or even at a surkh less, was valued at 39 dáms. *C.* The same rupees, when in weight two surkhs less, at 38 dáms.

Rupees of less weight than this were considered as bullion.

Secondly, on the 18th Mihr of the 29th year of the Divine era, 'Azaduddaulah Amír Fathullah[1] of Shíráz coming at the head of affairs, a royal order was issued, that on the *muhurs*, as far as *three* grains; and on the *rupees*, as far as *six* grains short weight, no account should be taken, but that they should be reckoned of full weight. If muhurs were still less, they should make a deduction for the deficiency, whatever their deficiency might be; but it was not ordered, that only muhurs down to nine grains less, should be regarded as muhurs. Again, according to the same regulation, the value of a muhur that was one surkh deficient, was put down as 355 dáms and a fraction; and hence they valued the price of one

[1] Amír Fathullah of Shíráz was the pupil of Khájah Jamáluddín Mahmúd, Kamáluddín of Shirwán, and Mír Ghiásuddín Mançúr of Shíráz. He so excelled in all branches of Natural philosophy, especially mechanics, that Abulfazl said of him, "If the books of antiquity should be lost, the Amír will restore them." At the earnest solicitations of 'Ádil Sháh of Bíjápúr, he left Shíráz for the Dekhan. In A.H. 991, after the death of 'Ádil Sháh, he was invited by Akbar, who raised him to the dignity of a *Sadr*, and bestowed upon him, three years later, the title of *Amínulmulk*. He was appointed to assist Tódarmal, and rendered good service in working up the old revenue books. His title *Amínulmulk*, to which Abulfazl alludes (*vide* p. 28, l. 9 of my text edition), was in the same year changed to *'Azaduddaulah*, or *the arm of the empire*. The Amír went afterwards to Khándésh. After his return in 997 to Akbar, who was then in Kashmír, he was attacked with fever, of which he died. Thinking to understand the medical art, he refused the advice of the famous Hakím 'Alí, and tried to cure the fever by eating *harísah*, (*vide* the twenty-fourth Áín), which caused his death.

Next to Abulfazl, Faizí, and Bír Bar, the Amír was perhaps most loved by Akbar. Several of his mechanical inventions, mentioned below, are ascribed by Abulfazl to Akbar himself (!). The Amír was, however, on the best terms with Abulfazl, whose son he instructed. According to the author of the *Mir-át ul 'Alam*, he was "a worldly man, often accompanying the emperor on hunting parties, with a rifle on his shoulder, and a powder-bag in his waistband, treading down science, and performing feats of strength, which Rustam could not have performed."

It is stated by the author of the *Maásir ul umará* that according to some, the Amír was a *Sih-hazárí*, or Commander of three thousand; but I do not find his name among the lists of Akbar's grandees given in the *Tabaqát i Akbarí*, and the last Áín of the second book of this work. Instead of *Amír* Fathullah, we also find, especially in Badáoní, *Sháh* Fathullah. He lies buried on the *Takht i Sulaimán*. Faizí's ode on his death is very fine.

surkh of *coined* gold at the low rate of *four* dáms and a fraction. According to Tódarmal's regulation, a deduction of *five* dáms was made for a deficiency of one surkh; and if the muhur had lost something more than the three grains, for which he had made no account, even if it were only ½ surkh, full five dáms were subtracted; and for a deficiency of 1½ surkhs, he deducted ten dáms, even if the deficiency should not be quite 1½ surkhs. By the new law of 'Azaduddaulah, the value of a muhur was lessened by six dáms and a fraction, as its gold was worth 353 dáms and a fraction only.[1]

'Azaduddaulah abolished also the regulation, according to which the value of a round rupee had been fixed at one dám less than the square one, notwithstanding its perfection in weight and purity, and fixed the value of the round rupee, when of full weight or not less than one surkh, at forty dáms; and whilst formerly a deduction of two dáms was made for a deficiency of two surkhs, they now deduct for the same deficiency only one dám and a fraction.

Thirdly, when 'Azaduddaulah went to Khándésh, the Rájah estimated the value of muhurs that had been expressed in Jalálah rupees, in round rupees; and from his obstinate and wrangling disposition, fixed again the deficiencies on muhurs and rupees according to the old rates.

Fourthly, when Qulij Khán[2] received the charge of the government, he adopted the Rájah's manner of estimating the muhurs; but he deducted

[1] For 'Azaduddaulah having fixed the value of 1 surkh of coined gold at 4 dáms and a small fraction, the value of a muhur of full weight (11 máshahs = 11 × 8 surkhs) was only 11 × 8 × (4 + a small fraction) dáms, *i. e.*, according to Abulfazl, 353 dáms and a fraction, instead of 360 dáms.

[2] *Qulij Khán* is first mentioned during the seventeenth year of Akbar's reign, when he was made governor of the Fort of Súrat, which Akbar after a siege of forty-seven days had conquered. In the 23rd year he was sent to Gujrát; and after the death of Sháh Mançúr, he was, two years later, appointed as *Díwán*. In the 28th year he accompanied the army during the conquest of Gujrát. In the 34th year, he received *Sambhal* as jágír. After the death of Tódarmal, he was again appointed as *Díwán*. This is the time to which Abulfazl refers. In 1002 he was made governor of Kábul, where he was not successful. After his removal, he accompanied, in 1005, his son-in-law Prince Danyál as *Atáliq*, or tutor, but he soon returned to Akbar. During the absence, in 1007, of the emperor in Khándésh, he was governor of Ágrah. Two years later he was promoted to the governorship of the Panjáb and Kábul. At the accession of Jahángír, he was sent to Gujrát, but returned next year to the Panjáb, where he had to fight against the Raushaniyyahs. He died, at an advanced age, in 1035, or A. D. 1625-26. Abulfazl, in the last Áín of the second book, mentions him as *Chahárhazárí*, or Commander of Four Thousand, which high rank he must have held for some time, as *Nizámí i Harawí*, in his *Tabáqat i Akbarí*, mentions him as such, and as Díwán. When tutor to Prince Danyál, he was promoted to the command of Four Thousand Five Hundred. Qulij Khán was a pious man, and a stanch Sunní; he was much respected for his learning. As a poet he is known under the name of *Ulfatí*; some of his verses may be found in the concluding chapter of the *Mir-át ul 'Alam*. The high rank which he held, was less due to his talents as a statesman, than to his family-connexion with the kings of Túrán. Of his two sons, Mírzá Saifullah and Mírzá Husain Qulij, the latter is best known.

ten dáms for a deficiency in the weight of a muhur, for which the Rájah had deducted five dáms; and twenty dáms, for the former deduction of ten dáms; whilst he considered every muhur as bullion, if the deficiency was 1½ surkhs. Similarly, every rupee, the deficiency of which was one surkh, was considered as bullion.

'*Lastly*, his Majesty trusting to his advisers, and being occupied by various important affairs, paid at first but little attention to this subject, till after having received some intimation of the unsatisfactory state of this matter, he issued another regulation, which saved the nation further losses, and was approved of by every one, far and near. On the 26th of Bahman, of the year 36, according to the Divine era (A. D. 1592,) he adopted the second [*i. e.*, 'Azaduddaulah's] method, with one exception, namely, he did not approve of the provision that a muhur the deficiency of which did not exceed *three*, and a rupee, the deficiency of which did not exceed *six*, surkhs, should still be regarded as of full weight. And this regulation was the only effectual method for preventing the fraudulent practices of unprincipled men; for the former regulations contained no remedy in cases when the officers of the mint coined money of the above deficiency in weight, or when treasurers reduced full coins to the same deficiency. Besides shameless, thievish people made light grain weights, and used to reduce muhurs, deficient by three grains, to six grains deficiency, whilst they accepted muhurs six grains deficient as muhurs deficient by nine grains. This reduction of coins being continued, large quantities of gold were stolen, and the losses seemed never to end. By the command of his Majesty grain weights of *bábághúrí* were made, which were to be used in weighing. On the same date other stringent regulations were issued, that the treasurers and revenue collectors should not demand from the tax-payers any particular species of coins, and that the exact deficiency in weight and purity, whatever it might be, should be taken according to the present rate and no more. This order of his Majesty disappointed the wicked, taught covetous men moderation, and freed the nation from the cruelty of oppressors.

ÁÍN 11.

THE DIRHAM AND THE DÍNÁR.

Having given some account of the currency of the empire, I shall add a few particulars regarding these two ancient coins, and remark on the value of ancient coinage.

The *Dirham*, or *Dirhám*, as the word is sometimes given, is a silver coin, the shape of which resembled that of a date stone. During the califate of

'Omar, it was changed to a circular form; and in the time of *Zubair*, it was impressed with the words *Alláhu* (God), *barakat* (blessing). *Hajjáj* stamped upon it the chapter of the Qorán called *Ikhláç;* and others say that he imprinted it with his own name. Others assert, that 'Omar was the first who stamped an impression on dirhams; whilst, according to some, Greek, Khusravite, and Himyarite dirhams were in circulation at the time of Abdulmalik, the son Marwán, by whose order Hajjáj, the son of Yúsuf, had struck dirhams. Some say that Hajjáj refined the base dirhams, and coined them with the words *Alláhu ahad* (God is one), and *Alláhu çamad* (God is eternal); and these dirhams were called *makrúhah* (abominable), because God's holy name was thereby dishonoured; unless this term be a corruption of some other name. After Hajjáj, at the time of the reign of *Yazíd* ibn i Abdulmalik, 'Omar ibn Hubairah coined in the kingdom of 'Iráq better dirhams than Hajjáj had made; and afterwards Khálid ibn Abdullah Qasrí, when governor of 'Iráq, made them still finer, but they were brought to the highest degree of purity by Yúsuf ibn 'Omar. Again, it has been said that Muç'ab ibn Zubair was the first who struck dirhams. Various accounts are given of their weights; some saying that they were of ten or nine, or six or five *misqáls;* whilst others give the weights of twenty, twelve and ten *qíráts*, asserting at the same time that 'Omar had taken a dirham of each kind, and formed a coin of fourteen qíráts, being the third part of the aggregate sum. It is likewise said that at the time of 'Omar there were current several kinds of dirhams: *first*, some of eight *dángs*, which were called *baghlí*, after *Rás baghl* who was an assay-master, and who struck dirhams by the command of 'Omar; but others call them *baghallí*, from *baghal*,[1] which is the name of a village; *secondly*, some of four dángs, which were called *tabrí; thirdly*, some of three dángs, which were known as *maghribí;* and *lastly*, some of one dáng, named *yamaní*, the half of which four kinds 'Omar is said to have taken as a uniform average weight. Fázil of Khujand says that in former days dirhams had been of two kinds, *first*:—full ones of eight and six dángs (1 *dang* of his = 2 *qíráts;* 1 *qírát* = 2 *tassúj*; 1 *tassúj* = 2 *habbah*); and *secondly*, deficient ones of four dángs and a fraction. Some hold different opinions on this subject.

The *Dínár* is a gold coin, weighing *one misqál, i. e.*, $1\frac{3}{7}$ dirhams, as they put 1 *misqál* = 6 *dángs;* 1 *dáng* 4 *tassúj;* 1 *tassúj* = 2 *habbahs;* 1 *habbah* = 2 *jaus* (barley grains); 1 *jau* = 6 *khardals* (mustard-grain); 1 *khardal* = 12 *fals;* 1 *fal* = 6 *fatíls;* 1 *fatíl* = 6 *naqírs*; 1 *naqír* = 6 *qitmírs;* and 1 *qitmír* = 12 *zarrahs*. One *misqál*, by this calculation, would be equal to 96 barley grains. *Misqál* is a weight, used in weighing gold; and it is also the name of the coin. From some ancient writings it appears

[1] According to some inferior MSS., the name of a kind of gold.

that the Greek *misqál* is out of use, and weighs two *qíráts* less than this; and that the Greek dirham differs likewise from others, being less in weight by $\frac{1}{6}$ or $\frac{1}{4}$ of a *misqál*.

ÁÍN 12.

THE PROFIT OF THE DEALERS IN GOLD AND SILVER.

One round muhur of 11 máshahs buys one tólah of gold of 10 *bán;* or one tólah, 2 surkhs of $9\frac{3}{4}$ bán; or 1 tólah, 4 *s.* of $8\frac{1}{2}$ bán; or 1 tólah 6 *s.* of $9\frac{1}{4}$ bán; or 1 tólah, 1 máshah of 9 bán; and similarly, according to the same proportion, the decrease of one bán increases the quantity of gold which a muhur can buy, by one máshah.

The merchant buys for 100 *La'l i Jaláli* muhurs 130 *t.* 2 *m.* $0\frac{5}{8}$ *s.* of *Hun* gold of $8\frac{1}{4}$ báns. Of this quantity 22 *t.* 9 *m.* $7\frac{1}{2}$ *s.* burn away in melting, and mix with the *khák i khaláç*, so that 107 *t.* 4 *m.* $1\frac{1}{2}$ *s.* of pure gold remain, which are coined into 105 muhurs, leaving a remainder of nearly half a tólah of gold, the value of which is 4 rupees. From the *khák i khaláç* are recovered 2 *t.* 11 *m.* 4 *s.* of gold, and 11 *t.* 11 *m.* $4\frac{1}{2}$ *s.* of silver, the value of both of which is 35 rupees, $12\frac{1}{2}$ tangahs,[1] so that altogether the abovementioned quantity of *Hun* gold yields 105 muhurs, 39 Rs., and 25 dáms.

This sum is accounted for as follows. *First*, 2 *Rs.* 18 *d.* $12\frac{1}{2}$ *j.*, due to the workmen according to the rates which have been explained above; *secondly*, 5 *Rs.* 8*d.* 8*j.* for ingredients; which sum is made up of 1 *R.* 4 *d.* $1\frac{1}{2}$ *j.* on account of articles used in refining the metal, *viz.*, 26 *d.* $16\frac{1}{2}$ *j.* dung; 4 *d.* 20*j.* salóní; 1 *d.* 10*j.* water; 11 *d.* 5*j.* quicksilver, and 4 *Rs.* 4 *d.* $6\frac{1}{4}$ *j.* on account of the *khák i khaláç* (*viz.*, 21 *d.* $7\frac{1}{4}$ *j.* charcoal, and 3 *Rs.* 22 *d.* 24*j.* lead); *thirdly*, 6 *Rs.* $37\frac{1}{2}$ *d.*, which the owners of the gold take from the merchant, as a consideration for lending him the gold; this item goes to the Díwán in case the gold belongs to the exchequer; *fourthly*, 100 *La'l i Jaláli* muhurs, which the merchant gets in exchange for the gold which he brought; *fifthly*, 12 *Rs.* 37 *d.* $3\frac{1}{2}$ *j.* which the merchant takes as his profit; *sixthly*, 5 muhurs 12 *Rs.* $3\frac{1}{2}$ *d.*, which go to the exchequer.[2] According to this proportion, merchants make their profits.

Although gold is imported into Hindustan, it is to be found in abundance in the northern mountains of the country, as also in Tibet. Gold may also be obtained by the *Salóní*-process from the sands of the Ganges and Indus,

---

[1] One tangah = 2 dáms; now-a-days one tangah = 2 *pais*.

[2] There is a slight mistake of $1\frac{1}{4}$ *jétals*, as the several items added up give 105 *m.* 39 *Rs.* 24 *d.* $23\frac{3}{4}$ *j.*, but not 105 *m.* 39 Rs. 25 *d.*

and several other rivers, as most of the waters of this country are mixed with gold: however, the labour and expense greatly exceed the profit.

One Rupee buys 1 *t.* 0 *m.* 2 *s.* of pure silver; hence for 950 Rs. the merchant gets 969 *t.* 9 *m.* 4 *s.* of silver. Out of this quantity, 5 *t.* 0 *m.* 4¾ *s.* burn away in casting ingots. The remainder yields 1006 rupees, and a surplus of silver worth 27½ dáms. The several items are—*first*, 2 *Rs.* 22 *d.* 12 *j.*, as wages for the workmen (*viz.*, The *Weighman* 5 *d.* 7¾ *j.*, the *Cháshnígír* 3 *d.* 4½; the *Melter* 6 *d.* 12½ *j.*; the *Zarráb* 2 *Rs.* 1 *d.* 0 *j.*; the *Sikkachí* 6 *d.* 12½ *j.*); *secondly*, 10 *d.* 15 *j.*, on account of requisites (*viz.*, 10 *d.* charcoal, and 15 *j.* water); *thirdly*, 50 *Rs.* 13 *d.* 0 *j.*, payable to the Díwán; *fourthly*, 950 Rs., which the merchant gets in exchange for the silver he brought; and *fifthly*, 3 *Rs.* 21 *d.* 10½ *j.*, being the profit of the merchant. If he refines the base silver at his own house, his profit will be much greater; but when he brings it to be coined, his profit cannot be so great.

Of the silver called *lárí* and *sháhí*, and the other above mentioned baser coins, one rupee buys 1 *t.* 0 *m.* 4 *s.*, so that 950 Rupees will buy 989 *t.* 7 *m.* In the *Sabbákí* process, 14 *t.* 10 *m.* 1 *s.* burn away, being at the rate of 1½ *t. per cent.*; and in making the ingots, 4 *t.* 11 *m.* 3 *s.* are lost in the fire. The remainder yields 1012 rupees; and from the *khák i k'haral* 3½ *Rs.* are recoverable. The several items are—*first*, 4 *Rs.* 27 *d.* 24¾ *j.* on account of the wages of the workmen (*viz.*, the *Weighman* 5 *d.* 7¾ *j.*; the *Sabbák* 2 *Rs.* 0 *d.* 19 *j.*; the *Qurçkób* 4 *d.* 19 *j.*; the *Cháshnígír* 3 *d.* 4 *j.*; the *Melter* 6 *d.* 12½ *j.*; the *Zarráb* 2 *Rs.* 1 *d.*; the *Sikkachí* 6 *d.* 12½ *j.*); *secondly*, 5 *Rs.* 24 *d.* 15 *j.* for necessaries, (*viz.* 5 *Rs.* 14 *d.* lead; 10 *d.* charcoal; and 15 *j.* water); *thirdly*, 50 *Rs.* 24 *d.*, payable to the state; *fourthly*, 950 *Rs.* which the merchant receives for his silver; *fifthly*, 4 *Rs.* 29 *d.* his profit.[1] Sometimes the merchant gets the silver cheap, when his profit is much larger.

1044 dáms buy one *man* of copper, *i. e.*, at the rate of 26 *d.* 2½ *j. per sér*. Out of this quantity, one sér is burnt away in melting; and as each sér yields 30 dáms, there are coined altogether 1170 dáms, from which the merchant takes his capital, and 18 *d.* 19½ *j.* as profit. 33 *d.* 10 *j.* go to the workmen; and 15 *d.* 8 *j.* for necessaries, (*viz.* 13 *d.* 8 *j.* for charcoal; 1 *d.* for water; and 1 *d.* for clay); 58½ *d.* go to the state.

AÍN 13.

THE ORIGIN OF METALS.

The Creator by calling into existence the four elements, has raised up wonderful forms. *Fire* is absolutely warm, dry, light; *air* is relatively

[1] These items added give *Rs.* 1015, 25*d.* 14¾ *j.*, *i. e.*, a little more than the sum mentioned by Abulfazl (1015 *Rs.* 20 *d.*)

warm, moist, light; water is relatively cold, moist, heavy; earth is absolutely cold, dry, heavy. Heat is the cause of lightness, and cold of heaviness; moistness easily separates particles, whilst dryness prevents their separation. This wonderful arrangement calls four compounds into existence, *first*, the *ásár i 'ulwí*;[1] *secondly*, stones; *thirdly*, plants; *fourthly*, animals. From the heat of the sun, watery particles become lighter, mix with the air, and rise up. Such a mixture is called *bukhár* (gas). From the same cause, earthy particles mix with the air, and rise up. This mixture is called *dukhán* (vapour). Sometimes, however, airy particles mix with the earth. Several philosophers call both of the above mixtures *bukhár*, but distinguish the mixture of watery particles and air by the name of *moist*, or *watery bukhár*, whilst they call the mixture of earthy particles and air, *dry bukhár*, or *dukhání bukhár* (vapour-like gas). Both mixtures, they say, produce above the surface of the earth, clouds, wind, rain, snow, &c.; and, below the surface of our earth, earthquakes, springs, and minerals. They also look upon the *bukhár* as the body, and upon the *dukhán* as the soul of things. From a difference in their quality and quantity, various bodies are called into existence, as described in books on philosophy.

Minerals are of five kinds: *first*, those which do not melt on account of their dryness, as the *yáqút*; *secondly*, those which do not melt, on account of their liquidity, as quicksilver; *thirdly*, those which can be melted, being at the same time neither malleable, nor inflammable, as blue stone; *fourthly*, those which can be melted, being however not malleable, but inflammable, as sulphur; *fifthly*, those which can be melted, and are malleable, but not inflammable, as gold. A body is said to melt, when from the union of the inherent principles of dryness and moisture its particles are moveable; and a body is called malleable, when we can make it extend in such a manner, as to yield a longer and wider surface, without, however, either separating a part from it, or adding a part to it.

When in a mixture of *bukhár* with *dukhán*, the former is greater in quantity, and when, after their mixture and complete union, the heat of the sun causes the whole to contract, QUICKSILVER will be produced. Since no part of it is destitute of *dukhán*, the dryness is perceptible; hence, on touching it, it does not affect the hand, but flees from it; and since its contraction was produced by heat, no warmth can dissolve it. Again, when in a mixture of *bukhár* and *dukhán*, both are nearly in equal proportion, a tenacious greasy moisture is produced. At the time of fermentation, airy particles enter, when cold causes the whole to contract. This mass is inflammable. If the *dukhán* and the greasiness are a little in excess, SULPHUR will be produced, in colour

[1] Or *doings from on high*, as rain, snow, &c.

either red or yellow, or grey or white. If the proportion of the dukhán is large, and that of the grease less, ARSENIC will result, which is red and yellow. And if the quantity of the *bukhár* is greater, pure, black and yellow NAPHTHA will arise, after the mixture gets solid. Since in all, cold was the cause of the contraction, they can be melted; and on account of the prevalence of greasiness and tenacious moistness, they are also inflammable, though, on account of the moistness, not malleable.

Although quicksilver and sulphur are the only component parts of "the seven bodies," there arise various forms from a difference in purity, or from peculiar circumstances of the mixture, or from a variety of the action of the component parts on each other. Thus *silver* will result, when neither of the two components mixes with earthy particles, when they are pure and become perfectly united, and when the sulphur is white, and less than the quicksilver. Or, when both are in equal proportions and the sulphur red, and capable of colouring, *gold* will originate. Again, under similar circumstances, if both contract after the mixture, but before a complete union has been effected, *kharchiní* will be produced. This body is also called *Ahanchiní*, and seems really to be raw gold; some say, it is a kind of copper. Again, if only the sulphur be impure, and the quicksilver the larger component, with an additional power of burning, *copper* will result. And if the mixture be not thorough, and the quicksilver larger, *tin* will be produced; some say that purity of the components is essential. If both compounds be of an inferior kind, closely mixed, and if the earthy particles of the quicksilver have a tendency of separating, and the power of burning be inherent in the sulphur, *iron* will result. And if under similar conditions the intermixture be not perfect, and the quicksilver quantitatively larger, *lead* will come into existence. These seven metals are called *the seven bodies;* and quicksilver has the name of *the mother of the bodies*, and sulphur, *the father of the bodies*. Quicksilver is also denominated *the spirit*, and arsenic and sulphur, the *pivots of life*.

Jast (pewter), which, according to the opinions of some, is *Rúh í tútiyá*, and resembles lead, is nowhere mentioned in philosophical books, but there is a mine of it in Hindustan, in the territory of *Jálór*, which is a dependency of the Súbah of Ajmír. Some practical mechanics[1] are of opinion that the metal called *riçáç* is a silver in the state of leprosy, and quicksilver a silver in the state of apoplexy; that lead is gold apoplectic and burnt, and bronze crude gold; and that the chemist, like the doctor, can restore these diseased metals by the principles of similarity and opposition.

Practical men form of the above seven bodies several compounds, used for ornaments, vessels, &c. Among them I may mention, 1. *Safídrú*, which the

[1] According to some MSS., the Hindús.

people of Hindustán call *káṉsí*. It is a mixture of 4 sérs of copper to 1 sér of tin, melted together. 2. *Rúi*, 4 sérs of copper to 1½ sérs of lead. It is called in this country *bhangár*. 3. *Brass*, which the Hindus call *pítal*, is made in three ways, *firsť*, 2½ sérs copper to 1 sér *rúh i túṭiya*, which is malleable, when cold; *secondly*, 2 sérs of copper to 1 sér of *ruh i túṭiyá*, which is malleable, when heated; *thirdly*, 2 sérs of copper to 1 sér of *rúh i túṭiyá*, not worked with the hammer, but by casting. 4. *Sím i sukhtah*, composed of lead, silver, and bronze; it has a black lustre, and is used in painting. 5. *Haftjósh*, which, like the *Khárchíní*, is nowhere to be found; it is said to consist of six metals. Some call it *táliqún*, whilst others give this name to common copper. 6. *Ashtdhát*, a compound of eight metals, *viz.*, the six of the *haftjósh*, *rúh i túṭiyá*, and *káṉsí*. It is also made of seven components. 7. *Kaulpatr*, 2 sérs of *safídrú*, and 1 sér of copper. It is coloured, and looks well, and belongs to the inventions of his Majesty.[1]

ÁÍN 14.

ON SPECIFIC GRAVITY.

It has been said above that various compounds result from a mixture of *bukhár* and *dukhán*, which themselves consist of light and heavy elements. Besides, bukhár is *wet* or *dry*; and a complete union of the two sets in, sometimes before and after the mixture, and sometimes in either of these conditions. It is on this account that a compound whose fiery and airy particles are more numerous than its watery and earthy particles, is lighter than a mineral in which there are more watery and earthy particles; and likewise, every mineral in which the bukhár predominates over the dukhán, is lighter than a mineral, in which the opposite is the case. Again, a mineral in which the complete union of the bukhár and dukhán has set in, is heavier than one which has not reached this degree, because the interstices between the particles, and the entering of air, make a body large and light. Bearing this in mind, we have a means of discovering the weight and lightness of every body. Some one,[2] now long ago dead, has expressed the weight of several bodies in verses, (metre *Mujtass*)—

Za rúy i jussah i haftád, u yak diram símáb,
Chiló shashast, u za arziz síy u hasht shumár,
Zahab çadast surub panjah o nuh áhan chil;
Biriṉj u mis chihil ó panj nuqrah panjah u chár.

[1] This phrase seems to mean that the invention was made at the time of Akbar.

[2] *Abú Naçr i Faráhí*, of Faráh, a town in Sijistán. His real name is Muhammad Badruddín. He has written a Vocabulary in rhyme, entitled *Niçáb uççibyán*, which for centuries has been read in nearly every Madrasah of Persia and India; *vide* Journal As. Soc. Bengal, for 1868, p. 7.

"Quicksilver[1] is 7.1; Rúi is 46; Tin is 38; Gold 100; Lead 59; Iron 40; Brass and Copper 45; Silver 54." Others have expressed the numbers by mnemotechnical words in rhyme, (metre *Ramal*)—

Nuh filizz é mustawiyyul hajm rá chún barkashí,
Ikhtiláf é wazn dárad har yaké bé ishtibáh.
Zar lakan, zébaq alam, usrub dahan, arzíz hal,
Fizzah nad, áhan yakí, miss o shabah mah, rúi máh.

"If you weigh equal volumes of the following *nine* metals, you will doubtlessly find their different weights as follows:—gold *lakan*,[2] quicksilver *alam*, lead *dahan*, tin *hal*, silver *nad*, iron *yakí*, copper and brass *mah*, rúi *máh*." If of these nine metals, pieces be taken of equal dimensions, their weights will be different. Some sages ascribe this variety in weight to the difference in the qualitative constitution of the bodies, and trace to it their lightness or heaviness, their floating or sinking in water, and their weights as indicated by common and hydrostatic balances.

Several deep-sighted philosophers compute the weight of bodies with a reference to water. They fill a suitable vessel with water, and throw into it 100 misqáls of each metal; and from the quantities of water thrown out upon the introduction of the metals, are found the differences between them in volume and weight. The greater the quantity of the water is which 100 misqáls of a body displace, the greater is its volume, and the less its weight; and reversely. Thus 100 m. of silver displace $9\frac{2}{3}$ m. of water, and the same quantity of gold, $5\frac{1}{4}$ m. If the weight of the water displaced by a body be subtracted from its weight in air, its weight in water will be found. The scales of the air-balance are both suspended in air: those of the hydrostatic balance are both on the surface of the water. As the heavier body possesses the greater power for sinking, it will, in any case, move in the direction of the perpendicular; but, if either of the two scales be on the surface of the water, and the other in the air, the latter scale, although perhaps the lighter, will necessarily sink, as air, being a finer substance than water, does not offer so much resistance. A body will sink in water, if the quantity of water displaced by it be less than the weight of the body; and a body will float, if that quantity be greater; and if the water displaced be equal to the weight

---

[1] We fix the specific gravities as follows:—*Gold* 19.26; *Mercury* 13.6; *Lead* 11.325; *Silver* 10.47; *Copper* 9; *Tin* 7.32; *Iron* 7.7, for which numbers water is unity. Abul Fazl takes gold as standard; and assuming, for his values, 19.26 as its specific gravity, we would get, *Mercury* 13.87; *Lead* 11.36; *Silver* 10.40; *Copper* 8.67; *Iron* 7.76; *Tin* 7.32; *Rúi* 8.86.

[2] The Arabic consonants of the mnemotechnical words *lakan*, *alam*, &c., represent numbers; thus $l + k + n = 30 + 20 + 50$; $a + l + m = 1 + 30 + 40$; &c.

of the body, its upper side will coincide with the surface of the water. *Abú Raihán* has drawn up a table, which I shall insert here.

Quantity of water displaced by 100 *misqáls of*

	Misqáls.	Dángs.	Tassújes.

Billaur,	63	3	3

[1] With the exception of *Quicksilver*, *Silver*, and *Yáqút* (*light blue*), the numbers given in the MSS., and the above list, are slightly wrong, because the sum of the weights of the water displaced and the apparent weight, ought to give 100 misqáls (1 *m.* = 6 *d.*; 1 *d.* = 4 *t.*) But in most items there is an excess of *one dáng*.

ÁÍN 15.

THE IMPERIAL HAREM.

His Majesty is a great friend of good order and propriety in business. Through order the world becomes a meadow of truth and reality; and that which is but external, receives through it a spiritual meaning. For this reason, the large number of women—a vexatious question even for great statesmen—furnished his Majesty with an opportunity to display his wisdom, and to rise from the low level of worldly dependence to the eminence of perfect freedom. The imperial palace and household are therefore in the best order.

His Majesty forms matrimonial alliances with princes of Hindustan, and of other countries; and secures by these ties of harmony the peace of the world.

As the sovereign, by the light of his wisdom, has raised fit persons from the dust of obscurity, and appointed them to various offices, so does he also elevate faithful persons to the several ranks in the service of the seraglio. Short-sighted men think of impure gold, which will gradually turn into pure gold;[1] but the far-sighted know that his Majesty understands how to use elixirs[2] and chemical processes. Any kind of growth will alter the constitution of a body; copper and iron will turn to gold, and tin and lead to silver; hence it is no matter of astonishment, if an excellent being changes the worthless into men. "The saying of the wise is true that the eye of the exalted is the elixir for producing goodness." Such also are the results flowing from the love of order of his Majesty, from his wisdom, insight, regard to rank, his respect for others, his activity, his patience. Even when he is angry, he does not deviate from the right path; he looks at every thing with kindly feelings, weighs rumours well, and is free from all prejudice; he considers it a great blessing to have the good wishes of the people, and does not allow the intoxicating pleasures of this world to overpower his calm judgment.

His Majesty has made a large enclosure with fine buildings inside, where he reposes. Though there are more than five thousand women, he has given to each a separate apartment. He has also divided them into sections, and keeps them attentive to their duties. Several chaste women have been appointed as *dárógháhs*, and superintendents over each section, and one has been selected for the duties of writer. Thus, as in the imperial offices, every thing is here also in proper order. The salaries are sufficiently liberal. Not counting the presents, which his Majesty most generously bestows, the women of the highest rank receive from 1610 to 1028 Rs. *per mensem*. Some

---

[1] So according to the opinion of the philosophers of the Middle Ages.

[2] Elixirs change *quickly* that which is worthless into pure gold.

of the servants have from 51 to 20, others from 40 to 2 Rs. Attached to the private audience hall of the palace, is a clever and zealous writer, who superintends the expenditure of the Harem, and keeps an account of the cash and the stores. If a woman wants anything, within the limit of her salary, she applies to one of the *Tahwíldárs* (cash-keepers) of the seraglio. The Tahwíldár then sends a memorandum to the writer, who checks it, when the General Treasurer makes the payment in cash, as for claims of this nature no cheques are given.

The writer also makes out an estimate of the annual expenditure, writes out summarily a receipt, which is countersigned by the ministers of the state. It is then stamped with a peculiar Imperial seal, which is only used in grants connected with the Harem, when the receipt becomes payable. The money itself is paid by the cash-keeper of the General Treasury to the General Tahwíldár, who on the order of the writer of the Harem, hands it over to the several Sub-Tahwíldárs for distribution among the servants of the seraglio. All monies are reckoned in their salaries at the current rate.[1]

The inside of the Harem is guarded by sober and active women; the most trustworthy of them are placed about the apartments of his Majesty. Outside of the enclosure the eunuchs are placed; and at a proper distance, there is a guard of faithful *Rájpúts*, beyond whom are the porters of the gates. Besides, on all four sides, there are guards of Nobles, Ahadís, and other troops, according to their ranks.

Whenever *Bégums*, or the wives of nobles, or other women of chaste character, desire to be presented, they first notify their wish to the servants of the seraglio, and wait for a reply. From thence they send their request to the officers of the palace, after which those who are eligible are permitted to enter the Harem. Some women of rank obtain permission to remain there for a whole month.

Notwithstanding the great number of faithful guards, his Majesty does not dispense with his own vigilance, but keeps the whole in proper order.

ÁÍN 16.

THE ENCAMPMENT ON JOURNEYS.

It would be difficult to describe a large encampment; but I shall say something on the equipage used for hunting parties and short journeys.

1. The *Gulálbár* is a grand enclosure, the invention of his Majesty, the doors of which are made very strong, and secured with locks and keys. It is never less than one hundred yards square. At its eastern end a

[1] At 40 dáms *per rupee*.

pavilion of two entrances is erected, containing 54 divisions, 24 yards long, and 14 broad; and in the middle there stands a large *Chaubín ráotí*,[1] and round about it a *Sarápardah*.[2] Adjoining to the *Chaubín*, they built up a two-storied pavilion, in which his Majesty performs divine worship, and from the top of which, in the morning, he receives the compliments of the nobility. No one connected with the seraglio enters this building without special leave. Outside of it, twenty-four *chaubín ráotís* are erected, 10 yards long, and 6 yards wide, each separated by a canvass, where the favourite women reside. There are also other pavilions and tents for the servants, with *Sáibáns*[2] of gold embroidery, brocade, and velvet. Adjoining to this is a *Sarápardah* of carpet, 60 yards square, within which a few tents are erected, the place for the *Urdúbégís*,[3] and other female servants. Farther on up to the private audience hall, there is a fine open space, 150 yards long and 100 yards broad, called the *Mahtábí*; and on both sides of it, a screen is set up as before described which is supported by poles 6 yards long, fixed in the ground at distances of two yards. The poles are one yard in the ground, and are ornamented with brass knobs on the top, and kept firm by two ropes, one passing inside, and the other outside of the enclosure. The guards watch here, as has been described.

In the midst of the plain is a raised platform,[4] which is protected by an awning, or *Namgírah*, supported by four poles. This is the place, where his Majesty sits in the evening, and none but those who are particularly favoured, are here admitted. Adjoining to the *Gulálbár*, there is a circular enclosure, consisting of twelve divisions, each of thirty yards, the door of the enclosure opening into the *Mahtabí*; and in the midst of it, is a *Chaubín ráotí*, ten yards long, and a tent containing forty divisions, over which twelve awnings are spread, each of twelve yards, and separated by canvasses. This place, in every division of which a convenient closet is constructed, is called *Ibachkí*, which is the (Chagatái) name used by his Majesty. Adjoining to this a *Sarápardah* is put up, 150 yards in length and breadth, containing sixteen divisions, of thirty-six square yards, the Sarápardah being, as before, sustained by poles with knobs. In the midst of it the state-hall is erected, by means of a thousand carpets; it contains seventy-two rooms, and has an opening fifteen yards wide. A tentlike covering, or *Qalandarí*, made of waxcloth, or any other lighter material, is spread over it, which affords protection against the rain and the sun; and round about it, are fifty awnings, of twelve yards each. The pavilion, which serves as *Díwán-i kháç*, or *private* audience hall, has proper doors and locks. Here the nobles, and the officers of the army, after having

[1] Described in the twenty-first Aín.
[2] Awnings.
[3] Armed women.
[4] As may be still seen in the ruins of Fathpúr Síkrí.

obtained leave through the *Bakhshís*,[1] pass before the Emperor, the list of officers eligible for admission being changed on the first of every month. The place is decorated, both inside and outside with carpets of various colours, and resembles a beautiful flower-bed. Outside of it, to a distance of 350 yards, ropes are drawn, fastened to poles, which are set up at a distance of three yards from each other. Watchmen are stationed about them. This is the *Díwán i 'Ám*, or *public* audience hall, round which, as above described, the various guards are placed. At the end of this place, at a distance of twelve *tanábs* is the *Naqqárah Khánah*,[2] and in the midst of the area the *Ákásdiah*[3] is lighted up.

Some encampments, as just now described, are sent off, and one of them is put up by the *Farráshes* on a piece of ground which the *Mír Manzils*[4] have selected as an eligible spot, whilst the other camp furniture is sent in advance, to await the approach of his Majesty. Each encampment requires for its carriage 100 elephants, 500 camels, 400 carts, and 100 bearers. It is escorted by 500 troopers, *Mansabdárs*,[5] *Ahadís*. Besides, there are employed a thousand Farráshes, natives of Írán, Túrán, and Hindustan, 500 pioneers, 100 water-carriers, 50 carpenters, tent-makers, and torch-bearers, 30 workers in leather, and 150 sweepers.

The monthly pay of the foot varies from 240 to 130 dáms.

ÁÍN 17.

THE ENCAMPMENT OF THE ARMY.

Although his Majesty but rarely collects his armies, a large number of troops accompany him in whatever direction an expedition may go; but a considerable number, in every province, are employed on various services, and are not allowed to follow him. On account of the crowding of camp-followers, and the number of the troops themselves, it would take a soldier days to find his tent; and how much worse would it be for a stranger? His Majesty has invented an admirable method of encamping his troops, which is a source of much comfort to them. On an open ground they pitch the imperial seraglio, the audience hall, and the *Naqqárah khánah*, all occupying a space the length of which is 1530 yards. To the right and left, and behind, is an open space of 360 yards, which no one but the guards are allowed to enter. Within it, at a distance of 100 yards to

[4] Quarter masters.

[5] Grandees.

the left centre are the tents of Maryam Makání,[1] Gulbadan Bégum, and other chaste ladies, and the tents of Prince Dányál; to the right, those of Prince Sultán Salím; and to the left, those of Prince Sháh Murád. Behind their tents, at some distance, the offices and workshops are placed, and at a further distance of 30 yards behind them, at the four corners of the camp, the bázárs. The nobles are encamped without on all sides, according to their rank.

The guards for Thursday, Friday and Saturday, encamp in the centre; those for Sunday and Monday, on the right; and those for Tuesday and Wednesday, on the left.

ÁÍN 18.

ON ILLUMINATIONS.

His Majesty maintains that it is a religious duty and divine praise to worship fire and light; surly, ignorant men consider it forgetfulness of the Almighty, and fire worship. But the deep-sighted know better. As the external form of the worship of "the select"[2] is based upon propriety, and as people think the neglect of some sort of worship abominable, there can be nothing improper in the veneration of that exalted element which is the source of man's existence, and of the duration of his life; nor should base thoughts enter such a matter.

How beautifully has Shaikh Sharafuddín Munyarí[3] said,—"What can be done with a man who is not satisfied with the lamp, when the sun is down?" Every flame is derived from that fountain of divine light, (the sun), and bears the impression of its holy essence. If light and fire did not exist, we should be destitute of food and medicines; the power of sight would be of no avail to the eyes. The fire of the sun is the torch of God's sovereignty.

At noon of the day, when the sun enters the 19th degree of Aries, the whole world being then surrounded by his light, they expose a round piece of a white and shining stone, called in Hindí *Súrajkránt*, to the rays of the sun. A piece of cotton is then held near it, which catches fire from the heat of the stone. This celestial fire is committed to the care of proper persons.

---

[1] *Maryam Makání*, (*i. e.*, dwelling with the Virgin Mary, who together with Asiah, the wife of Pharao, Khadíjah, the name of Muhammad's first wife, and Fátimah, his daughter, are the four *perfect* women of the Islám) is the *title* of Akbar's mother. Her name was *Hamídah Bánú Bégum; vide* Badáoní, ed. Bibl. Ind. I, p. 437. Gulbadan Bégum (*i. e.*, Lady Rose body) appears to be the name of one of Akbar's favourite wives.

[2] The members of the *Divine Faith*.

[3] This famous saint died in the beginning of the fifteenth century. Munair is a town in Bahár; *vide* Journal As. Soc. Bengal, 1868, p. 7, l. 3, from below, and the biographies of Indian Saints in the fourth book. His works are to be found among the Persian MSS. of the Society's Library.

The lamp-lighters, torch-bearers and cooks of the household use it for their offices; and when the year has passed away in happiness, they renew the fire. The vessel in which this fire is preserved, is called *Agingir*, *i. e.*, fire-pot.

There is also a shining white stone, called *Chandrkránt*, which, upon being exposed to the beams of the moon, drips water.

Every afternoon, one *ghaṛí*[1] before sunset, his Majesty, if on horseback, alights, or if sleeping, he is awakened. He then lays aside the splendour of royalty, and brings his external appearance in harmony with his heart. And when the sun sets, the attendants light twelve white candles, on twelve candlesticks of gold and silver, and bring them before his Majesty, when a singer of sweet melodies, with a candle in his hand, sings a variety of delightful airs to the praise of God, beginning and concluding with a prayer for the continuance of this auspicious reign. His Majesty attaches the utmost importance to praise and prayer, and earnestly asks God for renewed light.

It is impossible to describe the beauty and various forms of the candlesticks and shades, and to give an account of the offices of the workmen. Some of the candlesticks weigh ten *mans* and upwards, and are adorned with various designs; some single, others of two branches and more: they give light to the internal eye. His Majesty has invented a candlestick, one yard high. Five others are placed on the top of it, and each is adorned with the figure of an animal. White wax candles, three yards and upwards in length, are cast for it, so that a ladder is required to snuff it. Besides there are everywhere flambeaux[2] both inside and outside, which increase the light very much. The first, second, and third nights of every lunar month, when there is moonlight but for a short time, eight wicks are used;[3] from the fourth to the tenth, they decrease one in number every night, so that on the tenth night, when the moon is very bright, one is sufficient; and they continue in this state till the fifteenth, and increase one wick every day from the sixteenth to the nineteenth. For the twentieth night the number is the same as on the nineteenth; on the twenty-first and twenty-second they increase one daily; the twenty-third is the same as the twenty-second; and from the twenty-fourth to the last, eight wicks are lighted up. They allow for every wick one sér of oil, and half a sér of cotton. In some places there are fat-burners, where grease is burnt instead of oil. The allowance varies according to the size of the wick.

In order to render the royal camp conspicuous to those who come from

---

[1] One *ghaṛí* = 24 minutes.

[2] Oil-burners with several wicks are very common in India.

[3] For each flambeau.

far, his Majesty has caused to be erected, in front of the Durbár, a pole upwards of forty yards high, which is supported by sixteen ropes; and on the top of the pole is a large lantern, which they call *Ákásdiah*.[1] Its light is seen from great distances, guides the soldiers to the imperial camp, and helps them to find their tents. In former times, before the lamp was erected, the men had to suffer hardships from not being able to find the road.

In this department, Mansabdars, Ahadís, and other troops, are employed. The allowance of a foot soldier never exceeds 2400, and is never less than 80 dáms.

ÁÍN 19.

THE ENSIGNS OF ROYALTY.

The *Shamsah*[2] of the arch of royalty is a divine light, which God directly transfers to kings, without the assistance of men; and kings are fond of external splendour, because they consider it an image of the Divine glory. I shall mention some of the insignia used at present.

1. The *Aurang*, or throne, is made of several forms; some are inlaid with precious stones, and others are made of gold, silver, &c. 2. The *Chatr*, or umbrella, is adorned with the most precious jewels, of which there are never less than seven. 3. The *Sáibán* is of an oval form, a yard in length, and its handle, like that of the umbrella, is covered with brocade, and ornamented with precious stones. One of the attendants holds it, to keep off the rays of the sun. It is also called *Áftábgír*. 4. The *Kaukabah*,[3] of which several are hung up before the assembly hall.

These four insignia are only used by kings.

5. The *'Alam*, or standard. When the king rides out, not less than five of these are carried along with the *Qur*,[4] wrapped up in scarlet cloth bags. On days of festivity, and in battle, they are unfurled. 6. The *Chatrtóq*, a kind of *'Alam*, but smaller than it, is adorned with the tails of Thibetan yaks. 7. The *Tumantóq* is like the *Chatrtóq*, but longer. Both insignia are flags of the highest dignity, and the latter is bestowed upon great nobles only. 8. The *Jhandá* is an Indian flag. The Qur necessarily contains a flag of each kind; but on great occasions many are displayed.

Of musical instruments used in the *Naqqárahkhánah*, I may mention, 1. *the Kúwargah*, commonly called *damámah*; there are eighteen pair of

---

[1] From *Ák-ás* sky, and *diah* lamp. The Ákásdiyah is also mentioned by *Bernier*.

[2] *Shamsah* is a picture of the sun affixed to the gates or walls of the palaces of kings. At night, these pictures are illuminated.

[3] *Vide* the plates.

[4] The *Qur* is a collection of flags, arms, and other insignia, which follow the king wherever he goes.

them more or less; and they give a deep sound. 2. *The naqqárah*, twenty pair, more or less. 3. *The duhul*, of which four are used. 4. The *Karaná*[1] is made of gold, silver, brass, and other metals: and they never blow fewer than four. 5. *The surná* of the Persian and Indian kinds; they blow nine together. 6. The *nafír*, of the Persian, European, and Indian kinds; they blow some of each kind. 7. The *sing* is of brass, and made in the form of a cow's horn; they blow two together. 8. The *sanj*, or *cymbal*, of which three pair are used.

Formerly the band played four ghaṛís before the commencement of the night, and likewise four ghaṛís before daybreak; now they play first at midnight, when the sun commences his ascent, and the second time at dawn. One ghaṛí before sunrise, the musicians commence to blow the surná, and wake up those that are asleep; and one ghaṛí after sun rise, they play a short prelude, when they beat the kuwargah a little, whereupon they blow the karaná, the nafír, and the other instruments, without, however, making use of the naqqárah; after a little pause the surnás are blown again, the time of the music being indicated by the nafírs. One hour later the naqqárahs commence, when all musicians raise "the auspicious strain."[2] After this they go through the following seven performances. 1. The *Mursalí*, which is the name of a tune played by the *mursil*; and afterwards the *bardásht*, which consists likewise of certain tunes, played by the whole band. This is followed by a pianissimo, and a crescendo passing over into a diminuendo; 2. The playing of the four tunes, called *ikhláṭí*, *ibtidáí*, *shírází*, *qalandarí nigar qatrah*,[3] or *nukhúd qatrah*, which occupies an hour. 3. The playing of the old Khwárizmite tunes. Of these his Majesty has composed more than two hundred, which are the delight of young and old, especially the tunes *Jalálsháhí*, *Mahámír karkat (?)*, and the *Naurózi*. 4. The swelling play of the cymbals. 5. The playing of *Bá miyán daur*. 6. The passing into the tunes *azfar*, also called *ráh i bálá*, after which comes a pianissimo. 7. The Khwárizmite tunes, played by the *Mursil*, after which he passes into the *mursalí*; he then pauses, and commences the blessings on his Majesty, when the whole band strikes up a pianissimo. Then follows the reading of beautiful sentences and poems. This also lasts for an hour. Afterwards the surna-players perform for another hour, when the whole comes to a proper conclusion.

His Majesty has such a knowledge of the science of music as trained musicians do not possess; and he is likewise an excellent hand in performing, especially on the naqqárah.

---

[1] Or Karraná.

[2] Probably blessings on his Majesty.

[3] Several of these names of melodies are unclear, and will in all probability remain so. Perhaps the words *shírází qalandarí*, "a hermit of Shíráz," belong to each other. *Nigar qatrah* means, *behold the tear*.

Mansabdárs, Ahadís, and other troops are employed in this department. The monthly pay of a foot-soldier does not exceed 340, and is not less than 74 dáms.

ÁÍN 20.

THE ROYAL SEALS.

Seals are used in the three[1] branches of the Government; in fact every man requires them in his transactions.[2] In the beginning of the present reign, Maulánâ Maqçúd, the seal-engraver, cut in a circular form upon a surface of steel, in the *riqá'* character, the name of his Majesty and those of his illustrious ancestors up to Tímúrlang; and afterwards he cut another similar seal, in the *nasta'líq* character, only with his Majesty's name. For judicial transactions a second kind of seal was made, *mihrábí* in form,[3] which had the following verse round the name of his Majesty—

Rástí mújib i rizá i khudást, kas nadídam kih gum shud az rah i rást.

"Uprightness is the means of pleasing God; I never saw any one lost in the straight road."

Tamkín made a new seal of the second kind; and afterwards Maulánâ 'Alí Ahmad of Dihlí improved both. The round small seal goes by the (chagatái) name of *Uzuk*, and is used for *farmán i sabtís*;[4] and the large one, into which he cut the names of the ancestors of his Majesty, was at first only used for letters to foreign kings, but now-a-days for both. For other orders a square seal is used, engraved with the words *Alláhu Akbar, jalla jaláluhu*, whilst another of a peculiar stamp is used for all matters connected with the seraglio. For the seals attached to *farmáns*, another stamp is used of various forms.

Of seal-engravers I shall mention

1. *Maulánâ Maqçúd of Herát*, one of the servants of Humáyún, who writes well the *riqá'* and *nasta'líq* characters. The astrolabe, globes, and various *mistars*[5] which he made, were much admired by people of experience. The patronage of his Majesty perfected his art.

---

[1] Corresponding to the threefold division of the *Áín i Akbarí*.

[2] The word *muhur*, a seal, means also a *stamp*, and generally, the *signature of a man*. We *sign* documents, Orientals stamp their names to them. Sealing wax is rarely used on account of the climate; a tenacious black liquid, or the juice of the *bhélá* nut is preferred.

[3] *Vide* note p. 30.

[4] *Vide* the eleventh Áín of the second book.

[5] Copyists take a piece a pasteboard of the same size as the paper on which they write. Then they draw two parallel vertical lines, each about an inch from the two vertical sides of the pasteboard. Along these lines they make small holes at equal intervals, and draw a string from the first hole at the left hand to the first hole of the right of the pasteboard. Similarly, the two second holes are joined, and so on, care being taken that the horizontal strings are parallel. This contrivance is called *mistar*, from *satar*, a line. The copyist then puts the blank

2. *Tamkín of Kábul.* He was educated in his native country, and brought his art to such a perfection, as to excite the jealousy of the preceding engraver, whom he surpassed in the *nasta'líq*.

3. *Mír Dóst of Kábul.* He cuts both the *riqá'* and *nasta'líq* characters in cornelian. He does not come up to the preceding artists. His *riqá'* is better than his *nasta'líq*. He also understands assaying.

4. *Maulánd Ibráhím.* In the art of cutting cornelians he is the pupil of his brother Sharaf of Yazd. He surpasses the ancient engravers; and it is impossible to distinguish his *riqá'* and *nasta'líq* from the master pieces of the best calligraphers. He engraved the words *la'l jalálí*, or the glorious ruby, upon all imperial rubies of value.

5. *Maulánd 'Alí Ahmad*[1] of Dihlí who, according to all calligraphers, stands unsurpassed as steel-engraver, so much so that his engravings are taken as copies. His *nasta'líq* is charming; but he writes also other characters well. He learned the trade from his father Shaikh Husain, studied the manner of Maulánd Maqçúd, and eventually surpassed all.

ÁÍN 21.

THE FARRÁSH KHÁNAH.

His Majesty considers this department as an excellent dwelling-place, a shelter from heat and cold, a protector against the rain, as the ornament of royalty. He looks upon its efficiency as one of the insignia of a ruler, and therefore considers the care bestowed upon it, as a part of Divine worship. The department has been much improved, both in the quality and the quantity of the stores, and also by the introduction of new fashions. I shall mention a few particulars as specimens for future enquirers.

1. The *Bárgáh*, when large, is able to contain more than ten thousand people. It takes a thousand farráshes a week to erect it with the help of machines. There are generally two door poles, fastened with hinges. If plain, (*i. e.*, without brocade, velvet, or gold ornaments,) a bárgáh costs 10,000 Rupees and upwards, whilst the price of one full of ornaments is unlimited. The price of others may be estimated from the price of a plain one. 2. The *Chaubín ráwatí* is raised on ten pillars. They go a little into the ground, and are of equal height, with the exception of two, which are a little higher, as

---

sheets on the top of the mistar, and presses on them with the hands, when the strings will leave marks on the paper sufficiently clear to prevent the writer from writing crookedly.

[1] *Nizám* of Herát, in his Tabaqát i Akbarí, mentions him among the contemporaneous Persian poets, and gives a few of his verses.

the cross beam rests upon them. The pillars have, above and below, a *dásah*,[1] to keep them firm, and several rafters pass over the dásahs and the crossbeam, the whole being kept tightly together by clamps and bolts and nuts. The walls and the roof consist of mats. There is one door or two; and at the height of the lower dásahs there is a raised platform. The inside is ornamented with brocade and velvet, and the outside with scarlet-sackcloth, tied to the walls with silk tape. 3. The *Doáshyánah manzil*, or house of two stories, is raised upon eighteen pillars, six yards in height, which support a wooden platform; and into this, pillars of four cubits in length are fixed with bolt and nuts, forming an upper story. The inside and outside are ornamented, as in the preceding. On the march it is used by his Majesty as a sleeping apartment, and also as a place of divine worship, where he prays to the Sun; and hence the building resembles a man who strives after God without forgetting his worldly duties, whose one eye is directed to the solitude of pure devotion, and the other eye to the motly *sarái* of the world. After the devotions are over, the women are allowed to enter, to pay their compliments, and after them, outsiders. On journeys his Majesty inspects in this building the rations (of the elephants, camels, &c.,) which is called *jharókah*, or window. 4. The *Zamíndóz* is a tent made of various forms, sometimes with one, sometimes with two door poles; screens are also hung up within it, so as to form divisions. 5. The *'Ajáibí* consists of nine awnings on four pillars. Five of the awnings are square, and four tapering; sometimes they make it so as to contain one division only, supported by a single pole. 6. The *Mandal* is composed of five awnings joined together, and is supported by four poles. Four of the awnings are let down, so as to form a private room; sometimes all four are drawn up, or one side only is left open. 7. The *At'hk'hambah* consists of seventeen awnings, sometimes separate, sometimes joined together; they are supported by eight poles. 8. The *Khargáh* is a folding tent made in various ways; some with one, others with two doors. 9. The *Shámyánah*-awning is made of various sizes, but never more than of twelve yards square. 10. The *Qalandarí* has been described.[2] 11. The *Sarápardah* was made in former times of coarse canvass, but his Majesty has now caused it to be made of carpeting, and thereby improved its appearance and usefulness. 12. The *Gulálbár*, is a wooden screen, its parts being fastened together, like the walls of the *Khargáh*, with leather straps, so that it can be folded together, when the camp breaks off. The *gulálbár* is covered with red cloth, tied with tape.

---

[1] A triangular piece of wood fixed into the angle formed by the vertical beam and the cross-beam, *a support*.

[2] *Vide* p. 46.

Carpets.

His Majesty has caused carpets to be made of wonderful varieties and charming textures; he has appointed experienced workmen, who have produced many master-pieces. The carpets of Irán and Túrán are no more thought of, although merchants still import carpets from Góshkán, Khúzistán, Kirmán, and Sabzwár.[1] All kinds of carpet weavers have settled here, and drive a flourishing trade. There are found in every town, especially in Ágrah, Fathpúr, and Láhór. In the imperial workshops, single carpets are made 20 *gaz*, 7 *tassújes* long, and 6 *gaz*, 11½ *tassújes* broad, at a cost of 1810 rupees, which those who are skilled in the business have valued at 2715 rupees.

Takyahnamads, or woolen coverlets, are brought from Kábul and Persia, but are also made in this country.

It would take up too much time to describe the *jájams*, *shatrinjis*, *balúchis*, and the fine mats which look as if woven with silk.

ÁÍN 22.

THE ÁBDÁR KHÁNAH.

His Majesty calls this source of life "the water of immortality," and has committed the care of this department to proper persons. He does not drink much, but pays much attention to this matter. Both at home and on travels, he drinks Ganges water. Some trustworthy persons are stationed on the banks of that river, who dispatch the water in sealed jars. When the court was at the capital Ágrah and in Fathpúr, the water came from the district of Sárún;[2] but now[3] that his Majesty is in the Panjáb, the water is brought from Hardwár. For the cooking of the food, rain water or water taken from the Jamnah and the Chanáb is used, mixed with a little Ganges water. On journeys and hunting parties his Majesty, from his predilection for good water, appoints experienced men as water-tasters.

Saltpetre, which in gunpowder produces the explosive heat, is used by his Majesty as a means for cooling water, and is thus a source of joy for great and small. Saltpetre is a saline earth. They fill with it a perforated vessel, and pour some water over it, and collecting what drops through,

---

[1] *Góshkán*, or *Jóshaqán*, a town in 'Iráq i 'Ajamí, half way between Káshán and Içfahán. Khúzistán is the Persian province of which Shushtar, or Shustar, is the capital; the ancient *Susiana*. Kirmán is the capital of the Persian province Kirmán, which borders on Balúchistán. *Sabzwár* is one of the chief cities of the Persian province Khurásán, between Mashhad (Meshed) and the Caspian Sea.

[2] The nearest station on the Ganges from Ágrah.

[3] A. D. 1596. As in 1586 Fathpúr had ceased to be the capital, Akbar resided mostly in the Panjáb.

they boil it, clean it, and let it crystalize. One sér of water is then put into a goglet of pewter, or silver, or any other such metal, and the mouth closed. Then two and a half sérs of saltpetre are thrown into a vessel, together with five sérs of water, and in this mixture the goglet is stirred about for a quarter of an hour, when the water in the goglet will become cold. The price of saltpetre varies from $\frac{3}{4}$ to 4 mans *per rupee*.

Since the thirtieth year[1] of the *Divine Era*, when the imperial standards were erected in the Panjáb, snow and ice have come into use. Ice is brought by land and water, by post carriages or bearers, from the district of Panhán, in the northern mountains, about forty-five *kós* from Láhór. The dealers derive a considerable profit, two to three sérs of ice being sold *per rupee*. The greatest profit is derived when the ice is brought by water, next when by carriages, and least when by bearers. The inhabitants of the mountains bring it in loads, and sell it in piles containing from 25 to 30 seers, at the rate of 5 dáms. If they have to bring it very far, it costs 24 *d.* 17 *j.*; if the distance be an average one, 15 *d.*

Out of the ten boats employed for the transport of ice, one arrives daily at the capital, each being manned by four boatmen. The ice bundles contain from six to twelve sérs, according to the temperature. A carriage brings two loads. There are fourteen stages, where the horses are changed; and besides, one elephant is used. Twelve pieces of ten to four sérs arrive daily. By this kind of transport, a sér of ice costs in winter 3 *d.* 21 *j.*; during the rains 14 *d.* 20 *j.*; in the intermediate time 9 *d.* 21½ *j.*; and in the average[2] 5 *d.* 15½ *j.* If it is brought by bearers, twenty-eight men are required for the fourteen stages. They bring every day one load, containing four parcels. In the beginning of the year the ice costs 5 *d.* 19½ *j.*; in the middle 16 *d.* 2½ *j.*; and in the end 19 *d.* 15⅝ *j.*, *per sér*; in the average[2] 8⅞ *d.*

All ranks use ice in summer; the nobles use it throughout the whole year.

ÁÍN 23.

THE IMPERIAL KITCHEN.

His Majesty even extends his attention to this department, and has given many wise regulations for it; nor can a reason be given why he should not do so, as the equilibrium of man's nature, the strength of the body, the

[1] A. D. 1586.

[2] The text has *sarásarí*, which may mean *the average*; but the price given by Abulfazl is *not* an average. The charges for ice, at the time of Akbar, may be compared to the prices of the present age. Here, in Calcutta, one sér of American ice costs two annas, or ⅛ rupee, *i. e.*, $\frac{40}{8}$ = 5 dáms of Akbar.

capability of receiving external and internal blessings, and the acquisition of worldly and religious advantages, depend ultimately on proper care being shewn for appropriate food. This knowledge distinguishes man from beasts, with whom, as far as mere eating is concerned, he stands upon the same level. If his Majesty did not possess so lofty a mind, so comprehensive an understanding, so universal a kindness, he would have chosen the path of solitude, and given up sleep and food altogether; and even now, when he has taken upon himself the temporal and spiritual leadership of the people, the question, "What dinner has been prepared to-day?" never passes over his tongue. In the course of twenty-four hours his Majesty eats but once, and leaves off before he is fully satisfied; neither is there any fixed time for this meal, but the servants have always things so far ready, that in the space of an hour, after the order has been given, a hundred dishes are served up. The food allowed to the women of the seraglio commences to be taken from the kitchen in the morning, and goes on till night.

Trustworthy and experienced people are appointed to this department; and all good servants attached to the court, are resolved to perform well whatever service they have undertaken. Their head is assisted by the Prime Minister himself. His Majesty has entrusted to the latter the affairs of the state, but especially this important department. Notwithstanding all this, his Majesty is not unmindful of the conduct of the servants. He appoints a zealous and sincere man as *Mír Bakáwal*, or Master of the Kitchen, upon whose insight the success of the department depends, and gives him several upright persons as assistants. There are also treasurers for the cash and the stores, several tasters, and a clever writer. Cooks from all countries prepare a great variety of dishes of all kinds of grains, greens, meats; also oily, sweet and spicy dishes. Every day such dishes are prepared as the nobles can scarcely command at their feasts, from which you may infer how exquisite the dishes are which are prepared for his Majesty.

In the beginning of the year the Sub-treasurers make out an annual estimate, and receive the amount; the money bags and the door of the store-house being sealed with the seals of the Mír Bakáwal and the writer; and every month a correct statement of the daily expenditure is drawn up, the receipt for which is sealed by the same two officers, when it is entered under the head of the expenditure. At the beginning of every quarter, the *Diwán i buyútát*[1] and the *Mír Bakáwal*, collect whatever they think will be necessary; *e. g.*, *Suk'hdás* rice from Bharáij, *Déwzírah* rice from Gwáliár, *Jinjin* rice from Rájórí and Nímlah, *g'hi* from *Hiçár Fírúzah*; ducks, water-fowls, and

[1] Superintendent of the stores, workshops, &c.

certain vegetables from Kashmír. Patterns are always kept. The sheep, goats, berberies, fowls, ducks, &c., are fattened by the cooks; fowls are never kept longer than a month. The slaughter-house is without the city or the camp, in the neighbourhood of rivers and tanks, where the meat is washed, when it is sent to the kitchen in sacks sealed by the cooks. There it is again washed, and thrown into the pots. The water-carriers pour the water out of their leather bags into earthen vessels, the mouths of which are covered with pieces of cloth, and sealed up; and the water is left to settle before it is used. A place is also told off as a kitchen garden, that there may be a continual supply of fresh greens. The Mír Bakáwal and the writer determine the price of every eatable, which becomes a fixed rule; and they sign the day-book, the estimates, the receipts for transfers, the list of wages of the servants, &c., and watch every transaction. Bad characters, idle talkers, unknown persons are never employed; no one is entertained without security, nor is personal acquaintance sufficient.

The victuals are served up in dishes of gold and silver, stone and earthen-ware; some of the dishes being in charge of each of the Sub-Bakáwals. During the time of cooking, and when the victuals are taken out, an awning is spread, and lookers-on kept away. The cooks tuck up their sleeves, and the hems of their garments, and hold their hands before their mouths and noses when the food is taken out; the cook and the Bakáwal taste it, after which it is tasted by the Mír Bakáwal, and then put into the dishes. The gold and silver dishes are tied up in red cloths, and those of copper and china in white ones. The Mír Bakáwal attaches his seal, and writes on it the names of the contents, whilst the clerk of the pantry writes out on a sheet of paper a list of all vessels and dishes, which he sends inside, with the seal of the Mír Bakáwal, that none of the dishes may be changed. The dishes are carried by the Bakáwals, the cooks, and the other servants, and macebearers precede and follow, to prevent people from approaching them. The servants of the pantry send at the same time, in bags containing the seal of the Bakáwal, various kinds of bread, saucers of curds piled up, and small stands containing plates of pickles, fresh ginger, limes, and various greens. The servants of the palace again taste the food, spread the table cloth on the ground, and arrange the dishes; and when after some time his Majesty commences to dine, the table servants sit opposite him in attendance: first, the share of the derwishes is put apart, when his Majesty commences with milk or curds. After he has dined, he prostrates himself in prayer. The Mír Bakáwal is always in attendance. The dishes are taken away according to the above list. Some victuals are also kept half ready, should they be called for.

The copper utensils are tinned twice a month; those of the princes, &c., once; whatever is broken is given to the braziers, who make new ones.

ÁÍN 24.

RECIPES FOR DISHES.

There are many dishes, but the description is difficult. I shall give some particulars. Cooked victuals may be arranged under three heads, *first*, such in which no meat is used, called now-a-days *çáfiyánah*; *secondly*, such in which meat and rice, &c., are used; *thirdly*, meats with spices. I shall give ten recipes of each kind.

First, 1. *Zard biriny*. 10 *s*. of rice; 5 *s*. of sugarcandy; 3½ *s*. of g'hí; raisins, almonds, and pistachios, ½ *s*. of each; ¼ *s*. of salt; ⅛ *s*. of fresh ginger; 1½ dáms saffron, 2½ misqáls of cinnamon. This will make four ordinary dishes. Some make this dish with fewer spices, and even without any: and instead of without meat and sweets, they prepare it also with meat and salt. 2. *Khushkah*. 10 *s*. rice; ½ *s*. salt; but it is made in different ways. This will likewise give four dishes. One maund of *Déwzirah* paddy yields 25 *s*. of rice, of which 17 sérs make a full pot; *jinjin* rice yields 22 sérs. 3. *K'hichri*. Rice, split dal, and g'hí 5 *s*. of each; ½ *s*. salt: this gives seven dishes. 4. *Shirbiriny*. 10 *s*., milk; 1 *s*. rice; 1 *s*. sugarcandy; 1 *d*. salt: this gives five full dishes. 5. *T'húli*. 10 *s*. of wheat ground, of which one-third will be lost; half of that quantity of g'hí; 10 misqáls of pepper; 4 *m*. cinnamon; 3½ *m*. cloves and cardamums; ⅛ *s*. salt; some add milk and sweetmeats: this gives four dishes. 6. *Chik'hi*. 10 *s*. of wheat-flour, made into a paste, and washed till it is reduced to 2 *s*. fine paste. This is mixed with spices, and dressed with various kinds of meat. 1 *s*. g'hí; 1 *s*. onions; saffron, cardamums, and cloves, ½ *d*. of each; cinnamon, round pepper, and coriander seed, 1 *d*. of each; fresh ginger, salt 3 *d*. of each: this gives two dishes; some add lime juice. 7. *Bádinján*. 10 *s*. rice; 1½ *s*. g'hí; 3¾ *s*. onions; ¼ *s*. ginger and lime juice; pepper and coriander seed, 5 *m*. of each; cloves, cardamums, and assafœtida, each ½ *m*. This gives six dishes. 8. *Pahit*. For ten sérs of dál, or vetches, or gram, or skinned lentils, &c., take 2½ *s*. g'hí; ½ *s*. of salt and fresh ginger; 2 *m*. cuminseed; 1½ *m*. assafœtida: this yields fifteen dishes. It is mostly eaten with *Khushkah*. 9. *Ság*. It is made of spinach, and other greens, and is one of the most pleasant dishes. 10 *s*. spinach, fennel, &c., 1½ *s*. g'hí; 1 *s*. onions; ½ *s*. fresh ginger; 5½ *m*. of pepper; ½ *m*. of cardamums and cloves: this gives six dishes. 10. *Halwá*. Flour, sugarcandy, g'hí, 10 *s*. of each, which will give fifteen dishes; it is eaten in various ways.

There are also various kinds of sugared fruits, and drinks, which I cannot here describe.

Secondly, 1. *Qabúli.* 10 *s.* rice; 7 *s.* meat; 3½ *s.* g'hí; 1 *s.* gram skinned; 2 *s.* onions; ½ *s.* salt; ¼ *s.* fresh ginger; cinnamon, round pepper, cuminseed, of each 1 *d.*; cardamums and cloves, ½ *d.* of each; some add almonds and raisins: this gives five dishes. 2. *Duzdbiryán.* 10 *s.* rice, 3½ *s.* g'hí; 10 *s.* meat; ½ *s.* salt: this gives five dishes. 3. *Qímah Paláo.* Rice and meat as in the preceding; 4 *s.* g'hí; 1 *s.* peeled gram; 2 *s.* onions; ½ *s.* salt; ¼ *s.* fresh ginger, and pepper; cuminseed, cardamums and cloves, 1 *d.* of each: this gives five dishes. 4. *Shullah.* 10 *s.* meat, 3½ *s.* rice; 2 *s.* g'hí; 1 *s.* gram: 2 *s.* onions; ½ *s.* salt, ¼ *s.* fresh ginger; 2 *d.* garlic, and round pepper, cinnamon, cardamums, cloves, 1 *d.*, of each: this gives six dishes. 5. *Bughrá.* 10 *s.* meat; 3 *s.* flour; 1½ *s.* g'hí, 1 *s.* gram; 1½ *s.* vinegar; 1 *s.* sugarcandy; onions, carrots, beets, turnips, spinach, fennel, ginger, ¼ *s.* of each; saffron, cloves, cardamums, cuminseed, 1 *d.* of each; 2 *d.* cinnamon; 8 *m.* round pepper: this gives twelve dishes. 6. *Qímah Shúrbá.* 10 *s.* meat; 1 *s.* rice; 1 *s.* g'hí; ½ *s.* gram, and the rest as in the *Shullah:* this gives ten full dishes. 7. *Harísah.* 10 *s.* meat; 5 *s.* crushed wheat; 2 *s.* g'hí; ½ *s.* salt; 2 *d.* cinnamon: this gives five dishes. 8. *Kashk.* 10 *s.* meat; 5 *s.* crushed wheat; 3 *s.* g'hí; 1 *s.* gram; ¼ *s.* salt; 1½ *s.* onions; ½ *s.* ginger; 1 *d.* cinnamon; saffron, cloves, cardamums, cuminseed, 2 *m.* of each: this gives five dishes. 9. *Halím.* The meat, wheat, gram, spices, and saffron, as in the preceding; 1 *s.* g'hí; turnips, carrots, spinach, fennel, ¼ *s.* of each: this gives ten dishes. 10. *Quṭáb*, which the people of Hindústán call *sanbúsah.* This is made several ways. 10 *s.* meat; 4 *s.* flour; 2 *s.* g'hí; 1 *s.* onions; ¼ *s.* fresh ginger; ½ *s.* salt; 2 *d.* pepper and coriander seed; cardamum, cuminseed, cloves, 1 *d.* of each; ¼ *s.* of *summáq.* This can be cooked in twenty different ways, and gives four full dishes.

Thirdly, 1. *Biryán.* For a whole *Dashmandí* sheep, take 2 *s.* salt; 1 *s.* g'hí; 2 *m.* saffron, cloves, pepper, cuminseed: it is made in various ways. 2. *Yakhní.* For 10 *s.* meat, take 1 *s.* onions, and ½ *s.* salt. 3. *Yulmah.* A sheep is scalded in water till all the hair comes off; it is then prepared like *yakhní*, or any other way; but a lamb, or a kid, is more preferable. 4. *Kabáb* is of various kinds. 10 *s.* meat; ½ *s.* g'hí; salt, fresh ginger, onions, ¼ *s.* of each; cuminseed, coriander seed, pepper, cardamums cloves, 1½ *d.* of each. 5. *Musamman.* They take all the bones out of a fowl through the neck, the fowl remaining whole, ½ *s.* minced meat, ½ *s.* g'hí; 5 eggs; ¼ *s.* onions; 10 *m.* coriander; 10 *m.* fresh ginger; 5 *m.* salt; 3 *m.* round pepper; ½ *m.* saffron; it is prepared as the preceding. 6. *Dupiyázah.* 10 *s.* meat, middling fat; 2 *s.* g'hí; 2 *s.* onions; ¼ *s.* salt; ⅛ *s.* fresh pepper; cuminseed, coriander seed, cardamums, cloves, 1 *d.* of each; 2 *d.* pepper: this will give

five dishes. 7. *Mutanjanah sheep.* 10 *s.* meat, middling fat; 2 *s.* g'hí; ½ *s.* gram; ¼ *s.* ginger; 1 *d.* cuminseed; round pepper, cloves, cardamums, coriander seed 2 *d.* of each; this will give seven dishes full. It is also made of fowl and fish. 8. *Dampukht.* 10 *s.* meat; 2 *s.* g'hí; 1 *s.* onions; 1¼ *m.* fresh ginger; 10 *m.* pepper; 2 *d.* cloves; 2 *d.* cardamums. 9. *Qalyah.* 10 *s.* meat; 2 *s.* g'hí; 1 *s.* onions; 2 *d.* pepper; cloves, cardamums, 1 *d.* each; ⅛ *s.* salt: this will give eight dishes. In preparing *qalyah*, the meat is minced, and the gravy rather thick, in opposition to the *mutanjanah*. Here in Hindustan they prepare it in various ways. 10. *Malghúbah* 10 *s.* meat; 10 *s.* curds; 1 *s.* g'hí; 1 *s.* onions, ¼ *s.* ginger; 5 *d.* cloves: this will give ten dishes.

ÁÍN 25.

OF BREAD.

This belongs, properly speaking, to the preceding chapter. Bread is made in the pantry. There is a *large* kind, baked in an oven, made of 10 *s.* flour; 5 *s.* milk; 1½ *s.* g'hí; ¼ *s.* salt. They make also smaller ones. The *thin* kind is baked on an iron plate. One sér will give fifteen, or even more. There are various ways of making it: one kind is called *chapáti*, which is sometimes made of *khushkah;* it tastes very well, when served hot. For the bread used at court, one *man* of wheat is made to yield ½ *m.* of fine flour; 2 *s.* coarsely pounded flour; and the rest bran; if this degree of fineness be not required, the proportions are altered.

ÁÍN 26.

THE DAYS OF ABSTINENCE. (Ṣúfiyánah.[1])

His Majesty cares very little for meat, and often expresses himself to that effect. It is indeed from ignorance and cruelty that, although various kinds of food are obtainable, men are bent upon injuring living creatures, and lending a ready hand in killing and eating them; none seems to have an eye for the beauty inherent in the prevention of cruelty, but makes himself a tomb for animals. If his Majesty had not the burden of the world on his shoulders, he would at once totally abstain from meat; and now, it is his intention to quit it by degrees, conforming, however, a little to the spirit of the age. His Majesty abstained from meat for some time on Fridays, and then on Sundays; now on the first day of every solar month, on Sundays, on solar and lunar eclipses, on days between two fasts, on the Mondays of the

[1] Living according to the manner of the Súfís.

month of Rajab,[1] on the feast-day of every solar month, during the whole month of *Farwardín*,[2] and during the month, in which his Majesty was born, *viz*, the month of *Áb́án*. Again, when the number of fast days of the month of Áb́án had become equal to the number of years his Majesty had lived, some days of the month of *Áźar* also were kept as fasts. At present the fast extends over the whole month. These fast days, however, from pious motives, are annually increased by at least five days. Should fasts fall together, they keep the longer one, and transfer the smaller by distributing its days over other months. Whenever long fasts are ended, the first dishes of meat come dressed from the apartments of Maryam Makání, next from the other bégums, the princes, and the principal nobility.

In this department nobles, ahadís, and other military, are employed. The pay of a foot soldier varies from 100 to 400 dáms.

ÁÍN 27.

STATISTICS OF THE PRICES OF CERTAIN ARTICLES.

The prices of course vary, as on marches, or during the rains, and for other reasons; but I shall give here the average prices for the information of future enquirers.

A. The spring harvest.

Wheat, *per man*,	12 *d.*	Linseed, *per man*,	10 *d.*
Kábul gram, do.	16 *d.*	Safflower (carthamus), do.	8 *d.*
Black gram, do.	8 *d.*	Fenugreek, do	10 *d.*
Lentils, do.	12 *d.*	Peas, do.	6 *d.*
Barley, do.	8 *d.*	Mustardseed, do.	12 *d.*
Millet, do.	6 *d.*	Kéwú, do.	7 *d.*

B. The autumnal harvest.

Mushkín paddy, *per man*,	110 *d.*	Déwzírah rice, do.	90 *d.*
Sádah paddy, do.	100 *d.*	Jinjin rice, do.	80 *d.*
Suk'hdás rice, do.	100 *d.*	Dakah (?) rice, do.	50 *d.*
Dúnahparsád rice, do.	90 *d.*	Zirhí rice, do.	40 *d.*
Sámzírah rice, do.	90 *d.*	Sát'hí rice, do.	20 *d.*
Shakarchíní rice, do.	90 *d.*	Múng (black gram) do.	18 *d.*

[1] Akbar was born on the fifth of Rajab A. H. 949, a Sunday, This corresponds to the 15th October, 1542. The Mondays of the month of Rajab were observed as fasts, because the Sundays had been included in the list of fast days. The members of the *Divine Faith* fasted likewise during the month of their birth.

[2] February—March; vide the first Áín of the third book; *Áb́án* corresponds to October—November.

Másh (a kind of vetch) *per man*,	16 *d.*	Lahdarah, do.	8 *d.*
Mót'h (do.), do.	12 *d.*	Kódram, do.	7 *d.*
White sesame, do.	20 *d.*	Kúrí, do.	7 *d.*
Black sesame, do.	19 *d.*	Shamákh (Hind. *Sánwank*), do.	6 *d.*
Lóbiyá (a king of bean), do.	12 *d.*	Gál (Hind. *Kangní*), do, ...	8 *d.*
Juwárí (a kind of millet), do.	10 *d.*	Millet (Hind. *chínah*), do. ..	8 *d.*

Múng dál, *per man*, ...	18 *d.*	Lentils, *per man*, ...	16 *d.*
Nukhúd dál, do.	16½ *d.*	Mót'h dál, do.	12 *d.*

Wheat flour, *per man*, ...	22 *d.*	Nukhúd flour, *per man*, ...	22 *d.*
Do. coarse, do.	15 *d.*	Barley flour, do.	11 *d.*

C. Vegetables.

Fennel, *per man*, ...	10 *d.*	Garlic flowers, *per sér*, ...	1 *d.*
Spinach, do.	16 *d.*	Upalhák, (from Kashmír) do.	1 *d.*
Mint, do.	40 *d.*	Jítú, do.	3 *d.*
Onions, do.	6 *d.*	Ginger, do.	2½ *d.*
Garlic, do.	40 *d.*	Póí, do.	1 *d.*
Turnips, do.	21 *d.*	Kachnárbuds, do.	½ *d.*
Cabbage, *per sér*, ...	1 *d.*	Chúká (sorrel), do.	½ *d.*
Kankachhú, from Kashmír, do.	4 *d.*	Bat'hwah, do.	¼ *d.*
Duṇwrétú, do.	2 *d.*	Ratsaká, do.	1 *d.*
Shaqáqul (wild carrot), do. ..	3 *d.*	Chaulái, do.	¼ *d.*

D. Living animals and meats.

Dáshmandí sheep, *per head*, ..	6½ *R.*	Duck, *per head*, ...	1 *R.*
Afghán sheep, 1st kind, do.	2 *R.*	Tughdarí (bustard), do.	20 *d.*
Do., 2d kind, do.	1½ *R.*	Kulang (heron), do.	20 *d.*
Do., 3d kind, do.	1¼ *R.*	Jarz (a kind of bustard), do.	18 *d.*
Kashmír sheep, do.	1½ *R.*	Durráj (black patridge), do.	3 *d.*
Hindustani sheep, do.	1½ *R.*	Kabg, (partridge), do.	20 *d.*
Barbarí goat, 1st kind, do. ..	1 *R.*	Búdanah, do.	1 *d.*
Do., 2d kind, do.	¾ *R.*	Lawah, do.	1 *d.*
Mutton, *per man*, ...	65 *d.*	Karwának (stone curlew), do.	20 *d.*
Goat, do.	54 *d.*	Fákhtah, (ringdove), do.	4 *d.*
Geese, *per head*, ...	20 *d.*		

E. Butter, Sugar, &c.

G'hí, *per man*, ...	105 *d.*	Refined sugar, *per sĕr*, ...	6 *d.*
Oil, do.	80 *d.*	White sugar candy, do.	5½ *d.*
Milk, do.	25 *d.*	White sugar, *per man*, ...	128 *d.*
Curds, do.	18 *d.*	Brown sugar, do.	56 *d.*

F. Spices.

Saffron, *per sér*,	400 *d.*	Aniseed, *per sér*,	2 *d.*
Cloves, do.	60 *d.*	Turmeric (Hind. *haldi*) do.	10 *d.*
Cardamums, do.	52 *d.*	Coriander seed, do.	3 *d.*
Round pepper, do.	17 *d.*	Siyáhdánah(Hind.*kalaunji*),do.	1½ *d.*
Long pepper, do.	16 *d.*	Assafœtida, do.	2 *d.*
Dry ginger, do.	4 *d.*	Sweet fennel, do.	1 *d.*
Fresh do., do.	2½ *d.*	Cinnamon, do.	40 *d.*
Cummin seed,do.	2 *d.*	Salt, *per man*,	16 *d.*

G. Pickles.

Sour limes, *per sér*,	6 *d.*	Pickled quinces, *per sér*,	9 *d.*
Lemon-juice, do.	5 *d.*	Do. garlic, do.	1 *d.*
Wine vinegar,	5 *d.*	Do. onions, do.	½ *d.*
Sugarcane vinegar, do.	1 *d.*	Do. bádinján (egg-plant,) do.	1 *d.*
Pickled ashtarghár, do.	8 *d.*	Do. raisins & munaqqa, do.	8 *d.*
Mangoes in oil, do.	2 *d.*	Do. kachnár, do.	2 *d.*
Do. in vinegar, do.	2 *d.*	Do. peaches, do.	1 *d.*
Lemons in oil, do.	2 *d.*	Do. sahajnah(horse-raddish),	1 *d.*
Do. in vinegar, do.	2 *d.*	Do. karílbuds (capparis), do.	⅛ *d.*
Do. in salt, do.	1½ *d.*	Do. karílberries, do.	½ *d.*
Do. in lemon-juice,do.	3 *d.*	Do. súran, do.	1 *d.*
Pickled ginger,	2½ *d.*	Do. mustard,	¼ *d.*
Adarshákh, do.	2½ *d.*	Do. tórí (a kind of cucumber,)	½ *d.*
Turnips in vinegar, do.	1 *d.*	Do. cucumbers, do.	½ *d.*
Pickled carrots, do.	½ *d.*	Do. bádrang, (gourd) do.	½ *d.*
Do. bamboo, do.	4 *d.*	Do. kachálú, do.	½ *d.*
Do. apples, do.	8 *d.*	Do. raddishes, do.	½ *d.*

ÁÍN 28.

THE FRUITERY.

His Majesty looks upon fruits as one of the greatest gifts of the Creator, and pays much attention to them. The horticulturists of Irán and Túrán have, therefore, settled here, and the cultivation of trees is in a flourishing state. Melons and grapes have become very plentiful and excellent; and water-melons, peaches, almonds, pistachios, pomegranates, &c., are everywhere to be found. Ever since the conquest of Kábul, Qandahár, and Kashmír, loads of fruits are imported; throughout the whole year the stores of the dealers are full, and the bázárs well supplied. Muskmelons come in season, in Hindústán, in the month of *Farwardín* (February—March), and

are plenty in *Urdíbihisht* (March—April). They are delicious, tender, opening, sweet smelling, especially the kinds called *náshpáti, bábáshaikhi, 'alishérí, alchah, barg i nai, dúd i chirágh, &c.* They continue in season for two months longer. In the beginning of *Shariwar*, (August) they come from Kashmír, and before they are out of season, plenty are brought from Kábul; during the month of *Azar* (November) they are imported by the caravâns from Badakhshán, and continue to be had during *Dai* (December.) When they are in season in Zábulistán, good ones are also obtainable in the Panjáb; and in Bhakkar and its vicinity they are plentiful in season, except during the forty cold days of winter. Various kinds of grapes are here to be had from *Khurdád* (May) to *Amurdád* (July), whilst the markets are stocked with Kashmír grapes during *Shahriwar*. Eight sérs of grapes sell in Kashmír at one dám, and the cost of the transport is two rupees *per man*. The Kashmírians bring them on their backs in conical baskets, which look very curious. From *Mihr* (September) till *Urdíbihisht* grapes come from Kábul, together with cherries,[1] which his Majesty calls *sháhálú*, seedless pomegranates, apples, pears, quinces, guavas, peaches, apricots, girdálús, and álúchas, &c., many of which fruits grow also in Hindústán. From Samarqand even they bring melons, pears, and apples.

Whenever his Majesty wishes to take wine, opium, or *kúknar* (he calls the latter *sabras*), the servants in charge place before him stands of fruits; he eats a little, but most is distributed. The fruits are marked according to their degree of excellence: melons of the first quality are marked with a line drawn round the top; those of the second, with two lines; and so on.

In this department Mansabdárs, Ahadís, and other soldiers are employed; the pay of a foot soldier varies from 140 to 100 *d.*

The following tables contain particulars regarding the names, seasons, taste, and prices, of various fruits.

A. Túráni Fruits.

Arhang[2] melons, 1st quality, @ 2½ *R.*	Kábul and European apples, 5 to 10 for.....1 *R.*
Do., 2nd and 3rd do., @ 1 to 2½ *R.*	
Kábul melons, 1st do., @ 1 to 1½ *R.*	Kashmír grapes, *per man*,.... 108 *d.*
Do., 2d do., @ ¾ to .....1 *R.*	Dates, *per sér*, ...10 *d.*
Do., 3rd do., @ ½ to ..... ¾ *R.*	Raisins, do. ..... 9 *d.*
Samarqand apples, 7 to 15 for 1 *R.*	Ábjósh (large raisins), do..... 9 *d.*
Quinces, 10 to 30 for .....1 *R.*	Plums, do., ... 8 *d.*
Guavas, 10 to 100 for .....1 *R.*	Khúbání (dried apricots), *per sér*, 8 *d.*
Pomegranates, *per man*, 6½ to 15 *R.*	Qandahár dry grapes, do., .. 7 *d.*

[1] The original has a word *kílás*, which is not to be found in our dictionaries. It may be *cerasus*.

[2] A town in Badakhshán.

Figs, *per sér*, ...	7 *d.*	Chilghúzah nuts, *per sér*, ...	8 *d.*
Munaqqa, do.	6¾ *d.*	Sinjid (jujubes), do.....	6½ d.
Jujubes, do.	3½ *d.*	Pistachios, do.	6 *d.*
Almonds, without the shell, do.	28 *d.*	Jauz (nuts), do.....	4½ *d.*
Do., with do., do.	11 *d.*	Filberts, do.	3 *d.*
Pistachios, do.	9 *d.*	Hazel nuts, do.	2½ *d.*

B. The sweet fruits of Hindustan.

Mangoes, *per hundred*, up to .	40 *d.*	Usírá,.....	*
Pineapples, one for	4 *d.*	Dates, *per sér*, ...	4 *d.*
Oranges, two for	1 *d.*	Angúhal, ...	*
Sugarcanes, two for	1 *d.*	Délá, do.	1 *d.*
Jackfruits, two for	1 *d.*	Gúlah, ...	*
Plantains, do.	1 *d.*	Bholsarí, *per sér*, ...	4 *d.*
Bér, *per sér*, ...	2 *d.*	Tarkul, two for	1 *d.*
Pomegranates, *per man*, 80 to	100 *d.*	Paniálah, *per sér*, ...	2 *d.*
Guavas, two for.....	1 *d.*	Lahsaurah, do.	1 *d.*
Figs, *per sér*, ...	1 *d.*	Gumbhí, do.	4 *d.*
Mulberry, do.....	2 *d.*	Karahrí,.....	4 *d.*
Custard apples,[1] one for	1 *d.*	Tarrí, ...	*
Melons, *per man*, ...	40 *d.*	Bangah, two for	1 *d.*
Water melons, one.....	2 to 10 *d.*	Gúlar, *per sér*, ...	2 *d.*
K'hirní, *per sér*,.....	4 *d.*	Pílú, do.....	2 *d.*
Mahuwá, do.....	1 *d.*	Barautah, ...	*
Dép'hal, do.	4 *d.*	Piyár, do.	4 *d.*
Téndú, do.....	2 *d.*		

Mulberries and gúlars are in season during *spring;* pine apples, oranges, sugarcane, béers, úsírás, bhólsarís, gumbhís, dép'hals during *winter*; jackfruits, tarkuls, figs, melons, lahsauras, karahrís, mahuwás, téndús, pílús, barautahs, during *summer;* and mangoes, plantains, dates, delas, gúlahs, pomegranates, guavas, watermelons, paniálas, bangahs, k'hirnís, piyárs, during the rains.

C. Dried Fruits.

Cocoanuts, one for	4 *d.*	Mak'háná, *per sér*,.....	4 *d.*
Dry Dates, *per sér*, ...	6 *d.*	Súpyárí, do.	8 *d.*
Walnuts, do.	8 *d.*	Kaulgattah, do.	2 *d.*
Chiraunchí, do.	4 *d.*		

Dates, walnuts, chiraunchís, and kaulgattahs are in season during *summer*, and cocoanuts, mak'hánás and supyáris, during *winter*.

---

[1] The original says that custard apples are to be had throughout the whole year. | This seems a mistake of the MSS. The remark suits the next fruit (melons).

* The Original does not mention the price.

D. Vegetables.

Palwal, *per sér*, ...	2 *d.*	Kachálú, *per sér*, ...	2 *d.*
Gourd, one.....	2 *d.*	Chachíndá, do.	2 *d.*
Bádinján, *per sér*, ...	1½ *d.*	Súran, do.	1 *d.*
Turai, do...	1½ *d.*	Carrots, do.	1 *d.*
Kandúrí, do.	1½ *d.*	Sing'hárah, do.	3 *d.*
Sénb, do.	1½ *d.*	Sálak, do.	2 *d.*
Pét'h, do.	1½ *d.*	Pindálú, do.	2 *d.*
Karílah, do.	1½ *d.*	Séálí,.....	*
Kakúrah, do.....	1½ *d.*	Kasérú do.....	*3 *d.*

Súrans and séálís are in season during *summer;* palwals, gourds, turais, kachálús, chachíndás, kandúrís, sénbs, pét'hs, karílahs, kakúrahs, and sing'hárahs during the *rains;* and carrots, sálaks, pindálús, and kasérús, during *winter*. Bádinjáns are to be had throughout the year.

E. Sour Fruits.

Limes, *four* up to	1 *d.*	G'hép,.....	*
Amalbét, do.....	1 *d.*	Bijaurá, one for.....	8 *d.*
Galgal, two up to	1 *d.*	Anwlah, *per sér*,.....	2 *d.*

Limes and ánwlahs are to be had in summer, the others during the *rains*.

F. Fruits somewhat acid.

Ambilí, *per sér*, ...	2 *d.*	Kait, four up to.....	1 *d.*
Badhal, one for.....	1 *d.*	Kánkú, ...	*
Kamrak, four up to	1 *d.*	Pákar, *per sér*, ...	½ *d.*
Nárangí, two up to	1 *d.*	Karná, one for	1 *d.*
Mountain grapes, ...	*	Labhírá	*
Jáman, *per sér*, ...	1 *d.*	Janbhírí, five up to	1 *d.*
P'hálsah, do.	1½ *d.*	Garnah, ...	*
Karaundá, do.	1 *d.*		

Kamraks and nárangís are in season during *winter;* ambilís, badhals, mountain-grapes, p'hálsas, labhíras, during *summer*; and kaits, pákars, karnás, jámans, karaundás, jhanbhírís, during the *rains*.

The fruits of Hindustan are either sweet, or subacid, or sour; each kind is numerous. Some fruits also taste well when dry; others as above described are used when cooked. I shall give now a few details.

The Mangoe. The Persians call this fruit *Naghzak*, as appears from a verse of *Khusrau*.[1] This fruit is unrivalled in colour, smell, and taste; and some of the *gourmands* of Túrán and Irán place it above muskmelons and grapes.

[1] *Vide* the fourth note on p. 75 of my | text edition.

* The Original does not mention the price.

In shape it resembles an apricot, or a quince, or a pear, or a melon, and weighs even one sér and upwards. There are green, yellow, red, variegated, sweet, and subacid mangoes. The tree looks well, especially when young; it is larger than a nut tree, and its leaves resemble those of the willow, but are larger. The new leaves appear soon after the fall of the old ones in autumn, and look green and yellow, orange, peach-coloured, and bright red. The flower which opens in spring, resembles that of the vine, has a good smell, and looks very curious. About a month after the leaves have made their appearance, the fruit is sour, and is used for preserves and pickles. It improves the taste of *qalyahs* (p. 61.) as long as the stone has not become hard. If a fruit gets injured whilst on the tree, its good smell will increase. Such mangoes are called *kóilás*. The fruit is generally taken down when unripe, and kept in a particular manner. Mangoes ripened in this manner are much finer. They mostly commence to ripen during summer, and are fit to be eaten during the rains; others commence in the rainy season, and are ripe in the beginning of winter: the latter are called *Bhadiyyah*. Some trees bloom and yield fruit the whole year; but this is rare. Others commence to ripen, although they look unripe; they must be quickly taken down; else the sweetness would produce worms. Mangoes are to be found every where in India, especially in Bengal, Gujrát, Málwah, Khándésh, and the Dekhan. They are rarer in the Pánjab, where their cultivation has, however, increased, since his Majesty made Láhór his capital. A young tree will bear fruit after four years. They put also milk and treacle round about the tree, which makes the fruits sweeter. Some trees yield in one year a rich harvest, and less in the next: others yield for one year no fruit at all. When people eat a great deal of mangoes, they may promote digestion by partaking of milk with the kernels of the mangoe stones. The kernels of old stones are subacid, and taste well: when two or three years old, they are used as medicine. If a half ripe mangoe, together with its stalk to a length of about two fingers, be taken from the tree, and the broken end of its stalk be closed with warm wax, and kept in butter, or honey, the fruit will retain its taste for two or three months, whilst the colour will remain even for a year.

Pineapples[1] are also called *Kat'hal i Safarí*, or the jackfruits for travels, because young plants, put into a vessel, may be taken on travels, and will yield fruits. In colour and shape they resemble an oblong orange; and in taste and smell, a mangoe. The plant is about a yard long, and its leaves have the shape of a hand. The edges of the leaves are like a saw. The fruit forms at the end of the stalk, and has a few leaves on its top. When the fruit is plucked, they cut out these leaves, separate them, and

[1] Jahángír in his *Memoirs* (*Toozuk i Jahángíri*, ed. Sayyid Ahmad, p. 3,) states that the pineapples, at his time, came from the harbour towns held by the Portuguese

put them singly into the ground: they are the seedlings. Each plant bears only once, and one fruit only.

Oranges have the colour of saffron, and the shape of quinces. They belong to the best fruits to be had in Hindústán. The tree resembles the lime tree; its flower has a weak, but fine smell.

Sugarcane, which the Persians call *Naishakar*, is of various kinds; one species is so tender and so full of juice, that a sparrow can make it flow out by pecking it; and it would break to pieces, if let fall. Sugarcane is either soft, or hard. The latter is used for the preparation of brown sugarcandy, common sugar, white candy, and refined sugar, and thus becomes useful for all kinds of sweetmeats. It is cultivated as follows. They put some healthy sugarcane in a cool place, and sprinkle it daily with water. When the sun enters the sign of Aquarius, they cut off pieces, a cubit and upwards in length, put them into soft ground, and cover them up with earth. The harder the sugarcane is, the deeper they put it. Constant irrigation is required. After seven or eight months it will come up.

Sugarcane is also used for the preparation of intoxicating liquor, but brown sugar is better for this purpose. There are various kinds of preparing it. One way is as follows. They pound *Babúl* bark, mixing it at the rate of ten sérs to one *man* of sugarcane, and put three times as much water over it. Then they take large jars, fill them with the mixture, and put them into the ground, surrounding them with dry horse-dung. From seven to ten days are required to produce fermentation. It is a sign of perfection, when it has a sweet, but astringent taste. When the liquor is to be strong, they again put to the mixture some brown sugar, and sometimes even drugs and perfumes, as ambergis, camphor, &c. They let also meat dissolve in it. This beverage when strained, may be used, but it is mostly employed for the preparation of arrack.

They have several methods of distilling it; *first*, they put the above liquor into brass vessels, in the interior of which a cup is put, so as not to shake, nor must the liquid flow into it. The vessels are then covered with inverted lids which are fastened with clay. After pouring cold water on the lids, they kindle the fire, changing the water as often as it gets warm. As soon as the vapour inside reaches the cold lid, it condenses, and falls as arrack into the cup. *Secondly*, they close the same vessel with an earthen pot, fastened in the same manner with clay, and fix to it two pipes, the free ends of which have each a jar attached to them, which stands in cold water. The vapour through the pipes will enter the jars, and condense. *Thirdly*, they fill an earthen vessel with the above mentioned liquor, and fasten to it a large spoon with a hollow handle. The end of the handle they attach to a pipe, which leads into a jar. The vessel is covered with a lid, which is kept full with cold water. The arrack, when condensed, flows through the

spoon into the jar. Some distil the arrack twice, when it is called *Duátashah*, or twice burned. It is very strong. If you wet your hands with it, and hold them near the fire, the spirit will burn in flames of different colours, without injuring the hands. It is remarkable that when a vessel, containing arrack, is set on fire, you cannot put it out by any means; but if you cover the vessel, the fire gets at once extinguished.

The *Jackfruit* has the shape of a black pudding, looks greenish, and is sometimes a yard long, and half a yard broad. When small, it resembles a water melon; its peel is full of thorns. It grows out of the branches, the trunk, and the roots. Those that grow below the ground are sweetest. On opening you see round clusters, so viscous, that the fingers stick together, when you take them out. The tree looks like a nut tree, but is somewhat bigger, and has larger leaves. The flower, like the fruit, has a good smell. The fruits are also taken down, when unripe. They then apply chalk, &c., when the fruits will get ripe.

The *Plantain* tree looks straight like a spear; the leaves come out of the trunk thick and soft, and resemble an unsewn plaited sleeve, but are much larger and wider. Out of the middle rises something looking like a spindle, of a lilac colour; this is the bud. The fruit consists of a cluster of seventy to eighty plantains. In shape they resemble small cucumbers; the peel is easily removed. As plantains are very heavy, you cannot eat many. There are various kinds of plantains. The plant is every year cut down, and a stump only is left of it: if this is not done, it will no longer bear fruit. The vulgar believe that the plantain tree yields camphor, but this is wrong; for the camphor tree, as shall be hereafter explained, is a different tree, although it has the same name. They also say that pearls originate in plantain trees,—another statement upon which the light of truth does not shine.

The *Mahuwá* tree resembles the mangoe tree; its wood is used for building purposes. The fruit, which is also called *Gilaundah*, yields an intoxicating liquor.

The *Bhólsirí* tree is large and handsome;[1] the fruit has an orange colour, and resembles jujubes.

The *Tarkul* tree, and its fruit, resemble the cocoanut palm and its fruit. When the stalk of a new leaf comes out of a branch, they cut off its end, and hang a vessel to it, to receive the out-flowing juice. The vessel will fill twice or three times a day. The juice is called *tárí;* when fresh it is sweet; when it is allowed to stand for some time, it turns subacid, and is inebriating.

The *Paniálah* fruit resembles the *Zardálú;* and its tree, the lime tree; the leaves are like those of the willow. When unripe, the fruit is green; and red, when ripe.

[1] The text has here a few words the meaning of which I do not understand.

The *Gumbhí* has a stem the branches of which are like creepers; its leaves and fruits, as those of the *kunár*, come from below the roots.

The *Tarrí* forms at the root; it grows mostly in the mountains, and weighs a *man*, more or less, when the creeper is a year old; and two, when two years old. It looks like a millstone. When older, it grows larger according to the same proportion. Its leaves resemble those of the water melon.

The *Piyár* is like a small grape; brownish and sweet. The inside of the kernel is like butter, and is used in the preparation of food; it is called *Chiraunjí*. Its tree is about a yard high.

The *Cocoanut* is called by the Persians *Jauz i Hindí;* the tree resembles the date tree, but is larger; its wood, however, looks better, and the leaves are larger. The tree bears fruit throughout the whole year; they get ripe in three months. They are also taken down, when unripe and green, and kept for some time. Their inside contains a cup full of milk-like juice, which tastes well, and is very often drunk in summer, mixed with sugar. When ripe the fruit looks brown. The juice has now become solid, and gets black when mixed with butter; it is sweet and greasy. When eaten with *pán*-leaves, it makes the tongue soft and fresh. The shell is used for spoons, cups, and *ghichaks* (a kind of violin). There are nuts having four, three, two, and one, holes or eyes; each kind is said to possess certain qualities, the last being considered the best. Another kind is used for the preparation of an antidote against poison. The nuts weigh sometimes twelve sérs and upwards. The bark of the tree is used for ropes; the large ropes used on ships are made of it.

Dates are called in Hindí *Pindk'hajúr*. The tree has a short stem, rising little above the ground, and produces from four to five hundred fruits.

The *Súpyárí*, or betel nut, is called in Persian *fúfal*. The tree is graceful, and slender like the cypress. The wind often bends it, so that its crown touches the ground; but it rises up again. There are various kinds. The fruit when eaten raw, tastes somewhat like an almond, but gets hard when ripe. They eat it with betel leaves.

The *Sing'hárah* is a triangular fruit; its creeper grows in tanks, and the fruit is on the surface of the water. They eat it raw or roasted.

The *Sálak* grows in tanks under the earth. They go into the water and dig it up.

The *Pindálú* is reared on lattice work, and grows about two yards high. Its leaf resembles the betel leaf; they dig up the root.

The *Kasérú* grows in tanks. When the water gets low, they take it out of the ground and eat it, raw or boiled.

The *Séálí* root is long and conical; the plant is a creeper, to whose root the fruit is attached.

The *Orange* has the shape of an egg. One kind is called *kághazí*. Between the peel and the fruit is a thin white membrane. The fruit is juicy, and tastes well; one kind is to be had throughout the whole year.

The *Amalbét* is like a lime, and very sour. If you put a steel needle into this fruit, the needle in a short time will dissolve; and a white shell when put into its juice, will soon disappear.

The *Karná* resembles an apple, and appears after the plant has reached the third year. At first the fruit is green, sour, and also somewhat bitter, but turns afterwards yellow and bitter; when ripe it is red and sweet. When it is kept long, it turns green again. The tree looks like an orange tree, but the leaves are somewhat broader, and the buds like fine arrows. The flower is white, and has four petals and yellow stamens. It has a fine smell, and is used for ambergis; but it is beyond my power to describe the process of the manufacture.

The *Betel* leaf is properly speaking a vegetable, but *connoisseurs* call it an excellent fruit. Mír Khusrau of Dihlí in one of his verses says, "It is an excellent fruit like the flower of a garden, the finest fruit of Hindústán." The eating of the leaf renders the breath agreeable, and repasts odorous. It strengthens the gums, and makes the hungry satisfied, and the satisfied hungry. I shall describe some of the various kinds. 1. The leaf called *Bilahrí* is white and shining, and does not make the tongue harsh and hard. It tastes best of all kinds. After it has been taken away from the creeper, it turns white, with some care, after a month, or even after twenty days, when greater efforts are made. 2. The *Kákér* leaf is white with spots, and full, and has hard veins. When much of it is eaten, the tongue gets hard. 3. The *Jaiswár* leaf does not get white, and is profitably sold mixed with other kinds. 4. The *Kapúrí* leaf is yellowish, hard, and full of veins, but has a good taste and smell. 5. The *Kapúrkánt* leaf is yellowish-green, and pungent like pepper; it smells like camphor. You could not eat more than ten leaves. It is to be had at Banáras; but even there it does not thrive in every soil. 6. The *Banglah* leaf is broad, full, hard, plushy, hot, and pungent.

The cultivation is as follows. In the month of *Chait* (March—April), about New-Year's time, they take a part of a creeper four or five fingers long with *Karhanj* leaves on it, and put it below the ground. From fifteen to twenty days after, according as leaves and knots form, a new creeper will appear from a knot, and as soon as another knot forms, a leaf will grow up. The creepers and new leaves form for seven months, when the plant ceases to grow. No creeper has more than thirty leaves. As the plant grows, they prop it with canes, and cover it, on the top and the sides, with wood and straw, so as to rear it up in the shade. The plant requires continually to be watered, except during the rains. Sometimes they put

milk, sesame oil and its seeds pressed out, about the plant. There are seven kinds of leaves, known under nine names: 1. The *Karhanj* leaf, which they separate for seedlings, and call *Péṛi*. The new leaf is called *Gadautah*. 2. The *Nautí* leaf. 3. The *Bahutí* leaf. 4. The *Chhiw* leaf. 5. The *Adhinídá* leaf. 6. The *Agahniyah* or *Léwár* leaf. 7. The *Karhanj* leaf itself. With the exception of the *Gadautah*, the leaves are taken away from the creeper when a month old. The last kind of leaf is eaten by some; others keep it for seedlings: they consider it very excellent, but *connoisseurs* prefer the *Péṛi*.

A bundle of 11,000 leaves was formerly called *Lahásah*, which name is now given to a bundle of 14,000. Bundles of 200 are called *Dhóli*; a *lahásah* is made up of *dholis*. In winter they turn and arrange the leaves after four or five days; in summer every day. From 5 to 25 leaves, and sometimes more, are placed above each other, and adorned in various ways. They also put some betelnut and *kat'h*[1] on one leaf, and some chalk[2] paste on another, and roll them up: this is called a *bérah*. Some put camphor and musk into it, and tie both leaves with a silk thread. Others put single leaves on plates, and use them thus. They are also prepared as a dish.

ÁÍN 29.

ON FLAVOURS.

As I have mentioned various kinds of food, I shall also say something on flavours. *Heat* renders pungent that which is agreeable, bitter that which is greasy, and brackish that which has the proper flavour; *cold* makes the first acid, the second astringent, and the third tart. Astringency when affecting the tongue merely is called in Arabic *qabz;* and *'ufúçat*, when affecting the whole frame. A *moderate* temperature renders the first quality greasy, the second sweet, and the last tasteless. These are the fundamental flavours. Others count four, *viz.*, the sweet, the bitter, the acid, the brackish. The flavours produced by combinations is endless; some have however names, *e. g.*, *bashá'at* is a bitter and tart flavour, and *zu'úqah* a combination of the brackish and the bitter.

ÁÍN 30.

ON PERFUMES.

His Majesty is very fond of perfumes, and encourages this department from religious motives. The court-hall is continually scented with ambergis, aloewood, and compositions according to ancient recipes, or mixtures invented

[1] An astringent vegetable extract eaten by the natives of India with the *pán* leaf. It looks brown, and stains the tongue and the gums red.

[2] In Persian *chúnah;* but Anglo-Indice, *chunám*.

by his Majesty; and incense is daily burnt in gold and silver censers of various shapes, whilst sweet-smelling flowers are used in large quantities. Oils are also extracted from flowers, and used for the skin and the hair. I shall give a few recipes.

1. *Santúk* is used for keeping the skin fresh: 1½ tólahs Civet; 1 *t.* *Chúwah*;[1] 2 máshahs *Chambéli* essence; 2 bottles of rose-water. 2. *Argajah*, ¾ *s.* sandel wood; 2 *t.* Iksír and Míd; 3 *t.* Chúwah; 1 *t.* violet root, and géhlah (the seed of a plant); ½ *m.* camphor; 11 bottles of rose-water. It is used in summer for keeping the skin cool. 3. *Gulkámah.* Pound together 1 *t.* best Ambergis; ½ *t.* Ládan; 2 *t.* best musk; 4 *t.* wood of aloes, and 8 *t.* Iksír i 'abír; and put it into a porcelain vessel, mix with it a sér of the juice of the flower called *Gul i surkh*, and expose it to the sun, till it dries up. Wet it in the evening with rose-water and with the extract of the flower called *Bahár*, and pound it again on *Samáq* stone. Let it stand for ten days, mix it with the juice of the flower called *Bahár i Náranj*, and let it dry. During the next twenty days, add occasionally some juice of the black *Raihán* (also called black *Názbúi*). A part of this mixture is added to the preceding. 4. *Rúhafzá*, 5 *s.* Aloewood; 1¼ *s.* Sandelwood; 1¼ *s.* Ládan; Iksír, Lúbán, Dhúp (a root brought from Kashmír), 3½ *t.* of each; 20 *t.* violet root; 10 *t.* Ushnah, called in Hind. *Chharílah.* Press till it gets tenacious like syrup. To be made into cakes with four bottles of rose-water. It is burnt in censers, and smells very fine. 5. *Opatnah* is a scented soap. 2¾ *s.* Ládan; 1½ *s.* 5 *d.* Aloewood; the same quantity of Bahár i Náranj, and 1½ *s.* of its bark; 1 *s.* 10 *d.* Sandelwood; 1 *s.* 5 *d.* Sumbul uṭṭíb, called in Hind. *Chhar*; the same quantity of Ushnah; 38½ *t.* musk; 1 *s.* 4 *t.* *páchah* leaves; 36 *t.* apples; 11 *t.* Su'd, called in Hind. *Móth*; 5 *d.* violet root; 1 *t.* 2 *m.* Dhúp; 1½ *t.* Ikankí (a kind of grass); the same quantity of Zurumbád, called in Hind. *kachúr*, (zerumbet); 1 *t.* 2 *m.* Lúbán; 106 bottles of rose-water; 5 bottles of extract of Bahár. Pound the whole, sift it, and boil slowly in rose-water. When it has become less moist, let it dry. 6. *'Abírmáyah*,[2] 4 *d.* Aloewood; 2 *d.* Sandelwood; 1 *d.* violet root; 3 *d.* Sumbuluṭṭíb; 3 *d.* Duwálak; 4 *t.* musk of Khatá (Cathay); 2½ *d.* Ládan; 7½ *d.* Bahár i Náranj. Pound, and sift, boil over a slow fire in 10 bottles of rose-water, and put it into the shade to dry. 7. *Kishtah*, 24 *t.* Aloewood; 6½ Ládan, Lúbán, and Sandelwood; Iksír and Dhúp, 2 *t.* of each; violet root and musk, 2 *t.*; 1 *t.* Ushnah; mix with 50 *t.* refined sugar, and boil gently in 2 bottles of rose-water. It is made into cakes. It smells very fine when burnt, and is exhilarating. 8. *Bukhúr*, 1 *s.* Aloewood and Sandelwood; ½ *s.* Ládan; 2 *t.*

[1] This and the following names of perfumes are explained further on in this chapter.

[2] *Vide* below the twelfth flower.

musk; 5 *t.* Iksír; mix with two sérs of refined sugar and one bottle of rosewater over a slow fire. 9. *Fatílah*, 5 *s.* Aloewood; 72 *t.* Sandelwood; Iksír and Ládan, 20 *t.* of each; 5 *t.* Violet root; 10 *t.* Lúbán; 3 *t.* refined sugar; mix with two bottles of rose-water, and make into tapers. 10. *Bárját*, 1 *s.* Aloewood; 5 *t.* Ládan; 2 *t.* musk; 2 *t.* Sandelwood; 1 *t.* Lúbán; ½ *t.* Camphor. Then distill it like *Chúwah*, (*vide* below). 11 *'Abír-Iksír*, ¾ *s.* Sandelwood; 26 *t.* Iksír; 2 *t.* 8 *m.* musk. Pound it, and dry it in the shade. 12. *Ghásúl* (a liquid soap), 35 *t.* Sandelwood; 17 *t.* Katúl (?)[1]; 1 *t.* musk; 1 *t.* Chúwah; 2 *m.* Camphor; 2 *m.* Mid. Mix with 2 bottles of rose-water.

A List of Perfumes[2] *and their Prices.*

'Ambar i ashhab,	1 to 3 Muhurs, *per tólah.*

A List of fine smelling Flowers.

1. The *Sewtí.* Whitish; blooms the whole year, especially towards the end of the rains.
2. The *Bhólsarí.* Whitish; in the rains.
3. The *Chambéli.* White, yellow, and blue. In the rains, and partly during winter.
4. *Ráibél.* White and pale yellow. In the end of the hot season, and the beginning of the rains.
5. The *Móngrá.* Yellow. In summer.
6. The *Champah.* Yellow. All the year; especially when the sun stands in Pisces and Aries.
7. *Kétkí.* The upper leaves are green, the inner ones yellowish-white. It blooms during the hot season.
8. *Kúzáh.* White. During the hot season.
9. The *Pádal.* Brownish lilac. In spring.
10. The *Júhí.* White and yellow, like jasmin. During the rains.
11. The *Niwárí.* Whitish. In spring.
12. The *Nargis.* White. In spring.
13. The *Kéwarah.* From Leo to Libra.
14. The *Chaltah.*
15. The *Gulál.* In spring.
16. The *Tasbih i Gulál.* White. In winter.
17. The *Singárhár.* It has small white petals. In the hot season.
18. The *Violet.* Violet. In the hot season.
19. The *Karnah.* White. In spring.
20. The *Kapúr bél.*
21. The *Gul i Za'farán.* Lilac. In autumn.

A List of Flowers notable for their beauty.

1. The *Gul i Aftáb.* Yellow.
2. The *Gul i Kanwal.* White, and also bluish. In the rains.

* The original text does not mention the prices.

3. The *Ja'fari.* A golden yellow, or orange coloured, or greenish. In spring.

4. The *Gudhal.* Of different colours, red, yellow, orange, white. In the rains.

5. The *Ratanmanjani.* Bright red. It is smaller than jasmin. All the year.

6. The *Késú.* In the hot season.

7. The *Sénbal.* Dark red. In spring.

8. The *Ratanmálá.* Yellow. In spring.

9. The *Sónzard.* Yellow. In spring.

10. The *Gul i Máltí.*

11. The *Karn p'húl.* A golden red.

12. The *Karíl.* In spring.

13. The *Kanér.* Red and white.

14. The *Kadam.* Outside green; in the middle yellow threads; the inside leaves white. In spring.

15. The *Nágkésar.* In spring.

16. The *Surpan.* White, with red and yellow stripes in the middle. During the rains.

17. The *Sirí k'handí.* Inside yellowish white, outside reddish. In spring.

18. The *Jait.* Inside yellow, outside a blackish red. In the rains.

19. The *Champalah.* White, like orange blossoms. In spring.

20. The *Láhí.* It blooms in Pisces.

21. The *Gul i Karaundah.* White. It is smaller than the Chambéli, and blooms during the rains.

22. The *D'hanantar* resembles the *Nilúfar.* During the rains.

23. The *Gul i Hinná.*

24. The *Dupahriyá.* Bright red, and white. All the year.

25. The *Bhún Champá.* Peach coloured.

26. The *Sudarsan.* Yellow; it resembles the *Nilúfar,* but is smaller.

27. The *Kangláí.* There are two kinds, red, and white.

28. The *Sirs.* Yellowish green. It is full of stamens. In spring.

29. The *San.* Yellow. During the rains.

On the Preparation of some Perfumes.

1. *'Ambar.* Some say that 'Ambar grows at the bottom of the sea, and that it is the food brought up again after eating, by various animals living in the sea. Others say that fishes eat it and die from it, and that it is taken from their intestines. According to some, it is the dung of the sea-cow, called *sárá;* or the foam of the sea. Others again say, it trickles from the

mountains of islands. Many look upon it as marine gum; others whose opinion I adopt, take it to be wax. It is said that on some mountains a great deal of honey is to be found, so much in fact that it runs into the sea; the wax rises to the surface, when the heat of the sun reduces it to a solid state. As the bees collect the honey from sweet smelling flowers, 'Ambar is, naturally, scented. Bees are also occasionally found in it. *Abú Síná* thinks that there is a fountain at the bottom of the sea, from which 'Ambar rills, when it is carried by waves to the shore. 'Ambar, when fresh, is moist; the heat of the sun causes it to dry up. It is of various colours: the white one is the best, and the black is the worst; the middling sort is pistachio-coloured and yellow. The best kind goes by the name of *ashhab*. It feels greasy, and consists of layers. If you break it, it looks yellowish white. The whiter, lighter, and more flexible it is, the better. Next in quality is the pistachio-coloured 'Ambar; and inferior to it the yellow kind, called *Khashkháshí*. The black kind is bad; it is inflammable. Greedy bázár-dealers will mix it with wax, *Mandal*, and *Ládan*, &c.; but not every one has recourse to such practices. *Mandal* is a kind of 'Ambar taken from the intestines of dead fishes; it does not smell much.

2. *Ládan* is also often called *'Ambar*. It is taken from a tree which grows in the confines of *Qibrus* (Cyprus) and *Qisús* (Chios) or *Qistús*. It is a moisture that settles on the leaves of the tree. When goats in grazing pass near it, the hairs of their legs and the horn of their hoofs stick to it, and the whole then dries up. Such Ládan as is mixed with goat's-hair, is counted superior. It looks greenish, and has a good smell. But Ládan which is mixed with horn is looked upon as inferior. Sometimes people tie ropes round about the trees, and collect the Ládan which sticks to them. Afterwards they boil it in water, clean it, and make it into cakes.

3. The *Camphor tree* is a large tree growing in the ghauts of Hindustan and in China. A hundred horsemen and upwards may rest in the shade of a single tree. Camphor is collected from the trunk and the branches. Some say that during summer a large number of serpents wind themselves round about the tree, for the sake of its coolness; people then mark such trees by shooting an arrow into the trunks, and collect the camphor during the winter. Others say that camphor trees are much frequented by leopards, which like camphor so much as never to go away from the trees. The camphor within the tree looks like small bits of salt; that on the outside like resin. It often flows from the tree on the ground, and gets after some time solid: If there are earthquakes during a year, or any other cosmical disturbances, camphor is found in large quantities.

Of the various kinds of camphor, the best is called *Ribáhí*, or *Qaiçúrí*. Although different in name, they are the same; for it is said

that the first camphor was found by a king of the name of *Ribáh* near *Qaiçúr*, which is a place near the island of Ceylon. According to some books, it is white like snow: and this is true, for I have broken it myself from the tree. Ibn Baiṭár, however, said that it was originally red and shining, and only got white by artificial crystallization. Whatever the case may be, there is certainly a kind of camphor which is white in its natural state. And of all other kinds it is the best, the whitest, which has the thinnest layers, the cleanest, and the largest. Inferior to it is the kind called *Qurqúi*, which is blackish and dirty. Still inferior is the light brown kind called *Kaukab*. The worst camphor is mixed with pieces of wood; it goes under the name of *Bálús*. By artificial crystallization each kind will become clean and white. In some books camphor in its natural state is called *Júdánah* or *Bhímsíni*. If kept with a few barley grains, or peppercorns,[1] or *surkh dánahs*, it will evaporate the less. The camphor which is made of *Zurumbád* by mixing it with other ingredients, is called *Chíní* or *Mayyit*-camphor. White Zurumbád is finely pounded, and mixed with sour cream, of cow or buffaloe's milk; on the fourth day they put fresh cream to it, and beat it with the hand till foam appears, which they take away. With this they mix some camphor, put it into a box, and keep it for some time in the husks of grains. Or, they reduce some white stone to fine powder, mix it at the rate of ten dirhams of it with two dirhams of wax, and half a dirham of oil of Violet, or oil of *Surkh Gul*. The wax is first melted, and then mixed with the powder, so as to form a paste. They then put it between two stones, and make it thin and flat. When it gets cold, it looks like camphor, bits of which are mixed with it. Unprincipled men profit in this manner by the loss of others.

4. *Zabád* (civet) is also called *Shákh*. It is a moist substance secreted during the rutting season by an animal which resembles a cat, having, however, a larger face and mouth. The zabád which is brought from the harbour-town of Sumatra, from the territory of Áchín, goes by the name of *Sumatra zabád*, and is by far the best. The moist substance itself is yellowish white. The animal has below its tail a bag, of the size of a small hazel nut, in which there are from five to six holes. The bag may be emptied every week or fortnight, and yields from half a tólah to eight máshahs. Some civet cats become so tame as to hold quiet when the bag is being emptied; but in the case of most animals, they have to catch hold of the tail, and draw it through the cage, when they take out the zabád with a shell, or by pressing gently against the bag. The price of a civet cat varies from 300 to 500 Rs. The zabád of the male is better than that of the female, because in the latter the vulva is just above the bag. When removed, the zabád is washed, and

[1] Bázár dealers here give a few peppercorns along with every piece of camphor.

becomes afterwards one of the finest perfumes. The smell will remain a long time in the clothes, and even on the skin. There are several ways of washing it. If the quantity be small, they put it into a cup, or if greater, into a larger vessel, and wash it thirty times in cold water, and three times in warm water. The latter renders it thin and removes impurities. Then they wash it again in cold water till it gets solid, when they wash it three times in lime juice, which removes all unpleasant smell. After this, they wash it again three times in cold water, pass it through a piece of cloth, put it into a China cup, and wash it three times in rose water. They then smear the zabád on the inside of the cup, keep it at night inverted in extract of Chambélí, or Ráibél, or Surkh gul, or Gul i Karnah, and expose it at daytime to the rays of the sun, covered with a piece of white cloth till all moisture goes away. It may then be used, mixed with a little rose water.

5. *Gaurah* looks greyish white, but does not smell so well as the preceding. It is a moisture secreted during the rutting season by an animal like the civet cat, but somewhat larger. It is also brought from the confines of Áchín. The price of this animal varies from 100 to 200 Rs.

6. *Mid*[1] resembles the preceding, but is inferior to it. They mix it with other substances; hence they sell it in larger quantities. The animal which yields Mid, is found in various countries, and only sells from five to six dáms. Some say that Mid is the dried bag of the civet cat, pounded and boiled in water; the greasy substance which rises to the surface is the Mid.

7. *'Ud*, or wood of Aloes, called in Hind. *Agar*, is the root of a tree. They lop it off and bury it in the earth, when whatever is bad rots, and the remainder is pure aloes. Some say that they do so with the whole tree. The statement occasionally found in some old books that the habitat of the tree is Central India, is an absurdity of fanciful writers. There are several kinds: the best is called *Mandalí*, and the second in quantity, *Jabalí* or *Hindí*. The smell of the wood, especially that of the first kind, is a preventive against fleas; but some think both kinds equal in this respect. Of other good kinds I may mention the *Samandúrí*; the *Qumárí*, which is inferior to it; the *Qáqulí*, next in rank; the *Barrí*; the *Qiṭ'í*; and the *Chinese*, also called *Qismúrí*, which is wet and sweet. Still inferior are the *Jaláli*, the *Máyátáqí*, the *Lawáqí*, the *Rítalí*.[2] But of all kinds the *Mandalí*, is the best *Samandúrí* is grey, fatty, thick, hard, juicy, without the slightest sign of whitishness, and burns long. The best of all is the black and heavy; in water it settles at the bottom, is not fibrous, and may be easily pounded. The wood which floats is looked upon as bad. Former kings transplanted the tree to Gujrát, and now-a-days it grows in Chánpánír. It is generally

[1] مِيد with the kasrah, a kind of perfume. *Kashfullughát.*

[2] The last three names are doubtful.

brought from Áchín and Dahnásarí. Nothing is known of the *habitat* mentioned in old books. Aloewood is often used in compound perfumes; when eaten, it is exhilarating. It is generally employed in incense; the better qualities, in form of a powder, are often used for rubbing into the skin and clothes.

8. *Chúwah* is distilled wood of aloes; it is in general use. The preparation is as follows: They take fine clay, mix it with cotton or rice bran, and beat it well. When properly intermixed, they take a small bottle large enough to put a finger into it, smear it all over with the clay, and let it dry. After this, they put very small pieces of wood of aloes into it, so as nearly to fill the bottle. The wood must have been kept wet for a week before. Another vessel, with a hole in the middle, is now placed on a three-legged stand. Into this vessel, they pass the neck of the little bottle inverted, placing a cup full of water at the bottom of the vessel, in such a manner that the mouth of the bottle reaches the surface of the water. On the top of the vessel they then put wild cow's dung, and light a gentle fire. Should flames break out, they extinguish them with water. The wood of aloes will then secrete a moisture which trickles on the surface of the water, where it remains. This is collected, and washed several times with water and rose water, to take off all smell of smoke. The oftener it is washed, and the older it gets, the better will be the scent. It looks black, although experienced people make it white. One sér of wood of aloes will yield from two to fifteen tólahs of Chúwah. Some avaricious dealers mix sandalwood or almonds with it, trying thereby to cheat people.

9. *Sandalwood* is called in Hind. *Chandan*. The tree grows in China. During the present reign, it has been successfully planted in India. There are three kinds, the white, the yellow, the red. Some take the red to be more refreshing than the white; others prefer the white. The latter is certainly more cooling than the red, and the red more so than the yellow. The best is that which is yellow and oily; it goes by the name of *Maqáçarí*. Sandalwood is pounded and rubbed over the skin; but it is also used in other ways.

10. *Siláras* (storax) is called in Arabic *Mí'ah*. It is the gum of a tree that grows in Turkey. The kind which is clear, is called *Míah i sáilah* (liquid); the other kinds, *Mí'ah i yábisah* (dry). The best kind is that which spontaneously flows out of the trunk; it is yellowish.

11. *Kalanbák* (calembic) is the wood of a tree brought from Zírbád (?);[1] it is heavy and full of veins. Some believe it to be raw wood of aloes. When pounded, it looks grey. They use it for compound perfumes; and they also make rosaries of it.

[1] *Zírbád* (Zírábád), a town near the frontiers of Bengal. *Ghiásullughát.*

12. The *Malágír* is a tree resembling the former, only that the wood is lighter and not veined. When pounded, it looks reddish white.

13. *Lubán* (frankincense) is the odorous gum of a tree which is found in Java. Some take it to be the same as *Mi'ah i yábisah*. When exposed to fire, it evaporates like camphor. The Lubán which the Persians call *Kundur i daryái* (mastix), is a resin brought from Yaman; but it is not odorous.

14. *Azfár uṭṭíb*, or scented finger nails, are called in Hind. *Nak'h*, and in Persian *Nákhun i bóyá*. It is the house of an animal, consisting, like a shell, of two parts. They have a good smell, as the animal feeds on sumbuls, and are found in the large rivers of Hindustan, Baçrah, and Bahrain, the latter being considered the best. They are also found in the Red Sea, and many prefer them to the other kinds. They warm them in butter; others expose them afterwards to the fire, pound them, and mix them with other perfumes.

15. *Sugandh gúgalá* (bdellium) is a plant very common in Hindustan; it is used in perfumes.

As I have said something on perfumes, I shall make a few remarks on several beautiful flowers.

1. The *Séwtí* resembles the Gul i Surkh, but is smaller. It has in the middle golden stamens, and from four to six petals. *Habitat*, Gujrát and the Dek'han.

2. Of the *Chambéli* there are two kinds. The *Rái Chambéli* has from five to six petals, outside red. The *Chambéli proper* is smaller, and has on the top a red stripe. Its stem is one and a half or two yards high, and hangs over the ground. It has many long and broad branches. It flowers from the first year.

3. The *Rái bél* resembles the jasmin. There are various kinds; some are simple, double, &c. A quintuple is very common, so that each petal might be separated as a distinct flower. Its stem grows a yard high. The leaves of the tree resemble those of the orange tree; but they are somewhat smaller and softer.

4. The *Mungrá* resembles the *Rái bél*. It is larger, but inferior in smell. It has more than a hundred petals; the plant grows to a large tree.

5. The *Champah flower* has a conical shape, of the size of a finger,[1] and consists of ten petals and more, lying in folds one above the other. It has several stamens. The tree looks graceful, and resembles in leaf and trunk the nut tree. It flowers after seven years.

---

[1] Orientals, as a rule, have very small hands and fingers.

6. The *Kétkí* has the form of spindle, of the size of a quarter of a yard, with twelve or more petals. Its smell is delicate and fragrant. It bears flowers in six or seven years.

7. The *Kéwrah* resembles the preceding, but is more than twice as big. The petals have thorns. As they grow on different places, they are not all equal. In the midst of the flower, there is a small branch with honey-coloured threads, not without smell. The flower smells even after it is withered. Hence people put it into clothes, when the smell remains for a long time. The stem of the tree is above four yards high; the leaves are like those of the maize, only longer, and triangular, with three thorns in each corner. It flowers from the fourth year. Every year they put new earth round about the roots. The plant is chiefly found in the Dek'han, Gujrát, Málwah, and Bahár.

8. The *Chaltah* resembles a large tulip. It consists of eighteen petals, six green ones above; six others, some red, some green, some greyish yellow; and six white. In the midst of the flower, as in the flower called *Haméshah Bahár*, there are nearly two hundred little yellow leaves, with a red globule in the centre. The flower will remain quite fresh for five or six days after having been plucked. It smells like the violet. When withered, the flower is cooked and eaten. The tree resembles the pomegranate tree; and its leaves look like those of the orange tree. It blooms in seven years.

9. The *Tasbíhgulál* has a fine smell. The petals have the form of a dagger. The stem of the plant is two yards high. It flowers after four years. They make rosaries of the flowers, which keep fresh for a week.

10. The *Bholsarí* is smaller than the jasmin; its petals are indented. When dry the flower smells better. The tree resembles the walnut tree, and flowers in the tenth year.

11. The *Singárhár* is shaped like a clove, and has an orange-coloured stalk. The stamens look like poppy seeds. The tree resembles the pomegranate tree, and the leaves are like the leaves of a peach tree. It flowers in five years.

12. The *Kúzah* looks like a *Gul i surkh;* but the plant and the leaves are larger. It has five or a hundred petals, and golden coloured stamens in the middle. They make *'Abírmáyah* and an extract from it.

13. The *Pádal* has five or six long petals. It gives water an agreeable flavour and smell. It is on this account that people preserve the flowers, mixed with clay, for such times when the flower is out of season. The leaves and the stem are like those of a nut tree. It flowers in the twelfth year.

14. The *Júhí* has small leaves. This creeper winds itself round about trees, and flowers in three years.

15. The *Niwárí* looks like a simple *Rái bél*, but has larger petals.

The flowers are often so numerous, as to conceal the leaves and branches of the plant. It flowers in the first year.

16. The *Kapúr bél* has five petals, and resembles the saffron flower. This flower was brought during the present reign from Europe.

17. The *Za'farán* (saffron).[1] In the beginning of the month of Urdíbihisht, the saffron seeds are put into the ground which has been carefully prepared and rendered soft. After this, the field is irrigated with rain water. The seed itself is a bulb resembling garlic. The flower appears in the middle of the month of Ábán; the plant is about a quarter of a yard long; but, according to the difference of the soil in which it stands, there are sometimes two-thirds of it above, and sometimes below the ground. The flower stands on the top of the stalk, and consists of six petals and six stamens. Three of the six petals have a fresh lilac colour, and stand round about the remaining three petals. The stamens are similarly placed, three of a yellow colour standing round about the other three, which are red. The latter yield the saffron. Yellow stamens are often cunningly intermixed. In former times saffron was collected by compulsory labour: they pressed men daily, and made them separate the saffron from the petals and the stamens, and gave them salt instead of wages, a man who cleaned two *pals* receiving two *pals* of salt. At the time of Ghází Khán,[2] the son of (Khájí) Chak, another custom became general: they gave the workmen eleven *tarks* of saffron flowers, of which one *tark* was given them as wages; and for the remaining ten they had to furnish two Akbarsháhí sérs of clean, dry saffron, *i. e.*, for two Akbarsháhí *mans*[3] of saffron flowers they had to give two sérs of cleaned saffron. This custom, however, was abolished by his Majesty, on his third visit to Kashmír, to the great relief of the people.

When the bulb has been put into the ground, it will produce flowers for six years, provided the soil be annually softened. For the first two years, the flowers will grow sparingly; but in the third year the plant reaches its state of perfection. After six years the bulbs must be taken out; else they get rotten. They plant them again on some other place; and leave the old ground uncultivated for five years.

Saffron comes chiefly from the place Panpúr, which belongs to the district of Marurájˈ[4] (?). The fields there extend over nearly twelve *kós*.

---

[1] Vide a similar account of the saffron flower in the third book (Súbah Kábul).

[2] He was the contemporary of Shér Khán; *vide* Abulfázl's list of Kashmír Rulers in the third book. A good biography of *Ghází Khán* may be found in the beginning of the *Maásiri Rahímí*, Persian MS. No. 45, of the Asiatic Society of Bengal.

[3] One Kashmírí *Tark* = 8 *sérs* (of Akbar) = 4 Kashm. *mans*; 1 Kash. *man* = 4 Kash. *sérs*; 1 Kash. *sér* = 7½ *pals*.

[4] These places lie to the south of Srínagar, the capital of Kashmír; for *Maṛurájˈ* the test has مرراج. *Vide* Súbah Kábul, third book.

Another place of cultivation is in the Parganah of Paraspúr, near Indrakál, not far from Kamráj, where the fields extend about a *kós*.

18. The *Áftábí* (sun-flower) is round, broad, and large, has a large number of petals, and turns continually to the sun. Its stem reaches a height of three yards.

19. The *Kanwal*. There are two kinds. One opens when the sublime Sun shines, turning wherever he goes, and closing at night. It resembles the *shaqáiq*-lily; but its red is paler. Its petals which are never less than six in number enclose yellow stamens, in the midst of which there is an excrescence of the form of a cone with the base upwards, which is the fruit, and contains the seeds. The other kind has four white petals, opens at night, and turns itself according to the moon, but does not close.

20. The *Ja'farí* is a pretty round flower, and grows larger than the *çadbarg*. One kind has five, another a hundred petals. The latter remains fresh for two months and upwards. The plant is of the size of a man, and the leaves resemble those of the willow, but are indented. It flowers in two months.

21. The *Gúdhal* resembles the *joghású-tulip*, and has a great number of petals. Its stem reaches a height of two yards and upwards; the leaves look like Mulberry leaves. It flowers in two years.

22. The *Ratanmanjaní* has four petals, and is smaller than the jasmin. The tree and the leaves resemble the Ráibél. It flowers in two years.

23. The *Késú* has five petals resembling a tiger's claw. In their midst is a yellow stamen of the shape of a tongue. The plant is very large, and is found on every meadow; when it flowers, it is as if a beautiful fire surrounded the scenery.

24. The *Kanér* remains a long time in bloom. It looks well, but it is poisonous. Whoever puts it on his head, is sure to fall in battle. It has mostly five petals. The branches are full of the flowers; the plant itself grows to a height of two yards. It flowers in the first year.

25. The *Kadam* resembles a *tumághah* (a royal cap). The leaves are like those of the nut tree, which the whole tree resembles.

26. The *Nág késar*, like the *Gul i surkh*, has five petals and is full of fine stamens. It resembles the nut tree in the leaves and the stem, and flowers in seven years.

27. The *Surpan* resembles the Sesame flower, and has yellow stamens in the middle. The stem resembles the *Himná* plant, and the leaves those of the willow.

28. The *Srík'handí* is like the *Chambéli*, but smaller. It flowers in two years.

29. The *Hinna* has four petals, and resembles the flower called *Náfarmán*. Different plants have often flowers of a different colour.

30. The *Dupahriyá* is round and small, and looks like the flower called *Haméshah bahár*. It opens at noon. The stem is about two yards high.

31. The *Bhún champá* resembles the *Nilúfar* flowers, and has five petals. The stem is about a span long. It grows on such places as are periodically under water. Occasionally a plant is found above the water.

32. The *Sudarsan* resembles the *Ráibél*, and has yellow threads inside. The stem looks like that of the *Sósan* flower.

33. *Sénbal* has five petals, each ten fingers long, and three fingers broad.

34. The *Ratanmálá* is round and small. Its juice is cooked out, and when mixed with vitriol and *Muaçfar*, furnishes a fast red dye for stuffs. Butter, sesame oil, are also boiled together with the root of the plant, when the mixture becomes a purple dye.

35. The *Súnzárd* resembles the jasmin, but is a little larger, and has from five to six petals. The stem is like that of the *Chambéli*. It flowers in two years.

36. The *Máltí* is like the *Chamhéli*, but smaller. In the middle there are little stamens looking like poppyseed. It flowers in two years more or less.

37. The *Karíl* has three small petals. It flowers luxuriantly, and looks very well: The flower is also boiled and eaten; they make also pickles of it.

38. The *Jait* plant grows to a large tree; its leaves look like Tamarind leaves.

39. The *Chanpalah* is like a nosegay. The leaves of the plant are like nut leaves. It flowers in two years. The bark of the plant, when boiled in water, makes the water red. It grows chiefly in the hills; its wood burns bright like a candle.

40. The *Láhí* has a stem one and a half yards high. The branches, before the flowers appear, are made into a dish which is eaten with bread. When camels feed on this plant, they get fat and unruly.

41. The *Karaundah* resembles the *Júhí* flower.

42. The *Dhanantar* resembles the *Nilúfar*, and looks very well. It is a creeper.

43. The *Sirs* flower consists of silk-like threads, and resembles a *tumághah*. It sends its fragrance to a great distance. It is the king of the trees, although the Hindus rather worship the *Pipal* and *Bar* trees. The tree grows very large; its wood is used in building. Within the stem the wood is black, and resists the stroke of the axe.

44. The *Kangláí* has five petals, each four fingers long, and looks very beautiful. Each branch produces only one flower.

45. The *San* flower (hemp) looks like a nosegay. The leaves of the plant resemble those of the *Chanár*. Of the bark of the plant strong ropes are made. One kind of this plant bears a flower like the cotton tree, and is called *Patsan*. It makes a very soft rope.

It is really too difficult for me, ignorant as I am, to give a description of the flowers of this country: I have mentioned a few for those who wish to know something about them. There are also found many flowers of Irán and Túrán, as the *Gul i Surkh*, *the Nargis*, the violet, the *Yásaman i kabúd*, the *Sósan*, the *Raihán*, the *Ra'ná*, the *Zébá*, the *Shaqáiq*, the *Táj i khurús*, the *Qalghah*, the *Náfarmán*, the *Khatamí*, &c. Garden and flower beds are everywhere to be found. Formerly people used to plant their gardens without any order, but since the time of the arrival in India of the emperor Bábar, a more methodical arrangement of the gardens has obtained; and travellers now-a-days admire the beauty of the palaces and their murmuring fountains.

It would be impossible to give an account of those trees of the country, whose flowers, fruits, buds, leaves, roots, &c., are used as food, or medicine. If, according to the books of the Hindus, a man were to collect only one leaf from each tree, he would get eighteen *bárs*, or loads, (5 *surkhs* = 1 *máshah*; 16 *máshahs* = 1 *karga*; 4 *kargas* = 1 *pala*; 100 *palas* = 1 *tulá*; 20 *tulás* = 1 *bár*); *i. e.*, according to the weights now in use, 96 *mans*. The same books also state that the duration of the life of a tree is not less than two *gharís* (twice 24 minutes), and not more than ten thousand years. The height of the trees is said not to exceed a little above a thousand *júans*.[1] When a tree dies, its life is said to pass into one of the following ten things: fire, water, air, earth, plants, animals, animals of two senses, such as have three, or four, or five senses.

ÁÍN 31.

THE WARDROBE[2] AND THE STORES FOR MATTRESSES.

His Majesty pays much attention to various stuffs; hence Irání, European, and Mongolian articles of wear are in abundance. Skilful masters and workmen have settled in this country, to teach people an improved system of manufacture. The Imperial workshops, the towns of

[1] Regarding this measure, *vide* the fourth book.

[2] The text has a word كركراق which occurs about three times in this work. I have also found it in Sayyid Ahmad's edition of the Tuzuk i Jahángírí; but I cannot find it in any Persian or Chagatái Dictionary. The meaning *a wardrobe* is however clear.

Láhór, Agrah, Fathpúr, Ahmadábád, Gujrát, turn out many master-pieces of workmanship; and the figures and patterns, knots, and variety of fashions which now prevail, astonish experienced travellers. His Majesty himself acquired in a short time a theoretical and practical knowledge of the whole trade; and on account of the care bestowed upon them, the intelligent workmen of this country soon improved. All kinds of hair-weaving and silk-spinning were brought to perfection; and the imperial workshops furnish all those stuffs which are made in other countries. A taste for fine material has since become general, and the drapery used at feasts surpasses every description.

All articles which have been bought, or woven to order, or received as tribute or presents, are carefully preserved; and according to the order in which they were preserved, they are again taken out for inspection, or given out to be cut and to be made up, or given away as presents. Articles which arrive at the same time, are arranged according to their prices. Experienced people inquire continually into the prices of articles used both formerly and at present, as a knowledge of the exact prices is conducive to the increase of the stock. Even the prices became generally lower. Thus a piece woven by the famous Ghiás i Naqshband may now be obtained for fifty muhurs, whilst it had formerly been sold for twice that sum; and most other articles have got cheaper at the rate of thirty to ten, or even forty to ten.[1] His Majesty also ordered that people of certain ranks should wear certain articles; and this was done in order to regulate the demand.

I shall not say much on this subject, though a few particulars regarding the articles worn by his Majesty may be of interest.

1. The *Takauchiyah* is a coat without lining, of the Indian form. Formerly it had slits in the skirt, and was tied on the left side; his Majesty has ordered it to be made with a round skirt, and to be tied on the right side.[2] It requires seven yards and seven *girihs*,[3] and five girihs for the binding. The price for making a plain one varies from one rupee to three rupees; but if the coat be adorned with ornamental stitching, from one to four and three quarters rupees. Besides a misqál of silk is required.

---

[1] Or as we would, the prices have become less by 66⅔, and even 75 *per cent.*

[2] The coats used now-a-days both by Hindús and Muhammadans resemble in shape our dressing gowns (*Germ.* Schlafrock), but fitting tight where the lower ribs are. There the coat is tied; the Muhammadans make the tie on the *left*, and the Hindus on the *right* side. In the Eastern parts of Bengal, many Muhammadans adopt the old Hindu fashion of wearing a simple unsewn piece of muslin *(chádar)*.

[3] It is not stated in the Aín how many *girihs* the tailor's *gaz*, or yard, contains. It is probable that 16 *girihs* = 1 *gaz*, which is the usual division at present. For other yard measures, *vide* the 87th and 89th Aíns of this book. The Persian word *girih* is pronounced in India *girah*.

2. The *Péshwáz* (a coat open in front) is of the same form, but ties in front. It is sometimes made without strings.

3. The *Dutáhi* (a coat with lining) requires six yards and four girihs for the outside, six yards lining, four girihs for the binding, nine girihs for the border. The price of making one varies from one to three rupees. One misqál of silk is required.

4. The *Sháh-ájídah* (or the royal stitch coat) is also called *Shaçtkhaṭ* (or sixty rows), as it has sixty ornamental stitches *per girih*. It has generally a double lining, and is sometimes wadded and quilted. The cost of making is two rupees *per yard*.

5. The *Sózaní* requires a quarter of a sér of cotton and two dáms of silk. If sewed with *bakhyah*[1] stitches, the price of making one is eight rupees; one with *ájídah* stitches costs four rupees.

6. The *Qalamí* requires ⅜ *s.* cotton, and one dám silk. Cost of making, two rupees.

7. The *Qabá*, which is at present generally called *jámah i pumbahdár*, is a wadded coat. It requires 1 *s.* of cotton, and 2 *m.* silk. Price, one rupee to a quarter rupee.

8. The *Gadar* is a coat wider and longer than the *qabá*, and contains more wadding. In Hindustan, it takes the place of a fur-coat. It requires seven yards of stuff, six yards of lining, four girihs binding, nine for bordering, 2½ *s.* cotton, 3 *m.* silk. Price, from one-half to one and one-half rupees.

9. The *Farjí* has no binding, and is open in front. Some put buttons to it. It is worn over the *jámah* (coat), and requires 5 *y.* 12 *g.* stuff; 5 *y.* 5 *g.* lining; 14 *g.* bordering; 1 *s.* cotton; 1 *m.* silk. Price, from a quarter to one rupee.

10. The *Fargul* resembles the *yápanjí*,[2] but is more comfortable and becoming. It was brought from Europe;[3] but every one now-a-days wears it. They make it of various stuffs. It requires 9 *y.* 6½ *g.* stuff, the same

[1] *Bakhyah*, in Hind. *bak'hiyá*, corresponds to what ladies call *backstitching*. *Ájídah* is the button hole stitch. These, at least, are the meanings which *bakhyah* and *ájídah* now have. *Sozaní*, a name which in the text is transferred to the coat, is a kind of embroidery, resembling our *satin-stitch*. It is used for working leaves and flowers, &c., on stuffs, the leaves lying pretty loosely on the cloth; hence we often find *sozaní* work in rugs, small carpets, &c. The rugs themselves are also called *sozaní*. A term which is sometimes used in Dictionaries as a synonym for *sozaní* is *chikin*; but this is what we call *white embroidery*.

[2] A coat used in rainy weather. *Calcutta Chagatái Dictionary*.

[3] The etymology of the word *fargul* is not known to me. The names of several articles of wear, now-a-days current in India, are Portuguese; as *sáya*, a petticoat; *fíta*, a ribbon. Among other Portuguese words, now common in Hindustani, are *padrí*, clergyman; *girjá*, a church, *Port.* igrója; *kóbí*, cabbage, *Port.* cuóve; *chábí*, a key, *Port.* cháve.

Abul Fazl's explanation (*vide* my text edition, p. 102, l. 16) corrects Vullers II. p. 663 *a*.

quantity of lining, 6 *m.* silk, 1 *s.* cotton. It is made both single and double. Price, from ½ to 2 *R.*

11. The *Chakman*[1] is made of broadcloth, or woollen stuff, or wax cloth. His Majesty has it made of *Dárái* wax cloth, which is very light and pretty. The rain cannot go through it. It requires 6 *y.* stuff, 5 *g.* binding, and 2 *m.* silk. The price of making one of broadcloth is 2 *R.*; of wool, 1½ *R.*; of wax cloth, ½ *R.*

12. The *Shalwár* (drawers) is made of all kinds of stuff, single and double, and wadded. It requires 3 *y.* 11 *g.* cloth, 6 *g.* for the hem through which the string runs, 3 *y.* 5 *g.* lining, 1¼ *m.* silk, ½ *s.* cotton. Price, from ¼ to ½ *R.*

There are various kinds of each of these garments. It would take me too long to describe the *chírahs*, *fauṭahs*, and *dupattahs*,[2] or the costly dresses worn at feasts or presented to the grandees of the present time. Every season, there are made one thousand complete suits for the imperial wardrobe, and one hundred and twenty, made up in twelve bundles, are always kept in readiness. From his indifference to every thing that is worldly, His Majesty prefers and wears *woollen*[3] stuffs, especially shawls; and I must mention, as a most curious sign of auspiciousness, that His Majesty's clothes becomingly fit every one whether he be tall or short, a fact which has hitherto puzzled many.

His Majesty has changed the names of several garments, and invented new and pleasing terms.[4] Instead of *jámah* (coat), he says *sarbgátí*, *i. e.*, covering the whole body; for *izár* (drawers), he says *yúrpíráhan* (the companion of the coat); for *nímtanah* (a jacket), *tanzéb*; for *fauṭah*, *patgat*; for *burqu'* (a veil), *chitragupita*; for *kuláh* (a cap); *sís solhá*; for *máibáf* (a hair ribbon,) *késg'han*; for *patká* (a cloth for the loins), *katzéb*; for *shál* (shawl), *parmnarm*; for . . .;[5], *parmgarm*; for *kapúrdhúr*, a Tibetan stuff, *kapúrnúr*; for *páiafzár* (shoes), *charndharn*; and similarly for other names.

---

[1] As this word is not given in any dictionary, the vowels are doubtful. So is Vullers' form *chaspán*.

[2] Stuffs of different shapes, used for making turbans.

[3] In allusion to the practice of *Çúfís*, who only wear garments made of wool (*çúf*). Abul Fazl often tries to represent Akbar as a *Çúfí* of so high a degree as to be able to work miracles, and he states below that it was his intention to write a book on Akbar's miracles. The charge of fulsomeness in praise has often been brought against Abul Fazl, though it would more appropriately lie against *Faizí* who—like the poets of imperial Rome—represents the emperor as God, as may be seen in the poetical extracts of the second book. But the praises of the two brothers throw a peculiar light on Akbar's character, who received the most immoderate encomiums with self-complacency.

[4] The following passage is remarkable, as it shews Akbar's predilection for *Hindí* terms.

[5] The MSS. have an unintelligible word. The Banáras MS. has *pardak Firáng*, or European Pardak (?).

ÁÍN 32.

ON SHAWLS, STUFFS, &c.

His Majesty improved this department in *four* ways. The improvement is visible, *first*, in the *Ṭús* shawls, which are made of the wool of an animal of that name; its natural colours are black, white, and red, but chiefly black. Sometimes the colour is a pure white. This kind of shawl is unrivalled for its lightness, warmth, and softness. People generally wear it without altering its natural colour; his Majesty has had it dyed. It is curious that it will not take a red dye. *Secondly*, in the *Safíd Alchahs*,[1] also called *Ṭarhdárs*, in their natural colours. The wool is either white or black. These stuffs may be had in three colours, white, black, or mixed. The first or white kind, was formerly dyed in three ways; his Majesty has given the order to dye it in various ways. *Thirdly*, in stuffs as *Zardózí*,[2] *Kalábatún*, *Kashídah*, *Qálghaí*, *Bándhnún*, *Chhínt*, *Alchah*, *Purzdár*, to which His Majesty pays much attention. *Fourthly*, an improvement was made in the width of all stuffs; His Majesty had the pieces made large enough to yield the making of a full dress.

The garments stored in the Imperial wardrobe are arranged according to the days, months, and years, of their entries, and according to their colour, price, and weight. Such an arrangement is now-a-days called *misl*, a set. The clerks fix accordingly the degree of every article of wear, which they write on a strip of cloth, and tack it to the end of the pieces. Whatever pieces of the same kind arrive for the Imperial wardrobe on the *Urmuzd* day (first day) of the month of *Farwardín*, provided they be of a good quality, have a higher rank assigned to them than pieces arriving on other days; and if pieces are equal in value, their precedence, or otherwise, is determined by the character[3] of the day of their entry; and if pieces are equal as far as the character of the day is concerned, they put the lighter stuff higher in rank; and if pieces have the same weight, they arrange them according to their colour. The following is the order of colours: *ṭús*, *safídalchah*, ruby coloured, golden, orange, brass-coloured, crimson, grass green, cotton-flower coloured, sandalwood-coloured, almond-coloured, purple, grape-coloured, *mauve* like the colour of some parrots, honey-coloured, brownish lilac,

---

[1] *Alchah*, or *Aláchah*, any kind of corded *(mukhaṭṭaṭ)* stuff. *Ṭarhdár* means *corded*.

[2] *Zardózí*, *Kalábatún*, (Forbes, *kalabattún*), *Kashídah*, *Qalghaí*, are stuffs with gold and silk threads; *Bándhnún*, are stuffs dyed differently in different parts of the piece; *Chhínt* is our *chintz*, which is derived from *Chhínt*. *Purzdár* are all kinds of stuffs the outside of which is plush-like.

[3] Akbar, like all Parsees, believed in lucky and unlucky days. The arrangement of the stores of clothing must strike the reader as most unpractical. Similar arrangements, equally curious, will be found in the following Áíns. Perhaps they indicate a progress, as they shew that some order at least was kept.

coloured like the *Ratanmanjaní* flower, coloured like the *Kásní* flower, apple-coloured, hay-coloured, pistachio, ...[1], *bhójpatra* coloured, pink, light blue, coloured like the *qalghah* flower, water-coloured, oil-coloured, brown red, emerald, bluish like China-ware, violet, bright pink, mangoe coloured, musk-coloured, coloured like the *Fákhtah* pigeon.

In former times shawls were often brought from Kashmír. People folded them up in four folds, and wore them for a very long time. Now-a-days they are generally worn without folds, and merely thrown over the shoulder. His Majesty has commenced to wear them double, which looks very well.

His Majesty encourages, in every possible way, the manufacture of shawls in Kashmír. In Láhór also there are more than a thousand workshops. A kind of shawl, called *máyán*, is chiefly woven there; it consists of silk and wool mixed. Both are used for *chírahs* (turbans), *fauṭahs* (loin bands), &c.

I subjoin the following tabular particulars.

A. Gold stuffs.

Brocaded velvet, from *Yazd*,[2] *per piece*, ...	15 to 150 *M.*
Do. from Europe, do.	10 to 70 *M.*
Do. from *Gujrát*, do.....	10 to 50 *M.*
Do. from *Káshán*, do.	10 to 40 *M.*
Do. from *Herát*, do.	*
Do. from *Láhór*, do.	10 to 40 *M.*
Do. from *Barsah*, (?) do.	3 to 70 *M.*
Muṭabbaq,[3] do.	2 to 70 *M.*
Mílak, do.	3 to 70 *M.*
Brocade, from Gujrát, do.....	4 to 60 *M.*
Ṭás[4]-Brocade, from do. do.	1 to 35 *M.*

[1] The text contains two doubtful words. The next word *bhójpatra* is the bark of a tree used for making *hukka* tubes.

[2] *Yazd* is the principal city in the south of the Persian province of Khurásán. *Káshán* lies in *'Iráq i 'Ajamí*, north of Içfahán. "The asses of Káshán are wiser than the men of Içfahán," which latter town is for Persia what Bœotia is for Ancient Greece, or the Bretagne for France, or the kingdom of Fife for Scotland, or the town of Schilda for Germany, or Bahár for India,—the home of fools. During the time of Moguls, the Sayyids of Bárhah enjoyed a similar notoriety.

[3] *Muṭabbaq*, a kind of cloth, chiefly brought from *Khallukh*, and *Mílak* from *Naushád* in Turkestán. *Ghiásullughat.*

[4] *Ṭás* means *generally* brocade; *Dáráíbáf* is a kind of brocaded silk; *Muqayyash* is silk with stripes of silver—the *Ghiás* says that *Muqayyash* comes from the Hind. *késh*, hair, to which the silver-stripes are compared, and that it is an Arabicised form of the *Hindí* word, as *qaranful*, a clove, for the Hind. *karnp'hul*; *itríſal*, a kind of medicine, for *tríp'hal*, as it consists of *three* fruits; &c. *Mushajjar* is a kind of silk with leaves and branches woven in it; *Débá* is coloured silk; *Khárá*, moirée antique; *Khazz* is *filoselle*-silk. For *taf ílah* (*vide* Freytag III. p. 353), we also find *tafsílah*.

Dárái báf, from Gujrát,	2 to 50 *M.*
Muqayyash, do.	1 to 20 *M.*
Shirwáni Brocade, do.	6 to 17 *M.*
Mushajjar, from Europe, *per yard*,	1 to 4 *M.*
Débá silk, do. do.	1 to 4 *M.*
Do., from *Yazd*, do.	1 to 1½ *M.*
Khárá, do.	5 *R.* to 2 *M.*
Satin, from Chinese Tartary,	*
Nawár, from do.	*
Khazz silk,	*
Tafçílah, (a stuff from Mecca)	from 15 to 20 *R.*
Kurtahwár, from Gujrát,	1 to 20 *M.*
Mindíl,	1 to 14 *M.*
Chírah, (for turbans)	½ to 8 *M.*
Dupattah, do.	9 to 8 *R.*
Fauṭahs, (loin bands)	½ to 12 *M.*
Counterpanes,	1 to 20 *M.*

* *The Text does not give the prices.*

B. Silks, &c., plain.

Velvet, from Europe, *per yard*,	1 to 4 *M.*
Do. from Káshán, *per piece*,	2 to 7 *M.*
Do. from Yazd, do.	2 to 4 *M.*
Do. from Mashhad, do.	2 to 4 *M.*
Do. from Herát, do.	1½ to 3 *M.*
Do. Kháfí, do.	2 to 4 *M.*
Do. from Láhór, do.	2 to 4 *M.*
Do. from Gujrát, *per yard*,	1 to 2 *R.*
Qaṭífah i Púrabí,[1] do.	1 to 1½ *R.*
Tájah Báf, *per piece*,	2 to 30 *M.*
Dárái Báf, do.	2 to 30 *M.*
Muṭabbaq, do.	1 to 30 *M.*
Shirwání, do.	1½ to 10 *M.*
Mílak, do.	1 to 7 *M.*
Kamkháb, from Kábul and Persia, do.	1 to 5 *M.*
Tawár, (?) do.	2 *R.* to 2 *M.*
Khúrí (?) do.	4 to 10 *R.*
Mushajjar, from Europe, *per yard*,	2 *R.* to 1 *M.*
Do. from Yazd, *per piece*,	1 to 2 *M.*
Satin, from Europe, *per yard*,	2 *R.* to 1 *M.*

[1] A kind of velvet.

Satin, from Herát, *per piece*,	5 *R.* to 2 *M.*
Khárá, *per yard*,	1 *R.* to 6 *R.*
Sihrang,[1] *per piece*,	1 to 3 *M.*
Qutní,[2] do.	1½ *R.* to 2 *M.*
Katán,[3] from Europe, *per yard*,	½ to 1 *R.*
Táftah,[4] do.	¼ to 2 *R.*
Anbarí, do.	4 *d.* to ½ *R.*
Dárái, do.	⅕ *R.* to 2 *R.*
Sitípúrí, *per piece*,	6 *R.* to 2 *M.*
Qabáband, do.	6 *R.* to 2 *M.*
Tát bandpúrí, do.	2 *R.* to 1½ *M.*
Láh, *per yard*,	⅛ to ⅐ *R.*
Miçrí, *per piece*,	½ to 1 *M.*
Sár, *per yard*,	1/10 to ⅛ *R.*
Tassar,[5] *per piece*,	⅛ to 2 *R.*
Plain Kurtahwár Satin, *per yard*,	½ to 1 *R.*
Kapúrnúr, formerly called *Kapúrdhúr*, do.	⅛ to 1 *R.*
Alchah, do.	⅛ to 2 *R.*
Tafçílah, *per piece*,	7 to 12 *R.*

C. Cotton cloths.

Kháçah, *per piece*,	3 *R.* to 15 *M.*
Chautár, do.	2 *R.* to 9 *M.*
Malmal, do.	4 *R.*
Tansak'h, do.	4 *R.* to 5 *M.*
Sirí Çáf, do.	2 *R.* to 5 *M.*
Gangájal, do.	4 *R.* to 5 *M.*
Bhíraun, do.	4 *R.* to 4 *M.*
Sahan, do.	1 to 3 *M.*
Jhónah, do.	1 *R.* to 1 *M.*
Atán, do.	2½ *R.* to 1 *M.*
Asáwalí, do.	1 to 5 *M.*
Báftah, do.	1½ *R.* to 5 *M.*
Mahmúdí, do.	½ to 3 *M.*
Panchtóliyah, do.	1 to 3 *M.*
Jhólah, do.	½ to 2½ *M.*
Sálú, *per piece*,	3 *R.* to 2 *M.*

[1] Changing silk.
[2] A stuff made of silk and wool.
[3] Generally translated by *linen*. All Dictionaries agree that it is exceedingly thin, so much so that it tears when the moon shines on it; it is *Muslin*.
[4] Properly, *woven*; hence *taffeta*.
[5] Now-a-days chiefly made in Berhampore and Patna; *vulgo*, tessa.

Dóriyah, *per piece*,	6 *R.* to 2 *M.*
Bahádur Sháhí, do.	6 *R.* to 2 *M.*
Garbah Sútí, do.	1½ to 2 *M.*
Shélah, from the Dek'han, do.	½ to 2 *M.*
Mihrkul, do.	3 *R.* to 2 *M.*
Mindíl, do.	½ to 2 *M.*
Sarband, do.	½ to 2 *M.*
Dupattah, do.	1 *R.* to 1 *M.*
Katánchah, do.	1 *R.* to 1 *M.*
Fauṭah, do.	½ to 6 *R.*
Góshpéch, do.	1 to 2 *R.*
Chhínt, *per yard*,	2 *d.* to 1 *R.*
Gazínah, *per piece*,	½ to 1½ *R.*
Siláhatí, *per yard*,	2 to 4 *d.*

D. Woollen stuffs.

Scarlet Broadcloth, from Turkey, Europe[1], and Portugal, *per yard*,	2½ *R.* to 4 *M.*
Do., from Nágór and Láhór, *per piece*,	2 *R.* to 1 *M.*
Çúf i Murabba', do.	4 to 15 *M.*
Çúf i.....[2], do.	3 *R.* to 1½ *M.*
Parmnarm, do.	2 *R.* to 20 *M.*
Chírah i Parmnarm, do.	2 *R.* to 25 *M.*
Fauṭah, do.	½ to 3 *M.*
Jámahwár i Parmnarm, do.	½ to 4 *M.*
Góshpéch, do.	1½ *R.* to 1½ *M.*
Sarpéch, do.	½ to 4 *M.*
Aghrí, do.	7 *R.* to 2½ *M.*
Parmgarm, do.	3 *R.* to 2½ *M.*
Katás, do.	2½ *R.* to 10 *M.*
P'húk, *per piece*,	2½ to 15 *R.*
Durmah, do.	2 *R.* to 4 *M.*
Patú, do.	1 to 10 *R.*

[1] The articles imported from Europe were chiefly broadcloth; musical instruments, as trumpets; pictures; curiosities (*vide* Badáoní II, p. 290, l. 2 from below; p. 338, l. 7.) and, since 1600, tobacco. Of the names of cloths mentioned by Abulfazl, several are no longer known, as native weavers cannot compete with the English Long-cloth and the cheap European Muslins, Alpaccas, Chintzes, and Mohairs, which are now-a-days in common use with the natives all over the East. At the time of the Moguls, and before, the use of woollen stuffs and, for the poorer classes, blankets, was much more general than now. Even the light caps generally worn by Muhammadans in this country, called in Hind. *tópí*, and in Persian *takhfífah* (*vide* Bahár i 'Ajam) are mostly imported from England. I am not aware that the soldiers of the armies of the Moguls were uniformly dressed, though it appears that the commanders of the contingents at least looked to uniformity in the caps and turbans.

[2] The MSS. have an unintelligible word.

Rewkár, *per piece*,	2 *R.* to 1 *M.*
Miçrí, do.	5 to 50 *R.*
Burd i Yámaní, do.	5 to 35 *R.*
Mánjí (?) namad, do.	2 *R.* to 1 *M.*
Kanpak(?) namad, do.	2 *R.* to 1 *M.*
Takyahnamad, from Kábul and Persia,	*
Do., country made, do.	1½ to 5 *R.*
Lóí, do.	14 *d.* to 4 *R.*
Blankets, do.	10 *d.* to 2 *R.*
Kashmírian Caps, do.	2 *d.* to 1 *R.*

ÁÍN 33.

ON THE NATURE OF COLOURS.

White and black are believed to be the origin of all colours. They are looked upon as extremes, and as the component parts of the other colours. Thus white when mixed in large proportions with an impure black, will yield *yellow;* and white and black, in equal proportions, will give *red.* White mixed with a large quantity of black, will give a *bluish green.* Other colours may be formed by compounding these. Besides, it must be borne in mind that cold makes a juicy body white, and a dry body black; and heat renders that which is fresh black, and white that which is dry. These two powers (heat and cold) produce, each in its place, a change in the colour of a body, because bodies are both *qábil, i. e.*, capable of being acted upon, and *muqtaza, i. e.*, subject to the influence of the heavenly bodies (chiefly the sun), the active origin of heat.

ÁÍN 34.

THE ARTS OF WRITING AND PAINTING.

What we call *form* leads us to recognize a body; the body itself leads us to what we call *a notion, an idea.* Thus on seeing the form of a letter, we recognize the letter, or a word, and this again will lead us to some idea. Similarly in the case of what people term *a picture.* But though it is true that painters, especially those of Europe, succeed in drawing figures expressive of the conceptions which the artist has of any of the mental

* The price is not given in the text.

states,[1] so much so, that people may mistake a picture for a reality: yet pictures are much inferior to the written letter, inasmuch as the letter may embody the wisdom of bygone ages, and become a means to intellectual progress.

I shall first say something about the art of writing, as it is the more important of the two arts. His Majesty pays much attention to both, and is an excellent judge of form and thought. And indeed, in the eyes of the friends of true beauty, a letter is the source from which the light confined within it beams forth; and in the opinion of the far-sighted, it is the world-reflecting cup[2] in the abstract. The letter, a magical power, is spiritual geometry emanating from the pen of invention; a heavenly writ from the hand of fate; it contains the secret of the word, and is the tongue of the hand. The spoken word goes to the hearts of such as are present to hear it; the letter gives wisdom to those that are near and far. If it was not for the letter, the spoken word would soon die, and no keepsake would be left us of those that are gone by. Superficial observers see in the letter a sooty figure; but the deepsighted, a lamp of wisdom. The written letter looks black, notwithstanding the thousand rays within it; or, it is a light with a mole on it that wards off the evil eye.[3] A letter is the portrait painter of wisdom; a rough sketch from the realm of ideas; a dark night ushering in day; a black cloud pregnant with knowledge; the wand for the treasures of insight; speaking, though dumb; stationary, and yet travelling; stretched on the sheet, and yet soaring upwards.

When a ray of God's knowledge falls on man's soul, it is carried by the mind to the realm of thought, which is the intermediate station between that which is conscious of individual existence (*mujarrad*) and that which is material (*máddí*). The result[4] is a concrete thing mixed with the absolute, or an absolute thing mixed with that which is concrete. This compound steps forward on man's tongue, and enters, with the assistance of the conveying air, into the windows of the ears of others. It then drops the burden of its concrete component, and returns as a single ray, to its old place, the realm of thought. But the heavenly traveller occasionally gives his course a different direction by means of man's fingers, and having passed along

---

[1] *Khilqí* (from *khilqat*) referring to states of the mind natural to us, as benevolence, wrath, &c. These, Abulfazl says, a painter may succeed in representing; but the power of writing is greater.

[2] The fabulous cup of king Jamshéd, which revealed the secrets of the seven heavens.

[3] Human beauty is imperfect unless accompanied by a mole. For the mole on the cheek of his sweetheart, Háfiz would make a present of Samarqand and Bukhárá. Other poets rejoice to see at least one black spot on the beautiful face of the beloved who, without such an amulet, would be subject to the influence of the evil eye.

[4] The spoken word, the idea expressed by a sound.

the continent of the pen and crossed the ocean of the ink, alights on the pleasant expanse of the page, and returns through the eye of the reader to its wonted habitation.

As the letter is a representation of an articulate sound, I think it necessary to give some information regarding the latter.

The sound of a letter is a mode of existence depending on the nature of the air. By *qara'* we mean the striking together of two hard substances; and by *qala'*, the separation of the same. In both cases the intermediate air, like a wave, is set in motion; and thus the state is produced which we call *sound*. Some philosophers take sound to be the secondary effect, and define it as the air set in motion; but others look upon it as the primary effect, *i. e.*, they define sound to be the very *qara'*, or the *qala'*, of any hard substances. Sound may be accompanied by modifying circumstances: it may be piano, deep, nasal, or guttural, as when the throat is affected by a cold. Again, from the nature of the organ with which man utters a sound, and the manner in which the particles of the air are divided, another modifying circumstance may arise, as when two piano, two deep, two nasal, or two guttural sounds separate from each other. Some, as Abú 'Alí Síná, call this modifying element (*'áriz*) the sound of the letter; others define it as the original state of the sound thus modified (*ma'rúz*); but the far-sighted define an articulate sound as the union of the modifying element and the original state modified. This is evidently the correct view.

There are fifty-two articulate sounds in Hindí, so and so many[1] in Greek, and eighteen in Persian. In Arabic, there are twenty-eight letters represented by eighteen signs, or by only fifteen, when we count the joined letters, and if we take the *Hamzah* as one with the Alif. The reason for writing an *Alif* and a *Lám*, (لا) separately at the end of the single letters in the Arabic Alphabet, is merely to give an example of a *sákin* letter, which must necessarily be joined to another letter; and the reason why the letter *lám* is preferred[2]

[1] Abúl Fazl has forgotten to put in the number. He counts eighteen letters, or rather signs, in Persian, because ز, ژ, and ذ, have the same fundamental sign.

[2] Or rather, the alif was preferred to the *wáw* or *yá*, because these two letters may be either *sákin* or *mutaharrik*. But the custom has become established to call the alif, when mutaharrik, *hamzah*; and to call the alif, when sákin, merely alif. *'Abdulwási'*, of *Hánsah*, in his excellent Persian Grammar, entitled *Risálah i 'Abdulwási'*, which is read all over India, says that the *lám-alif* has the meaning of *not*, *i. e.*, 'do *not* read this compound *lám-alif*, but pass over it, when you say the Alphabet: look upon it as a mere example of a sákin letter.'

The term *hamzah*, as used here in native schools, is carefully distinguished from the terms *Shakl i Hamzah* and *Markiz i Hamzah*. *Shakl i Hamzah* is the small sign consisting of a semicircle, one extremity of which stands upon a straight line slightly slanting. *Markiz i Hamzah* is either of the letters *alif*, *wáw*, or *yá*, but chiefly the latter, when accompanied by the *Shakl i Hamzah*. *Hamzah* is a general term for either of the three letters *alif*, *wáw*, *yá*, when accompanied by the *Shakl i Hamzah*. In European grammars, the chapter on the Hamzah is

as an example, is because the letter *lám* is the middle letter of the word *alif*, and the letter *alif* the middle letter of the word *lám*.

The vowel-signs did not exist in ancient times, instead of which letters were dotted with a different kind of ink; thus a red dot placed *over* a letter expressed that the letter was followed by an *a*; a red dot in front of the letter signified a *u*; and a red dot below a letter, an *i*. It was Khalíl ibn i Ahmad,[1] the famous inventor of the Metrical Art of the Arabians, who fixed the forms of the vowel-signs as they are now in use.

The beauty of a letter and its proportions depend much on personal taste; hence it is that nearly every people has a separate alphabet. Thus we find an Indian, Syriac, Greek, Hebrew, Coptic, Ma'qalí, Kúfí, Kashmírí, Abyssinian, Raihání, Arabic, Persian, Himyaritic, Berbery, Andalusian, Rúhání, and several other ancient systems of writing. The invention of the Hebrew characters is traced in some poems to Ádam i Hafthazárí;[2] but some mention *Idrís*[3] as the inventor. Others, however, say that Idrís perfected the *Ma'qalí* character. According to several statements, the Kúfic character was derived by the Khalífah 'Alí from the *Ma'qalí*.

The difference in the form of a letter in the several systems, lies in the proportion of straight and round strokes: thus the Kúfic character consists of one-sixth curvature and five-sixths straight lines; the *Ma'qalí* has no curved lines at all; hence the inscriptions which are found on ancient buildings are mostly in this character.

In writing we have to remember that black and white look well, as these colours best prevent ambiguities in reading.

In Írán and Túrán, India, and Turkey, there are eight caligraphical systems[4] current, of which each one is liked by some people. Six of them were derived, in A. H. 310, by *Ibn i Muqlah* from the Ma'qalí and the Kúfic characters, *viz.*, the *Suls*, *Tauqí'*, *Muhaqqaq*, *Naskh*, *Raihán*, *Riqá'*. Some add the *Ghubár*, and say that this seventh character had likewise been invented by him. The *Naskh* character is ascribed by many to *Yáqút*, a slave of the

---

badly treated, because all explain the word *Hamzah* as the name of a *sign*.

Another peculiarity of European grammars is this, that in arranging the letters of the alphabet, the *wáw* is placed *after* the *hé*; here, in the East, the *hé* is invariably put before the *yá*.

[1] He is said to have been born A. H. 100, and died at Baçrah A. H. 175 or 190. He wrote several works on the science which he had established, as also several books on the rhyme, lexicographical compilations, &c.

[2] 'Adam is called *Haft-hazárí*, because the number of inhabitants on earth, at his death, had reached the number *seven thousand*. A better explanation is given by Badáoní (II. p. 337, l. 10), who puts the creation of Ádam *seven thousand* years before his time. *Vide* the first Áín of the Third Book.

[3] *Idrís*, or Enoch.

[4] It is remarkable that, in the whole chapter, there is not the slightest allusion to the art of printing. Nor do Abulfazl's letters, where nearly the whole of this Áín is repeated, contain a reference to *printed* books. "The first book printed in India was the *Doctrina Christiana* of Giovanni Gonsalvez, a lay brother of the order of the Jesuits, who, as far as I

Khalífah Musta'çam Billáh.[1] The *Suls* and the *Naskh* consist each of one-third[2] curved lines, and two-thirds straight lines; the former (the *suls*) is *jalí*,[3] whilst the latter (the *naskh*) is *khafí*. *The Tauqí'* and *Riqá'* consist of three-fourths curved lines, and one-fourth straight lines; the former is *jalí*, the latter is *khafí*. *The Muhaqqaq* and *Raihán* contain three-fourths straight lines; the former, as in the preceding, is *jalí*, and the Raihán *khafí*.

Among famous copyists I must mention 'Alí ibn i Hilál, better known under the name of *Ibn i Bawwáb*;[4] he wrote well the six characters. Yáqút brought them to perfection. Six of Yáqút's pupils are noticeable; 1. Shaikh Ahmad, so well known under the name of Shaikhzádah i Suhrwardí; 2. Arghún of Kábul; 3. Maulaná Yúsuf Sháh of Mashhad; 4. Maulaná Mubárik Sháh, styled *Zarrín qalam* (the golden pen); 5. Haidar, called *Gandahnawis* (*i. e.*, the writer of the *jalí*); 6. Mír Yahya.

The following caligraphists are likewise well known: Çúfí Naçrullah, also called Çadr i 'Iráqí; Arqún 'Abdullah; Khájah 'Abdullah i Çairafí; Hájí Muhammad; Mauláná 'Abdullah i Ashpaz; Mauláná Muhí of Shíráz; Mu'ínuddín i Tanúrí; Shamsuddín i Khaṭáí; 'Abdurrahím i Khalúlí (?); Abdulhay; Mauláná Ja'far[5] of Tabríz; Mauláná Sháh of Mashhad; Mauláná Ma'rúf[6] of Baghdád; Mauláná Shamsuddín i Báyasanghur; Mu'ínuddín of

know, first cast Tamulic characters in the year 1577. After this appeared, in 1578, a book entitled *Flos Sanctorum*, which was followed (?) by the Tamulic Dictionary of Father Antonio de Proenza, printed in 1679, at Ambalacate, on the coast of Malabar. From that period the Danish Missionaries at Tranquebar have printed many works, a catalogue of which may be found in Alberti Fabricii *Salutaris lux Evangelii.*" *Johnston's translation* of *Fra P. Da San Bartolomeo's Voyage to the East Indies, p.* 395. The Italian Original has the same years: 1577, 1578, 1679.

[1] He was the last caliph, and reigned from 1242 to 1258, when he was put to death by Hulágú, grandson of Chingiz Khán.

[2] Hence the name *suls*, or *one-third*.

[3] *Jalí* (*i. e.*, clear) is a term used by copyists to express that letters are thick, and written with a pen full of ink. *Ghiás.*—*Khafí* (hidden) is the opposite.

[4] *Ibn Muqlah*, *Ibn Bawwáb*, and *Yáqút*, are the three oldest caligraphists mentioned in various histories. The following notes are chiefly extracted from Bakhtáwar Khán's *Mir-átul 'Alam*:—

Ibn Muqlah, or according to his full name, Abú 'Alí Muhammad ibn i 'Alí ibn i Hasan ibn i Muqlah, was the vizier of the Khalífahs Muqtadir billah, Alqáhir billah, and ArRází billah, who reigned from A. D. 907 to 940. The last cut off Ibn i Muqlah's right hand. He died in prison, A. H. 327, or A. D. 938-39.

Ibn i Bawwáb, or Abul Hasan 'Alí ibn i Hilál, lived under the twenty-fifth Khalífah, Alqádir billah (A. D. 992-1030), the contemporary of Mahmúd of Ghazní, and died A. H. 416, or A. D. 1025.

Yáqút, or Shaikh Jamáluddín, was born at Baghdád, and was the Librarian of Musta'çam billah, the thirty-seventh and last Khalífah, who imprisoned him some time on account of his Shí'ah tendencies. He survived the general slaughter (1258) of Hulágú Khán, and died, at the age of one hundred and twenty, A. H. 697, or A. D. 1297, during the reign of Gházán Khán, Hulágú's great grandson.

[5] He lived in the beginning of the fifteenth century, at the time of Mírzá Sháhrukh, (1404-1447).

[6] A contemporary and rival of the great poet Salmán of Sáwah (died 769). The name *Ma'rúf* appears to have been common in Baghdád since the times of the famous saint *Ma'rúf* of *Karkh* (a part of Baghdád).

Faráh; Abdulhaq of Sabzwár; Mauláná Ni'matullah i Bawwáb; Khájagí Múmin i Marwáríd, the inventor of variegated papers and sands for strewing on the paper; Sultán Ibráhím, son of Mírzá Sháhrukh; Mauláná Muhammad Hakím Háfiz; Mauláná Mahmúd Siyáush; Mauláná Jamáluddín Husain; Mauláná Pír Muhammad; Mauláná Fazlulhaq of Qazwín[1].

A *seventh* kind of writing is called *Ta'liq*, which has been derived from the *Riqá'* and the *Tauqí'*. It contains very few straight lines, and was brought to perfection by Khájah Táj i Salmání,[2] who also wrote well the other six characters. Some say that he was the inventor.

Of modern caligraphists I may mention: Mauláná 'Abdulhay, the Private Secretary[3] of Sultán Abú Sa'íd Mírzá, who wrote *Ta'liq* well; Mauláná Darwísh;[4] Amír Mançúr; Mauláná Ibráhím of Astarábád; Khájah Ikhtiyár;[5] Munshí Jamáluddín; Muhammad of Qazwín; Mauláná Idrís; Khájah Muhammad Husain Munshí; and Ashraf Khán,[6] the Private Secretary of His Majesty, who improved the *Ta'liq* very much.

The *eighth* character which I have to mention is the *Nasta'liq:* it consists entirely of round lines. They say that Mír 'Alí of Tabríz, a contemporary of Tímúr, derived it from the Naskh and the Ta'líq; but this can scarcely be correct, because there exist books in the Nasta'líq character, written before Tímúr's time. Of Mír 'Alí's pupils I may mention two:[7] Mauláná Ja'far of Tabríz, and Mauláná Azhar; and of other caligraphists in Ta'líq, Mauláná Muhammad of Aubah (near Herát), an excellent writer; Mauláná Bárí of Herát; and Mauláná Sultán 'Alí[8] of Mashhad, who surpasses

[1] The *Maktúbát* and the *Mir-át* also mention Mullá Abá Bakr, and Shaikh Mahmúd.

[2] According to the Maktúbát and several MSS., *Sulaimání*.

[3] In the original text, p. 114, l. 5, by mistake, Mauláná 'Abdulhay *and* the Munshí of Sultán Abú Sa'íd.

[4] Mauláná Darwísh Muhammad was a friend of the famous Amír 'Alí Shér, the vizier of Sultán Husain Mírzá, king of Khurásán (A. D. 1470 to 1505), and the patron of the poet Jámí. Mauláná Darwísh entered afterwards the service of Sháh Junaid i Cafawí, king of Persia, (A. D. 1499 to 1525). A biography of the Mauláná may be found in the *Maásir i Rahímí*, p. 751.

[5] Khájah Ikhtiyár, the contemporary and successful rival of the preceding caligraphist. He was Private Secretary to Sultán Husain Mírzá.

[6] This is the title of Muhammad Açghar, a Sayyid from Mashhad—or according to the Tabaqát i Akbarí, from 'Arabsháhí. He served Humáyún as Mír Munshí, Mír 'Arzí and Mír Málí. He accompanied Tardí Bég on his flight from Dihlí, was imprisoned by Bairám, and had to go to Mecca. He rejoined Akbar, in A. H. 968, when Bairám had just fallen in disgrace, received in the following year the title of *Ashraf Khán*, and served under Mun'im Khán in Bengal. He died in the tenth year of Akbar's reign, A. H. 973. In Abulfazl's list of grandees, in the second book, Ashraf Khán is quoted as a commander of two thousand. Badáoní mentions him among the contemporaneous poets. Abul Muzaffar, Ashraf Khán's son was, A. D. 1596, a commander of five hundred.

[7] The *Mir-át* mentions a third immediate pupil of Mír Alí, *Mauláná Khájah Muhammad*, and relates that he put Mír Alí's name to his own writings, without giving offence to his master.

[8] He also was a friend of Amír 'Alí Shér, and died A. H. 910, during the reign of Sultán Husain Mírzá, mentioned in the fourth note.

them all. He imitated the writing of Maulánà Azhar, though he did not learn from him personally. Six of his pupils are well known: Sultán Muhammad i Khandán;[1] Sultán Muhammad Núr; Maulánà 'Aláuddín[2] of Herát; Maulánà Zainuddín (of Níshápúr); Maulánà 'Abdí of Níshápúr; Muhammad Qásim Shádí Sháh, each of whom possessed some distinguishing qualities.

Besides these, there are a great number of other good caligraphists, who are famous for their skill in Nasta'líq; as Maulánà Sultán 'Alí, of Qáyin;[3] Maulánà Sultán 'Alí of Mashhad;[4] Maulánà Hijrání;[5] and after them the illustrious Maulánà Mír 'Alí,[6] the pupil, as it appears, of Maulánà Zainuddín. He brought his art to perfection by imitating the writing of Sultán 'Alí of Mashhad. The new method which he established, is a proof of his genius; he has left many master-pieces. Some one asked him once what the difference was between his writing and that of the Maulánà. He said, "I have brought his writing to perfection; but yet, his method has a peculiar charm."

In conclusion I may mention:—Sháh Mahmúd[7] of Níshápúr; Mahmúd Is-háq; Shamsuddín of Kirmán; Maulánà Jamshéd, the riddle-writer; Sultan Husain of Khujand; Maulánà 'Aishí; Ghiásuddín, the gilder; Maulánà 'Abduççamad; Maulánà Malik; Maulánà 'Abdulkarím; Maulánà Abdurrahím of Khárizm; Maulánà Shaikh Muhammad; Maulánà Sháh Mahmúd i Zarrínqalam (or gold pen); Maulánà Muhammad Husain[8] of Tabríz; Maulánà Hasan 'Alí of Mashhad; Mír Mu'izz of Káshán; Mírzá Ibráhím of Içfahán; and several others who have devoted their lives to the improvement of the art.

His Majesty shews much regard to the art, and takes a great interest in the different systems of writing; hence the large number of skilful caligraphists. Nasta'líq has especially received a new impetus. The artist who, in the shadow of the throne of His Majesty, has become a master of caligraphy, is Muhammad Husain[9] of Kashmír. He has been honoured

[1] He was called *Khandán*, as he was always *happy*. He was a friend of Amír 'Alí Shér, and died A. H. 915.

[2] In the *Maktúbát*, 'Aláuddín *Muhammad* of Herát.

[3] He was the instructor of Sultán Husain Mírzá's children, and died A. H. 914. *Qáyin* is a Persian town, S.E. of Khurásán, near the frontier of Afghánistán. It is spelt *Ghayan* on our maps.

[4] According to the *Maktúbát*, Maulánà Sultán 'Alí *shér* of Mashhad, which is evidently the correct reading.

[5] A poet and friend of Amír 'Alí Shér. He died A. H. 921.

[6] Maulánà Mír 'Alí, a Sayyid of Herát, died A. H. 924. As a poet he is often mentioned together with Mír Ahmad, son of Mír Khusrau of Dihlí, and Bairám Khán, Akbar's Khánkhánán, as a master of *Dakhl* poetry. *Dakhl*, or *entering*, is the *skilful* use which a poet makes of verses, or parts of verses, of another poet.

[7] According to the *Maktúbát* and the *Mir-át*, Sháh *Muhammad* of Níshápúr. Both mention another caligraphist, *Mír Sayyid Ahmad of Mashhad*.

[8] He was the teacher of the celebrated caligraphist *'Imád*, whose biography will be found in the *Mir-át*. *Vide* also the preface of Dr. Sprenger's *Gulistán*.

[9] He died A. H. 1020, six years after Akbar's death.

with the title of *Zarrínqalam*, the gold pen. He surpassed his master Mauláná 'Abdul-'Aziz; his *maddát* and *dawáir*[1] shew everywhere a proper proportion to each other, and art critics consider him equal to Mullá Mír 'Alí. Of other renowned caligraphists of the present age, I must mention Mauláná Báqir, the son of the illustrious Mullá Mír 'Alí; Muhammad Amín of Mashhad; Mír Husain i Kulankí; Mauláná 'Abdulhay; Mauláná Daurí[2]; Mauláná 'Abdurrahím; Mír 'Abdullah; Nizámí of Qazwín; 'Alí Chaman of Kashmír; Núrullah Qásim Arsalán.

His Majesty's library is divided into several parts: some of the books are kept within, and some without the Harem. Each part of the Library is subdivided, according to the value of the books and the estimation in which the sciences are held of which the books treat. Prose books, poetical works, Hindí, Persian, Greek, Kashmírian, Arabic,[3] are all separately placed. In this order they are also inspected. Experienced people bring them daily and read them before His Majesty, who hears every book from the beginning to the end. At whatever page the readers daily stop, His Majesty makes with his own pen a sign, according to the number of the pages; and rewards the readers with presents of cash, either in gold or silver, according to the number of leaves read out by them. Among books of renown, there are few that are not read in His Majesty's assembly hall; and there are no historical facts of the past ages, or curiosities of science, or interesting points of philosophy, with which His Majesty, a leader of impartial sages, is unacquainted. He does not get tired of hearing a book over again, but listens to the reading of it with more interest. The Akhláq i Náçirí, the Kímiyá i Sa'ádat, the Qábúsnámah, the works of Sharaf of Munair (*vide* p. 48), the Gulistán, the Hadíqah of Hakím Sanáí, the Masnawí of Ma'nawí, the Jám i Jam, the Bustán, the Sháhnámah, the

---

[1] By *Maddát*, (extensions) caligraphists mean letters like ب, ف; by *dawáir* (curvatures), letters like ن, ح.

Draw four horizontal lines at equal intervals; call the spaces between them *a*, *b*, *c*, of which *a* is the highest. Every letter which fills the space *b*, is called a *shóshah*; as ذ, ڈ, د, ک. The diacritical points are immaterial. Every line above *b*, is called a *markiz*; every line below *b*, *i. e.* in *c*, a *dáman*. Thus ک consists of a shóshah and a markiz; س of a shóshah and a dáman. The knob of a ع, ف, or ق, is called *kallah*, head. Thus ف is a *Maddah*, consisting of a kallah, and a dáman; so also ع, ج, ک. The ک consists of a markiz and a dáman.

In *Grammar* the word *markiz* means the same as *shóshah* in caligraphy; thus أ, إ, consist of a *markiz*, and a *shakl i hamzah*.

By *içláh* caligraphists mean any additional ornamental strokes, or refilling a written letter with ink (Hind. *siyáhí bharná*), or erasing (Hind. *chhílna*).

[2] His name is Sultán Báyazíd; he was born at Herát. *Daurí* is his poetical name. *Vide* Badáoní's list of poets (Vol. III of the Bibl. Indica). Akbar bestowed on him the title of *Kátib ul mulk*, the writer of the empire. His pupil was Khájah Muhammad Husain, an Ahadí, (*vide* Badáoní, II, p. 394, where for *Ibráhím*, in the Táríkh, read *Baráhím*).

[3] Observe that the Arabic books are placed last.

collected Masnawís of Shaikh Nizámí, the works of Khusrau and Mauláná Jámí, the Díwáns of Kháqání, Anwarí, and several works on History, are continually read out to His Majesty. Philologists are constantly engaged in translating Hindí, Greek, Arabic, and Persian books, into other languages. Thus a part of the Zích i Jadíd i Mírzái (*vide* IIIrd book, Ain 1) was translated under the superintendence of Amír Fathullah of Shíráz (*vide* p. 33), and also the Kishnjóshí, the Gangádhar, the Mohesh Mahánand, from Hindí (Sanscrit) into Persian, according to the interpretation of the author of this book. The Mahábhárat which belongs to the ancient books of Hindústán has likewise been translated, from Hindí into Persian, under the superintendence of Naqíb Khán[1], Mauláná 'Abdul Qádir of Badáon,[2] and Shaikh Sultán of T'hanésar.[3] The book contains nearly one hundred thousand verses: His Majesty calls this ancient history *Razmnámah*, the book of Wars. The same

[1] Regarding this renowned man, *vide* Abulfazl's list of Grandees, IInd book, No. 161.

[2] Mullá 'Abdul Qádir, poetically styled *Qádirí*, was born A. H. 947 [or 949] at Badáon, a town near Dihlí. He was thus two years older than Akbar. His father, whom he lost in 969, was called Shaikh Mulúk Sháh, and was a pupil of the Saint Béchú of Sambhal. Abdul Qádir, or *Badáoní*, as we generally call him, studied various sciences under the most renowned and pious men of his age, most of whom he enumerates in the beginning of the third volume of his *Muntakhab*. He excelled in Music, History, and Astronomy, and was on account of his beautiful voice appointed Court *Imám* for Wednesdays. He had early been introduced to Akbar by Jalál Khán Qúrchí (*vide* List of Grandees, IInd book, No. 213). For forty years Badáoní lived in company with Shaikh Mubárik, and Faizí and Abulfazl, the Shaikh's sons; but there was no sincere friendship between them, as Badáoní looked upon them as heretics. At the command of Akbar, he translated the *Rámáyan* (*Badáoní* II, pp. 336, 366,) from the Sanscrit into Persian, receiving for twenty-four thousand *slóks* 150 Ashrafís and 10,000 Tangahs; and parts of the Mahábhárat; extracts from the History of Rashíd; and the Bahr ul asmár, a work on the *Hadís*. A copy of another of his works, entitled *Najálurrashíd* may be found among the Persian MSS. of the As. Soc. Bengal. His historical work, entitled *Muntakhabut Tawáríkh*, is much prized as written by an enemy of Akbar, whose character, in its grandeur and its failings, is much more prominent than in the *Akbarnámah*, or the *Tabaqát i Akbarí*, or the *Maásiri Rahímí*. It is especially of value for the religious views of the emperor, and contains interesting biographies of most famous men and poets of Akbar's time. The History ends with the beginning of A. H. 1004, or eleven years before Akbar's death, and we may conclude that Badáoní died soon after that year. The book was kept secret, and according to a statement in the *Mir-átul 'álam*, it was made public during the reign of Jahángír, who shewed his displeasure by disbelieving the statement of Badáoní's children that they themselves had been unaware of the existence of the book. The Tuzuk i Jahángírí unfortunately says nothing about this circumstance; but Badáoní's work was certainly not known in A. H. 1025, the tenth year of Jahángír's reign, in which the *Maásir i Rahímí* was written, whose author complains of the want of a history beside the Tabaqát, and the Akbarnámah.

In point of style, Badáoní is much inferior to Bakhtáwar Khán (*Mir-átul 'Alam*) and Muhammad Kázim (the 'Alamgírnámah), but somewhat superior to his friend Mírzá Nizámuddín Ahmad of Herát, author of the *Tabaqát*, and to 'Abdul Hamíd of Lahór, author of the *Pádisháhnámah*.

'Abdul Qádir of Badáon must not be confounded with Mauláná Qádirí, another learned man contemporaneous with Akbar.

[3] *Vide* Badáoní III, p. 118; and for Hájí Ibráhím, III, p. 139.

learned men translated also into Persian the Ramáyan, likewise a book of ancient Hindustan, which contains the life of Rám Chandra, but is full of interesting points of Philosophy. Hájí Ibráhím of Sarhind translated into Persian the *At'harban*[1] which, according to the Hindús, is one of the four divine books. The Lílawatí, which is one of the most excellent works written by Indian Mathematicians on Arithmetic, lost its Hindú veil, and received a Persian garb from the hand of my elder brother, Shaikh 'Abdul Faiz i Faizí.[2] At the command of His Majesty, Mukammal Khán of Gujrát translated into Persian the Tájak, a well known work on Astronomy. The Memoirs[3] of Bábar, the Conqueror of the world, which may be called a Code of practical wisdom, have been translated from Turkish into Persian by Mírzá

[1] "In this year (A. H. 983, or A. D. 1575) a learned Brahmin, Shaikh Bháwan, had come from the Dek'han and turned Muhammadan, when His Majesty gave me the order to translate the *At'harban*. Several of the religious precepts of this book resemble the laws of the Islám. As in translating I found many difficult passages, which Shaikh Bháwan could not interpret either, I reported the circumstance to His Majesty, who ordered Shaikh Faizí, and then Hájí Ibráhím, to translate it. The latter, though willing, did not write anything. Among the precepts of the At'harban, there is one which says that no man will be saved unless he read a certain passage. This passage contains many times the letter *l*, and resembles very much our *Lá illah illallah*. Besides, I found that a Hindú, under certain conditions, may eat cow flesh; and another, that Hindús *bury* their dead, but do not burn them. With such passages the Shaikh used to defeat other Brahmins in argument; and they had in fact led him to embrace Islám. Let us praise God for his conversion!" *Badáoní* II. p. 212.

The translation of the Mahábhárat was not quite a failure. "For two nights, His Majesty himself translated some passages of the Mahábhárat, and told Naqíb Khán to write down the general meaning in Persian; the third night he associated me with Naqíb Khán; and, after three or four months, two of the eighteen chapters of these useless absurdities—enough to confound the eighteen worlds—were laid before His Majesty. But the emperor took exception to my translation, and called me a *Haramkhur* and a *turnip-eater*, as if that was my share of the book. Another part was subsequently finished by Naqíb Khán and Mullá Shérí, and another part by Sultán Hájí of T'hanésar; then Shaikh Faizí was appointed, who wrote two chapters, prose and poetry; then the Hájí wrote two other parts, adding a *verbal* translation of the parts that had been left out. He thus got a hundred *juz* together, closely written, so exactly rendered, that even the accidental dirt of flies on the original was not left out; but he was soon after driven from Court, and is now in Bhakkar. Other translators and interpreters, however, continue now-a-days the fight between Pandús and the Kurús. May God Almighty protect those that are not engaged in this work, and accept their repentance, and hear the prayer of pardon of every one who does not hide his disgust, and whose heart rests in the Islám; for 'He allows men to return to Him in repentance!' This Razmnámah was illuminated, and repeatedly copied; the grandees were ordered to make copies, and Abdul Fazl wrote an introduction to it of about two *juz*, &c." *Badáoní* II. p. 302. A copy of this translation in two volumes, containing eighteen *fans* (فن) is among the MSS. of the As. Soc. of Bengal, No. 1329. One *juz* (جزء) = sixteen pages *quarto*, or two sheets.

[2] This work has been printed. Abulfazl's words *Hindú veil* are an allusion to Lílawatí's sex.

[3] *Vide* Tuzuk i Jahángírí, p. 417. The Wáqiát i Timur were translated into Persian, during the reign of Sháhjahán, by Mír Abú Tálib i Turbatí. *Padsháhnámah* II, p. 288,. edit. Bibl. Indica. "Conqueror of the world," *gétí sitání*, is Báber's title. Regarding the titles of the Mogul Emperors from Bábar to Bahádur Sháh, *vide* Journal As. Soc. Bengal for 1868, Part I. p. 39.

'Abdurrahím Khán, the present Khán Khánán (Commander-in-Chief). The History of Kashmír, which extends over the last four thousand years, has been translated from Kashmírian into Persian[1] by Maulánà Sháh Muhammad of Sháhábád. The *Mu'jam ul Buldán*, an excellent work on towns and countries, has been translated from Arabic into Persian by several Arabic scholars, as Mullá Ahmad of T'hat'hah, Qásim Bég, Shaikh Munawwar, and others. The *Haribans*, a book containing the life of Krishna, was translated into Persian by Maulánà Sherí (*Vide* the poetical extracts of the second book). By order of His Majesty, the author of this volume composed a new version of the Kalílah Damnah, and published it under the title of *'Ayár Dánish*.[3] The original is a master-piece of practical wisdom, but is full of rhetorical difficulties; and though Naçrullah i Mustaufí and Maulánà Husain i Wá'iz had translated it into Persian, their style abounds in rare metaphors and difficult words. The Hindí story of the Love of Nal and Daman, which melts the heart of feeling readers, has been metrically translated by my brother Shaikh Faizí i Fayyází, in the masnawí metre of the Laílí Majnún, and is now everywhere known under the title of *Nal Daman*.[4]

As His Majesty has become acquainted with the treasure of history, he ordered several well informed writers to compose a work containing the events which have taken place in the seven zones for the last one thousand years. Naqíb Khán, and several others, commenced this history. A very large portion was subsequently added by Mullá Ahmad of T'hat'hah, and the whole concluded by Ja'far Bég i Açaf Khán. The introduction is composed by me. The work has the title of *Taríkh i Alfí*,[5] the History of a thousand years.

---

[1] "During this year (A. H. 999, or A. D. 1590-91,) I received the order from His Majesty, to re-write, in an easy style, the History of Kashmír, which Mullá Sháh Muhammad of Sháhábád, a very learned man, had translated into Persian. I finished this undertaking in two months, when my work was put into the Imperial Library, to be read out to His Majesty in its turn." *Badáoní*, II. p. 374.

[2] Regarding the tragic end of this "heretic," *vide* Badáoní II. p. 364. Notices regarding the other two men will be found in the third volume of Badáoní.

[3] For *'Iyár i Dánish*. Such abbreviations are common in *titles*.

[4] "Faizí's *Naldaman* (for *Nal o Daman* contains about 4200 verses, and was composed, A. H. 1003, in the short space of five months. It was presented to Akbar with a few *ashrafís* as *nazar*. It was put among the set of books read at Court, and Naqíb Khán was appointed to read it out to His Majesty. It is, indeed, a masnawí, the like of which, for the last three hundred years, no poet of Hindustan, after Mír Khusrau of Dihlí, has composed." Badáoní, II. p. 396.

[5] In A. H. 1000, A. D. 1591-92, the belief appears to have been current among the Muhammadans that the Islám and the world were approaching their end. Various men arose, pretending to be *Imám Mahdí*, who is to precede the reappearance of Christ on earth; and even Badáoní's belief got doubtful on this point. Akbar's disciples saw in the common rumour a happy omen for the propagation of the *Dín i Iláhí*. The *Táríkh i Alfí* was likewise to give prominence to this idea.

The copy of the *Táríkh i Alfí* in

The Art of Painting.

Drawing the likeness of anything is called *taçwír*. His Majesty, from his earliest youth, has shewn a great predilection for this art, and gives it every encouragement, as he looks upon it as a means, both of study and amusement. Hence the art flourishes, and many painters have obtained great reputation. The works of all painters are weekly laid before His Majesty by the Dáróghahs and the clerks; he then confers rewards according to excellence of workmanship, or increases the monthly salaries. Much progress was made in the commodities required by painters, and the correct prices of such articles were carefully ascertained. The mixture of colours has especially been improved. The pictures thus received a hitherto unknown finish. Most excellent painters are now to be found, and master-pieces, worthy of a *Bihzád*,[1] may be placed at the side of the wonderful works of the European painters who have attained world-wide fame. The minuteness in detail, the general finish, the boldness of execution, &c., now observed in pictures, are incomparable; even inanimate objects look as if they had life. More than a hundred painters have become famous masters of the art, whilst the number of those who approach perfection, or of those who are middling, is very large. This is especially true of the Hindus:[2] their pictures surpass our conceptions of things. Few, indeed, in the whole world are found equal to them.

Among the forerunners on the high road of art I may mention:

1. Mír Sayyid 'Alí of Tabríz.[3] He learned the art from his father. From the time of his introduction at Court, the ray of royal favour has shone upon him. He has made himself famous in his art, and has met with much success.

2. Khájah Abduççamad, styled *Shírínqalam*, or *sweet pen*. He comes from Shíráz. Though he had learnt the art before he was made a grandee[4] of the Court, his perfection was mainly due to the wonderful effect of a look of His Majesty, which caused him to turn from that which is form to that which is spirit. From the instruction they received, the Khájah's pupils became masters.

---

the Library of the As. Soc. of Bengal (No. 19,) contains no preface, commences with the events subsequent to the death of the Prophet (8th June, 632), and ends abruptly with the reign of 'Umar ibn i 'Abdul Malik (A. H. 99, or A. D. 717-18). The years are reckoned from the death of the Prophet, not from the Hijrah. For further particulars regarding this book, *vide* Badáoní, II. p. 317.

[1] "*Bihzad* was a famous painter, who lived at the Court of Sháh Isma'íl i Çafawí of Persia." *Sirájullughát.*

[2] Compare with Abulfazl's opinion, *Elphinstone's* History of India, second edition, p. 174.

[3] Better known as a poet under the name of *Judái*. *Vide* the poetical extracts of the second book. He illuminated the *Story of Amír Hamzah*, mentioned on the next page.

[4] He was a *Chahárçadí*. *Vide* the list of grandees, in the second book, No. 266.

3. Daswant'h. He is the son of a palkee-bearer. He devoted his whole life to the art, and used, from love to his profession, to draw and paint figures even on walls. One day the eye of His Majesty fell on him; his talent was discovered, and he himself handed over to the Khájah. In a short time he surpassed all painters, and became the first master of the age. Unfortunately the light of his talents was dimmed by the shadow of madness; he committed suicide. He has left many master-pieces.

4. Basáwan. In back grounding, drawing of features, distribution of colours, portrait painting, and several other branches, he is most excellent, so much so, that many critics prefer him to Daswant'h.

The following painters have likewise attained fame: Késú, Lál, Mukund, Mushkín, Farrukh the Qalmáq (Calmuck), Mádhú,[1] Jagan, Mohesh, K'hémkaran, Tárá, Sánwlah, Haribans, Rám. It would take me too long to describe the excellencies of each. My intention is "to pluck a flower from every meadow, an ear from every sheaf."

I have to notice that the observing of the figures of objects and the making of likenesses of them, which are often looked upon as an idle occupation, are, for a well regulated mind, a source of wisdom, and an antidote against the poison of ignorance. Bigoted followers of the letter of the law are hostile to the art of painting; but their eyes now see the truth. One day at a private party of friends, His Majesty, who had conferred on several the pleasure of drawing near him, remarked: "There are many that hate painting; but such men I dislike. It appears to me as if a painter had quite peculiar means of recognizing God; for a painter in sketching anything that has life, and in devising its limbs, one after the other, must come to feel that he cannot bestow individuality upon his work, and is thus forced to think of God, the Giver of life, and will thus increase in knowledge."

The number of master-pieces of painting increased with the encouragement given to the art. Persian books, both prose and poetry, were ornamented with pictures, and a very large number of paintings was thus collected. The *Story of Hamzah* was represented in twelve volumes, and clever painters made the most astonishing illustrations for no less than one thousand and four hundred passages of the story. The Chingiznámah, the Zafarnámah,[2] this book, the Razmnámah, the Ramáyan, the Nal Daman, the Kalílah Damnah, the 'Ayár Dánish, &c., were all illustrated. His Majesty himself sat for his likeness, and also ordered to have the likenesses

[1] Mentioned in the *Maásir i Rahímí* (p. 753) as in the service of Abdurrahím Khán Khánán, Akbar's Commander-in-Chief.

[2] A History of the House of Tímúr, by Sharafuddín of Yazd (died 1446). *Vide* Morley's Catalogue of Historical MSS., p. 94.

taken of all the grandees of the realm. An immense album was thus formed: those that have passed away, have received a new life, and those who are still alive, have immortality promised them.

In the same manner, as painters are encouraged, employment is held out to ornamental artists, gilders, line-drawers, and pagers.

Many Mansabdars, Ahadís, and other soldiers, hold appointments in this department. The pay of foot soldiers varies from 1200 to 600 *dáms*.

Áín 35.

THE ARSENAL.

The order of the Household, the efficiency of the Army, and the welfare of the country, are intimately connected with the state of this department; hence His Majesty gives it every attention, and looks scrutinizingly into its working order. He introduces all sorts of new methods, and studies their applicability to practical purposes. Thus a plated armour was brought before His Majesty, and set up as a target; but no bullet was so powerful as to make an impression on it. A sufficient number of such armours has been made so as to supply whole armies. His Majesty also looks into the prices of such as are sold in the bázárs.

All weapons for the use of His Majesty have names, and a proper rank is assigned to them. Thus there are thirty swords, (*kháçah* swords) one of which is daily sent to His Majesty's sleeping apartments. The old one is returned, and handed over to the servants outside the Harem, who keep it till its turn comes again. Forty other swords are kept in readiness: they are called *kotal* swords. When the number of *kháçah* swords (in consequence of presents, &c.) has decreased to twelve, they supply new ones from the *kotal* swords. There are also twelve *Yakbandí (?)*[1], the turn of every one of which recurs after one *week*. Of *Jámdhars* and *K'hapwahs*, there are forty of each. Their turn recurs every week; and each has thirty *kotals*, from which deficiencies are supplied as before. Besides, eight knives, twenty spears and *barchhas* are required monthly. Of eighty-six *Mashhadí* bows, *Bhadáyan* bows, and twenty-four others, are returned monthly....[2] In the same manner a rank is assigned to each.

Whenever His Majesty rides out, or at the time of the *Bár i 'Ám*, or Levee, the sons of the Amírs, and other Mansabdárs and Ahadís, carry the *Qur* in their hands and on their shoulders, *i. e.*, every four of them carry four

---

[1] I doubt the correctness of the translation. The word *yakbandí* is not in the Dictionaries.

[2] The text has an unintelligible sentence.

quivers, four bows, four swords, four shields; and besides, they take up lances, spears, axes, pointed axes, *piyázi* war-clubs, sticks, bullet bows, pestles, and a footstool, all properly arranged. Several *qiṭárs*[1] of camels and mules are loaded with weapons and kept in readiness; and on travels, they use Bactrian camels, &c., for that purpose. At Court receptions the Amírs and other people stand opposite the *Qur*, ready for any service; and on the march, they follow behind it, with the exception of a few who are near His Majesty. Elephants in full trappings, camels, carriages, naqqárahs, flags, the kaukabahs, and other Imperial insignia, accompany the *Qur*, while eager macebearers superintend the march, assisted by the Mírbakhshís. In hunting expeditions several swift runners are in attendance, and a few others are in charge of harnesses.

In order to shorten the trouble of making references, I shall enumerate the weapons now in use in form of a table, and give pictures of some of them.

1.	Swords (slightly bent), ...	½ *R.* to 15 *Muhurs.*
2.	K'hándah (straight swords), ...	1 to 10 *R.*
3.	Guptí 'Açá (a sword in a walking stick),	2 to 20 *R.*
4.	Jamd'har (a broad dagger), ...	¼ *R.* to 2½ *M.*
5.	Khanjar, ...	½ to 5 *R.*
6.	K'hapwah, ...	½ *R.* to 1½ *M.*
7.	Jam K'hák, ...	½ *R.* to 1½ *M.*
8.	Báṇk, ...	½ *R.* to 1 *M.*
9.	Jhanbwah, ...	½ *R.* to 1 M.
10.	Katárah, ...	½ *R.* to 1 *M.*
11.	Narsink Mot'h, ...	½ *R.* to 2 *M.*
12.	Kamán (bows)	¼ *R.* to 3 *M.*
13.	Takhsh Kamán, ...	1 to 4 *R.*
14.	Náwak, ...	½ *R.* to 1 *M.*
15.	Arrows, *per bundle*, ...	½ to 30 *R.*
16.	Quivers, ...	¼ *R.* to 2 *M.*
17.	Ḍaḍí, ...	¼ to 5 *R.*
18.	Tírbardár (Arrow drawers),[2]	½ to 2½ *d.*
19.	Paikánkash (Do.), ...	½ to 3 *R.*
20.	Naizah (a lance), ...	1¾ *R.* to 6 *M.*
21.	Barchhah, ...	¾ *R.* to 2 *M.*
22.	Sáṇk, ...	¼ to 1½ *R.*

[1] Five camels are called a *qiṭár*, in Hind. *qaṭár*. A string of some length is tied to the tail of the front camel and is drawn through the nose holes of the next behind it, and so on. Young camels are put on the backs of their mothers.

[2] If this spelling be correct, it is the same as the next (No. 19); but it may be *tír i pardar*, an arrow with a *feather* at the bottom of the shaft, a barbed arrow.

23. Saint'hí,	½ to 1 *R.*
24. Sélarah,	10 *d.* to ¾ *R.*
25. Gurz (a war club,)	½ to 5 *R.*
26. Shashpar (do.),	½ *R.* to 3 *M.*
27. Késtan (?)[1]	1 to 3 *R.*
28. Tabar (a war axe),	¼ *R.* to 2 *M.*
29. Piyází (a club),	½ to 5 *R.*
30. Zághnól (a pointed axe)	½ *R.* to 1 *M.*
31. Chakar-Basólah,	1 to 6 *R.*
32. Tabar zághnól,	1 to 4 *R.*
33. Tarangálah,	¼ to 2 *R.*
34. Kárd (a knife)	2 *d.* to 1 *M.*
35. Guptí kárd,	3 *R.* to 1½ *M.*
36. Qamchí kárd,	1 to 3½ *R.*
37. Cháqú (a clasp knife)	2 *d.* to ¼ *R.*
38. Kamán i Guróhah (bullet bow)	2 *d.* to 1 *R.*
39. Kamt'hah,	5 *d.* to 3 *R.*
40. Tufak i dahán (a tube; *Germ.* Blasorohr)	10 *d.* to ½ *R.*
41. Pushtkhár,[2]	2 *d.* to 2 *R.*
42. Shaçtáwéz,[3]	2 *d.* to 1 *R.*
43. Girihkushá,	1 *d.* to ¼ *R.*
44. Khár i Máhí,	1 to 5 *R.*
45. Góbhan (a sling)	1½ *d.* to ¼ *R.*
46. Gajbág,	1 to 5 *R.*
47. Sipar (a shield),	1 to 50 *R.*
48. Dhál,	½ *R.* to 4 *M.*
49. K'hérah,	1 *R.* to 4 *M.*
50. Pahrí,	1 *R.* to 1 *M.*
51. Uḍánah,	½ to 5 *R.*
52. Dubulghah,	½ *R.* to 3½ *M.*
53. K'hóg'hí,	1 to 4 *R.*
54. Zirih Kuláh,	1 to 5 *R.*
55. G'húg'huwah,	1 *R.* to 2 *M.*
56. Jaibah,[4]	20 *R.* 30 *M.*

[1] This name is doubtful. The MSS. give all sorts of spellings. *Vide* my Text edition, p. 121, l. 1. The Dictionaries give no information.

[2] Vide Journal As. Society, Bengal, for 1868, p. 61.

[3] A weapon resembling the following. The word *Shaçtáwéz*, or more correctly *shastáwéz*, means *a thing by which you can hook anything*. In Vullers' Persian Dicty. II. p. 426, b, read *bíz* for *panír* (!).

[4] This word is used in a general sense, *an armour*. It is either *Turkish*, or a corruption of the Arab. *jubbah*. The form *jaibá* is occasionally met with; but *jabah*, as given by Vullers I, p. 508 a., is wrong, and against the metre of his quotation.

57. Zirih,	1¾ *R.* to 100 *M.*
58. Bagtar,	4 *R.* to 12 *M.*
59. Jóshan,	4 *R.* to 9 *M.*
50. Chár Áínah,	2 *R.* to 7 *M.*
61. Koṭ'hí,	5 *R* to 8 *M.*
62. Çádiqí,	3 *R.* to 8 *M.*
63. Angirk'hah,	1½ *R.* to 5 *M.*
64. Bhanjú,	3 *R.* to 2 *M.*
65. Chihrahzirih i Áhaní,	1½ *R.* to 1 *M.*
66. Salhqabá,	5 *R.* to 8 *M.*
67. Chihilqad,	5 to 25 *R.*
68. Dastwánah,	1½ *R.* to 2 *M.*
69. Rák,[1]	1 *R.* to 10 *M.*
70. Kaṇt'hah sobhá,[2]	1 to 10 *R.*
71. Mózah i Áhaní.	½ to 10 *R.*
72. Kajém,	50 to 300 *R.*
73. Artak (the quilt) i Kajém,	4 *R.* to 7 *M.*
74. Qashqah,	1 *R.* to 2½ *M.*
75. Gardaní,[3]	1 *R.* to 1 *M.*
76. Matchlocks,	½ *R.* to 1 *M.*
77. Bán (rockets),	2½ to 4 *R.*

ÁÍN 36.

ON GUNS.

Guns are wonderful locks for protecting the august edifice of the state; and befitting keys for the door of conquest. With the exception of Turkey, there is perhaps no country which in its guns has more means of securing the government than this. There are now-a-days guns made of such a size that the ball weighs 12 *mans;* several elephants and a thousand cattle are required to transport one. His Majesty looks upon the care bestowed on the efficiency of this branch as one of the higher objects of a king, and therefore devotes to it much of his time. Dáróghahs and clever clerks are appointed, to keep the whole in proper working order.

His Majesty has made several inventions, which have astonished the whole world. He made a gun which, on marches, can easily be taken to

[1] According to some MSS. *rág.*

[2] The figure represents a long spear; but the etymology, as also its position in the list of weapons, shews that it must be a part of the armour, *a neck-piece.*

[3] A round shield-like plate of iron attached to the *neck* of the horse and hanging down so as to protect the chest of the animal.

pieces, and properly put again together when required. By another invention, His Majesty joins seventeen guns in such a manner as to be able to fire them simultaneously with one match. Again, he made another kind of gun, which can easily be carried by a single elephant; such guns have the name of *Gajnáls*. Guns which a single man may carry, are called *Narnáls*.

The imperial guns are carefully distributed over the whole kingdom, and each Súbah has that kind which is fit for it. For the siege of fortresses and for naval engagements, His Majesty has separate guns made, which accompany his victorious armies on their marches. It is impossible to count every gun; besides clever workmen make continually new ones, especially *Gajnáls* and *Narnáls*.

Amírs and Ahadís are on staff employ in this branch. The pay of the foot varies from 100 to 400 *d*.

ÁÍN 37.

ON MATCHLOCKS, &c.

These are in particular favour with His Majesty, who stands unrivalled in their manufacture, and as a markman. Matchlocks are now made so strong, that they do not burst, though let off when filled to the top. Formerly they could not fill them to more than a quarter. Besides, they made them with the hammer and the anvil by flattening pieces of iron, and joining the flattened edges of both sides. Some left them, from foresight, on one edge open; but numerous accidents were the result, especially in the former kind. His Majesty has invented an excellent method of construction. They flatten iron, and twist it round obliquely in form of a roll, so that the folds get longer at every twist; then they join the folds, not edge to edge, but so as to allow them to lie one over the other, and heat them gradually in the fire. They also take cylindrical pieces of iron, and pierce them when hot with an iron pin. Three or four of such pieces make one gun; or, in the case of smaller ones, two. Guns are often made of a length of two yards; those of a smaller kind are one and a quarter yards long, and go by the name of *Damának*. The gunstocks are differently made. From the practical knowledge of His Majesty, guns are now made in such a manner that they can be fired off, without a match, by a slight movement of the cock. Bullets are also made, so as to cut like a sword. Through the assistance of the inventive genius of His Majesty, there are now many masters to be found among gunmakers; *e. g.*, Ustád Kabír, and Husain.

Iron, when heated, loses about one-half of its volume.

When a barrel is completed lengthways, before the transverse bottom piece is fixed to it, they engrave on it the quantity of its iron and the length, b oth being expressed in numerals. A barrel thus far finished, is called *Daul*. In this imperfect state they are sent to His Majesty, and delivered, in proper order, at the Harem, to which place they are also brought for.....[1] At the same time, the weight of the ball is fixed, and the order is given for the transverse section of the matchlock. For long guns the weight of a ball does not exceed twenty-five *tánks*, and for smaller ones, fifteen. But balls of the former weight no one but His Majesty[2] would dare to fire. When the barrels are polished, they are again sent to the Harem, and preserved in proper order. They are afterwards taken out, and closed by the order of His Majesty with a transverse bottom piece. Having been put to an old stock, they are filled to one-third of the barrel with powder, and fired off. If no *tarávish*[3] takes place, and the trial is satisfactory, they take the barrels again to His Majesty, who gives the order to finish the mouth piece of the barrel. After this the gun is again placed on the stock, and subjected to a trial. If the ball issues in a crooked line, the barrel is heated, and straightened by means of a rod introduced into it, and, in the presence of His Majesty, handed over to a filer. He adorns the outside of the barrel in various ways, according to orders, when it is taken to the Harem. The wood and the shape of the stock are then determined on. Several things are marked on every matchlock, *viz.*, the weight of the raw and the manufactured iron, the former marks being now removed; the place where the iron is taken from; the workman; the place where the gun is made; the date; its number. Sometimes without reference to a proper order, one of the unfinished barrels is selected, and completed at His Majesty's command. It is then entered in another place; the transverse bottom piece is fixed; and the order is given to make the cock, the ramrod, the *pargaz*,[4] *&c.* As soon as all these things have been completed, a new trial is ordered; and when it succeeds, they send in the gun, and deliver it a third time at the Harem. In this state the gun is called *sádah* (plain). Five bullets are sent along with it. His Majesty, after trying it in the manner above described, returns it with the fifth bullet. The order for the colour of the barrel and the stock is now given; one of the nine kinds of colour is selected for the stock. Guns also differ in the quantity of inlaid gold

[1] The text has an unintelligible word; the *variantes lectiones* are marked on p. 125 of my text edition, Note (13). The Banáras MS. has قرقان. The word appears to be a foreign term.

[2] Akbar was remarkable for bodily strength. *Vide* Tuzuk i Jahángírí, p. 16.

[3] *Tarávish* means *a trickling*; the particular meaning which it here has, is unclear and not given in the Dictionaries.

[4] *Pargaz*, or *Purgaz*, may mean the groove into which the ramrod is put, or the ramrod itself. The word is not in the Dicts., and appears to be unknown at the present day.

and enamel; the colour of the barrel is uniform. A gun thus far completed is called *rangín* (coloured). It is now, as before, handed over together with five bullets; His Majesty makes four trials, and returns it with the last ball. When ten of such guns are ready, His Majesty orders to inlay the mouth of the barrel and the butt end with gold. They are then again sent for trial into the Harem, and whenever ten are quite complete, they are handed over to the slaves.

ÁÍN 38.

THE MANNER OF CLEANING GUNS.

Formerly a strong man had to work a long time with iron instruments, in order to clean matchlocks. His Majesty, from his practical knowledge, has invented a wheel, by the motion of which sixteen barrels may be cleaned in a very short time. The wheel is turned by a cow. The plate will best show what sort of a machine it is.

ÁÍN 39.

THE RANKS OF THE GUNS.

The Imperial Arsenal contains *manufactured*, *purchased*, and *presented*, guns. Each of them is either *long*, or *short;* and these are again subdivided into *sádah* (plain), *rangín*, (coloured), and *koftkár* (hammered) guns. His Majesty has selected out of several thousand guns, one hundred and five as *kháçah*, *i. e.*, for his special use. *First*, twelve in honour of the twelve months; each of them is brought back in its turn after eleven months. *Secondly*, thirty for every week; after every seven days one goes out, and another is brought. *Thirdly*, thirty-two for the solar days; one for every day. *Fourthly*, thirty-one *kotals*. Sometimes there are only twenty-eight. Whenever some of the former guns have been given away, *kotals* are brought, to supply their places. The order of precedence is as follows: the guns for the month; the week; days; kotals; plain; coloured; koftkár, not handed over to the slaves; koftkár, handed over to the slaves; long ones, selected from *péshkash* presents, or from such as were bought; *Damánaks*, selected from péshkashí, or from bought ones; such as have been chosen from selections of both. The one hundred and five *kháçah* guns are divided into seven parts; every fifteen form a *kishk*, or guard, and are always kept ready by the slaves. On Sundays, two are taken from the first; four from the second; five from the third; four from the fourth. This order is also followed on Mondays, Tuesdays, and Wednesdays. On Thursdays, two are again taken from the first, and four from the second; four from the third; five from

the fourth. On Fridays, one is taken from the first; five from the second; four from the third; five from the fourth. So also for Saturdays. In order to supply the places of such *khâçah* guns as have been given away, five other classes have been determined on: half kotals, fourteen; quarter kotals, seven; one-eighth kotals, four; one-sixteenth kotals, two; one-thirty second kotals, one. When kotal guns are given away, they bring half *kotals*; similarly, the place of a gun, when given away, is taken by the next; and the place of the last is supplied by one selected from such as have been bought.

One hundred and one guns are continually kept in the Harem. Their order is as follows. On the first day of every solar month eleven guns are handed over to the servants of the Harem, one of each of the guns for the months, the weeks, the days, the kotals, the plain ones, the coloured ones, the *koftkár* not in charge of the slaves, the koftkár in their charge, the selected long ones, the selected *Damánaks*, the chosen ones of the selected ones. On the second day only the guns of the months (*i. e.*, ten) are handed over in the same order. For ten days an equal number is sent to the Harem.

His Majesty practises often. When he has tried each gun, he commences from the beginning; and when each gun has been used four times, it is sent away and replaced by a new one of each kind. If guns have been left unused at the beginning of a new month, they are placed last, and the guns for the current month are put first.

An order has also been given to the writers to write down the game killed by His Majesty with the particulars of the guns used. Thus it was found that with the gun, which has the name of *Sangrám*, one thousand and nineteen animals have been killed. This gun is the first of His Majesty's private guns, and is used during the *Farwardín* month of the present era.

ÁÍN 40.

ON THE PAY OF THE MATCHLOCK BEARERS.

The pay of a *Mírdahah*[1] is of four grades, 300 dáms, 280 *d.*, 270 *d.*, 260 *d.* The pay of the others is of five grades. Each grade is again subdivided into three classes. *First grade*, 250 *d.*, 240 *d.*, 230 *d.* *Second grade*, 220 *d.*, 210 *d.*, 200 *d.* *Third grade*, 190 *d.*, 180., *d.*, 170 *d.* *Fourth grade*, 160 *d.*, 150 *d.*, 140 *d.* *Fifth grade*, 130 *d.*, 120 *d.*, 110 *d.*

---

[1] *A man placed over ten.* The rank of the *Mírdahah* appears to have been the only *non-commissioned* rank in the Mogul Armies. The lowest *commissioned* rank was that of a *Dahbáshí*, which word, though of the same *etymological* meaning, differs in usage, and signifies a man in *command* of ten. The rank of a Dahbáshí was the lowest Mansabdár rank (*vide* the second book). *Mírdahah* is also used in the sense *of a servant who looks after ten horses.*

ÁÍN 41.

THE IMPERIAL ELEPHANT STABLES.

This wonderful animal is in bulk and strength like a mountain; and in courage and ferocity like a lion. It adds materially to the pomp of a king and to the success of a conqueror; and is of the greatest use for the army. Experienced men of Hindustan put the value of a good elephant equal to five hundred horse; and they believe, that when guided by a few bold men armed with matchlocks, such an elephant alone is worth double that number. In vehemence on one side, and submissiveness to the reins on the other, the elephant is like an Arab, whilst in point of obedience and attentiveness to even the slightest signs, it resembles an intelligent human being. In restiveness when full-blooded, and in vindictiveness, it surpasses man. An elephant never hurts the female, though she be the cause of his captivity; he never will fight with young elephants, nor does he think it proper to punish them. From a sense of gratitude, he does his keepers no harm, nor will he throw dust over his body, when he is mounted, though he often does so at other times. Once an elephant, during the rutting season, was fighting with another. When he was in the height of excitement, a small elephant came in his way: he kindly lifted up the small one with his trunk, set him aside, and then renewed the combat. If a male elephant breaks loose during the rutting season, in order to have his own way, few people have the courage to approach him; and some bold and experienced man will have to get on a female elephant, and try to get near him and tie a rope round his foot. Female elephants, when mourning the loss of a young one, will often abstain from food and drink; they sometimes even die from grief.

The elephant can be taught various feats. He learns to remember such melodies as can only be remembered by people acquainted with music; he will move his limbs, to keep time, and exhibit his skill in various ways. He will shoot off an arrow from a bow, discharge a matchlock, and will learn to pick up things that have been dropped, and hand them over to the keeper. Sometimes they get grain to eat wrapped up in hay; this they hide in the side of their mouth, and give it back to the keeper, when they are alone with him.

The teats of a female elephant, and the womb, resemble those of woman. The tongue is round like that of a parrot. The testicles are not visible. Elephants frequently with their trunks take water out of their stomachs, and sprinkle themselves with it. Such water has no offensive smell. They also take out of their stomach grass on the second day, without its having undergone any change.

The price of an elephant varies from a lak[1] to one hundred rupees; elephants worth five thousand, and ten thousand rupees, are pretty common.

There are four kinds of elephants. 1. *Bhaddar.* It is well proportioned, has an erect head, a broad chest, large ears, a long tail, and is bold, and can bear fatigue. They take out of his forehead an excrescence resembling a large pearl, which they call in Hindí *Gaj manik.*[2] Many properties are ascribed to it. 2. *Mand.* It is black, has yellow eyes, a uniformly sized belly, a long penis, and is wild and ungovernable. 3. *Mirg.* It has a whitish skin, with black spots; the colour of its eyes is a mixture of red, yellow, black, and white. 4. *Mir.* It has a small head, and obeys readily. It gets frightened, when it thunders.

From a mixture of these four kinds are formed others of different names and properties. The colour of the skin of elephants is threefold: white, black, grey. Again, according to the threefold division of the dispositions assigned by the Hindus to the mind, namely, *sat* benevolence, *raj* love of sensual enjoyment, and *tam* irascibility, which shall be further explained below,[3] elephants are divided into three classes. *First*, such in which *sat* predominates. They are well proportioned, good looking, eat moderately, are very submissive, do not care for intercourse with the female, and live to a very old age. *Secondly*, such in whose disposition *raj* prevails. They are savage looking, and proud, bold, ungovernable, and voracious. *Lastly*, such as are full of *tam*. They are self-willed, destructive, and given to sleep and voraciousness.

The time of gestation of the female is generally eighteen[4] lunar months, For three months the *fluida germinalia* intermix in the womb of the female; when agitated, the mass looks like quicksilver. Towards the fifth month the *fluida* settle, and get gelatinous. In the seventh month, they get more solid, and draw to perfection towards the ninth month. In the eleventh, the outline of a body is visible; and in the twelfth, the veins, bones, hoofs, and

---

[1] During the reigns of Akbar's successor, the price of a well trained war elephant rose much higher. *Vide* Tuzuk i Jahángírí, p. 198. At the time of Sháhjahán, the first white elephant was brought from Pégú, *Pádisháhnamah*, I. p. 267.

[2] This excrescence is also called *Gajmotí*, or *elephants' pearl.* Forbes has, a so *Gajmanih*, and the *Dalíl i Sáti*, گجوتی gaj watí?).

[3] In the *fourth* book of this work.

[4] The time is differently given. The emperor Jahángír says in his Memoirs (p. 130):—During this month, a female elephant in my stables gave birth before my own eyes. I had often expressed the wish to have the time of gestation of the female elephant correctly determined. It is now certain that a female birth takes place after sixteen, and a male birth after nineteen months [the emperor means evidently *solar* months]; and the process is different from what it is with man, the fœtus being born with the feet foremost. After giving birth, the female at once covers the young one with earth and dust, and continually caresses it, whilst the young one sinks down every moment trying to reach the teats of the mother." *Vide* Lt. Johnstone's remarks on the same subject, in the Proceedings of the Asiatic Society of Bengal for May, 1868.

hairs, make their appearance. In the thirteenth month, the *genitalia* become distinguishable, and in the fifteenth, the process of quickening commences. If the female, during gestation, gets stronger, the fœtus is sure to be a male; but if she gets weak, it is the sign of a female. During the sixteenth month, the formation becomes still more perfect, and the life of the fœtus becomes quite distinct. In the seventeenth month, there is every chance[1] of a premature birth, on account of the efforts made by the fœtus to move, till, in the eighteenth month, the young one is born.

According to others, the sperm gets solid in the first month; the eyes, ears, the nose, mouth, and tongue, are formed in the second; in the third month, the limbs make their appearance; in the fourth month, the fœtus grows and gets strong; in the fifth, it commences to quicken; in the sixth, it gets sense, which appears more marked during the seventh month; in the eighth, there is some chance of a miscarriage; during the ninth, tenth, and eleventh months, the fœtus grows, and is born during the twelfth. It will be a male young one, if the greater part of the sperm came from the male; and it will be a female young one, if the reverse is the case. If the sperm of both the male and female is equal in quantity, the young one will be a hermaphrodite. The male fœtus lies towards the right side; the female towards the left; a hermaphrodite in the middle.

Female elephants have often for twelve days a red discharge, after which gestation commences. During that period, they look startled, sprinkle themselves with water and earth, keep ears and tail upwards, and go rarely away from the male. They will rub themselves against the male, bend their heads below his tusks, smell at his urine and dung, and cannot bear to see another female near him. Sometimes, however, a female shews aversion to intercourse with the male, and must be forced to copulate, when other female elephants, at hearing her noise, will come to her rescue.

In former times, people did not breed elephants, and thought it unlucky; by the command of His Majesty, they now breed a very superior class of elephants, which has removed the old prejudice in the minds of men. A female elephant has generally one young one, but sometimes two. For five years the young ones content themselves with the milk of the mother; after that period they commence to eat herbs. In this state they are called *bál.* When ten years old, they are named *pút;* when twenty years old, *bikka;* when thirty years old, *kalbah.* In fact the animal changes appearance every year, and then gets a new name. When sixty years old, the elephant is full grown. The skull then looks like two halves of a ball, whilst the ears look like winnowing

[1] The words of the text are ambiguous. They may also mean: In the seventeenth month, the effort of the fœtus to move causes the female to sink down.

fans.[1] White eyes mixed with yellow, black, and red, are looked upon as a sign of excellence. The forehead must be flat without swellings or wrinkles. The trunk is the nose of the animal, and is so long as to touch the ground. With it, it takes up the food and puts it into the mouth; similarly, it sucks up water with it, and then throws it into the stomach. It has eighteen teeth; sixteen of them are inside the mouth, eight above and eight below, and two are the tusks outside. The latter are one and more yards long, round, shining, very strong, white, or sometimes reddish, and straight, the end slightly bent upwards. Some elephants have four tusks. With a view to usefulness as also to ornament, they cut off the top of the tusks, which grow again. With some elephants they have to cut the tusks annually; with others after two or three years; but they do not like to cut them when an elephant is ten and eighty years old. An elephant is perfect when it is eight *dast* high, nine *dast* long, and ten *dast* round the belly, and along the back. Again, nine limbs ought to touch the ground, namely, the fore feet, the hind feet, the trunk, the tusks, the penis, the tail. White spots on the forehead are considered lucky, whilst a thick neck is looked upon as a sign of beauty. Long hairs on and about the ears point to good origin.

Some elephants rut in winter, some in summer, some in the rains. They are then very fierce, they pull down houses, throw down stone walls, and will lift up with their trunks a horse and and its rider. But elephants differ very much in the amount of fierceness and boldness.

When they are hot, a blackish discharge exudes from the soft parts between the ears and the temples, which has a most offensive smell; it is sometimes whitish, mixed with red. They say that elephants have twelve holes in those soft parts, which likewise discharge the offensive fluid. The discharge is abundant in lively animals, but trickles drop by drop in slow ones. As soon as the discharge stops, the elephant gets fierce and looks grand; in this state he gets the name of *Tafti* or *Sarhari*. When the above discharge exudes from a place a little higher than the soft parts between the ears and the temples, the elephant is called *Singádhál;* and when the fluid trickles from all three places, *Taljór*. When hot, elephants get attached to particular living creatures, as men, or horses; but some elephants to any animal. So at least according to Hindu books.

The *Bhaddar* ruts in Libra and Scorpio; the *Mand* in spring; the *Mirg* in Capricorn and Sagittarius; the *Mir* in any season. Elephant drivers

[1] *Ghallah afshán.* This word, though common, is not in our dictionaries. It is a flat piece of wicker work, from one to two feet square. Three sides of the square are slightly bent upwards. They put grain on it, and seizing the instrument with both hands, they throw up the grain, till the husks, stones, and all other refuse, collect near the side which is not bent upwards, when the refuse is removed with the hand. We use *sieves* for such purposes.

have a drug which causes an artificial heat; but it often endangers the life of the beast. The noise of battle makes some superior elephants just as fierce as at the rutting season; even a sudden start may have such an effect. Thus His Majesty's elephant *Gajmuktah;* he gets brisk, as soon as he hears the sound of the Imperial drum, and gets the above mentioned discharge. This peculiar heat generally makes its first appearance, when elephants have reached the age of thirty; sometimes, however, earlier, at an age of twenty-five. Sometimes the heat lasts for years, and some of the Imperial elephants have continued for five years in an uninterrupted alacrity. But it is mostly male elephants that get hot. They then commence to throw up earth, and run after a female, or roll about in mud, and daub themselves all over with dirt. When hot, they are very irritable, and yawn a great deal, though they sleep but little. At last, they even discontinue eating, and dislike the foot-chain; they try to get loose, and behave noisily.

The elephant, like man, lives to an age of one hundred and twenty years.

The Hindí language has several words for an elephant, as *hastí, gaj, píl, hát'hí,* &c. Under the hands of an experienced keeper, it will much improve, so that its value, in a short time, may rise from one hundred to ten thousand rupees.

The Hindus believe that the eight points of the earth are each guarded by a heavenly being in the shape of an elephant; they have curious legends regarding them. Their names are as follows: 1. *Airáwata,* in the East; 2. *Pundarika,* South-east; 3. *Báman,* South; 4. *Kumada,* South-west; 5. *Anjan,* West; 6. *Puhpadanta,* North-west; 7. *Súrbhabhúma,* North; 8. *Supratíka,* North-east. When occasions arise, people read incantations in their names, and address them in worship. They also think that every elephant in the world is the offspring of one of them. Thus, elephants of a white skin and white hairs are related to the first; elephants with a large head, and long hairs, of a fierce and bold temper, and eyelids far apart, belong to the second; such as are ....[1], good looking, black, and high in the back, are the offspring of the third; if tall, ungovernable, quick in understanding, short-haired, and with red and black eyes, they come from the fourth; if bright black, with one tusk longer than the other, with a white breast and belly, and long and thick fore-feet, from the fifth; if fearful, with prominent veins, with a short hump and ears, and a long trunk, from the sixth; if thin-bellied, red-eyed, and with a long trunk, from the seventh; and if of a combination of the preceding seven qualities, from the eighth.

[1] The MSS. have an unintelligible word. Perhaps *khushsanj,* graceful, is the correct reading.

The Hindus also make the following division into *eight* classes. 1. Elephants whose skin is not wrinkled, who are never sick, who are grand looking, do not run away from the battle-field, dislike meat, and prefer clean food at proper times, are said to be *Dew mizáj* (of a divine temper). 2. Such as possess all the good qualities of elephants, and are quick in learning, moving about the head, ears, trunk, forelegs, hind legs, and the tail, and do no one harm, except they be ordered to do so, are *Gandharba mizáj* (angelic). 3. If irritable, of good appetite, fond of being in water, they are *Barhaman mizáj* (of a brahminical temper). 4. Such as are very strong, in good condition, fond of fighting, ungovernable, are said to have the temper of a *Khetrí*, or warrior. 5. Those which are of a low stature, and forgetful, self-willed in their own work, and neglectful in that of their master, fond of unclean food, and spiteful towards other elephants, are *Súdra mizáj*. 6. Elephants which remain hot for a long time, and are fond of playing tricks, or destructive, and lose the way, have the temper of a serpent. 7. Such as squint, and are slow to learn, or feign to be hot, have the temper of a *Pishácha* (spectre). 8. Those which are violent, swift, and do men harm, and are fond of running about at night, have the qualities of a *Ráchhas* (demon).

The Hindus have written many books in explanation of these various tempers, as also many treatises on the diseases of the elephants, their causes and proper remedies.

Elephants are chiefly found in the Súbah of Agrah, in the forests of Bayáwán and Narwar[1], as far as Barár; in the Súbah of Iláhábás (Allahabad), in the confines of Pattah (?), and G'horág'hát, and Ratanpúr, Nandanpúr, Sargachh, and Bustar; and in the Súbah of Málwah, near Handiyah, Uchhod, Chandérí, Santwás, Bijágarh, Ráisín, Hoshangábád, Gaḍh, Haryágaḍh; in the Súbah of Bahár, in the neighbourhood of Rahtás and Chár K'hand; and in the Súbah of Bengal, in Orissá, and Sátgánw (Húglí). The elephants of Pattah (?) are the best.

A herd of elephants is called in Hindí *sahn*. They vary in number; sometimes a herd amounts to a thousand elephants. Wild elephants are very cautious. In winter and summer, they select a proper place, and break down

---

[1] Narwar, where Abul Fazl was subsequently murdered at the instigation of Prince Salím (Jahángír), Long. 77° 58, Lat. 25° 39′; *G'horág'hát*, near Dinagepore, Long. 89° 17′, Lat. 25° 12′; *Ratanpúr* (Abul Fazl evidently means the one south-east of Sargachh) Long. 82°, Lat. 22° 14′; *Sargachh*, Long. 83° 8′, Lat. 23° 8′; *Bustar*, Long. 81° 58′, Lat. 19° 13′. The towns from Handiyah to Haryágadh lie all between Long. 75° and 79°, and Lat. 21° and 24° (Gwáliár). For *Uchhod* (اچهود) the third book has *Unchhod* (اونچهود). The Fort of Rahtás, the scene of Sher Sháh's first exploit, lies Long. 84°, Lat. 24° 38′. The name *Pattah* (پته) is doubtful, each MS. having a different reading.

Wild elephants have now-a-days disappeared in nearly all the places mentioned by Abulfazl.

a whole forest near their sleeping place. For the sake of pleasure, or for food and drink, they often travel over great distances. On the journey one runs far in front of the others, like a sentinel; a young female is generally selected for this purpose. When they go to sleep, they send out to the four sides of the sleeping place pickets of four female elephants, which relieve each other.

Elephants will lift up their young ones, for three or four days after their birth, with their trunks, and put them on their backs, or lay them over their tusks. They also prepare medicines for the females when they are sick or in labour pains, and crowd round about them. When some of them get caught, the female elephants break through the nets, and pull down the elephant-drivers. And when a young elephant falls into a snare, they hide themselves in an ambush, go at night to the place where the young one is, set it at liberty, and trample the hunters to death. Sometimes its mother slowly approaches alone, and frees it in some clever way. I have heard the following story from His Majesty.—"Once a wild young one had fallen into a pit. As night had approached, we did not care to pull it out immediately, and left it; but when we came next morning near the place, we saw that some wild elephants had filled the pit with broken logs and grass, and thus pulled out the young one." Again, "Once a female elephant played us a trick. She feigned to be dead. We passed her, and went onwards; but when at night we returned, we saw no trace left of her."

There was once an elephant in the Imperial stables, named *Ayás*. For some reason, it had got offended with the driver, and was for ever watching for an opportunity. Once at night, it found him asleep. It got hold of a long piece of wood, managed to pull off with it the man's turban, seized him by his hair, and tore him asunder.

Many examples are on record of the extraordinary cleverness of elephants; in some cases it is difficult to believe them.

Kings have always shewn a great predilection for this animal, and done every thing in their power to collect a large number. Elephant-keepers are much esteemed, and a proper rank is assigned to such as have a special knowledge of the animal. Wicked, low men see in an elephant a means of lawlessness; and unprincipled evildoers, with the help of this animal, carry on their nefarious trade. Hence kings of former times never succeeded in suppressing the rebellious, and were thus disappointed in their best intentions. But His Majesty, though overwhelmed with other important matters, has been able, through God's assistance and his numerous elephants, to check those low but haughty men; he teaches them to desire submission, and bestows upon them, by wise laws, the blessings of peace.

His Majesty divided the Imperial elephants into sections, which he

put in charge of honest Dároghahs. Certain elephants were also declared *kháçah, i. e.*, appointed for the exclusive use of His Majesty.

ÁÍN 42.

THE CLASSIFICATION OF THE IMPERIAL ELEPHANTS.

His Majesty made a seven-fold division, based upon experience; 1. *Mast* (full blood); 2. *Shergîr* (tiger-seizing); 3. *Súdah* (plain); 4. *Manjholah* (middlemost); 5. *Karha;* 6. *P'handurkiya;* 7. *Mokal.* The first class comprises young elephants, possessed of the peculiar heat which renders the animal so strong. The second class contains likewise young ones, which once or twice have given signs of perfection, and exhibit an uninterrupted alacrity. The third class comprehends useful elephants, which are nearly as good as the preceding. The fourth class contains elephants of a somewhat inferior value. Those of the fifth class are younger than those of the fourth. The elephants of the sixth class are smaller than those of the fifth. The last class contains all young ones still unfit for use.

Each class is divided into three subdivisions, viz., *large sized, middle, young* ones; the last class contains ten kinds. A certain quantity of food has been fixed for each class.

ÁÍN 43.

THE FOOD ALLOWED TO THE ELEPHANTS.

Formerly the classification of the elephants was never attended to; hence in feeding them a large quantity of the stores was wasted. But when His Majesty, soon after lifting the veil,[1] commenced to care for the happiness of his subjects, this matter was properly inquired to, and wise regulations were issued for guidance. 1. *Mast elephants.* Large ones get daily 2 *mans* 24 *sers*; middle-sized, 2 *m.* 19 *s.*; small ones, 2 *m.* 14 *s.* 2. *Shergîrs.* Large ones, 2 *m.* 9 *s.*; middle-sized ones, 2 *m.* 4 *s.*; small ones, 1 *m.* 39 *s.* 3. *Súdahs.* Large ones, 1 *m.* 34 *s.*; middle-sized ones, 1 *m.* 29 *s.*; small ones, 1 *m.* 24 *s.* 4. *Manjholahs.* Large ones, 1 *m.* 22 *s.*; middle-sized ones, 1 *m.* 20 *s.*; small ones, 1 *m.* 18 *s.* 5. *Karhas.* Large ones, 1 *m.* 14 *s.*; middle-sized ones, 1 *m.* 9 *s.*; small ones, 1 *m.* 4 *s.* 6. *P'handurkiyas.* Large ones, 1 *m.*; middle-sized ones, 36 *s.*; small ones, 32 *s.* 7. *Mokals.* Large ones, 26 *s.*; middle-sized ones, 24 *s;* third class, 22 *s.*; fourth class, 20 *s.*; fifth class,

---

[1] The same phrase as on p. 13, l. 12. It refers to the year 1560, when Bairám fell in disgrace, and Akbar assumed the reins of the government.

18 *s.*; sixth class, 16 *s.*; seventh class, 14 *s.*; eighth class, 12 *s.*; ninth class, 10 *s.*; tenth class, 8 *s.*

Female elephants have been divided into four classes, *viz.*, large ones, middle-sized ones, small ones, Mokals. The first two classes are divided into three; the third, into four; the fourth, into nine subdivisions. *1. Large ones.* *Big, 1 m. 22 s.*; middling, 1 *m.* 18 *s.*; small ones, 1 *m.* 14 *s.* 2. *Middle-sized ones.* Big, 1 *m.* 10 *s.*; middling, 1*m.* 6*s.*; small, 1*m.* 2*s.* 3. *Small ones.* Big, 37 *s.*; middling, 32 *s.*; small, 27 *s.*; still smaller, 22 *s.* 4. *Mokals.* First class, 22 *s.*; second, 20 *s.*; third, 18 *s.*; fourth, 16 *s.*; fifth, 14 *s.*; sixth, 12 *s.*; seventh, 10 *s.*; eighth, 8 *s.*; ninth, 6 *s.*

ÁÍN 44.

THE SERVANTS OF THE ELEPHANT STABLES.

1. *Mast* elephants. There are five and a half[1] servants for each, *viz.*, *first*, a *Maháwat*, who sits on the neck of the animal and directs its movements. He must be acquainted with its good and bad properties, and thus contribute to its usefulness. He gets 200 *dáms* per month; but if the elephant be *k'huṭahar*, *i. e.*, wicked and addicted to pulling down the driver, he gets 220 *d.* *Secondly*, a *Bhoi*, who sits behind, upon the rump of the elephant, and assists in battle and in quickening the speed of the animal; but he often performs the duties of the *Maháwat*. His monthly pay is 110 *d.* *Thirdly*, the *Met'hs*, of whom there are three and one-half, or only three in case of small elephants. A met'h fetches fodder, and assists in caparisoning the elephant. Met'hs of all classes get on the march four dáms daily, and at other times, three and a half.

2. For every *Shergír*, there are five servants, *viz.*, a Maháwat, at 180 *d.*; a Bhoí, at 103 *d.*; and three Met'hs as before.

3. For every *Sádah*, there are four and a half servants, *viz.*, a Maháwat, at 160 *d.*, a Bhoí at 90 *d.*; and two and a half Met'hs.

4. For every *Manjholah*, there are four servants; *viz.*, a Maháwat, at 140 *d.*; a Bhoí, at 80 *d.*; and two Met'hs.

6. For every *Kárha*, there are three and a half servants; *viz.*, a Maháwat at 120 *d.*, a Bhoí at 70 *d.*; and one and a half Met'hs.

6. For every *P'handurkiya*, there are two servants; *viz.*, a Maháwat, at 100 *d.*, and a Met'h.

7. For every *Mokal*, there are likewise two servants; *viz.*, a Maháwat, at 50 *d.*, and a Met'h.

---

[1] *I. e.*, either eleven servants for two elephants, or the last was a boy.

Female Elephants. 1. Large ones have four servants, *viz.*, a Mahâwat at 100 *d.*; a Bhoí, at 60 *d.*, two Met'hs. 2. Middle sized ones have three and a half servants; *viz.*, a Mahâwat, at 80 *d.*; a Bhoí, at 50 *d.*; and one and a half Met'hs. 3. Small ones have two; *viz.*, a Mahâwat, at 60 *d.*; and a Met'h. 4. Mokals have likewise two; *viz.* a Mahâwat, at 60 *d.*, and a Met'h.

The Faujdár.

His Majesty has appointed a Superintendent over every troop of ten, twenty, and thirty, elephants. Such a troop is called a *halqah;* the superintendent is called *Faujdár.* His business is to look after the condition and the training of the elephants; he teaches them to be bold, and to stand firm at the sight of fire, and at the noise of artillery; and he is responsible for their behaviour in these respects. When a Faujdár is raised to the dignity of a *Çadí* (a commander of one hundred), or higher, he has twenty-five elephants assigned to himself, the other Faujdárs, as *Bistís* (commanders of twenty) and *Dahbáshís* (commanders of ten) being under his orders. The same order is followed from the *Dahbáshís* up to the *Hazáris* (commanders of one thousand). The pay of officers above the Çadí is different. Some Faujdárs have been raised to the dignity of grandees of the court. A Çadí marks two horses. A *Bistí* of the first grade has 30 Rupees *per mensem;* second grade, 25 *R;* third grade, 20 *R.* A Dahbáshí of the first grade has twenty *R.;* second grade, 16 *R.;* third grade, 12 *R.* Bístís and Dahbáshís mark one horse, and belong to the *Ahadís.* Such Faujdars as have thirty or twenty-five elephants assigned to themselves, have to pay the wages of the Mahâwat and of one Bhoí of that elephant, which they select for their own use; but such as have twenty or ten, only pay for a Mahâwat.

The above arrangement regarding the servants was not thought sufficient by His Majesty, who has much experience in this matter. He therefore put several *halqahs* in charge of every grandee, and required him to look after them. The fodder also is now supplied by the government. A trustworthy clerk has, besides, been appointed, who is in charge of the correspondence of this branch; he looks after the receipts and expenditure, and sees that the orders of His Majesty are carried out. He also parades the elephants in the order described below (Áín 78).

ÁÍN 45.

THE HARNESS OF ELEPHANTS.

1. The *Dharnah* is a large chain, made of iron, gold, or silver. It is made of sixty oval links, each weighing three sers; but the chain differs in length and thickness according to the strength of the elephant. One end of

the chain is fixed in the ground, or fastened to a pillar; the other end is tied to the left hind leg of the elephant. Formerly, they fastened this chain to the forefoot; but as this is injurious for the chest of the elephant, His Majesty ordered to discontinue the usage.

2. The *Ándú* is a chain, with which both forefeet are tied. As it annoys the elephant, His Majesty ordered it to be discontinued.

3. The *Berí* is a chain for fastening both hindfeet.

4. The *Baland* is a fetter for the hindfeet, an invention of His Majesty. It allows the elephant to walk, but prevents him from running.

5. The *Gaddh berí* resembles the Ándú, and is an additional chain for the hindlegs of unruly and swift elephants.

6. The *Loh langar* is a long chain, suitable for an elephant. One end is tied to the right fore foot, and the other end to a thick log, a yard in length. This the driver keeps near him, and drops it, when the elephant runs too swiftly, or gets so unruly as no longer to obey. The chain twists round his leg, and the log will annoy the animal to such an extent that it necessarily stops. This useful invention, which has saved many lives, and protected huts and walls, is likewise due to His Majesty.

7. The *Charkhí* is a piece of hollowed bamboo, half a yard and two ṭassújes long, and has a hole in the middle. It is covered with sinews and filled with gunpowder, an earthen partition dividing the powder into two halves. A fuzee wrapt in paper, is put into each end. Fixed into the hole of the bamboo at right angles is a stick, which serves as a handle. Upon fire being put to both ends, it turns round, and makes a frightful noise. When elephants fight with each other, or are otherwise unruly, a bold man on foot takes the burning bamboo into his hand, and holds it before the animals, when they will get quiet. Formerly, in order to separate two elephants that were fighting, they used to light a fire; but people had much trouble, as it seldom had the desired effect. His Majesty invented the present method, which was hailed by all.

8. *Andhiyárí*, *i. e.*, darkness, a name which His Majesty changed into *Ujyálí*, *i. e.*, light, is a piece of canvass above one and a half yards square. It is made of brocade, velvet, &c., and tied with two ends to the *Kíláwah* (*vide* next). When the elephant is unruly, it is let fall, so that he cannot see. This has been the saving of many. As it often gives way, especially when the elephant is very wild, His Majesty had three heavy bells attached to the ends of the canvass, to keep it better down. This completed the arrangement.

9. The *Kíláwah*[1] consists of a few twisted ropes, about one and a half

[1] This should be *Kuláwah*. Abulfazl spells the word wrong; *vide* my Text edition, p. 136, l. 16. It looks as if Abulfazl had mistaken this *Persian* word

yards long. They are laid at the side of each other, without however being interwoven among themselves, the whole being about eight fingers broad. A ring is drawn through both ends of the ropes, and fastened where the throat of the elephant is: the elephant driver rests his feet in it, and thus sits firmly. Sometimes it is made of silk or leather. Others fix small pointed iron-spikes to the kaláwah, which will prevent an unruly elephant from throwing down the driver by shaking its head.

10. The *Dult'hí* is a rope, five yards long, as thick as a stick. This they tie over the kaláwah, to strengthen it.

11. The *Kanár* is a small pointed spike, half a yard long. This they likewise attach to the kaláwah, and prick the elephant's ears with it, in order to make the animal wild, or to urge it on.

12. The *Ḍór* is a thick rope passing from the tail to the throat. When properly tied, it is an ornament. They also catch hold of it, when the elephant makes an awkward movement. They also attach many other trappings to it.

13. The *Gadelah*, is a cushion put on the back of the elephant, below the dult'hí. It prevents galling, and is a source of comfort.

14. The *Gudauṭí* is a chain of brass. They attach it near the tail, which it prevents from getting injured by the dult'hí. It is also ornamental.

15. The *Pichwah* is a belt made of ropes, and is fastened over the buttocks of the elephant. It is a support for the *Bhoi*, and of much use to him in firing.

16. The *Chaurásí* consists of a number of bells attached to a piece of broadcloth, which is tied on before and behind with a string passed through it. It looks ornamental and grand.

17. *Piṭkachh* is the name of two chains fastened over the elephant's sides. Attached to them, a bell hangs below the belly. It is of great beauty and grandeur.

18. *Large chains.* They attach six on both sides, and three to the kaláwah, the latter being added by His Majesty.

19. *Quṭás* (the tail of the Thibetan Yak). There are about sixty, more or less, attached to the tusk, the forehead, the throat, and the neck. They are either white, or black, or pied, and look very ornamental.

20. The *Ṭayyá* consists of five iron plates, each a span long, and four fingers broad, fastened to each other by rings. On both sides of the Ṭayyá there are two chains, each a yard long, one of which passes from above the ear, and the other from below it, to the kaláwah, to which both are attached.

---

for a *Hindí* term; else, why should he have any spelling at all. In Vullers' Persian Dictionary, II, p. 862 *b*, read *khait* for *khat*, and *ba ṭanid* for his emendation (?) *tabyín*.

Between them there is another chain, which is passed over the head and tied to the kaláwah; and below, crossways, there are four iron spikes ending in a curve, and adorned with knobs. The *Quṭás* are attached here. At their lower end, there are three other chains similarly arranged. Besides, four other chains are attached to the knob; two of them, like the first, end in a knob, whilst the remaining two are tied to the tusks. To this knob again three chains are attached, two of which are tied round about the trunk, the middle one hanging down. *Quṭás* and daggers are attached to the former knobs, but the latter lies over the forehead. All this is partly for ornament, partly to frighten other animals.

21. The *Pák'har* is like an armour, and is made of steel; there are separate pieces for the head and the trunk.

22. The *Gaj-jhamp* is a covering put as an ornament above the *pák'har*. It looks grand. It is made of three folds of canvass, put together and sewn, broad ribbons being attached to the outside.

23. The *Meg'h dambar* is an awning, to shade the elephant driver, an invention by His Majesty. It also looks ornamental.

24. The *Ranpiyala* is a fillet for the forehead, made of brocade or similar stuffs, from the hem of which nice ribbons and *quṭás* hang down.

25. The *Gateli* consists of four links joined together, with three above them, and two others over the latter. It is attached to the feet of the elephant. Its sound is very effective.

26. The *Pái ranjan* consists of several bells similarly arranged.

27. The *Ánkus* is a small crook. His Majesty calls it *Gajbág'h*.[1] It is used for guiding the elephant and stopping him.

28. The *Gaḍ* is a spear which has two prongs, instead of an iron point. The Bhoí makes use of it, when the elephant is refractory.

29. The *Bangrí* is a collection of rings made of iron or brass. The rings are put on the tusks, and serve to strengthen as well as to ornament them.

30. The *Jagáwaṭ* resembles the *Gaḍ* (No. 28), and is a cubit long. The Bhoí uses it, to quicken the speed of the elephant.

31. The *Jhanḍá*, or flag, is hung round with *Quṭás*, like a *togh*.[2] It is fixed to the side of the elephant.

But it is impossible to describe all the ornamental trappings of elephants.

For each *Mast* and *Shergír* and *Sádah*, seven pieces of cotton cloth are annually allowed, each at a price of 8½ *dáms*. Also, four coarse woollen pieces, called in Hindí *kambal*, at 10 *d.* each, and eight ox hides, each at 8 *d.*

---

[1] *I. e.*, an elephant-rein. His Majesty had reason to change the name *Ánkus*, "which sounds offensive to a Persian ear." *Rashídí.* Hence the Persians pronounce it *anguzh*.

[2] *Tógh* is the same as *tóq*. *Vide* Aín 19, p. 50.

For *Manjholah* and *Karha* elephants, four of the first; three of the second; and seven of the third, are allowed. For *P'handurkiyas*, and *Mokals*, and female elephants, three of the first; two of the second; four of the third. The saddle cloth is made of cloth, lining, and stuff for edging it round about; for sewing, half a ser of cotton thread is allowed. For every *man* of grain, the *halqah dár* is allowed ten *sers* of iron for chains, &c., at 2 *d. per ser;* and for every hide, one *ser* of sesame oil, at 60 *d. per man.* Also, 5 *s.* coarse cotton thread for the *kaláwah* of the elephant on which the *Fawjdár* rides, at 8 *d. per ser;* but for other elephants, the men have to make one of leather, &c., at their own expense.

A sum of twelve dáms is annually subtracted from the servants; but they get the worn out articles.

ÁÍN 46.

THE ELEPHANTS FOR HIS MAJESTY'S USE (KHÁÇAH).

There are one hundred and one elephants selected for the use of His Majesty. Their allowance of food is the same in quantity as that of the other elephants, but differs in quality. Most of them also get 5 *s.* of sugar, 4 *s.* of g'hí, and half a *man* of rice mixed with chillies, cloves, &c.; and some have one and a half *man*[1] of milk in addition to their grain. In the sugar-cane season, each elephant gets daily, for two months, 300 sugar-canes, more or less. His Majesty takes the place of the *Maháwat.*

Each elephant requires three *bhoís* in the rutting season, and two, when cool. Their monthly wages vary from 120 to 400 *d.*, and are fixed by His Majesty himself. For each elephant there are four *Met'hs.* In the *Halqahs*, female elephants are but rarely told off to accompany big male ones; but for each *kháçah* elephant there are three, and sometimes even more, appointed. First class big female elephants have two and one-half *met'hs;* second class do., two; third class do., one and one-half; for the other classes, the same as in the *Halqahs.*

As each *Halqah* is in charge of one of the Grandees, so is every *kháçah* elephant put in charge of one of them. Likewise, for every ten *kháçah* elephants, a professional man is appointed, who is called *Daháidár.* They draw twelve, ten, and eight rupees *per mensem.* Besides, an active and honest superintendent is appointed for every ten elephants. He is called *Naqíb* (watcher), and has to submit a daily report, when elephants eat little, or get a shortened allowance, or in cases of sickness, or when anything unusual happens. He marks a horse, and holds the rank of an *Ahadi.* His Majesty

[1] Liquids are sold in India by the weight.

also weekly dispatches some of the servants near him, in the proportion of one for every ten elephants, who inspect them and send in a report.

ÁÍN 47.

THE MANNER OF RIDING KHÁÇAH-ELEPHANTS.

His Majesty, the royal rider of the plain of auspiciousness, mounts on every kind of elephants, from the first to the last class, making them, notwithstanding their almost supernatural strength, obedient to his command. His Majesty will put his foot on the tusks, and mount them, even when they are in the rutting season, and astonishes experienced people.[1]

They also put comfortable turrets on the backs of swift-paced elephants, which serve as a travelling sleeping apartment. An elephant so caparisoned, is always ready at the palace.

Whenever His Majesty mounts an elephant, a month's wages are given as a donation to the Bhoís. And when he has ridden ten elephants, the following donations are bestowed, *viz.*, the near servant who has weekly to report on the elephants, receives a present; the former, 100 *R.*; the Dahái, 31 *R.*; the Naqíb, 15 *R.*; the Mushrif (writer), 7½ *R.* Besides, the regal rewards given to them at times when they display a particular zeal or attentiveness, go beyond the reach of speech.

Each elephant has his match appointed for fighting: some are always ready at the palace, and engage when the order is given. When a fight is over, if the combatants were *kháçah* elephants, the bhoís receive 250 *dáms* as a present; but if other elephants, the bhoís get 200 *d.*

The *Daháídár* of kháçah elephants receives one *dám* for every rupee paid as wages to the Bhoís and Met'hs; the Mushrif is entitled to ½ *d.*, and the Naqíb to ¼ *d.* In the case of *Halqah* elephants, the *Çadíwál*, the *Dahbáshi*, and the *Bísti*, are entitled to 1 *d.* for every rupee; and the Mushrif and the Naqíb receive the allowance given for kháçah elephants.

ÁÍN 48.

ON FINES.

In order to prevent laziness, and to ensure attentiveness, His Majesty, as for all other departments, has fixed a list of fines. On the death of a male or a female *kháçah* elephant, the *Bhoís* are fined three months' wages. If any part of the harness is lost, the Bhoís and Met'hs are fined two-

[1] Jahángír, in his Memoirs, gives several examples of Akbar's daring in this respect; *vide* Tuzuk, p. 16.

thirds of the value of the article; but in the case of a saddle cloth, the full price. When a female elephant dies from starvation, or through want of care, the Bhoís have to pay the cost price of the animal.

If a driver mixes drugs with the food of an elephant, to make the animal hot, and it dies in consequence thereof, he is liable to capital punishment, or to have a hand cut off, or to be sold as a slave. If it was a khá̈çah elephant, the Bhoís lose three months' pay, and are further suspended for one year.

Two experienced men are monthly dispatched, to enquire into the fatness or leanness of *kháçah* elephants. If elephants are found by them out of flesh, to the extent of a quarter, according to the scale fixed by the *Págosht* Regulation (*vide* Aín 83), the grandees in charge are fined, and the bhoís are likewise liable to lose a month's wages. In the case of *Halqah* elephants, Ahadís are told off to examine them, and submit a report to His Majesty. If an elephant dies, the *Maháwat* and the *Bhoí* are fined three months' wages. If part of an elephant's tusk is broken, and the injury reaches as far as the *kalí*—this is a place at the root of the tusks, which on being injured is apt to fester, when the tusks get hollow and become useless—a fine amounting to one-eighth of the price of the elephant is exacted, the dárogah paying two-thirds, and the Fáujdár one-third. Should the injury not reach as far as the *kalí*, the fine is only one-half of the former, but the proportions are the same. But, at present, a fine of one *per cent.* has become usual; in the case of *kháçah* elephants, however, such punishment is inflicted as His Majesty may please to direct.

Aín 49.

THE IMPERIAL HORSE STABLES.

His Majesty is very fond of horses, because he believes them to be of great importance in the three branches of the government, and for expeditions of conquest, and because he sees in them a means of avoiding much inconvenience.

Merchants bring to court good horses from 'Iráq i 'Arab and 'Iráq i 'Ajam, from Turkey, Turkestan, Badakhshán, Shirwán, Qirghiz, Thibet, Kashmír, and other countries. Droves after droves arrive from Túrán and Irán, and there are now-a-days twelve thousand in the stables of His Majesty. And in like manner, as they are continually coming in, so there are others daily going out as presents, or for other purposes.

Skilful, experienced men have paid much attention to the breeding of this sensible animal, many of whose habits resemble those of man; and after a short time Hindustan ranked higher in this respect than Arabia,

whilst many Indian horses cannot be distinguished from Arabs or from 'Iráqí breed. There are fine horses bred in every part of the country; but those of Cachh excel, being equal to Arabs. It is said that a long time ago an Arab ship was wrecked and driven to the shore of Cachh; and that it had seven choice horses, from which, according to the general belief, the breed of that country originated. In the Panjáb, horses are bred resembling 'Iráqís, especially between the Indus and the Bahat (Jhelum): they go by the name of *Sanújí*;[1] so also in the district of Patí Haibatpúr,[2] Bajwárah, Taháarah, in the Súbah of Ágrah, Mewát, and in the Súbah of Ajmír, where the horses have the name of *pachwariyah*. In the northern mountainous district of Hindustan, a kind of small but strong horses is bred, which are called *gúṭ*; and in the confines of Bengal, near Kúch [- Bahár], another kind of horses occurs, which rank between the *gúṭ* and Turkish horses, and are called *táng'han*: they are strong and powerful.

His Majesty, from the light of his insight and wisdom, makes himself acquainted with the minutest details, and with the classification and the condition of every kind of article; he looks to the requirements of the times, and designs proper regulations. Hence he also pays much attention to every thing that is connected with this animal, which is of so great an importance for the government, and an almost supernatural means for the attainment of personal greatness.

First, he has set apart a place for horse-dealers, where they may, without delay, find convenient quarters, and be secure from the hardships of the seasons. By this arrangement, the animals will not suffer[3] from that hardness and avariciousness so often observed in dealers of the present time; nor will they pass from the hands of well intentioned merchants into those of others. But dealers who are known for their uprightness and humanity, may keep their horses where they please, and bring them at an appointed time. *Secondly*, he appointed a circumspect man to the office of an *Amín i Kárwánsará*, who from his superior knowledge and experience, keeps the dealers from the path of disobedience, and ties the mischievous tongues of such as are wicked and evasive. *Thirdly*, he has appointed a clever writer, who keeps a roll of horses that arrive and have been mustered, and who sees that the orders of His Majesty do not fall into abeyance. *Fourthly*, he has appointed trustworthy men, acquainted with the prices of horses, to examine the animals, and to fix their prices, in the order in which they are imported. His Majesty, from his goodness, generally gives

[1] Several good MSS. read *Satújí*.

[2] Haibatpúr, Lat. 29° 51′, Long. 76° 2′; Taháarah, Lat. 30′ 57°, Long. 75° 25′.

[3] Akbar abhorred cruelty towards domestic animals. Towards the end of his life, as shall be mentioned below, he even gave up hunting and animal fights.

half as much again above the price fixed by them, and does not keep them waiting for their money.[1]

ÁÍN 50.

THE RANKS OF THE HORSES.

There are two classes of horses: 1. *Kháçah;* 2. Those that are not *kháçah.* The *kháçah* horses are the following—six stables, each containing forty choice horses of Arabia and Persia; the stables of the princes; the stables of Turkish courier horses; the stables of horses bred in the Imperial studs. They have each a name, but do not exceed the number thirty. His Majesty rides upon horses of the six stables.

The *Second class* horses are of three kinds, *viz., sí-aspí, bíst-aspí, duh-aspí i. e.,* belonging to the stables of thirty, twenty, and ten. A horse whose value comes up to ten muhurs, is kept in a *Dah-muhrí* stable; those worth from eleven to twenty muhurs, in a *Bíst-muhrí* stable, and so on.

Grandees and other *Mançabdárs,* and *Senior Ahadís* are in charge of the stables. Hay and crushed grain are found by the government for all horses, except for the horse which the *Yatáqdár* (guard) of every stable is allowed to ride, and which he maintains in grain and grass at his own expense.

ÁÍN 51.

THE FODDER ALLOWED IN THE IMPERIAL STABLES.

A *kháçah* horse was formerly allowed eight *sers* fodder *per diem,* when the *ser* weighed twenty-eight *dáms.* Now that the *ser* is fixed at thirty *dáms,* a kháçah horse gets seven and a half sers. In winter, they give boiled peas or vetch; in summer, grain. The daily allowance includes two sers of flour, and one and a half sers of sugar. In winter, before the horse gets fresh grass, they give it half a ser of *g'hí.* Two *dáms* are daily allowed for

---

[1] Abulfazl mentions this very often in the Áín. Contractors generally received cheques on a local treasury; but they might be sent from there to another local treasury, unless they bribed the collector, or made over their cheques, for a *consideration,* to Mahájans (bankers). It was the same in Persia. "The clerks whose habit it is to annoy people, gave him (Wazír Mírzá Çálih, brother of the great Persian historian *Sikandar Beg*) in payment of his claims a lot of transfer receipts, and left him in the hands of the collectors (muhaççil), who, like the clerks, always pretend to be in a hurry; and although Mírzá Rahím, a relation of his, tried to come to an understanding with them, in order to help Mírzá Çálih out of his wretched plight, they ruined him, in a short time, to such an extent, that they had to provide in lieu a daily subsistence allowance. He died of a broken heart." *Ṭáhir Naçrábádí's Tadzkirah.*

hay; but hay is not given, when fresh grass is available. About three *big'has* of land will yield sufficient fodder for a horse. When, instead of sugar, the horses get molasses, they stop the *g'hí*; and when the season of fresh grass comes, they give no grain for the first three days, but allow afterwards six *sers* of grain and two sers of molasses *per diem*. In other *'Iráqí* and *Turkí* stables, they give seven and a half sers of grain. During the cool six months of the year, they give the grain boiled, an allowance of one dám being given for boiling one *man* of it. The horses also get once a week a quarter ser of salt. When *g'hí* and fresh grass are given, each horse, provided its price be above thirty-one muhurs, gets also one ser of sugar; whilst such as are worth from twenty-one to thirty muhurs, only get half a ser. Horses of less value get no sugar at all. Before green grass is given, horses of a value from twenty-one to upwards of one hundred muhurs, get one *man* and ten sers of g'hí; such as are worth from eleven to twenty muhurs, thirty sers; but horses up to ten muhurs get neither g'hí, brown sugar, nor green oats. Salt is given at the *daily* rate one-fiftieth of a dám, though it is mostly given in a lump. 'Iráqí and Turkí horses which belong to the court, are daily allowed two *d.* for grass; but such of them as are in the country, only one and a half. In winter, each horse gets a big'ha of fresh oats, the price of which, at court, is 240 *d.*, and in the country, 200 *d.* At the time of fresh oats, each horse gets two *mans* of molasses, the same quantity being subtracted from the allowance of grain.

Experienced officers, attached to the Imperial offices, calculate the amount required, and make out an estimate, which in due course is paid. When a horse is sick, every necessary expense is paid on the certificate of the horse doctor.

Every stallion to a stud of mares receives the allowance of a *khúçah* horse. The *gúṭ* horses get five and a half sers of grain, the usual quantity of salt, and grass at the rate of one and a half *d.* per diem, if at court, and at the rate of $1\frac{3}{25}$ *d.*, when in the country; but they do not get g'hí, molasses, or green oats. *Qisráqs*, *i. e.*, female horses, get, at court, four and a half sers of grain, the usual allowance of salt, and one *d.* for grass; and in the country, the same, with the exception of the grass, for which only three fourths of a dám are allowed. Stud mares get two and three fourths sers of grain; but the allowance for grass, salt, and fuel, is not fixed.

A foal sucks its dam for three months; after which, for nine months, it is allowed the milk of two cows; then, for six months, two and three-fourths sers of grain *per diem*; after which period, the allowance is every six months increased by a ser, till it completes the third year, when its food is determined by the above regulations.

LIBRARY OF THE

ÁÍN 52.

ON HARNESS, &c.

It would be difficult and tedious to describe the various ornaments, jewels, and trappings, used for the *kháçah* horses on which His Majesty rides out.

For the whole outfit of a *kháçah* horse, the allowance is 277½ *d. per annum; viz.*, an *artak*, or horse quilt, of wadded chintz, 47 *d.*; a *yálposh* (a covering for the mane) 32 *d.*; a woollen towel, 2 *d.*—these three articles are renewed every six months; in lieu of the old *artak*, half the cost price is deducted, and one-sixth for the old *yálposh*—; a saddle cloth, the outside of which is woven of hair, the lining being coarse wool, 42 *d.*; halters for the *nakhtah* (headstall) and the hind feet,[1] 40 *d.*; a *pusht-tang* (girth), 8 *d.*; a *magas-rán* (a horse tail to drive away flies), 3 *d.*; a *nakhtah* and *qaizah* (the bit), 14 *d.*; a curry-comb, 1½ *d.*; a grain bag, 6 *d.*; a basket, in which the horse gets its grain, 1 *d.*[3] These articles are given *annually*, and fifteen dáms, ten *jetals*, subtracted in lieu of the old ones.

In the other stables, the allowance for horses whose value is not less than twenty-one muhurs, is 196½ *d. per annum*, the rate of the articles being the same. Twenty-five and a half dáms are subtracted in lieu of the old articles.

In stables of horses worth twenty to eleven muhurs, the annual allowance is 155¼ *d.*; *viz.*, for the *artak*, 39¾ *d.*; the *yálposh*, 27¼ *d.*; a coarse saddle cloth, 30 *d.*; the girth, 6 *d.*; the *nakhtah* and *qaizah*, 10 *d.*, and the *nakhtah* ropes and feet-ropes, 32 *d.*; the *magasrán*, 2 *d.*; a towel, 1½ *d.*; a curry-comb, 1¼ *d.*; a basket, 1 *d.*; a grain bag, 4½ *d.* Twenty dáms are subtracted for the old articles.

For horses worth up to ten muhurs, and *qisráqs*, and *gút*, the allowance is 117¼ *d.*;[2] *viz.*, an *artak*, 37 *d.*; a *yálposh*, 24½ *d.*; a *jul*, 24 *d.*; a *nakhtah band* and a *páiband*, 8 *d.*; a *nakhtah* and *qaizah*, 8 *d.*; a *pusht-tang*, 5 *d.*; a *magasrán* and a towel, each 1½ *d.*; a curry-comb, 1¼ *d.*; a basket, 1 *d.*; a grain bag, 4½ *d.* The amount subtracted is the same as before.

---

[1] In consequence of the climate, horses are kept, in the East, much more outside than in the stables. When being cleaned or fed, each of the hindlegs is fastened by means of a rope to a peg in the ground. In the case of wicked horses, a rope is attached to each side of the head stall, and fastened, like tent ropes, to pegs in the ground. Native grooms in feeding horses, generally squat on the ground, pushing the grain in the basket towards the mouth of the horse. The word *nakhtah*, which, like hundreds of other words, is not given in our dictionaries, is generally pronounced *nuqtah*. Similarly, *qaizah* is pronounced *qáizah*; *vide* Journal As. Soc. Bengal for 1868, I. p. 36 b. c.

[3] Altogether 196⅕ *d.*, and 81 *d.* on account of the first three articles renewed after *six months*. The deduction in lieu of old articles refers, of course, to the wages of the grooms.

[2] The items added only give 116¼ *d.*

1. The *Karáh* is an iron vessel for boiling grain sufficient for ten horses. The price of a *karáh* is at the rate of one hundred and forty dáms *per man* of iron; but this includes the wages of the maker. 2. The *Missín Saṭl*, or brass bucket, out of which horses drink. There is one for every ten *kháçah* horses. The price of making one is 140 *d.* For other horses, as in the stables of thirty, &c., there is only one. 3. The *Kamand* is a halter, attached to iron pegs, for fastening the horses. In stables of forty, there are three; in stables of thirty, two; in others, one. The weight of a halter is half a *man*; its cost price is 140 *d.*, and 16 *d.* the wages of the rope maker. 4. The *Áhanin mekh*, or iron peg, of which there are two for every halter. Each peg weighs five sers, and costs 15 *d.* 5. The *Tabartukhmáq*, or hammer, weighs five *sers*, and is used for fixing the iron pegs. There is one in every stable.

All broken and old utensils of brass and iron, in the *kháçah* stables, if repairable, are repaired at the expense of the Dároghahs; and when they are past mending, their present value is deducted, and the difference paid in cash. In other stables, a deduction of one-half of their value is made every third year.

6. *Na'l*, or horseshoes, are renewed twice a year. Formerly eight dáms were given for a whole set, but now ten. 7. *Kúndlán*. One is allowed for ten horses.[1] The price of it is 80¾ *R.*

ÁÍN 53.

THE OFFICERS AND SERVANTS ATTACHED TO THE IMPERIAL STABLES.

1. The *Átbegí* is in charge of all horses belonging to the government. He directs all officers charged with the management of the horses. This office is one of the highest of the State, and is only held by grandees of high rank: at present it is filled by the *Khán Khánán*[2] (Commander-in-Chief). 2. The *Dároghah*. There is one appointed for each stable. This post may be held by officers of the rank of commanders of five thousand down to Senior Ahadís. 3. The *Mushrif*, or accountant. He keeps the roll of the horses, manages all payments and fines, sees that His Majesty's orders are

---

[1] This appears to be the same as the *Hind.* کوندلا, which our meagre dictionaries describe as "a kind of tent."

[2] Or *Mírzá Khán Khánán, i. e.*, 'Abdurrahím, son of Bairám Khán; *vide* List of Grandees, IInd book, No. 29.

carried out, and prepares the estimate of the stores required for this department. He is chosen from among the grandees. 4. The *Dídahwar*, or inspector. Their duty is occasionally to inspect the horses, before they are mustered by His Majesty; they also determine the rank and the condition of the horses. Their reports are taken down by the Mushrif. This office may be held by Mansabdárs or Ahadís. 5. The *Akhtachis* look after the harness, and have the horses saddled. Most of them get their pay on the list of the Ahadís. 6. The *Chábuksuwár* rides the horses, and compares their speed with the road, which is likewise taken down by the Mushrif. He receives the pay of an Ahadí. 7. The *Hádá*: This name is given to a class of Rájpúts, who teach horses the elementary steps. Some of them get their pay on the list of the Ahadís. 8. The *Mírdahah* is an experienced groom placed over ten servants. He gets the pay of an Ahadí: but in other *kháçah* stables, he only gets 170 *d.*; in the country-bred stables, 160 *d.*; in the other *Siaspí* stables, 140 *d.*; in the *Bistaspí* stables, 100 *d.*; and in the *Dah-aspí* stables, 30 *d.* Besides he has to look after two horses. 9. The *Baiṭár*, or horse-doctor, gets the pay of an Ahadí. 10. The *Naqíb*, or watcher. Some active, intelligent men are retained for supervision. They report the condition of each stable to the Dároghahs and the Mushrif, and it is their duty to have the cattle in readiness. The two head Naqíbs are Ahadís, and they have thirty people under them, who receive from 100 to 120 *d.* 11. The *Sáis*, or groom. There is one groom for every two horses. In the *Chihilaspí* stables, each groom gets 170 *d.*; in the stables of the eldest prince, 138 *d.*; in the stables of the other princes, and in the courier horse stables, 136 *d.*; in the country bred stables, 126 *d.*; in the other *Siaspí* stables, 106 *d.*; in the *Bistaspí* stables, 103 *d.*; and in the *Dahaspí* stables, 100 *d.* 12. The *Jilaudár* (*vide* Aín 60) and the *Paik* (a runner). Their monthly pay varies from 1200 to 120 *d.*, according to their speed and manner of service. Some of them will run from fifty to one hundred *kroh* (kos) *p. day*. 13. The *Na'lband*, or farrier. Some of them are Ahadís, some foot soldiers. They receive 160 *d.* 14. The *Zíndár*, or *saddle holder*, has the same rank and pay as the preceding. In the Kháçah stable of forty horses, one saddle is allowed for every two horses, in the following manner: for the first and twenty-first; for the second and twenty-second, and so on. If the first horse is sent out of the stable, the saddle remains at its place, and what was the second horse becomes first, and the second saddle falls to the third horse, and so on to the end. If a horse out of the middle leaves, its saddle is given to the preceding horse. 15. The *Ábkash*, or water-carrier. Three are allowed in the stables of forty; two in stables of thirty, and only one in other stables. The monthly pay is 100 *d.* 16. The *Farrásh* (who dusts the furniture). There is one in every *kháçah* stable. His pay is 130 *d.*

17. A *Sipandsoz*[1] is only allowed in the stables of forty horses; his pay is 100 *d.*

18. The *Khákrúb*, or sweeper. Sweepers are called in Hindustan *Halálkhur*;[2] His Majesty brought this name *en vogue*. In stables of forty, there are two; in those of thirty and twenty, one. Their monthly pay is 65 *d.*

During a march, if the *dároghahs* are in receipt of a fixed allowance for coolies, they entertain some people to lead the horses. In the stables of thirty horses, fifteen are allowed. And in the same proportion does the government appoint coolies, when a dároghah has not received the extra-allowance. Each cooly gets two dáms *per diem*.

ÁÍN 54.

THE BÁRGÍR.

His Majesty, from the regard which he pays to difference in rank, believes many fit for cavalry service, though he would not trust them with the keeping of a horse. For these he has told off separate stables, with particular Dároghahs and Mushrifs. When their services are required, they are furnished with a horse on a written order of the *Bitikchí* (writer); but they have not to trouble themselves about the keeping of the horse. A man so mounted is called a *Bárgírsuwár*.

ÁÍN 55.

REGULATIONS FOR BRANDING HORSES.

In order to prevent fraudulent exchanges, and to remove the stamp of doubtful ownership, horses were for some time marked with the word نظر (*nazar* sight), sometimes with the word داغ (*dágh*, mark), and sometimes with the

[1] The seeds of *sipand* (in *Hind.* sarson, a kind of mustard seed) are put on a heated plate of iron. Their smoke is an effectual preventive against the evil eye (*nazar i bad*, *chashm rasídan*), which is even dangerous for Akbar's choice horses. The seeds burn away slowly, and emit a crackling sound. The man who burns them, is called *Sipandsóz*. *Vide* the poetical extracts of the IInd book, under *Shikebí*. Instead of Sipand, grooms sometimes keep a monkey over the entrance of the stable. The influence of the evil eye passes from the horses to the ugly monkey.

Another remedy consists in nailing old horse shoes to the gates of the stables. Hundreds of such shoes may still be seen on the gates in Fathpúr Síkrí.

[2] Akbar was very fond of changing names which he thought offensive, or of giving new names to things which he liked; *vide* p. 46, l. 28; p. 55, l. 18; p. 65, l. 16; p. 90, l. 22; also Forbes' Dictionary under *rangtará*. *Halálkhur*, *i. e.*, one who eats that which the ceremonial law allows, is a euphemism for *harámkhur*, one who eats forbidden things, as pork, &c. The word *halálkhur* is still in use among educated Muhammadans; but it is doubtful whether it was Akbar's invention. The word in common use for a sweeper is *mihtar*, a prince, which like the proud title of *khalífah*, now-a-days applied to cooks, tailors, &c., is an example of the irony of fate.

numeral ۷ (seven).[1] Every horse that was received by government had the mark burnt on the right cheek; and those that were returned, on the left side. Sometimes, in the case of *'Iráqí* and *Mujannas*[2] horses, they branded the price in numerals on the right cheek; and in the case of Turkí and Arab horses, on the left. Now-a-days the horses of every stable are distinguished by their price in numerals. Thus, a horse of ten muhurs, is marked with the numeral ten; those of twenty muhurs, have a twenty, and so on. When horses, at the time of the musters, are put into a higher or a lower grade, the old brand is removed.

Aín 56.

REGULATIONS FOR KEEPING UP THE FULL COMPLEMENT OF HORSES.

Formerly, whenever there had been taken away either ten horses from the stables of forty, or from the stud-bred horses, or five from the courier horses, they were replaced in the following manner. The deficiency in the stables of forty was made up from horses chosen from the stables of the princes; the stud-bred horses were replaced by other stud bred ones, and the courier horses from other stables. Again, if there were wanting fifteen horses in the stables of the eldest prince (Salím), they were replaced by good horses of his brothers; and if twenty were wanting in the stables of the second prince (Murád), the deficiency was made up by horses taken from the stables of the youngest prince and from other stables; and if twenty-five were wanting in the stables of the youngest prince (Dányál), the deficiency was made up from other good stables.

But in the thirty-seventh year of the Divine Era (A. D. 1593), the order was given that, in future, one horse should annually be added to each stable. Thus, when, in the present year, the deficiency in the *kháçah* stables had come up to eleven, they commenced to make up the complement, the deficiency of the other stables being made up at the time of the muster parades.

Aín 57.

ON FINES.

When a *kháçah* horse dies, the Dároghah has to pay one rupee, and the Mírdahah ten *d.*, upon every muhur of the cost price; and the

[1] Vide Aíns 7 and 8 of the second book. The branding of horses was revived in A. H. 981, A. D. 1573, when Shahbáz had been appointed *Mír Bakhshí*. He followed the regulations of 'Aláuddín Khiljí and Sher Sháh; *vide* Badáoní, pp. 173, 190.

[2] *Mujannas*, *i. e.*, put nearly equal (to an *Iráqí* horse); *vide* IInd book, Aín 2.

grooms lose one-fourth of their monthly wages. When a horse is stolen, or injured, His Majesty determines the fine, as it cannot be uniform in each case.

In the other stables, they exacted from the Dároghah for a single horse that dies, one rupee upon every muhur; for two horses, two rupees upon every muhur; and from the Mírdahah and the grooms the above proportions. But now, they take one rupee upon every muhur for one to three horses that die; and two upon every muhur, for four horses; and three upon every muhur, for five.

If the mouth of a horse gets injured, the Mírdahah is fined ten dáms upon every muhur, which fine he recovers from the other grooms.

ÁÍN 58.

ON HORSES KEPT IN READINESS.

There are always kept in readiness two *kháçah* horses; but of courier-horses, three, and one of each stable from the seventy muhurs down to the ten muhur stables and the *Gúṭs*. They are formed into four divisions, and each division is called a *misl*.

First misl, one from the *chihilaspí* stables; one from the stable of the eldest prince; one from those of the second prince; one from the stable of *kháçah* courier horses. *Second misl*, one from the stable of the youngest prince; one from the studbred; one from the chihilaspí stables; one courier horse. *Third misl*, one horse from the stables of the three princes; one stud bred. *Fourth misl*, one horse from each of the stables of horses of forty, thirty, twenty, and ten muhurs.

His Majesty rides very rarely on horses of the fourth misl. But when prince Sháh Murád joined his appointment,[1] His Majesty also rode the best horses of the stables of forty muhurs. The arrangement was then as follows. *First misl*, one horse from the stables of forty; one horse from the stables of the eldest and the youngest prince, and a courier horse. *Second misl*, stud bred horses from the stables of horses above seventy muhurs; *kháçah* horses of forty muhurs, and courier horses. *Third misl*,

[1] "Prince Murád, in the beginning of the fortieth year (1596) of Akbar's reign, was put in command of the army of Gujrát, and ordered to take Ahmadnagar. But when, some time after, Akbar heard that Murad's army was in a wretched condition, chiefly through the carelessness and drunken habits of the prince, the emperor resolved to go himself (43rd year), and dispatched Abulfazl, to bring the prince back to court. Abulfazl came just in time, to see the prince die, who from the preceding year had been suffering from epileptic fits (*çar'*, delirium tremens ?) brought on by habitual drunkenness." *Mir-át.*

one horse from the stables of each of the two princes, the stud bred, and the seventy muhur horses. *Fourth misl,* horses from the stables of sixty, forty, and thirty muhurs.

Horses are also kept in readiness from the stables of twenty and ten muhurs and the *Gúṭs.*

ÁÍN 59.

ON DONATIONS.

Whenever His Majesty mounts a horse belonging to one of the six *kháçah* stables, he gives something, according to a fixed rule, with the view of increasing the zeal and desire for improvement among the servants. For some time it was a rule that, whenever he rode out on a *kháçah* horse, a rupee should be given, *viz.*, one dám to the Átbegí, two to the Jilaudár; eighteen and one-half to the grooms, the rest being shared by the Mushrif, the Naqíb, the Akhtachí, and the Zíndár. In the case of horses belonging to the stables of the eldest prince, thirty dáms were given, each of the former recipients getting a quarter of a dam less. For horses belonging to stables of the second prince, twenty dáms were given, the donations decreasing by the same fraction; and for horses belonging to the stables of the youngest prince, as also for courier horses, and stud-breds, ten dáms, according to the same manner of distribution.

Now, the following donations are given:—For a horse of a stable of forty, one rupee as before; for a horse belonging to a stable of the eldest prince, twenty dáms; for a horse belonging to the youngest prince, ten dáms; for courier horses, five; for stud breds, four; for horses of the other stables, two.

ÁÍN 60.

REGULATIONS FOR THE JILAWÁNAH.[1]

Whenever a horse is given away as a present, the price of the horse is calculated fifty *per cent.* higher, and the recipient has to pay ten dáms upon every muhur of the value of the horse. These ten dáms *per muhur* are

[1] *Jilau* is the string attached to the bridle, by which a horse is led. A led horse is called *janíbah.* The adjective *jilawánah,* which is not in the dictionaries, means *referring to a led horse.* We have to write *jilawánah,* not *jilauánah,* according to the law of the Persian language, to break up a final diphthong in derivatives; as *na-ín, jawín,* from *nai, jau,* not *nai-ín,* or *jau-ín.* The *jilaudár,* or *janíbahdar,* or *janíbahkash,* is the servant who leads the horse. The *jilaubegí* is the superintendent of horses selected for presents. The *tahçíldár* collects the fee.

divided as follows:—The Átbegí gets five dáms; the Jílaubegí, two and a half; the Mushrif, one and a quarter; the Naqíbs, nine jetals; the grooms, a quarter dám; the Tahçíldár, fifteen jetals; the remainder is equally divided among the Zíndár and Akhtachí.

'In this country, horses commonly live to the age of thirty years. Their price varies from 500 muhurs to 2 Rupees.

ÁÍN 61.

THE CAMEL STABLES.

From the time His Majesty paid regard to the affairs of the state, he has shewn a great liking for this curiously shaped animal; and as it is of great use for the three branches of the government, and well known to the emperor for its patience under burdens, and for its contentment with little food, it has received every care at the hands of His Majesty. The quality of the country breed improved very much, and Indian camels soon surpassed those of Irán and Túrán.

From a regard to the dignity of his court, and the diversion of others, His Majesty orders camel-fights, for which purpose several choice animals are always kept in readiness. The best of these *kháçah* camels, which is named *Sháhpasand* (approved of by the Sháh), is a country bred twelve years old: it overcomes all its antagonists, and exhibits in the manner in which it stoops down and draws itself up, every finesse of the art of wrestling.

Camels are numerous near Ajmír, Jodhpúr, Nágór, Bíkánír, Jaisalmír, Batinḍá, and Bhaṭnír; the best are bred in the Súbah of Gujrát, near Cachh. But in Sind is the greatest abundance: many inhabitants own ten thousand camels and upwards. The swiftest camels are those of Ajmír; the best for burden are bred in T'hat'hah.

The success[1] of this department depends on the *Arwánahs*, *i. e.*, female camels. In every country, they get hot in winter, and couple. The male of two humps goes by the name of *Bughur*. The young ones of camels are called *nar* (male), and *máyah* (female), as the case may be; but His Majesty has given to the *nar* the name of *Bughdí*, and to the female that of *Jammázah*. The *bughdí* is the better for carrying burdens and for fighting; the *jammázah* excels in swiftness. The Indian camel called *Lok*, and its female, come close to them in swiftness, and even surpass them. The offspring of a *bughur* and a *jammázah* goes by the name of *g'hurd*; the female is called *máyah*

[1] In the text *máyah*, which also means *a female camel*—a very harmless pun. *Vide* Dr. Sprenger's Gulistán, preface, p. 6. Regarding the word *bughur* vide Journal, Asiatic Society, Bengal, for 1868, p. 59.

g'hurd. If a *bughdí*, or a *lok*, couples with a *jammázah*, the young one is called *bughdí* or *lok* respectively. But if a *bughdí* or a *lok* couples with an *arwánah*, the young male is named after its sire, and the young female after its dam. The *lok* is considered superior to the *g'hurd*, and the *máyah g'hurd*.

When camels are loaded and travel, they are generally formed into *qaṭárs* (strings), each *qaṭár* consisting of five camels. The first camel of each *qaṭár* is called *peshang*;[1] the second, *peshdarah*; the third, *miyánah qaṭár*; the fourth, *dumdast*; the last camel, *dumdár*.

Á'ÍN 62.

THE FOOD OF CAMELS.

The following is the allowance of such *bughdís* as are to carry burdens. At the age of two and a half, or three years, when they are taken from the herd of the stud dams, a *bughdí* gets 2 *s.* of grain; when three and a half to four years old, 5 *s.*; up to seven years, 9 *s.*; at eight years, 10 *s.* The same rule applies to *bughurs*. Similarly in the case of jammázahs, g'hurds, máyah g'hurds, and loks, up to four years of age; but from the fourth to the seventh year, they get 7 *s.*; and at the age of eight years, 7½ *s.*, at the rate of 28 *dáms* p. ser. As the ser has now 30 *dáms*, a corresponding deduction is made in the allowance. When *bughdís* are in heat, they eat less. Hence also concession is made, if they get lean, to the extent of 10 *s.*, according to the provisions of the *Págosht* rule (Á'ín 83); and when the rutting season is over, the Dároghahs give out a corresponding extra allowance of grain, to make up for the former deficiency. If they have made a definite entry into their day-book, and give out more food, they are held indemnified according the *Págosht* rule; and similarly in all other cases, note is taken of the deductions according to that rule.

At Court, camels are found in grass by the government for eight months. Camels on duty inside the town, are daily allowed grass at the rate of 2 *d.* per head; and those outside the town, 1½ *d.* During the four rainy months, and on the march, no allowance is given, the drivers taking the camels to meadows to graze.

---

[1] So according to the best MSS. The word is evidently a vulgar corruption of *pesh-áhang*, the leader of a troop. *Pesh-darah* means 'in front of the *belly*, or middle, of the *qaṭár*.'

ÁÍN 63.

THE HARNESS OF CAMELS.

The following articles are allowed for *kháçah* camels:—an *Afsár* (head stall); a *Dum-afsár*, (crupper); a *Mahár kát'hí* (furniture resembling a horse-saddle, but rather longer,—an invention of His Majesty); a *kúchí* (which serves as a saddle-cloth); a *Qaṭárchí;* a *Sarbchí;*[1] a *Tang* (a girth); a *Sartang* a (head-strap); a *Shebband* (a loin-strap); a *Jalájil* (a breast rope adorned with shells or bells); a *Gardanband* (a neckstrap); three *Chúdars* (or coverings) made of broadcloth, or variegated canvass, or waxcloth. The value of the jewels, inlaid work, trimmings, and silk, used for adorning the above articles, goes beyond description.

Five *qaṭárs* of camels, properly caparisoned, are always kept ready for riding, together with two for carrying a *Mihaffah*, which is a sort of wooden turret, very comfortable, with two poles, by which it is suspended, at the time of travelling, between two camels.

A camel's furniture is either coloured or plain. For every ten *qaṭárs*, they allow three *qaṭárs* coloured articles.

For *Bughdís*, the cost of the [coloured] furniture is 225¾ *d.*, *viz.*, a head-stall studded with shells, 20¼ *d.*; a brass ring, 1½ *d.*; an iron chain, 4½ *d.*; a *kallagí* (an ornament in shape of a rosette, generally made of peacock's feathers, with a stone in the centre), 5 *d.*; a *pushtpozí* (ornaments for the strap which passes along the back), 8 *d.*; a *dum-afsár* (a crupper), 1½ *d.*; for a *takaltú* (saddle quilt) and a *sarbchí*, both of which require 5 sers of cotton, 20 *d.*; a *jul* (saddle-cloth), 68 *d.*; a *jaház i gajkárí*,[2] which serves as a *mahárkát'hí* (*vide* above), 40 *d.*: a *tang*, *shebband*, *gulúband* (throat-strap), 24 *d.*; a *ṭanáb* (long rope) for securing the burden—camel-drivers call this rope *ṭáqah ṭanáb*, or *kharwár*—38 *d.*; a *bálápush*, or covering, 15 *d.*[3]

For *Jammázahs*, two additional articles are allowed, *viz.*, a *gardanband*, 2 *d.*; and a *sínah band* (chest-strap), 16 *d.*

The cost of a set of plain furniture for *Bughdís* and *Jammázahs* amounts to 168½ *d.*, *viz.*, an *afsár*, studded with shells, 10 *d.*; a *dum-afsár*, ½ *d.*; a *jaház*,

---

[1] The meaning is doubtful. The Arab. *sarb*, like *qiṭár*, signifies a troop of camels. From the following it appears that *sarbchí* is a sort of quilt.

[2] *Gajkárí* appears to be the correct reading. The Arab. *jaház* means *whatever is upon a camel*, especially *the saddle and its appurtenances*, generally made of coarse canvass, steeped in lime (*gaj*). Hence *gajkarí*, white-washed.

[3] These items added up give 246 *d.*, not 225¾, as stated by Abulfazl. When discrepancies are slight, they will be found to result from a rejection of the fractional parts of the cost of articles. The difference of 20¼ *d.* in this case can only have resulted from an omission on the part of the author, because all MSS. agree in the several items. Perhaps some of the articles were not exchanged *triennially*, but had to last a longer time.

16½ *d.*; a *jul*, 52½ *d.*; a *tang*, a *shebband*, and *gulúband*, 24 *d.*; a *ṭáqah ṭanáb*, 37½ *d.*; a *bálápush*, 28 *d.*[1]

For *Loks*, the allowance for furniture is 143 *d.*, *viz.*, an *afsár*, *jaház*, *kharwár*, according to the former rates; a *jul*, 37½ *d.*; a *tang*, *shebband*, *gulúband*, 14½ *d.*; a *bálápush*, 28 *d.*[2]

The coloured and plain furniture is renewed once in three years, but not so the iron bands and the wood work. In consideration of the old coloured furniture of every *qaṭár*, sixteen *dáms*, and of plain furniture, fourteen *dáms*, are deducted by the Government. At the end of every three years, they draw out an estimate, from which one-fourth is deducted; then after taking away one-tenth of the remainder, an assignment is given for the rest.[3]

'Alafí camels (used for foraging) have their furniture renewed annually, at the cost of 52½ *d.* for countrybred camels and *loks*, *viz.*, [for countrybred camels] an *afsár*, 5 *d.*; a *jul*, 36½ *d*; a *sardoz*, ½ *d.*; a *tang*, and a *shebband*, 10¾ *d.*;[4] and [for *loks*], an *afsár*, a *tang*, and a *shebband*, as before; a *jul*, 45¾ *d.*; a *sardoz*, ¾ *d.*

From the annual estimate one-fourth is deducted, and an assignment is given for the remainder.

Shalítah ṭáṭs, or canvass sacks, for giving camels their grain, are allowed one for every *qaṭár*, at a price of 30¾ *d.* for *bughdís* and *jammázahs*, and 24½ *d.* for *loks*.

Hitherto the cost of these articles had been uniformly computed and fixed by contract with the camel-drivers. But when in the forty-second year of the divine era [1598 A. D.], it was brought to the notice of His Majesty that these people were, to a certain extent, losers, this regulation was abolished, and the current market price allowed for all articles. The price is therefore no longer fixed.

On every New Year's day, the head camel-drivers receive permission for shearing the camels, anointing them with oil, injecting oil into the noses of the animals, and indenting for the furniture allowed to *'Alafí* camels.

ÁÍN 64.

REGULATIONS FOR OILING CAMELS, AND INJECTING OIL INTO THEIR NOSTRILS.

The scientific terms for these operations are *taṭliyah* and *tajrí'*, though we might expect *taṭliyah* and *tánshíq*, because *tanshíq* means *injecting into the nose*.

[1] These items added up give 169 *d.*, instead of Abulfazl's 168½ *d.*

[2] The items added up give 144 *d.*, instead of Abulfazl's 143 *d.*

[3] Hence the Government paid, as a rule, $\frac{9}{10} \times \frac{3}{4} = \frac{27}{40}$ of the estimates presented.

[4] The addition gives 52¾ *d.* instead of 52½. The following items, for *loks*, give added up 62¼.

For each *Bughdí* and *Jammázah* 3¾ sers of sesame oil are annually allowed, *viz.*, three sers for anointing, and ¾ ser for injection into the nose. So also ¾ *s.* of brimstone, and 6½ *s.* of butter-milk. For other kinds of camels the allowance is ⅝ *s.* of brimstone, 6½ *s.* of butter-milk, and ¾ *s.* of grease for injecting into the nose-holes.

Formerly these operations were repeated three times, but now only once a year.

ÁÍN 65.

THE RANKS OF THE CAMELS, AND THEIR SERVANTS.

His Majesty has formed the camels into *qaṭárs*, and given each *qaṭár* in charge of a *sárbán*, or driver. Their wages are four-fold. The first class get 400 *d.*; the second, 340 *d.*; the third, 280 *d.*; the fourth, 220 *d.*, *per mensem*.

The *qaṭárs* are of three kinds—1. Every five *qaṭárs* are in charge of an experienced man, called *bistopanjí*, or commander of twenty-five. His salary is 720 *d.* He marks a *Yábú* horse, and has four drivers under him. 2. Double the preceding, or ten *qaṭárs*, are committed to the care of a *Panjáhí*, or commander of fifty. He is allowed a horse, draws 960 *d.*, and has nine drivers under him. 3. Every hundred *qaṭárs* are in charge of a *Panjçadí*, or commander of five hundred. Ten *qaṭárs* are under his personal superintendence. With the exception of one *qaṭár*, Government finds drivers for the others. The *Panjáhís*, and *Bistopanjís* are under his orders. Their salary varies: now-a-days many Yúzbáshís[1] are appointed to this post. One camel is told off for the *farráshes*. A writer also has been appointed. His Majesty, from his practical knowledge, has placed each *Pançadí* under a grandee of the court. Several active foot-soldiers have been selected, to enquire from time to time into the condition of the camels, so that there may be no neglect. Besides, twice a year some people adorned with the jewel of insight, inspect the camels as to their leanness or fatness, at the beginning of the rains, and at the time of the annual muster.

Should a camel get lost, the *Sárbán* is fined the full value; so also the *Panjáhí* and the *Pançadí*. If a camel get lame or blind, they are fined the fourth part of the price.

Raibárí.

Raibárí is the name given to a class of Hindus who are acquainted with the habits of the camel. They teach the country bred *lok* camel so to step as to pass over great distances in a short time. Although from the capital

---

[1] Corresponding to our Captains of the Army, commanders of 100 soldiers.

to the frontiers of the empire, into every direction, relay horses are stationed, and swift runners have been posted at the distance of every five *kos*, a few of these camel riders are kept at the palace in readiness. Each *Raibárí* is also put in charge of fifty stud arwánahs, to which for the purpose of breeding, one *bughur* and two *loks* are attached. The latter (the males) get the usual allowance of grain, but nothing for grass. The fifty *arwánahs* get no allowance for grain or grass. For every *bughur*, *bughdí*, and *jammázah*, in the stud, the allowance for oiling and injecting into the nostrils, is 4 *s.* of sesame oil, $\frac{3}{4}$ *s.* of brimstone, $6\frac{1}{2}$ *s.* of butter milk. The first includes $\frac{3}{4}$ *s.* of oil for injection. *Loks*, *arwánahs*, *g'hurds*, and *máyah g'hurds*, only get $3\frac{3}{8}$ *s.* of sesame oil—the deduction is made for injection,—$6\frac{1}{2}$ *s.* of butter milk, and $\frac{5}{8}$ *s.* of brimstone.

Botahs and *Dumbálahs*—these names are given to young camels; the former is used for light burdens—are allowed $2\frac{1}{2}$ *s.* of oil, inclusive of $\frac{1}{2}$ *s.* for injection into the nostrils, $\frac{1}{2}$ *s.* of brimstone, and $4\frac{1}{2}$ *s.* of butter-milk.

Full grown stud camels get weekly $\frac{1}{2}$ *s.* of saltpetre and common salt; *botahs* get $\frac{1}{4}$ *s.*

The wages of a herdsman is 200 *d. per mensem.* For grazing every fifty stud camels, he is allowed five assistants, each of whom gets 2 *d. per diem.* A herdsman of two herds of fifty is obliged to present His Majesty three *arwánahs* every year; on failure, their price is deducted from his salary.

Formerly the state used to exact a fourth part of the wool sheared from every *bughdí* and *jammázah*, each camel being assessed to yield four sers of wool. This His Majesty has remitted, and in lieu thereof, has ordered the drivers to provide their camels with *dum-afsárs*, wooden pegs, &c.

The following are the prices of camels:—a *bughdí*, from 5 to 12 Muhurs; a *jammázah*, from 3 to 10 *M.*; a *bughur*, from 3 to 7 *M.*; a mongrel *lok*, from 8 to 9 *M.*; a country-bred, or a Balúchí *lok*, from 3 to 8 *M.*; an *arwánah*, from 2 to 4 *M.*

His Majesty has regulated the burdens to be carried by camels. A first class *bughdí*, not more than 10 *mans*; a second class do., 8 *m.*; superior *jammázahs*, *loks*, &c., 8 *m.*; second class do, 6 *m.*

In this country, camels do not live above twenty-four years.

ÁÍN 66.

THE GÁOKHÁNAH OR COW-STABLES.

Throughout the happy regions of Hindustan, the cow is considered auspicious, and held in great veneration; for by means of this animal, tillage is carried on, the sustenance of life is rendered possible, and the table of

the inhabitant is filled with milk, butter-milk, and butter. It is capable of carrying burdens and drawing wheeled carriages, and thus becomes an excellent assistant for the three branches of the government.

Though every part of the empire produces cattle of various kinds, those of Gujrát are the best. Sometimes a pair of them are sold at 100 muhurs. They will travel 80 kos [120 miles] in 24 hours, and surpass even swift horses. Nor do they dung whilst running. The usual price is 20 and 10 muhurs. Good cattle are also found in Bengal and the Dakh'in. They kneel down at the time of being loaded. The cows give upwards of half a *man* of milk. In the province of Dihlí again, cows are not more worth than 10 Rúpees. His Majesty once bought a pair of cows for two lacs of *dáms* [5000 Rupees].

In the neighbourhood of Thibet and Kashmír, the *Qaṭás*, or Thibetan Yak, occurs, an animal of extraordinary appearance.

A cow will live to the age of twenty-five.

From his knowledge of the wonderful properties of the cow, His Majesty, who notices every thing which is of value, pays much attention to the improvement of cattle. He divided them into classes, and committed each to the charge of a merciful keeper. One hundred choice cattle were selected as *kháçah*, and called *kotal*. They are kept in readiness for any service, and forty of them are taken unladen on hunting expeditions, as shall be mentioned below (Book II, Aín 27.). Fifty-one others nearly as good are called half-*kotal*, and fifty-one more, quarter-*kotal*. Any deficiency in the first class is made up from the second, and that of the middle from the third. But these three form the cow-stables for His Majesty's use.

Besides, sections of cattle have been formed, each varying in number from 50 to 100, and committed to the charge of honest keepers. The rank of each animal is fixed at the time of the public muster, when each gets its proper place among sections of equal rank. A similar proceeding is adopted for each section, when selected for drawing waggons and travelling carriages, or for fetching water (*vide* Aín 22).

There is also a species of oxen, called *gaini*, small like *gút* horses, but very beautiful.

Milk-cows and buffaloes have also been divided into sections, and handed over to intelligent servants.

AÍN 67.

THE DAILY ALLOWANCE OF FOOD.

Every head of the first *kháçah* class is allowed daily 6¼ *s.* of grain, and 1½ *d.* of grass. The whole stable gets daily 1 *man*, 19 *s.* of molasses, which

is distributed by the Dárogah, who must be a man suitable for such a duty and office. Cattle of the remaining *kháçah* classes get daily 6 *s.* of grain, and grass as before, but no molasses are given.

In other cow-stables, the daily allowance is as follows. First kind, 6 *s.* of grain, 1½ *d.* of grass at court, and otherwise only 1 *d.* The second kind get 5 *s.* of grain, and grass as usual. The oxen used for travelling carriages get 6 *s.* of grain, and grass as usual. First class *gainis* get 3 *s.* of grain, and 1 *d.* of grass at court, otherwise only ¾ *d.*. Second class do., 2½ *s.* of grain, and ¾ *d.* of grass at court, otherwise only ½ *d.*

A male buffalo (called *Arnah*) gets 8 *s.* of wheat flour boiled, 2 *s.* of g'hí, ½ *s.* of molasses, 1½ *s.* of grain, and 2 *d.* of grass. This animal, when young, fights astonishingly, and will tear a lion to pieces. When this peculiar strength is gone, it reaches the second stage, and is used for carrying water. It then gets 8 *s.* of grains, and 2 *d.* for grass. Female buffaloes used for carrying water get 6 *s.* of grain, and 2 *d.* for grass. First class oxen for leopard-waggons[1] get 6¼ *s.* of grain; and other classes, 5 *s.* of grain, but the same quantity of grass. Oxen for heavy waggons got formerly 5 *s.* of grain, and 1½ *d.* for grass; but now they get a quarter ser less, and grass as before.

The milk-cows and buffaloes, when at court, have grain given them in proportion to the quantity of milk they give. A herd of cows and buffaloes is called *t'hát*. A cow will give daily from 1 to 15 *s.* of milk; a buffalo from 2 to 30 *s.* The buffaloes of the Panjáb are the best in this respect. As soon as the quantity of milk given by each cow has been ascertained, there are demanded two dáms weight of g'hí for every ser of milk.

ÁÍN 68.

THE SERVANTS EMPLOYED IN THE COW-STABLES.

In the *kháçah* stables, one man is appointed to look after four head of cattle. Eighteen such keepers in the first stable get 5 *d. per diem*, and the remaining keepers, 4 *d.* In other stables, the salary of the keepers is the same, but each has to look after six cows. Of the carriage drivers, some get their salaries on the list of the Ahadís; others get 360 *d.*, others 256 *d.* down to 112 *d.* *Bahals*, or carriages, are of two kinds:—1. *Chatrídár* or covered carriages, having four or more poles (which support the *chatr*, or umbrella); 2. without a covering. Carriages suited for horses are called *g'hurbahals*. For every ten waggons, 20 drivers and 1 carpenter are allowed.

[1] Carriages for the transport of trained hunting leopards. *Vide* Book II, Áín 27.

The head driver, or *Mírdahah*, and the carpenter, get each 5 *d. per diem;* the others, 4 *d.* For some time 15 drivers had been appointed, and the carpenter was disallowed: the drivers themselves undertook the repairs, and received on this account an annual allowance of 2200 *dáms* [55 Rupees.]

If a horn of an ox was broken, or the animal got blind, the Dároghah was fined one-fourth of the price, or even more, according to the extent of the injury.

Formerly the Dároghahs paid all expenses on account of repairs, and received for every day that the carriages were used, half a dám *úng* money—*úng* is hemp smeared with g'hí, and twisted round about the axle-tree which, like a pivot, fits into the central hole of the wheel, and thus prevents it from wearing away or getting broken. When afterwards the Dárogahship was transferred to the drivers, they had to provide for this expense. At first, it was only customary for the carts to carry on marches a part of the baggage belonging to the different workshops; but when the drivers performed the duties of the Dároghahs, they had also to provide for the carriage of the fuel required at court, and for the transport of building materials. But subsequently, 200 waggons were set aside for the transport of building materials, whilst 600 others have to bring, in the space of ten months, 1,50,000 *mans* of fuel to the Imperial kitchen. And if officers of the government on any day use the Imperial waggons for other purposes, that day is to be separately accounted for, as also each service rendered to the court. The drivers are not subject to the *Págosht* regulation (*vide* Aín 83). If, however, an ox dies, they have to buy another.

But when it came to the ears of His Majesty that the above mode of contract was productive of much cruelty towards these serviceable, but mute animals, he abolished this system, and gave them again in charge of faithful servants. The allowance of grain for every cart-bullock was fixed at 4 *s.*, and 1½ *d.* were given for grass. For other bullocks, the allowance in one-half of the preceding. But during the four rainy months no money is allowed for grass. There were also appointed for every eighteen carts twelve drivers, one of whom must understand carpenter's work. Now, if a bullock dies, government supplies another in his stead, and likewise pays for the *úng*, and is at the expense of repairs.

The cattle that are worked are mustered once a year by experienced men who estimate their fatness or leanness; cattle that are unemployed are inspected every six months. Instead of the above mentioned transport of firewood, &c., the carters have now to perform any service which may be required by the government.

ÁÍN 69.

THE MULE STABLES.

The mule possesses the strength of a horse, and the patience of an ass; and though it has not the intelligence of the former, it has not the stupidity of the latter. It never forgets the road which it has once travelled. Hence it is liked by His Majesty, whose practical wisdom extends to every thing, and the breeding is encouraged. It is the best animal for carrying burdens, and travelling over uneven ground, and has a very soft step. People generally believe that the male ass couples with a mare, but the opposite connexion also is known to take place, as mentioned in the books of antiquity. The mule resembles its dam. His Majesty had a young ass coupled with a mare, and they produced a very fine mule.

In many countries just princes prefer travelling about on a mule; and people can therefore easily lay their grievances before them,[1] without inconveniencing the traveller.

Mules are only bred in Hindustan in Pak'halí,[2] and its neighbourhood. The simple inhabitants of this country used to look upon mules as asses, and thought it derogatory to ride upon them; but in consequence of the interest which His Majesty takes in this animal, so great a dislike is now nowhere to be found.

Mules are chiefly imported from 'Iráq i 'Arab and 'Iráq i 'Ajam. Very superior mules are often sold at Rs. 1,000 per head.

Like camels, they are formed into *qaṭárs* of five, and have the same names, except the second mule of each *qaṭár*, which is called *bardast*, [instead of *peshdárah*, *vide* Áín 61, end].

Mules reach the age of fifty.

ÁÍN 70.

THE DAILY ALLOWANCE OF FOOD FOR MULES.

Such mules as are not country-bred, get at court, 6 *s.* of grain, and 2 *d.* for grass; otherwise, only 1½ *d.* Country-bred mules get 4 *s.* of grain, and 1½ *d.* of grass, when at court; otherwise, 1 *d.* for grass. Each mule is allowed every week 3½ *jetals* for salt; but they give the salt in a lump.

---

[1] Which the subjects could not so easily do, if the princes, on their tours of administration of justice, were to ride on elephants, because the plaintiff would stand too far from the king.

[2] The Sarkár of Pak'halí lies between Aṭak (Attock) and Kashmír, a little north of Rawul Pindee. *Vide* towards the end of Book III.

ÁÍN 71.

THE FURNITURE OF MULES.

For imported mules, a head stall of leather, 20¼ *d.*; an iron chain weighing 2 *s.*, 10 *d.*; a *ranáki* (crupper) of leather, 4 *d.*; a *pálán* (pack-saddle), 102 *d.*; a *shálta,g* (shawl strap), and a *palás-tang* (blanket strap), 36¼ *d.*; a *ṭáqah ṭanáb* (a rope for fastening the burden,) 63 *d.*; a *qatír shaláq* (a short whip), 6 *d.*; a bell, one for every *qaṭár*, 10 *d.*; a horse hair saddle, 40 *d.*; a *kaláwah* (*vide* Áín 45, No. 9) of leather, 13 *d.*; a set of ropes, 9 *d.*; a saddle cloth, 4½ *d.*; a *sardoz* (a common head stall) 4 *d.*; a *khurjín* (wallet), 15 *d.*; a fodder-bag, 4 *d.*; a *magas-rán* (to drive away flies) of leather, 1 *d.*; a curry-comb and a hair-glove (for washing), 4 *d.* Total, 345¾ *d.*

For country-bred mules the allowance is 151¼ *d.*, *viz.*, a head stall of leather, 4 *d.*; pack-saddle, 51 *d.* 18¾ *j.*; the two straps, 16½ *d.*; a *ṭáqah ṭanáb* and *sardoz*, 40 *d.*; a bell, 5 *d.*; a fodder-bag, 3 *d.*; a crupper, 3 *d.*; a saddle, 24 *d.*; a curry-comb and a hair-glove, 4 *d.*

The furniture is renewed every third year; but, for all iron and wood work, half the price is deducted. The annual allowance for the repair of the furniture is 40 *d.*; but on the march, the time of renewal depends on the wear. Mules are shod every six months at a cost of 8 *d.* per head.

Each *qaṭár* is in charge of a keeper. Túráuís, Ifránís, and Indians, are appointed to this office; the first two get from 400 to 1920 *d.*; and the third class, from 240 to 256 *d. per mensem*. Such keepers as have monthly salaries of 10 R. [400 *d.*] and upwards, have to find the *peshang* (first mule of their *qaṭár*) in grain and grass. Experienced people inspect the mules twice a year as to leanness or fatness. Once a year they are paraded before His Majesty.

If a mule gets blind or lame, the muleteer is fined one-fourth of the cost price; and one-half, if it is lost.

Asses also are employed for carrying burdens and fetching water. They get 3 *s.* of grain, and 1 *d.* for grass. The furniture for asses is the same as that for country-bred mules, but no saddle is given. The annual allowance for repairs is 23 *d.* The keepers do not get above 120 *d. per mensem.*

ÁÍN 72.

THE MANNER IN WHICH HIS MAJESTY SPENDS HIS TIME.

The success of the three branches of the government, and the fulfilment of the wishes of the subjects, whether great or small, depend upon the

manner in which a king spends his time. The care with which His Majesty guards over his motives, and watches over his emotions, bears on its face the sign of the Infinite, and the stamp of immortality; and though thousands of important matters occupy, at one and the same time, his attention, they do not stir up the rubbish of confusion in the temple of his mind, nor do they allow the dust of dismay to settle on the vigour of his mental powers, or the habitual earnestness with which His Majesty contemplates the charms of God's world. His anxiety to do the will of the Creator is ever increasing; and thus his insight and wisdom are ever deepening. From his practical knowledge, and capacity for every thing excellent, he can sound men of experience, though rarely casting a glance on his own ever extending excellence. He listens to great and small, expecting that a good thought, or the relation of a noble deed, may kindle in his mind a new lamp of wisdom, though ages have past without his having found a really great man. Impartial statesmen, on seeing the sagacity of His Majesty, blotted out the book of their own wisdom, and commenced a new leaf. But with the magnanimity which distinguishes him, and with his wonted zeal, he continues his search for superior men, and finds a reward in the care with which he selects such as are fit for his society.

Although surrounded by every external pomp and display, and by every inducement to lead a life of luxury and ease, he does not allow his desires, or his wrath, to renounce allegiance to Wisdom, his sovereign—how much less would he permit them to lead him to a bad deed! Even the telling of stories, which ordinary people use as as a means of lulling themselves into sleep, serves to keep His Majesty awake.

Ardently feeling after God, and searching for truth, His Majesty exercises upon himself both inward and outward austerities, though he occasionally joins public worship, in order to hush the slandering tongues of the bigots of the present age. But the great object of his life is the acquisition of that sound morality, the sublime loftiness of which captivates the hearts of thinking sages, and silences the taunts of zealots and sectarians.

Knowing the value of a lifetime, he never wastes his time, nor does he omit any necessary duty, so that in the light of his upright intentions, every action of his life may be considered as an adoration of God.

It is beyond my power to describe in adequate terms His Majesty's devotions. He passes every moment of his life in self-examination or in adoration of God. He especially does so at the time, when morning spreads her azure silk, and scatters abroad her young, golden beams; and at noon, when the light of the world-illuminating sun embraces the universe, and thus becomes a source of joy for all men; in the evening, when that

fountain of light withdraws from the eyes of mortal man, to the bewildering grief of all who are friends of light; and lastly at midnight, when that great cause of life turns again to ascend, and to bring the news of renewed cheerfulness to all who, in the melancholy of the night, are stricken with sorrow. All these grand mysteries are in honor of God, and in adoration of the Creator of the world; and if dark-minded, ignorant men cannot comprehend their signification, who is to be blamed, and whose loss is it? Indeed, every man acknowledges that we owe gratitude and reverence to our benefactors; and hence it is incumbent on us, though our strength may fail, to show gratitude for the blessings we receive from the sun, the light of all lights, and to enumerate the benefits which he bestows. This is essentially the duty of kings, upon whom, according to the opinion of the wise, this sovereign of the heavens sheds an immediate light.[1] And this is the very motive which actuates His Majesty to venerate fire and reverence lamps.

But why should I speak of the mysterious blessings of the sun, or of the transfer of his greater light to lamps? Should I not rather dwell on the perverseness of those weakminded zealots, who, with much concern, talk of His Majesty's religion as of a deification of the Sun, and the introduction of fire-worship? But I shall dismiss them with a smile.

The compassionate heart of His Majesty finds no pleasure in cruelties, or in causing sorrow to others; he is ever sparing of the lives of his subjects, wishing to bestow happiness upon all.

His Majesty abstains much from flesh, so that whole months pass away without his touching any animal food, which, though prized by most, is nothing thought of by the sage. His august nature cares but little for the pleasures of the world. In the course of twenty-four hours, he never makes more than one meal. He takes a delight in spending his time in performing whatever is necessary and proper. He takes a little repose in the evening, and again for a short time in the morning; but his sleep looks more like waking.

His Majesty is accustomed to spend the hours of the night profitably; to the private audience hall are then admitted eloquent philosophers, and virtuous Çúfís, who are seated according to their rank, and entertain His Majesty with wise discourses. On such occasions His Majesty fathoms them, and tries them on the touch-stone of knowledge. Or the object of an ancient institution is disclosed, or new thoughts are hailed with delight. Here young men of talent learn to revere and adore His Majesty, and experience the happiness of having their wishes fulfilled, whilst old men of impartial

[1] Vide Abulfazl's Preface, p. iii., and p. 49.

judgment see themselves on the expanse of sorrow, finding that they have to pass through a new course of instruction.

There are also present in these assemblies, unprejudiced historians, who do not mutilate history by adding or suppressing facts, and relate the impressive events of ancient times. His Majesty often makes remarks wonderfully shrewd, or starts a fitting subject for conversation. On other occasions matters referring to the empire and the revenue, are brought up, when His Majesty gives orders for whatever is to be done in each case.

About a watch before day-break, musicians of all nations are introduced, who recreate the assembly with music and songs, and religious strains; and when four *g'haṛis* are left till morning, His Majesty retires to his private apartments, brings his external appearance in harmony with the simplicity of his heart, and launches forth into the ocean of contemplation. In the meantime, at the close of night, soldiers, merchants, peasants, tradespeople, and other professions, gather round the palace, patiently waiting to catch a glimpse of His Majesty. Soon after day-break, they are allowed to make the *kornish* (*vide* Aín 74). After this, His Majesty allows the attendants of the Harem to pay their compliments. During this time various matters of worldly and religious import are brought to the notice of His Majesty. As soon as they are settled, he returns to his private apartments, and reposes a little.

The good habits of His Majesty are so numerous, that I cannot adequately describe them. If I were to compile dictionaries on this subject, they would not be exhaustive.

AÍN 73.

REGULATIONS FOR ADMISSION TO COURT.

Admittance to Court is a distinction conferred on the nation at large; it is a pledge that the three branches of the government are properly looked after, and enables subjects personally to apply for redress of their grievances. Admittance to the ruler of the land is for the success of his government, what irrigation is for a flower-bed; it is the field, on which the hopes of the nation ripen into fruit.

His Majesty generally receives twice in the course of twenty-four hours, when people of all classes can satisfy their eyes and hearts with the light of his countenance. *First*, after performing his morning devotions, he is visible, from outside the awning, to people of all ranks, whether they be given to worldly pursuits, or to a life of solitary contemplation, without any molestation from the mace-bearers. This mode of shewing himself is

called, in the language of the country, *darsan* (view); and it frequently happens that business is transacted at this time. The *second* time of his being visible is in the State Hall, whither he generally goes after the first watch of the day. But this assembly is sometimes announced towards the close of day, or at night. He also frequently appears at a window which opens into the State Hall, for the transaction of business; or he dispenses there justice calmly and serenely, or examines into the dispensation of justice, or the merit of officers, without being influenced in his judgment by any predilections, or any thing impure and contrary to the will of God. Every officer of government then presents various reports, or explains his several wants, and is instructed by His Majesty how to proceed. From his knowledge of the character of the times, though in opposition to the practice of kings of past ages, His Majesty looks upon the smallest details as mirrors capable of reflecting a comprehensive outline; he does not reject that which superficial observers call unimportant, and counting the happiness of his subjects as essential to his own, never suffers his equanimity to be disturbed.

Whenever His Majesty holds court, they beat a large drum, the sounds of which are accompanied by Divine praise. In this manner, people of all classes receive notice. His Majesty's sons and grandchildren, the grandees of the Court, and all other men who have admittance, attend to make the *kornish*, and remain standing in their proper places. Learned men of renown and skilful mechanics pay their respects; the Dároghahs and Bitikchís (writers) set forth their several wants; and the officers of justice give in their reports. His Majesty, with his usual insight, gives orders, and settles everything in a satisfactory manner. During the whole time, skilful gladiators and wrestlers from all countries hold themselves in readiness, and singers, male and female, are in waiting. Clever jugglers, and funny tumblers also are anxious to exhibit their dexterity and agility.

His Majesty, on such occasions, addresses himself to many of those who have been presented, impressing all with the correctness of his intentions, the unbiasedness of his mind, the humility of his disposition, the magnanimity of his heart, the excellence of his nature, the cheerfulness of his countenance, and the frankness of his manners; his intelligence pervades the whole assembly, and multifarious matters are easily and satisfactorily settled by his truly divine power.

This vale of sorrows is changed to a place of rest: the army and the nation are content. May the empire flourish, and these blessings endure!

ÁÍN 74.

REGULATIONS REGARDING THE KORNISH AND THE TASLÍM.

Superficial observers, correctly enough, look upon a king as the origin of the peace and comfort of the subjects. But men of deeper insight are of opinion that even spiritual progress among a people would be impossible, unless emanating from the king, in whom the light of God dwells; for near the throne, men wipe off the stain of conceit, and build up the arch of true humility.[1]

With the view, then, of promoting this true humility, kings in their wisdom have made regulations for the manner in which people are to shew their obedience. Some kings have adopted the bending down of the head. His Majesty has commanded the palm of the right hand to be placed upon the forehead, and the head to be bent downwards. This mode of salutation, in the language of the present age, is called *kornish*, and signifies that the saluter has placed his head (which is the seat of the senses and the mind) into the hand of humility, giving it to the royal assembly as a present, and has made himself in obedience ready for any service that may be required of him.

The salutation, called *taslím*, consists in placing the back of the right hand on the ground, and then raising it gently till the person stands erect, when he puts the palm of his hand upon the crown of his head, which pleasing manner of saluting signifies that he is ready to give himself as an offering.

His Majesty relates as follows: "One day my royal father bestowed upon me one of his own caps, which I put on. Because the cap of the king was rather large, I had to hold it with my [right] hand, whilst bending my head downwards, and thus performed the manner of salutation (kórnish) above described. The king was pleased with this new method, and from his feeling of propriety ordered this to be the mode of the *kornish* and *taslím*.

Upon taking leave, or presentation, or upon receiving a *mansab*, a *jágír*, or a dress of honour, or an elephant, or a horse, the rule is to make three *taslíms*; but only one on all other occasions, when salaries are paid, or presents are made.

Such a degree of obedience is also shewn by servants to their masters, and looked upon by them as a source of blessings. Hence for the disciples of

---

[1] Hence the presence of the king promotes humility, which is the foundation of all spiritual life. So especially in the case of Akbar, towards whom, as the head of the New Church, the subjects occupy the position of disciples. *Vide* Aín 77, and the Note after it.

His Majesty, it was necessary to add something, *viz.*, prostration[1] (*sijdah*); and they look upon a prostration before His Majesty as a prostration performed before God; for royalty is an emblem of the power of God, and a light-shedding ray from this Sun of the Absolute.

Viewed in this light, the prostration has become acceptable to many, and proved to them a source of blessings upon blessings.

But as some perverse and dark-minded men look upon prostration as blasphemous man-worship, His Majesty, from his practical wisdom, has ordered it to be discontinued by the ignorant, and remitted it to all ranks, forbidding even his private attendants from using it in the *Darbár i 'Ám* (general court-days). However, in the private assembly, when any of those are in waiting, upon whom the star of good fortune shines, and they receive the order of seating themselves, they certainly perform the prostration of gratitude by bowing down their foreheads to the earth, and thus participate in the halo of good fortune.

In this manner, by forbidding the people at large to prostrate, but allowing the Elect to do so, His Majesty fulfills the wishes of both, and shows the world a fitting example of practical wisdom.

ÁÍN 75.

Just as spiritual leadership requires a regulated mind, capable of controlling covetousness and wrath, so does political leadership depend on an external order of things, on the regulation of the difference among men in rank, and the power of liberality. If a king possess a cultivated mind, his position as the spiritual leader of the nation will be in harmony with his temporal office; and the performance of each of his political duties will be equivalent to an adoration of God. Should any one search for an example, I would point to the practice of His Majesty, which will be found to exhibit that happy harmony of motives, the contemplation of which rewards the

---

[1] The prostration, or *sijdah*, is one of the positions at prayer, and is therefore looked upon by all Muhammadans as the exclusive right of God. When Akbar, as the head of his new faith, was treated by his flattering friends, perhaps against his calmer judgment, as the representative of God on earth, he had to allow prostration in the assemblies of the Elect. The people at large would never have submitted. The practice evidently pleased the emperor, because he looked with fondness upon every custom of the ancient Persian kings, at whose courts the προσκυνεῖν had been the usual salutation. "It was *Nizám* of Badakhshán who invented the prostration when the emperor was still at Fathpúr [before 1586]. The success of the innovation made Mullá A'lam of Kábul exclaim, "O that I had been the inventor of this little business!" *Bad.* III, p. 153. Regarding Nizám, or Ghází Khán, *vide* Abulfazl's list of Grandees, IInd book, No. 144. The *sijdah* as an article of Akbar's Divine Religion, will be again referred to in the note to Áín 77.

searcher with an increase of personal knowledge, and leads him to worship this ideal of a king.[1]

When His Majesty seats himself on the throne, all that are present perform the *kornish*, and then remain standing at their places, according to their rank, with their arms crossed,[2] partaking, in the light of his imperial countenance, of the elixir of life, and enjoying everlasting happiness in standing ready for any service.

The eldest prince places himself, when standing, at a distance of one to four yards from the throne, or when sitting, at a distance from two to eight. The second prince stands from one and one-half to six yards from the throne, and in sitting from three to twelve. So also the third; but sometimes he is admitted to a nearer position than the second prince, and at other times both stand together at the same distance. But His Majesty generally places the younger princes affectionately nearer.

Then come the Elect of the highest rank, who are worthy of the spiritual guidance of His Majesty, at a distance of three to fifteen yards, and in sitting from five to twenty. After this follow the senior grandees from three and a half yards, and then the other grandees, from ten or twelve and a half yards from the throne.

All others stand in the *Yasal*.[3] One or two attendants[4] stand nearer than all.

---

[1] The words of the text are ambiguous They may also mean, *and leads him to praise me as the man who directed him towards this example.*

[2] The finger tips of the left hand touch the right elbow, and those of the right hand, the left elbow; or, the fingers of each hand rest against the inner upper arm of the opposite side. The lower arms rest on the *kamarband*. When in this position, a servant is called *ámádah i khidmat*, or ready for service. Sometimes the right foot also is put over the left, the toes of the former merely touching the ground. The shoes are, of course, left outside at the *çaff i ni'ál*. The emperor sits on the throne (*vide* Plate VII.) with crossed legs, or *chahár-zánú*, a position of comfort which Orientals allow to persons of rank. This position, however, is called *fir'aunú nishast*, or Pharaoh's mode of sitting, if assumed by persons of no rank in the presence of strangers. Pharaoh—Orientals mean the Pharaoh of the time of Moses—is proverbial in the East for vain-glory. The position suitable for society is the *duzánú* mode of sitting, *i. e.*, the person first kneels down with his body straight; he then lets the body gently sink till he sits on his heels, the arms being kept extended and the hands resting on the knees.

[3] *Yasal* signifies the wing of an army, and here, the two wings into which the assembly is divided. The place before the throne remains free. One wing was generally occupied by the grandees of the Court, and the chief functionaries; on the other wing stood the *Qur* (*vide* pp. 109, 110), the Mullás and the 'Ulamá, &c.

[4] The servants who hold the *sáibán* Áín 19, or the fans.

Á'ÍN 76.

THE MUSTER OF MEN.

The business which His Majesty daily transacts is most multifarious; hence I shall only describe such affairs as continually recur.

A large number of men are introduced on such days, for which an *Anjuman i Dád o Dihish*, or assembly of expenditure, has been announced. Their merits are enquired into, and the coin of knowledge passes current. Some take a burden from their hearts by expressing a wish to be enrolled among the members of the Divine Faith; others want medicines for their diseases.[1] Some pray His Majesty to remove a religious doubt; others again seek his advice for settling a worldly matter.[2] There is no end to such requests, and I must confine myself to the most necessary cases.

The salaries of a large number of men[3] from Túrán and Irán, Turkey and Europe, Hindustan and Kashmír, are fixed by the proper officers in a manner described below, and the men themselves are taken before His Majesty by the paymasters. Formerly it had been the custom for the men to come with a horse and accoutrements; but now-a-days only men appointed to the post of an Ahadí[4] bring a horse. The salary as proposed by the officers who bring them, is then increased or decreased, though it is generally increased; for the market of His Majesty's liberality is never dull. The number of men brought before His Majesty depends on the number of men available. Every Monday all such horsemen are mustered as were left from the preceding week. With the view of increasing the army and the zeal of the officers, His Majesty gives to each who brings horsemen, a present of two *dáms* for each horseman.

Special *Bitikchís*[5] [writers] introduce in the same manner such as are fit to be Ahadís. In their case, His Majesty always increases the stipulated salary. As it is customary for every Ahadí to buy[6] his own horse, His Majesty has ordered to bring to every muster the horses of any Ahadís that

---

[1] This is to be taken literally. The water on which Akbar breathed, was a universal remedy. *Vide* next Á'ín.

[2] As settling a family-feud, recommending a matrimonial alliance, giving a new-born child a suitable name, &c.

[3] Abulfazl means men who were willing to serve in the several grades of the standing army. The standing army consisted of cavalry, artillery, and rifles. There was no regular Infantry. Men who joined the standing army, in the beginning of Akbar's reign, brought their own horse and accoutrements with them; but as this was found to be the cause of much inefficiency (*vide* Second Book, Á'ín 1), a horse was given to each recruit on joining, for which he was answerable.

[4] As Ahadís drew a higher salary (II, Á'ín 4), they could buy, and maintain, horses of a superior kind.

[5] Á'ín 4 of the second book mentions only one officer appointed to recruit the ranks of Ahadís.

[6] So according to two MSS. My text edition, p. 158, l. 10, has *As it is* not *customary for Ahadís to buy a horse, &c.* Both readings give a sense, though I should prefer the omission of the negative word. According to Á'ín 4, of the second book, an Ahadí was supplied with

may have lately died, which he hands over to the newly appointed Ahadís either as presents, or charging the price to their monthly salaries.

On such occasions, Senior Grandees and other Amírs introduce also any of their friends, for whom they may solicit appointments. His Majesty then fixes the salaries of such candidates according to circumstances; but appointments under fifty rupees *per mensem* are rarely ever solicited in this manner.

Appointments to the Imperial workshops also are made in such assemblies, and the salaries are fixed.

Aín 77.

HIS MAJESTY[1] AS THE SPIRITUAL GUIDE OF THE PEOPLE.

God, the Giver of intellect and the Creator of matter, forms mankind as He pleases, and gives to some comprehensiveness, and to others narrowness of disposition. Hence the origin of two opposite tendencies among men, one class of whom turn to religious (*dín*), and the other class to worldly thoughts (*dunyá*). Each of these two divisions selects different leaders,[2] and mutual repulsiveness grows to open rupture. It is then that men's blindness and silliness appear in their true light; it is then discovered how rarely mutual regard and charity are to be met with.

But have the religious and the worldly tendencies of men no common ground? Is there not everywhere the same enrapturing beauty[3] which beams forth from so many thousand hidden places? Broad indeed is the carpet[4] which God has spread, and beautiful the colours which He has given it.

> The Lover and the Beloved are in reality one;[5]
> Idle talkers speak of the Brahmin as distinct from his idol.

---

a horse when his first horse had died. To such cases the negative phrase would refer. But it *was* customary for Ahadís to bring their own horse on joining; and this is the case which Abulfazl evidently means; for in the whole Aín he speaks of newcomers.

[1] A note will be found at the end of this Aín.

[2] As prophets, the leaders of the Church; and kings, the leaders of the State.

[3] God. He may be worshipped by the meditative, and by the active man. The former speculates on the essence of God, the latter rejoices in the beauty of the world, and does his duty as man. Both represent tendencies apparently antagonistic; but as both strive after God, there is a ground common to both. Hence mankind ought to learn that there is no real antagonism between *dín* and *dunyá*. Let men rally round Akbar, who joins Çufic depth to practical wisdom. By his example, he teaches men how to adore God in doing one's duties; his superhuman knowledge proves that the light of God dwells in him. The surest way of pleasing God is to obey the king.

The reader will do well to compare Abulfazl's preface with this Aín.

[4] The world.

[5] These Çufic lines illustrate the idea that 'the same enrapturing beauty' is everywhere. God is everywhere, in everything: hence everything is God. Thus God, the Beloved, dwells in man,

There is but one lamp in this house, in the rays of which,
Wherever I look, a bright assembly meets me.

One man thinks that by keeping his passions in subjection he worships God; and another finds self-discipline in watching over the destinies of a nation. The religion of thousand others consists in clinging to an idea: they are happy in their sloth and unfitness of judging for themselves. But when the time of reflection comes, and men shake off the prejudices of their education, the threads of the web of religious blindness[1] break, and the eye sees the glory of harmoniousness.

But the ray of such wisdom does not light up every house, nor could every heart bear such knowledge. Again, although some are enlightened, many would observe silence from fear of fanatics, who lust for blood, but look like men. And should any one muster sufficient courage, and openly proclaim his enlightened thoughts, pious simpletons would call him a mad man, and throw him aside as of no account, whilst ill-stared wretches would at once think of heresy and atheism, and go about with the intention of killing him.

Whenever, from lucky circumstances, the time arrives that a nation learns to understand how to worship truth, the people will naturally look to their king, on account of the high position which he occupies, and expect him to be their spiritual leader as well; for a king possesses, independent of men, the ray of Divine wisdom,[2] which banishes from his heart everything that is conflicting. A king will therefore sometimes observe the element of harmony in a multitude of things, or sometimes, reversely, a multitude of things in that which is apparently one; for he sits on the throne of distinction, and is thus equally removed from joy or sorrow.

Now this is the case with the monarch of the present age, and this book is a witness of it.

Men versed in foretelling the future, knew this when His Majesty was born,[3] and together with all others that were cognizant of the secret, they

---

the lover, and both are one. Brahmin = man; the idol = God; lamp = thought of God; house = man's heart. The thoughtful man sees everywhere 'the bright assembly of God's works.'

[1] The text has *taqlíd*, which means *to put a collar on one's own neck*, to follow another blindly, especially in religious matters. "All things which refer to prophetship and revealed religion they [Abulfazl, Hakím Abulfath, &c.] called *taqlídiyát*, *i. e.*, things against reason, because they put the basis of religion upon reason, not testimony. Besides, there came [during A. H. 983, or A. D. 1575] a great number of Portuguese, from whom they likewise picked up doctrines justifiable by reasoning." *Badáoní* II, p. 281.

[2] *Vide* Abulfazl's preface, p. III, l. 19.

[3] This is an allusion to the wonderful event which happened at the birth of the emperor. Akbar spoke. "From Mirzá Sháh Muhammad, called Ghaznín Khán, son of Sháh Begkhán, who had the title of Durrán Khán, and was an Arghún by birth. The author heard him say at Láhor, in A. H. 1053. "I asked Nawáb 'Azíz Kokah, who has the title of Khán i A'zam [*vide* List of

have since been waiting in joyful expectation. His Majesty, however, wisely surrounded himself for a time with a veil, as if he were an outsider, or a stranger to their hopes. But can man counteract the will of God? His Majesty, at first, took all such by surprise as were wedded to the prejudices of the age; but he could not help revealing his intentions: they grew to maturity in spite of him, and are now fully known. He now is the spiritual guide of the nation, and sees in the performance of this duty a means of pleasing God. He has now opened the gate that leads to the right path, and satisfies the thirst of all that wander about panting for truth.

But whether he checks men in their desire of becoming disciples, or admits them at other times, he guides them in each case to the realm of bliss. Many sincere enquirers, from the mere light of his wisdom, or his holy breath, obtain a degree of awakening which other spiritual doctors could not produce by repeated fasting and prayers for forty days. Numbers of those who have renounced the world, as *Sannásis*, *Jogis*, *Serrás*, *Qalandars*, *Hakims*, and *Çufis*, and thousands of such as follow worldly pursuits, as soldiers, tradespeople, mechanics, and husbandmen, have daily their eyes opened to insight, or have the light of their knowledge increased. Men of all nations, young and old, friends and strangers, the far and the near, look upon offering a vow to His Majesty as the means of solving all their difficulties, and bend down in worship on obtaining their desire. Others again, from the distance of their homes, or to avoid the crowds gathering at Court, offer their vows in secret, and pass their lives in grateful praises. But when His Majesty leaves Court, in order to settle the affairs of a province, to conquer a kingdom, or to enjoy the pleasures of the chase, there is not a hamlet, a town, or a city, that does not send forth crowds of men and women with vow-offerings in their hands, and prayers on their lips, touching the ground with their foreheads, praising the efficacy of their vows, or proclaiming the accounts of the spiritual assistance received. Other multitudes ask for lasting bliss, for an upright heart, for advice how best to act, for strength of the body, for enlightenment, for the birth of a son, the reunion of friends, a long life, increase of wealth, elevation in rank, and many other things. His Majesty, who knows what is really good, gives satisfactory answers to every one, and applies remedies to their religious perplexities. Not a day passes but people bring cups of water to him, beseeching him to breathe upon it. He who reads the letters of the divine orders in the book of fate, on seeing the tidings of hope, takes the water with his blessed hands, places

Grandees, second Book, Ain 30], whether the late emperor, like the Messiah, had really spoken with his august mother. He replied, "His mother told me, it was true." *Dabistán ul Mazáhib*, Calcutta Edition, p. 390. Bombay edition, p. 260. The words which Christ spoke in the cradle, are given in the Qorán, Sur. 19, and in the spurious gospel of the *Infancy of Christ*, pp. 5, 111.

it in the rays of the world-illuminating sun, and fulfils the desire of the suppliant. Many sick people[1] of broken hopes, whose diseases the most eminent physicians pronounced incurable, have been restored to health by this divine means.

A more remarkable case is the following. A simple-minded recluse had cut off his tongue, and throwing it towards the threshold of the palace, said, "If that certain blissful thought,[2] which I just now have, has been put into my heart by God, my tongue will get well; for the sincerity of my belief must lead to a happy issue." The day was not ended before he obtained his wish.

Those who are acquainted with the religious knowledge and the piety of His Majesty, will not attach any importance to some of his customs,[3] remarkable as they may appear at first; and those who know His Majesty's charity and love of justice, do not even see any thing remarkable in them. In the magnanimity of his heart, he never thinks of his perfection, though he is the ornament of the world. Hence he even keeps back many who declare themselves willing to become his disciples. He often says, "Why should I claim to guide men, before I myself am guided?" But when a novice bears on his forehead the sign of earnestness of purpose, and he be daily enquiring more and more, His Majesty accepts him, and admits him on a Sunday, when the world-illuminating sun is in its highest splendour. Notwithstanding every strictness and reluctance shewn by His Majesty in admitting novices, there are many thousands, men of all classes, who have cast over their shoulders the mantel of belief, and look upon their conversion to the New Faith as the means of obtaining every blessing.

At the above-mentioned time of everlasting auspiciousness, the novice with his turban in his hands, puts his head on the feet of His Majesty. This is symbolical,[4] and expresses that the novice, guided by good fortune and the assistance of his good star, has cast aside[5] conceit and selfishness,

[1] "He [Akbar] shewed himself every morning at a window, in front of which multitudes came and prostrated themselves; while women brought their sick infants for his benediction, and offered presents on their recovery." From the account of the Goa Missionaries who came to Akbar in 1595, in *Murray's Discoveries in Asia*, II, p. 96.

[2] His thought was this. If Akbar is a prophet, he must, from his supernatural wisdom, find out in what condition I am lying here.

[3] "He [Akbar] shewed, besides, no partiality to the Mahometans; and when in straits for money, would even plunder the mosques to equip his cavalry. Yet there remained in the breast of the monarch a stronghold of idolatry, on which they [the Portuguese Missionaries] could never make any impression. Not only did he adore the sun, and make long prayers to it four times a day; he also held himself forth as an object of worship; and though exceedingly tolerant as to other modes of faith, never would admit of any encroachments on his own divinity." *Murray's Discoveries*, II, p. 95.

[4] The text has *zabán i hál*, and a little lower down, *zabán i bezufáni*. *Zabán i hál*, or *symbolical* language, is opposed to *zabán i maqál*, spoken words.

[5] Or rather, *from his head*, as the text has, because the casting aside of selfish-

the root of so many evils, offers his heart in worship, and now comes to enquire as to the means of obtaining everlasting life. His Majesty, the chosen one of God, then stretches out the hand of favour, raises up the suppliant, and replaces the turban on his head, meaning by these symbolical actions that he has raised up a man of pure intentions, who from seeming existence has now entered into real life. His Majesty then gives the novice the *Shaçt*,[1] upon which is engraved 'the Great Name,'[2] and His Majesty's symbolical motto, '*Alláhu Akbar*.' This teaches the novice the truth that

"*The pure Shaçt and the pure sight never err.*"

Seeing the wonderful habits of His Majesty, his sincere attendants are guided, as circumstances require it; and from the wise counsels they receive, they soon state their wishes openly. They learn to satisfy their thirst in the spring of divine favour, and gain for their wisdom and motives renewed light. Others, according to their capacities are taught wisdom in excellent advices.

But it is impossible while speaking of other matters besides, to give a full account of the manner in which His Majesty teaches wisdom, heals dangerous diseases, and applies remedies for the severest sufferings. Should my occupations allow sufficient leisure, and should another term of life be granted me, it is my intention to lay before the world a separate volume on this subject.

Ordinances of the Divine Faith.

The members of the Divine Faith, on seeing each other, observe the following custom. One says, "*Alláhu Akbar*;" and the other responds, "*Jalla Jaláluhu*."[3] The motive of His Majesty, in laying down this mode

---

ness is symbolically expressed by taking off the turban. To wear a turban is a distinction.

[1] *Shaçt* means *aim;* secondly *any thing round*, either a ring, or a thread, as the Brahminical thread. Here a ring seems to be meant. Or it may be the likeness of the Emperor which, according to Badáoní, the members wore on their turbans.

[2] The *Great Name* is a name of God. "Some say, it is the word *Allah;* others say, it is *çamad*, the eternal; others, *alhayy*, the living; others, *alqayyúm*, the everlasting; others, *arrahmán*, *arrahím*, the clement and merciful; others, *almuhaimin*, the protector. *Ghiás.* "Qází Hamíduddín of Núgor says, the Great Name is the word *Hú*, or He (God), because it has a reference to God's nature, as it shows that He has no other at His side. Again, the word *hú* is a root, not a derivative. All epithets of God are contained in it." *Kashfullughát.*

[3] These formulæ remind of Akbar's name, *Jaláluddín Muhammad Akbar.* The words *Alláhu Akbar* are *ambiguous:* they may mean, *God is great*, or, *Akbar is God.* There is no doubt that Akbar liked the phrase for its ambiguity; for it was used on coins, the Imperial seals, and the heading of books, farmáns, &c. His era was called the *Divine* era; his faith, the *Divine* faith; and the note at the end of this Aín shews how Akbar, starting from the idea of the Divine right of kings, gradually came to look upon himself as the *Mujtahid* of the age, then as the prophet of God and God's Vice regent on earth, and lastly as a Deity. "It was during these days [A. H. 983, or A. D. 1575-76] that His Majesty once asked how people would like it, if he ordered the words *Alláhu Akbar* to be cut on

of salutation, is to remind men to think of the origin of their existence, and to keep the Deity in fresh, lively, and grateful remembrance.

It is also ordered by His Majesty that, instead of the dinner usually given in remembrance of a man after his death, each member should prepare a dinner during his lifetime, and thus gather provisions for his last journey.

Each member is to give a party on the anniversary of his birth-day, and arrange a sumptuous feast. He is to bestow alms, and thus prepare provisions for the long journey.

His Majesty has also ordered that members should endeavour to abstain from eating flesh. They may allow others to eat flesh, without touching it themselves; but during the month of their birth they are not even to approach meat. Nor shall members go near anything that they have themselves slain; nor eat of it. Neither shall they make use of the same vessels with butchers, fishers, and birdcatchers.

Members should not cohabit with pregnant, old, and barren women; nor with girls under the age of puberty.

Note by the Translator on the religious views of the Emperor Akbar.

In connection with the preceding Aín, it may be of interest for the general reader, and of some value for the future historian of Akbar's reign, to collect, in form of a note, the information which we possess regarding the religious views of the Emperor Akbar. The sources from which this information is derived, is, besides Abulfazl's Aín, the *Muntakhab ut Tawárikh* by 'Abdul Qádir ibn i Mulúk Sháh of Badáon —regarding whom I would refer the reader to p. 104, and to a longer article in the Journal of the Asiatic Society of Bengal for 1869—and the *Dabistán ul Mazáhib*[1], a work written about sixty years after Akbar's death by an unknown Muhammadan writer of strong Pársí tendencies. Nor must we forget the valuable testimony of some of the Portuguese Missionaries whom Akbar called from Goa, as Rodolpho Aquaviva,

---

the Imperial seal and the dies of his coins. Most said, people would like it very much. But Háji Ibráhím objected, and said, the phrase had an ambiguous meaning, and the emperor might substitute the Qorán verse *Lazikru Alláhi akbaru* (To think of God is the greatest thing), because it involved no ambiguity. But His Majesty got displeased, and said, it was surely sufficient that no man who felt his weakness, would claim Divinity; he merely looked to the sound of the words, and he had never thought that a thing could be carried to such an extreme." *Badáoní*, p. 210.

[1] Printed at Calcutta in 1809 with a short dictionary, and reprinted at Bombay, A. H. 1272, [A. D. 1856]. This work

Antonio de Monserrato, Francisco Enriques, &c., of whom the first is mentioned by Abulfazl under the name of *Pádrí Radalf*.[1] There exist also two articles on Akbar's religious views, one by Captain Vans Kennedy, published in the second volume of the Transactions of the Bombay Literary Society, and another by the late Horace Hayman Wilson, which had originally appeared in the Calcutta Quarterly Oriental Magazine, Vol. I., 1824, and has been reprinted in the second volume of Wilson's works, London, 1862. Besides, a few extracts from Badáoní, bearing on this subject, will be found in Sir H. Elliott's Bibliographical Index to the Historians of Muhammadan India, p. 243 ff. The Proceedings of the Portuguese Missionaries at Akbar's Court are described in Murray's Historical Account of Discoveries and Travels in Asia, Edinburgh, 1820, Vol. II.

I shall commence with extracts from Badáoní.[2] The translation is literal, which is of great importance in a difficult writer like Badáoní.

Abulfazl's second introduction to Akbar. His pride.

[Badáoní, edited by Maulawí Aghá Ahmad 'Alí, in the Bibliotheca Indica, Vol. II, p. 198.]

"It was during these days [end of 982 A. H.] that Abulfazl, son of Shaikh Mubárik of Nágor, came the second time to court. He is now styled *'Allámí*. He is the man that set the world in flames. He lighted up the lamp of the *Çabáhís*, illustrating thereby the story of the man who, because he did not know what to do, took up a lamp in broad daylight, and representing himself as opposed to all sects, tied the girdle of infallibility round his waist, according to the saying, 'He who forms an opposition, gains power.' He laid before the Emperor a commentary on the *Áyat ul-kursí*,[3]

---

has also been translated into English at the cost of the Oriental Translation Fund.

[1] Not *Padre Radíf*, پادري ردیف, as in Elphinstone's history, but ردلف, the letter (lám) having been mistaken for a ي (*yá*).

[2] As in the following extracts the years of the Hijrah are given, the reader may convert them according to this table:—
The year 980 A. H. commenced 14 May 1572 [Old Style.
981 — 3 May, 1573.
982 — 23 April, 1574.
983 — 12 April, 1575.
984 — 31 March, 1576.
985 — 21 March, 1577.
986 — 10 March, 1578.
987 — 28 February, 1579.
988 — 17 February, 1580.
989 — 5 February, 1581.
990 — 26 January, 1582.
991 — 15 January, 1583.
992 — 4 January, 1584.
993 — 24 December, 1584.
994 — 13 December, 1585.
995 — 2 December, 1586.
996 — 22 November, 1587.
997 — 10 November, 1588.
998 — 31 October, 1589.
999 — 20 October, 1590.
1000 — 9 October, 1591.
1001 — 28 September, 1592.
1002 — 17 September, 1593.
1003 — 6 September, 1594.
1004 — 27 August, 1595.

[3] Qor. Sur. II, 256.

which contained all subtleties of the Qorán; and though people said that it had been written by his father, Abulfazl was much praised. The numerical value of the letters in the words *Tafsír i Akbarí* (Akbar's commentary) gives the date of composition [983]. But the emperor praised it, chiefly because he expected to find in Abulfazl a man capable of teaching the Mullás a lesson, whose pride certainly resembles that of Pharaoh, though this expectation was opposed to the confidence which His Majesty had placed in me.

The reason of Abulfazl's opinionativeness and pretensions to infallibility was this. At the time when it was customary to get hold of, and kill, such as tried to introduce innovations in religious matters (as had been the case with Mír Habshí and others), Shaikh 'Abdunnabí and Makhdúm ul mulk, and other learned men at court, unanimously represented to the emperor that Shaikh Mubarik also, in as far as he pretended to be *Mahdí*[1], belonged to the class of innovators, and was not only himself damned, but led others into damnation. Having obtained a sort of permission to remove him, they despatched police officers, to bring him before the emperor. But when they found that the Shaikh, with his two sons, had concealed himself, they demolished the pulpit in his prayer-room. The Shaikh, at first, took refuge with Salím i Chishtí at Fathpúr, who then was in the height of his glory, and requested him to intercede for him. Shaikh Salím, however, sent him money by some of his disciples, and told him, it would be better for him to go away to Gujrát. Seeing that Salím took no interest in him, Shaikh Mubárik applied to Mírzá 'Azíz Kokah [Akbar's foster-brother], who took occasion to praise to the emperor the Shaikh's learning and voluntary poverty, and the superior talents of his two sons, adding that Mubárik was a most trustworthy man, that he had never received lands as a present, and that he ['Azíz] could really not see why the Shaikh was so much persecuted. The emperor at last gave up all thoughts of killing the Shaikh. In a short time matters took a more favourable turn; and Abulfazl, when once in favor with the emperor, (officious as he was, and time-serving, openly faithless, continually studying His Majesty's whims, a flatterer beyond all bounds) took every opportunity of reviling in the most shameful way that sect whose labours and motives have been so little appreciated,[2] and became the cause not only of the extirpation of these experienced people, but also of the ruin of all servants of God, especially of Shaikhs, pious men, of the helpless, and the orphans, whose livings and grants he cut down.

[1] *Vide* p. 106, Note 6.

[2] Badáoní belonged to the believers in the approach of the Millennium. A few years later, Akbar used Mahdawí rumours for his own purposes; *vide* below. The extract shows that there existed before

He used to say, openly and implicitly,—

O Lord, send down a proof[1] for the people of the world!
Send these Nimrods[2] a gnat as big as an elephant!
These Pharaoh-like fellows have lifted up their heads;
Send them a Moses with a staff, and a Nile!

And when in consequence of his harsh proceedings, miseries and misfortunes broke in upon the 'Ulamás (who had persecuted him and his father), he applied the following Rubá'í to them:—

I have set fire to my barn with my own hands,
As I am the incendiary, how can I complain of my enemy?
No one is my enemy but myself,
Woe is me! I have torn my garment with my own hands.

And when during disputations people quoted against him the edict of any *Mujtahid*[3], he used to say, "Oh don't bring me the arguments of this sweetmeat-seller, and that cobbler, or that tanner!" He thought himself capable of giving the lie to all Shaikhs and 'Ulamás."

Commencement of the Disputations. [Badáoní II, p. 200.]

"During the year 983 A. H., many places of worship were built at the command of His Majesty. The cause was this. For many years previous to 983, the emperor had gained in succession remarkable and decisive victories. The empire had grown in extent from day to day; everything turned out well, and no opponent was left in the whole world. His Majesty had thus leisure to come into nearer contact with ascetics and the disciples of the Mu'íniyyah sect, and passed much of his time in discussing the word of God (Qorán), and the word of the prophet (the *Hadís*, or Tradition). Questions of Çúfism, scientific discussions, enquiries into Philosophy and Law, were the order of the day. His Majesty passed whole nights in thoughts of God; he continually occupied himself with pronouncing the names *Yá hú* and *Yá hádí*, which had been mentioned to him,[4] and his

982, heretical innovators, whom the emperor allowed to be persecuted. Matters soon took a different turn.

[1] That is, a man, capable of teaching the 'Ulamás a lesson. Abulfazl means himself.

[2] Nimrod, or Namrúd, and Pharaoh, are proverbial in the East for their pride. Nimrod was killed by a gnat which had crept through the nose to his brain. He could only relieve his pains by striking the crown of head; but at last he died from the effects of his own blows.

[3] A man of infallible authority in his explanations of the Muhammadan law. There are few Mujtahids. Among the oldest there were several who plied a trade at the same time. The preceding Rubá'í is translated by Sir H. Elliott in the Muhammadan Historians of India, p. 244.

[4] By some ascetic. *Yá hú* means O He (God), and *Ya hádí*, O Guide. The frequent repetition of such names is a means of knowledge. Some faqírs repeat them several thousand times during a night.

heart was full of reverence for Him who is the true Giver. From a feeling of thankfulness for his past successes, he would sit many a morning alone in prayer and melancholy, on a large flat stone of an old building which lay near the palace in a lonely spot, with his head bent over his chest, and gathering the bliss of early hours."

In his religious habits the emperor was confirmed by a story which he had heard of Sulaimán,[1] ruler of Bengal, who, in company with 150 Shaikhs and 'Ulamás, held every morning a devotional meeting, after which he used to transact state business; as also by the news that Mírzá Sulaimán, a prince of Çúfí tendencies, and a *Çáhib i hál*[2] was coming to him from Badakhshán.

Among the religious buildings was a meeting place near a tank called *Anúptaláo*, where Akbar, accompanied by a few courtiers, met the 'Ulamás and lawyers of the realm. The pride of the 'Ulamás, and the heretical (Shí'itic) subjects discussed in this building, caused Mullá Sherí, a poet of Akbar's reign, to compose a poem in which the place was called a temple of Pharaoh and a building of Shaddád (*vide* Qor. Sur. 89). The result to which the discussions led, will be seen from the following extract. [Bad. II, p. 202.]

"For those discussions, which were held every Thursday[3] night, His Majesty invited the Sayyids, Shaikhs, 'Ulamás, and grandees, by turn. But as the guests generally commenced to quarrel about their places, and the order of precedence, His Majesty ordered that the grandees should sit on the east side; the Sayyids on the west side; the 'Ulamás, to the south; and the Shaikhs, to the north. The emperor then used to go from one side to the other, and make his enquiries....., when all at once, one night, 'the vein of the neck of the 'Ulamás of the age swelled up,' and a horrid noise and confusion ensued. His Majesty got very angry at their rude behaviour, and said to me [Badáoní], "In future report any of the 'Ulamás that cannot behave and talks nonsense, and I shall make him leave the hall." I gently said to Açaf Khán, "If I were to carry out this order, most of the 'Ulamás would have to leave," when His Majesty suddenly asked what I had said. On hearing my answer, he was highly pleased, and mentioned my remark to those sitting near him."

---

[1] The edition of Badáoní calls him كرراني *Kararání*. He is sometimes called *Karání*; sometimes, *Karzání*. He reigned in Bengal from 971 to 98[illegible] or A. D. 1563 to 157[illegible].

[2] *Hál* is the state of ecstasy and close union with God, into which Çúfís bring themselves by silent thought, or by pronouncing the name of God.

[3] The text has *Shab i Jum'ah*, the night of Friday; but as Muhammadans commence the day at sunset, it is our *Thursday* night.

Soon after, another row occurred in the presence of the Emperor.

[Bad. II, p. 210.]

"Some people mentioned that Hájí Ibráhím of Sarhind had given a decree, by which he made it legal to wear red and yellow clothes,[1] quoting at the same time a Tradition as his proof. On hearing this, the Chief Justice, in the meeting hall, called him an accursed wretch, abused him, and lifted up his stick, in order to strike him, when the Hájí by some subterfuges managed to get rid of him."

Akbar was now fairly disgusted with the 'Ulamás and lawyers; he never pardoned pride and conceit in a man, and of all kinds of conceit, the conceit of learning was most hateful to him. From now he resolved to vex the principal 'Ulamás; and no sooner had his courtiers discovered this, than they brought all sorts of charges against them.

[Bad. II, p. 203.]

"His Majesty therefore ordered Mauláná 'Abdullah of Sulṭánpúr, who had received the title of *Makhdúm ul mulk*, to come to a meeting, as he wished to annoy him, and appointed Hájí Ibráhím, Shaikh Abulfazl (who had lately come to court, and is at present the infallible authority in all religious matters, and also for the New Religion of His Majesty, and the guide of men to truth, and their leader in general), and several other newcomers, to oppose him. During the discussion, His Majesty took every occasion to interrupt the Mauláná, when he explained anything. When the quibbling and wrangling had reached the highest point, some courtiers, according to an order previously given by His Majesty, commenced to tell rather queer stories of the Mauláná, to whose position one might apply the verse of the Qorán (Sur. XVI, 72), 'And some one of you shall have his life prolonged to a miserable age, &c.' Among other stories, Khán Jahán said that he had heard that Makhdúm ul mulk[2] had given a *fatwa*, that the ordinance of pilgrimage was no longer binding, but even hurtful. When people had asked him the reason of his extraordinary fatwa, he had said, that the two roads to Makkah, through Persia and over Gujrát, were impracticable, because people, in going by land (Persia), had to suffer injuries at the hand of the *Qizilbáshes* (*i. e.*, the Shí'ah inhabitants of Persia), and in going by sea, they had to put up with indignities from the Portuguese, whose ship-tickets had pictures of Mary and Jesus stamped on them. To make use, therefore, of the latter alternative would mean to countenance idolatry; hence both roads were closed up.

[1] As women may use.

[2] This extract as given by Sir H. Elliott on p. 244 conveys a wrong impression. Akbar did not prohibit pilgrimages before 990 A. H.

Khán Jahán also related that the Mauláná had invented a clever trick by which he escaped paying the legal alms upon the wealth which he amassed every year. Towards the end of each year, he used to make over all his stores to his wife, but he took them back before the year had actually run out.[1]

Other tricks also, in comparison with which the tricks of the children of Moses are nothing, and rumours of his meanness and shabbiness, his open cheating and worldliness, and his cruelties said to have been practised on the Shaikhs and the poor of the whole country, but especially on the Aimadárs and other deserving people of the Panjáb,—all came up, one story after the other. His motives, 'which shall be revealed on the day of resurrection' (Qor. LXXXVI, 9), were disclosed; all sorts of stories, calculated to ruin his character and to vilify him, were got up, till it was resolved to force him to go to Makkah.

But when people asked him whether pilgrimage was a duty for a man in his circumstances, he said *No*;[2] for Shaikh 'Abdunnabí had risen to power, whilst the star of the Mauláná was fast sinking."

But a heavier blow was to fall on the 'Ulamás. [Bad. II, p. 207.]

"At one of the above-mentioned meetings, His Majesty asked how many *freeborn* women a man was legally allowed to marry (by *nikáh*). The lawyers answered that four was the limit fixed by the prophet. The emperor thereupon remarked that from the time he had come of age, he had not restricted himself to that number, and in justice to his wives, of whom he had a large number, both freeborn and slaves, he now wanted to know what remedy the law provided for his case. Most expressed their opinions, when the emperor remarked that Shaikh 'Abdunnabí had once told him that one of the Mujtahids had had as many as nine wives. Some of the 'Ulamás present replied that the Mujtahid alluded to was Ibn Abí Laila; and that some had even allowed eighteen from a too literal translation of the Qorán verse (Qor. Sur. IV, 3), "Marry whatever women ye like, two and two,[3] and three and three, and four and four;" but this was improper. His Majesty then sent a message to Shaikh 'Abdunnabí,

[1] Alms are due on every surplus of stock or stores which a Sunní possesses at the end of a year, provided that surplus have been in his possession for a whole year. If the wife, therefore, had the surplus for a part of the year, and the husband took it afterwards back, he escaped the paying of alms.

[2] *I. e.*, he meant to say he was poor, and thus refuted the charges brought against him.

[3] Thus they got 2+2, 3+3, 4+4=18. But the passage is usually translated, 'Marry whatever women ye like, two, or three, or four.' The Mujtahid who took nine unto himself, translated 'two + three + four,' = 9. The question of the emperor was most ticklish, because, if the lawyers adhered to the number four, which they could not well avoid, the *harámzádagí* of Akbar's *freeborn* princesses was acknowledged.

who replied that he had merely wished to point out to Akbar that a difference of opinion existed on this point among lawyers, but that he had not given a *fatwa*, in order to legalize irregular marriage proceedings. This annoyed His Majesty very much. "The Shaikh," he said, "told me at that time a very different thing from what he now tells me." He never forgot this.

After much discussion on this point, the 'Ulamás, having collected every Tradition on the subject, decreed, *first*, that by *Mut'ah* [not by *nikáh*] a man might marry any number of wives he pleased; and *secondly*, that *Mut'ah* marriages were allowed by Imám Málik. The Shí'ahs, as was well known, loved children born in *Mut'ah* wedlock more than those born by *nikáh* wives, contrary to the Sunnís and the Ahl i Jamá'at.

On the latter point also the discussion got rather lively, and I would refer the reader to my work entitled *Najáturrashíd* [*Vide* note 2, p. 104], in which the subject is briefly discussed. But to make things worse, Naqíb Khán fetched a copy of the *Muwaṭṭa* of Imám Málik, and pointed to a Tradition in the book, which the Imám had cited as a proof against the legality of *Mut'ah* marriages.

Another night, Qází Ya'qúb, Shaikh Abulfazl, Hájí Ibráhím, and a few others were invited to meet His Majesty in the house near the *Anúptaláo* tank. Shaikh Abulfazl had been selected as the opponent, and laid before the emperor several traditions regarding *Mut'ah* marriages, which his father (Shaikh Mubárik) had collected, and the discussion commenced. His Majesty then asked me, what my opinion was on this subject. I said, "The conclusion which must be drawn from so many contradictory traditions and sectarian customs, is this:—Imám Málik and the Shí'ahs are unanimous in looking upon *Mut'ah* marriages as legal; Imám Sháfi'í and the Great Imám (Hanífah) look upon *Mut'ah* marriages as illegal. But, should at any time a Qází of the Málikí sect decide that *Mut'ah* is legal, it is legal, according to the common belief, even for Sháfi'ís and Hanafís. Every other opinion on this subject is idle talk." This pleased His Majesty very much."

The unfortunate Shaikh Ya'qúb, however, went on talking about the extent of the authority of a Qází. He tried to shift the ground; but when he saw that he was discomfited, he said, "Very well, I have nothing else to say,—just as His Majesty pleases."

"The emperor then said, "I herewith appoint the Málikí Qází Husain 'Arab as the Qází before whom I lay this case concerning my wives, and you, Ya'qúb, are from to-day suspended." This was immediately obeyed, and Qází Hasan, on the spot, gave a decree which made *Mut'ah* marriages legal.

The veteran lawyers, as Makhdúm ulmulk, Qází Ya'qúb, and others, made very long faces at these proceedings.

This was the commencement of 'their sere and yellow leaf.'

The result was that, a few days later, Maulánâ Jaláluddín of Multán a profound and learned man, whose grant had been transferred, was ordered from Ágrah (to Fathpúr Síkrí,) and appointed Qází of the realm. Qází Ya'qúb was sent to Gaur as District Qází.

From this day henceforth, 'the road of opposition and difference in opinion' lay open, and remained so till His Majesty was appointed Mujtahid of the empire." [Here follows the extract regarding the formula *'Alláhu Akbar*, given on p. 166, note 3.]

[Badáoní II, p. 211.]

"During this year [983], there arrived Hakím Abulfath, Hakím Humáyún (who subsequently changed his name to Humáyún Qulí, and lastly to Hakím Humám,) and Núruddín, who as poet is known under the name of *Qarárí*. They were brothers, and came from Gílán, near the Caspian Sea. The eldest brother, whose manners and address were exceedingly winning, obtained in a short time great ascendancy over the Emperor; he flattered him openly, adapted himself to every change in the religious ideas of His Majesty, or even went in advance of them, and thus became in a short time, a most intimate friend of Akbar.

Soon after there came from Persia Mullá Muhammad of Yazd, who got the nickname of Yazídí, and attaching himself to the emperor, commenced openly to revile the *Çaháhah* (persons who knew Muhammad, except the twelve Imáms), told queer stories about them, and tried hard to make the emperor a Shí'ah. But he was soon left behind by Bír Baṛ—that bastard!—and by Shaikh Abulfazl, and Hakím Abulfath, who successfully turned the emperor from the Islám, and led him to reject inspiration, prophetship, the miracles of the prophet and of the saints, and even the whole law, so that I could no longer bear their company.

At the same time, His Majesty ordered Qází Jaláluddín and several 'Ulamás to write a commentary on the Qorán; but this led to great rows among them.

Deb Chand Rájah Manjholah—that fool—once set the whole court in laughter by saying that Allah after all had great respect for cows, else the cow would not have been mentioned in the first chapter (Súrat ul *baqarah*) of the Qorán.

His Majesty had also the early history of the Islám read out to him, and soon commenced to think less of the *Çaháhah*. Soon after, the observance of the five prayers and the fasts, and the belief in every thing connected with the prophet, were put down as *taqlídí*, or religious blindness,

and man's reason was acknowledged to be the basis of all religion. Portuguese priests also came frequently; and His Majesty enquired into the articles of their belief which are based upon reason."

[Badáoní II, p. 245.]

"In the beginning of the next year [984], when His Majesty was at Dípálpúr in Málwah, Sharíf of Ámul arrived. This apostate had run from country to country, like a dog that has burnt its foot, and turning from one sect to the other, he went on wrangling till he became a perfect heretic. For some time he had studied Çúfic nonsense in the school of Maulána Muhammad Záhid of Balkh, nephew of the great Shaikh Husain of Khwárizm, and had lived with derwishes. But as he had little of a derwish in himself, he talked slander, and was so full of conceit, that they hunted him away. The Maulána also wrote a poem against him, in which the following verse occurs:

There was a heretic, Sharíf by name,
Who talked very big, though of doubtful fame.

In his wanderings he had come to the Dak'hin, where he made himself so notorious, that the king of the Dak'hin wanted to kill him. But he was only put on a donkey and shewn about in the city. Hindustan, however, is a nice large place, where anything is allowed, and no one cares for another, and people go on as they may. He therefore made for Málwah, and settled at a place five *kos* distant from the Imperial camp. Every frivolous and absurd word he spoke, was full of venom, and became the general talk. Many fools, especially Persian heretics, (whom the Islám casts out as people cast out hairs which they find in dough—such heretics are called *Nabaṭis*, and are destined to be the foremost worshippers of Antichrist) gathered round him, and spread, at his order, the rumour that he was the restorer of the Millenium. The sensation was immense. As soon as His Majesty heard of him, he invited him one night to a private audience in a long prayer room, which had been made of cloth, and in which the emperor with his suite used to say the five daily prayers. "Ridiculous in his exterior, ugly in shape, with his neck stooping forward, he performed his obeisance, and stood still with his arms crossed, and you could scarcely see how his blue eye (which colour[1] is a sign of hostility to our prophet) shed lies, falsehood, and hypocrisy. There he stood for a long time, and when he got the order to sit down, he prostrated himself in worship, and sat down *duzánú* (*vide* p. 160, note 2), like an Indian camel. He talked privately to His Majesty; no one dared to draw near them, but I some-

[1] *Chashmi i azraq*. Europeans have blue eyes. The expression is as old as Harírí and the Crusades.

times heard from a distance the word *'ilm* (knowledge) because he spoke pretty loud. He called his silly views 'the truth of truths,' or 'the groundwork of things.'

A fellow ignorant of things external and internal,
From silliness indulging idle talk.
He is immersed in heresies infernal,
And prattles—God forbid!—of truth eternal.

The whole talk of the man was a mere repetition of the ideas of Mahmúd of Basakhwán (a village in Gílán), who lived at the time of Tímúr. Mahmúd had written thirteen treatises of dirty filth, full of such hypocrisy, as no religion or sect would suffer, and containing nothing but *tittál*, which name he had given to the 'science of expressed and implied language.' The chief work of this miserable wretch is entitled *Bahr o Kúzah* (the Ocean and the Jug), and contains such loathsome nonsense, that on listening to it one's ear vomits. How the devil would have laughed into his face, if he had heard it, and how he would have jumped for joy! And this Sharíf—that dirty thief—had also written a collection of nonsense, which he styled *Tarashshukh i Zuhúr*, in which he blindly follows Mír 'Abdulawwal. This book is written in loose, deceptive aphorisms, each commencing with the words *mífarmúdand* (the master said), a queer thing to look at, and a mass of ridiculous, silly nonsense. But notwithstanding his ignorance, according to the proverb, 'Worthies will meet,' he has exerted such an influence on the spirit of the age, and on the people, that he is now [in 1004] a commander of One Thousand, and His Majesty's apostle for Bengal, possessing the four degrees of faith, and calling, as the Lieutenant of the emperor, the faithful to these degrees."

The discussions on Thursday evenings were continued for the next year. In 986, they became more violent, in as far as the elementary principles of the Islám were chosen as subject, whilst formerly the disputations had turned on single points. The 'Ulamás even in the presence of the emperor, often lost their temper, and called each other *Káfirs* or *accursed*.

[Bad. II. p. 255.]

"Makhdúm also wrote a pamphlet against Shaikh 'Abdunnabí, in which he accused him of the murder of Khizr Khán of Shirwán, who was suspected to have reviled the prophet, and of Mír Habshí, whom he had ordered to be killed for heresy. But he also said in the pamphlet that it was wrong to say prayers with 'Abdunnabí, because he had been undutiful towards his father, and was, besides, afflicted with piles. Upon this, Shaikh 'Abdunnabí called Makhdúm a fool, and cursed him. The 'Ulamás now

broke up into two parties, like the Sibṭís and Qibṭís, gathering either round the Shaikh, or round Makhdúm ulmulk; and the heretic innovators used this opportunity, to mislead the emperor by their wicked opinions and aspersions, and turned truth into falsehood, and represented lies as truth.

His Majesty till now [986] *had shewn every sincerity, and was diligently searching for truth. But his education had been much neglected; and surrounded as he was by men of low and heretic principles, he had been forced to doubt the truth of the Islám. Falling from one perplexity into the other, he lost sight of his real object, the search of truth; and when the strong embankment of our clear law and our excellent faith had once been broken through, His Majesty grew colder and colder, till after the short space of five or six years not a trace of Muhammadan feeling was left in his heart. Matters then became very different.*"

[Bad. *II*, *p.* 239.]

"In 984, the news arrived that Sháh Ṭahmásp of Persia had died, and Sháh Ismá'íl II. had succeeded him. The Táríkh of his accession is given in the first letters of the three words دولت, فتح, and ظفر [ظ + ف + د = 984]. Sháh Ismá'íl gave the order that any one who wished to go to Makkah could have his travelling expenses paid from the royal exchequer. Thus thousands of people partook of the spiritual blessing of pilgrimage, whilst here you dare not now [1004] mention that word, and you would expose yourself to capital punishment, if you were to ask leave from court for this purpose."

[Bad. *II*, *p.* 241.]

In 985, the news arrived that Sháh Ismá'íl, son of Sháh Ṭahmásp had been murdered, with the consent of the grandees, by his sister *Parí Ján Khánum*. Mír Haidar, the riddle writer, found the Táríkh of his accession in the words *Shahinsháhi rúi zamín* [984,] 'a king of the face of the earth,' and the Táríkh of his death in *Shahinsháhi zer i zamín* [985,] 'a king below the face of the earth." At that time also there appeared in Persia the great comet which had been visible in India (p. 240), and the consternation was awful, especially as at the same time the Turks conquered Tabríz, Shirwán, and Mázandarán. Sulṭán Muhammad Khudábandah, son of Sháh Ṭahmásp, but by another mother, succeeded; and with him ended the time of reviling and cursing the *Çahábah*.

But the heretical ideas had certainly entered Hindustán from Persia."

---

[1] As Ṭahmásp in his short Memoirs (Pers. Ms. 782, As. Soc. Bengal) gives the word ظل *zil* [930] as the Táríkh of his accession, we have
Ṭahmasp from 930 to 984.
Ismá'íl II. 984 to 985.
Prinsep's Tables (IInd edition, p. 308) give,
Ṭahmasp, 932 to 983,
Ismá'íl II., from 983 to 985.

Bada'oni"s Summary of the reasons which led Akbar to renounce the Islám.

[Bad. *II, p.* 256.]

The following are the principal reasons which led His Majesty from the right path. I shall not give all, but only some, according to the proverb, "That which is small, guides to that which is great, and a sign of fear in a man points him out as the culprit."

The principal reason is the large number of learned men of all denominations and sects that came from various countries to court, and received personal interviews. Night and day people did nothing but enquire and investigate; profound points of science, the subtleties of revelation, the curiosities of history, the wonders of nature, of which large volumes could only give a summary abstract, were ever spoken of. His Majesty collected the opinions of every one, especially of such as were not Muhammadans, retaining whatever he approved of, and rejecting everything which was against his disposition, and ran counter to his wishes. From his earliest childhood to his manhood, and from his manhood to old age, His Majesty has passed through the most various phases, and through all sorts of religious practices and sectarian beliefs, and has collected every thing which people can find in books, with a talent of selection peculiar to him, and a spirit of enquiry opposed to every [Islámitic] principle. Thus a faith based on some elementary principles traced itself on the mirror of his heart, and as the result of all the influences which were brought to bear on His Majesty, there grew, gradually as the outline on a stone, the conviction in his heart that there were sensible men in all religions, and abstemious thinkers, and men endowed with miraculous powers, among all nations. If some true knowledge was thus everywhere to be found, why should truth be confined to one religion, or to a creed like the Islám, which was comparatively new, and scarcely a thousand years old; why should one sect assert what another denies, and why should one claim a preference without having superiority conferred on itself.

Moreover Sumanís[1] and Brahmins managed to get frequent private interviews with His Majesty. As they surpass other learned men in their treatises on morals, and on physical and religious sciences, and reach a high degree in their knowledge of the future, in spiritual power and human perfection, they brought proofs, based on reason and testimony, for the truth of their own, and the fallacies of other religions, and inculcated their

[1] Explained in Arab. Dictionaries as a sect in Sind who believe in the transmigration of souls (*tanásuḫ.*) Akbar, as will be seen from the following, was convinced of the transmigration of souls, and therefore rejected the doctrine of resurrection.

doctrines so firmly, and so skilfully represented things as quite self-evident which require consideration, that no man, by expressing his doubts, could now raise a doubt in His Majesty, even if mountains were to crumble to dust, or the heavens were to tear asunder.

Hence His Majesty cast aside the Islámitic revelations regarding resurrection, the day of judgment, and the details connected with it, as also all ordinances based on the tradition of our prophet. He listened to every abuse which the courtiers heaped on our glorious and pure faith, which can be so easily followed; and eagerly seizing such opportunities, he shewed in words and gestures, his satisfaction at the treatment which his original religion received at their hands.

How wise was the advice which the guardian gave a lovely being,

"Do not smile at every face, as the rose does at every zephyr." [1]
When it was too late to profit by the lesson,
She could but frown, and hang down the head.

For some time His Majesty called a Brahmin, whose name was Puzukhotam, author of a commentary on the ..,[2] whom he asked to invent particular Sanscrit names for all things in existence. At other times, a Brahmin of the name of Debí was pulled up the wall of the castle,[3] sitting on a *chárpái*, till he arrived near a balcony where the emperor used to sleep. Whilst thus suspended, he instructed His Majesty in the secrets and legends of Hinduism, in the manner of worshipping idols, the fire, the sun and stars, and of revering the chief gods of these unbelievers, as Brahma, Mahádev, Bishn, Kishn, Rám, and Mahámáí, who are supposed to have been men, but very likely never existed, though some, in their idle belief, look upon them as gods, and others as angels. His Majesty, on hearing further how much the people of the country prized their institutions, commenced to look upon them with affection. The doctrine of the transmigration of souls especially took a deep root in his heart, and he approved of the saying, —"There is no religion in which the doctrine of transmigration has not taken firm root." Insincere flatterers composed treatises, in order to fix the evidence for this doctrine; and as His Majesty relished enquiries into the sects of these infidels (who cannot be counted, so numerous they are, and who have no end of revealed books, but nevertheless, do not belong to the *Ahl i Kitáb* (Jews, Christians, and Muhammadans), not a day passed, but a new fruit of this loathsome tree ripened into existence.

---

[1] Just as Akbar liked the zephyr of enquiry into other religious systems. But zephyrs are also destructive: they scatter the petals of the rose.

[2] The text has a few unintelligible words.

[3] Perhaps in order not to get polluted, or because the balcony belonged to the Harem.

Sometimes again, it was *Shaikh Tájuddín* of Dihlí, who had to attend the emperor. This Shaikh is the son of Shaikh Zakariyá of Ajodhan. The principal 'Ulamás of the age call him *Táju'árifín*, or crown of the Çúfís. He had learned under Shaikh Zamán of Pánípat, author of a commentary on the Lawáih, and of other very excellent works, was in Çúfism and pantheism second only to Shaikh Ibn 'Arabí, and had written a comprehensive commentary on the *Nuzhat ularwáh*. Like the preceding he was drawn up the wall of the castle. His Majesty listened whole nights to his Çúfic trifles. As the Shaikh was not overstrict[1] in acting according to our religious law, he spoke a great deal of the pantheistic presence, which idle Çúfís will talk about, and which generally leads them to denial of the law and open heresy. He also introduced polemic matters, as the ultimate salvation by faith of Pharaoh—God's curse be upon him!—which is mentioned in the *Fuçúç ulhikam*,[2] or the excellence of hope over fear,[3] and many other things to which men incline from weakness of disposition, unmindful of cogent reasons, or distinct religious commands, to the contrary. The Shaikh is therefore one of the principal culprits, who weakened His Majesty's faith in the orders of our religion. He also said that infidels would, of course, be kept for ever in hell, but it was not likely, nor could it be proved, that the punishment in hell was eternal. His explanations of some verses of the Qorán, or of the Tradition of our prophet, were often far-fetched. Besides, he mentioned that the phrase *'Insán i kámil* (perfect man) referred to the ruler of the age, from which he inferred that the nature of a king was holy. In this way, he said many agreeable things to the emperor, rarely expressing the proper meaning, but rather the opposite of what he knew to be correct. Even the *sijdah* (prostration), which people mildly call *zamínbos* (kissing the ground,) he allowed to be due to the Insán i Kámil; he looked upon the respect due to the king as a religious command, and called the face of the king *Ka'bah i Murádát*, the sanctum of desires, and *Qiblah i Háját*, the cynosure of necessities. Such blasphemies[4] other people supported by quoting stories of no credit, and by referring to the practice followed by disciples of some heads of Indian

[1] As long as a Çúfí conforms to the Qorán, he is *shar'í*; but when he feels that he has drawn nearer to God, and does no longer require the ordinances of the *profanum vulgus*, he is *ázád*, free, and becomes a heretic.

[2] Pharaoh claimed divinity, and is therefore *mal'ún*, accursed by God. But according to some books, and among them the Fuçúç, Pharaoh repented in the moment of death, and acknowledged Moses a true prophet.

[3] The Islám says, *Álámán baina-l khaufi warrijá*, 'Faith stands *between* fear and hope.' Hence it is sin to fear God's wrath more than to hope for God's mercy; and so reversely.

[4] As the *zamínbos*, or the use of holy names as *Ka'bah* (the temple at Makkah) or *qiblah* (Makkah, in as far as people turn to it their face when praying).

sects. And after this, when....[1]

Other great philosophical writers of the age also expressed opinions, for which there is no authority. Thus Shaikh Ya'qúb of Kashmír, a well known writer, and at present the greatest authority in religious matters, mentioned some opinions held by 'Ain ulquzát of Hamadán, that our prophet Muhammad was a personification of the divine name of *Alhádi* (the guide), and the devil was the personification of God's name of *Almuzill* (the tempter),[2] that both names, thus personified, had appeared in this world, and that both personifications were therefore necessary.

Mullá Muhammad of Yazd, too, was drawn up the wall of the castle, and uttered unworthy, loathsome abuse against the first three Khalífahs, called the whole Çahábah, their followers and next followers, and the saints of past ages, infidels and adulterers, slandered the Sunnís and the *Ahl i Jamá'at*,[3] and represented every sect, except the Shí'ah, as damned and leading men into damnation.

The differences among the 'Ulamás, of whom one called lawful what the other called unlawful, furnished His Majesty with another reason for apostacy. The emperor also believed that the 'Ulamás of his time were superior in dignity and rank to Imám i Ghazzálí and Imám i Rází,[4] and knowing from experience the flimsiness of his 'Ulamás, he judged those great men of the past by his contemporaries, and threw them aside.

Learned monks also came from Europe, who go by the name of *Pádre*.[5] They have an infallible head, called *Pápá*. He can change any religious ordinances as he may think advisable, and kings have to submit to his authority. These monks brought the gospel, and mentioned to the emperor their proofs for the Trinity. His Majesty firmly believed in the truth of the Christian religion, and wishing to spread the doctrines of Jesus, ordered Prince Murád[6] to take a few lessons in Christianity by way of auspicious-

[1] The text has an unintelligible sentence.

[2] According to the Islám, God leads (*hádí*) men to salvation, but also to sin and damnation. God created also wickedness.

[3] *Ahl i jamá'at* is a term which is often joined with the word *Sunnís*. All religious ordinances are either based upon the Qorán; or upon the Tradition; or upon the opinion (*qiás*) of famous Çahábís; or lastly, upon *ijmá'*, agreement, or the custom generally followed during the first century of the Hijrah. Hence *Ahl i jamá'at* comprises all such as believe *ijmá'* binding.

[4] Two famous authorities in religious matters. The most popular books of *Imám Ghazzálí* are the *Ihyá ul'ulúm*, and the *Kimiyá i Sa'ádat*, which, according to p. 103, was one of the few books which Abkar liked.

[5] The text has پادهری.

[6] Prince Murád was then about eight years old. Jahángír (Salím) was born on Wednesday, the 17 Rabí'ulawwal 977. Three months after him, his sister *Shahzádah Khánum* was born; and after her (perhaps in year the 978) *Sháh Murád*, who got the nickname of *Pahárí*, as he was born in the hills of Fathpúr Síkrí. Dánjál was born in Ajmír during the night between Tuesday and Wednesday, the 10th the Jumádalawwal 979.

ness, and charged Abulfazl to translate the Gospel. Instead of the usual *Bismilláh-irrahmán-irrahím*,[1] the following lines were used—

Ai nám i tu Jesus o Kiristo

(O thou whose names are Jesus and Christ)

which means, 'O thou whose name is gracious and blessed;' and Shaikh Faizí added another half, in order to complete the verse

Subhánaka lá siwáka Yá hú.

(We praise Thee, there is no one besides Thee, O God!)

These accursed monks applied the description of cursed Satan, and of his qualities, to Muhammad, the best of all prophets—God's blessings rest on him and his whole house!—a thing which even devils would not do.

Bír Bar also impressed upon the emperor that the sun was the primary origin of every thing. The ripening of the grain on the fields, of fruits and vegetables, the illumination of the universe, and the lives of men, depended upon the Sun. Hence it was but proper to worship and reverence this luminary; and people in praying should face towards the place where he rises, instead of turning to the quarter where he sets. For similar reasons, said Bír Bar, should men pay regard to fire and water, stones, trees, and other forms of existence, even to cows and their dung, to the mark on the forehead and the Brahminical thread.

Philosophers and learned men who had been at Court, but were in disgrace, made themselves busy in bringing proofs. They said, the sun was 'the greatest light,' the source of benefit for the whole world, the nourisher of kings, and the origin of royal power.

This was also the cause why the Naurúz i Jaláli[2] was observed, on which day, since His Majesty's accession, a great feast was given. His Majesty also adopted different suits of clothes of seven different colours, each of which was worn on a particular day of the week in honor of the seven colours of the seven planets.

The emperor also learned from some Hindus formulæ, to reduce the influence of the sun to his subjection, and commenced to read them mornings and evenings as a religious exercise. He also believed that it was wrong to kill cows, which the Hindus worship; he looked upon cow-dung as pure, interdicted the use of beef, and killed beautiful men (?)

---

[1] The formula '*Bismilláh*, &c.' is said by every schoolboy before he commences to read from his text book.

The words *Ai nám i tu Jesus o Kiristo* are taken from the Dabistán; the edition of Badáoní has *Ai námí wai zhazho Kiristo*, which, though correct in metre (*vide* my 'Prosody of the Persians, p. 33, No. 32,) is improbable. The formula as given in the Dabistán has a common Masnawí metre, (*vide* my 'Prosody,' p. 33, No. 31), and spells *Jesus* دیزز *dezuz*. The verse as given by H. Wilson (Works II, p. 387) has no metre.

[2] *Vide* the *Táríkh i Mulkí*, in the beginning of Book III.

instead of cows. The doctors confirmed the emperor in his opinion, and told him, it was written in their books that beef was productive of all sorts of diseases, and was very indigestible.

Fire-worshippers also had come from Nausárí in Gujrát, and proved to His Majesty the truth of Zoroaster's doctrines. They called fire-worship 'the great worship,' and impressed the emperor so favorably, that he learned from them the religious terms and rites of the old Pársís, and ordered Abulfazl to make arrangements, that sacred fire should be kept burning at court by day and by night, according to the custom of the ancient Persian kings, in whose fire-temples it had been continually burning; for fire was one of the manifestations of God, and 'a ray of His rays.'

His Majesty, from his youth, had also been accustomed to celebrate the *Hom* (a kind of fire-worship), from his affection towards the Hindu princesses of his Harem.

From the New Year's day of the twenty-fifth year of his reign [988], His Majesty openly worshipped the sun and the fire by prostrations; and the courtiers were ordered to rise, when the candles and lamps were lighted in the palace. On the festival of the eighth day of Virgo, he put on the mark on the forehead, like a Hindu, and appeared in the Audience Hall, when several Brahmins tied, by way of auspiciousness, a string with jewels on it round his hands, whilst the grandees countenanced these proceedings by bringing, according to their circumstances, pearls and jewels as presents. The custom of Rák'hí (or tying pieces of clothes round the wrists as amulets) became quite common.

When orders, in opposition to the Islám, were quoted by people of other religions, they were looked upon by His Majesty as convincing, whilst Hinduism is in reality a religion, in which every order is nonsense. The Originator of our belief, the Arabian Saints, all were said to be adulterers, and highway robbers, and all the Muhammadans were declared worthy of reproof, till at length His Majesty belonged to those of whom the Qorán says (Sur. 61, 8:) "They seek to extinguish God's light with their mouths: but God will perfect his light, though the infidels be averse thereto." In fact matters went so far, that proofs were no longer required, when anything connected with the Islám was to be abolished."

Akbar publicly assumes the spiritual leadership of the nation.

[Bad. II, p. 268.]

In this year [987], His Majesty was anxious to unite in his person the powers of the state and those of the Church; for he could not bear to be subordinate to any one. As he had heard that the prophet, his lawful successors, and some of the most powerful kings, as Amír Timúr Çáhibqirán, and Mírzá Ulugh Beg i Gurgán, and several others, had

themselves read the *Khuṭbah* (the Friday prayer), he resolved to do the same, apparently in order to imitate their example, but in reality to appear in public as the Mujtahid of the age. Accordingly, on Friday, the first Jumáda-lawwal 987, in the Jámi' Masjid of Fathpúr, which he had built near the palace, His Majesty commenced to read the Khuṭbah. But all at once he stammered and trembled, and though assisted by others, he could scarcely read three verses of a poem, which Shaikh Faizí had composed, came quickly down from the pulpit, and handed over the duties of the Imám (leader of the prayer) to Háfiz Muhammad Amín, the Court *Khaṭíb*. These are the verses—

The Lord has given me the empire,
And a wise heart, and a strong arm,
He has guided me in righteousness and justice,
And has removed from my thoughts everything but justice.
His praise surpasses man's understanding,
Great is His power, Alláhu Akbar!"

[*p.* 269.]

"As it was quite customary in those days to speak ill of the doctrine and orders of the Qorán, and as Hindu wretches and Hinduizing Muhammadans openly reviled our prophet, irreligious writers left out in the prefaces to their books the customary praise of the prophet, and after saying something to the praise of God, wrote eulogies of the emperor instead.[1] It was impossible even to mention the name of the prophet, because these liars (as Abulfazl, Faizí, &c.) did not like it. This wicked innovation gave general offence, and sowed the seed of evil throughout the country;[2] but notwithstanding this, a lot of low and mean fellows put piously on their necks the collar of the Divine Faith, and called themselves disciples, either from fear, or hope of promotion, though they thought it impossible to say our creed."

[*p.* 270 *to* 272.]

"In the same year [987], a document made its appearance, which bore the signatures and seals of Makhdúm ulmulk, of Shaikh 'Abdunnabí, çadruççudúr, of Qází Jaláluddín of Multán, Qázílquzát, of Çadr Juhán, the muftí of the empire, of Shaikh Mubárik, the deepest writer of the age, and of Ghází Khán of Badakhshán, who stood unrivalled in the various sciences.

[1] As Abulfazl has done in the Áín. 'But Faizí added the usúal praise of the prophet (*na't*) to his *Nal Daman*, a short time before his death, at the pressing request of some friends.' *Badáoní.*

[2] Because books were sure to be copied; hence many would see the innovation and imitate it. As the formula '*Bismi'lláh, &c.*' had been changed to *Alláhu Akbar*, we also find *Alláhu Akbar* in the heading of books, as in the Áín.

The object of the document was to settle the superiority of the *Imám i 'ádil* (just leader) over the *Mujtahid*, which was proved by a reference to an ill-supported authority. The whole matter is a question, regarding which people differ in opinion; but the document was to do away with the possibility of disagreeing about laws, whether political or religious, and was to bind the lawyers in spite of themselves. But before the instrument was signed, a long discussion took place as to the meaning of *ijtihád*, and as to whom the term *Mujtahid* was applicable, and whether it really was the duty of a just Imám who, from his acquaintance with politics, holds a higher rank than the Mujtahid, to decide, according to the requirements of the times, and the wants of the age, all such legal questions on which there existed a difference of opinion. At last, however, all signed the document, some willingly, others against their convictions.

I shall copy the document *verbatim*.

The Document.

'Whereas Hindústán has now become the centre of security and peace, and the land of justice and beneficence, a large number of people, especially learned men and lawyers, have immigrated and chosen this country for their home. Now we, the principal 'Ulamás, who are not only well versed in the several departments of the law and in the principles of jurisprudence, and well-acquainted with the edicts which rest on reason or testimony, but are also known for our piety and honest intentions, have duly considered the deep meaning, *first*, of the verse of the Qórán (Sur. IV, 62,) "*Obey God, and obey the prophet, and those who have authority among you*," and *secondly*, of the genuine tradition, "*Surely, the man who is dearest to God on the day of judgment, is the Imám i 'Ádil: whosoever obeys the Amír, obeys Me; and whosoever rebels against him, rebels against Me*," and *thirdly*, of several other proofs based on reasoning or testimony; and we have agreed that the rank of a *Sulṭán i 'Ádil* (a just ruler) is higher in the eyes of God than the rank of a *Mujtahid*. Further we declare that the king of the Islám, Amír of the Faithful, shadow of God in the world, *Abul Fath Jaláluddín Muhammad Akbar Pádisháh i ghází*, whose kingdom God perpetuate, is a most just, a most wise, and a most God-fearing king. Should therefore, in future, a religious question come up, regarding which the opinions of the Mujtahids are at variance, and His Majesty, in his penetrating understanding and clear wisdom, be inclined to adopt, for the benefit of the nation and as a political expedient, any of the conflicting opinions which exist on that point, and issue a decree to that effect, we do hereby agree that such a decree shall be binding on us and on the whole nation.

Further, we declare that, should His Majesty think fit to issue a new order, we and the nation shall likewise be bound by it, provided always that such an order be not only in accordance with some verse of the Qorán, but also of real benefit for the nation; and further, that any opposition on the part of the subjects to such an order as passed by His Majesty, shall involve damnation in the world to come, and loss of religion and property in this life.

This document has been written with honest intentions, for the glory of God, and the propagation of the Islám, and is signed by us, the principal 'Ulamás and lawyers, in the month of Rajab of the year 987 of the Hijrah.'

The draft of this document when presented to the emperor, was in the handwriting of Shaikh Mubárik. The others had signed it against their will, but the Shaikh had added at the bottom that he had most willingly signed his name; for this was a matter, which, for several years, he had been anxiously looking forward to.

No sooner had His Majesty obtained this legal instrument, than the road of deciding any religious question was open; the superiority of intellect of the Imám was established, and opposition was rendered impossible. All orders regarding things which our law allows or disallows, were abolished, and the superiority of intellect of the Imám became law.

But the state of Shaikh Abulfazl resembled that of the poet *Hairatí* of Samarqand,[1] who after having been annoyed by the cool and sober people of Máwaral-nahr (Turkistán), joined the old foxes of Shí'itic Persia, and chose 'the roadless road.' You might apply the proverb to him, 'He prefers hell to shame on earth.'

On the 16th Rajab of this year, His Majesty made a pilgrimage to Ajmír. It is now fourteen years that His Majesty has not returned to that place. On the 5th Sha'bán, at the distance of five *kos* from the town, the emperor alighted, and went on foot to the tomb of the saint (Mu'ínuddín). But sensible people smiled, and said, it was strange that His Majesty should have such a faith in the Khwájah of Ajmír, whilst he rejected the foundation of everything, our prophet, from whose 'skirt' hundreds of thousands of saints of the highest degree had sprung."

[*p.* 273.]

"After Makhdúm ulmulk and Shaikh 'Abdunnabí had left for Makkah (987), the emperor examined people about the creation of the Qorán, elicited

[1] The birthplace of the poet *Hairatí* is not exactly known, though he belongs to Turkistán. It is said that he was a great wine-bibber, and travelled about in search of places where wine-drinking was connived at. At last he settled at Káshán, and became a Shí'ah. He was murdered there by a robber in 961.

their belief, or otherwise, in revelation, and raised doubts in them regarding all things connected with the prophet and the imáms. He distinctly denied the existence of *Jins*, of angels, and of all other beings of the invisible world, as well as the miracles of the prophet and the saints; he rejected the successive testimony of the witnesses of our faith, the proofs for the truths of the Qorán as far as they agree with man's reason, the existence of the soul after the dissolution of the body, and future rewards and punishments in as far as they differed from metempsychosis.

Some copies of the Qorán, and a few old graves
Are left as witnesses for these blind men.
The graves, unfortunately, are all silent,
And no one searches for truth in the Qorán.

An *'Íd* has come again, and bright days will come—like the face of the bride.
And the cupbearer will again put wine into the jar—red like blood.
The reins of prayer and the muzzle of fasting—once more
Will fall from these asses—alas, alas![1]

His Majesty had now determined publicly to use the formula, 'There is no God but God, and Akbar is God's representative.' But as this led to commotions, he thought better of it, and restricted the use of the formula to a few people in the Harem. People expressed the date of this event by the words *fitnahái ummat*, the ruin of the Church (987). The emperor tried hard to convert Quṭbuddín Muhammad Khán and Shahbáz Khán (*vide* List of grandees, IId book, Nos. 28 and 80), and several others. But they staunchly objected. Quṭbuddín said, "What would the kings of the West, as the Sulṭán of Constantinople, say, if he heard all this. Our faith is the same, whether a man hold high or broad views." His Majesty then asked him, if he was in India on a secret mission from Constantinople, as he shewed so much opposition; or if he wished to keep a small place warm for himself, should he once go away from India, and be a respectable man there: he might go at once. Shahbáz got excited, and took a part in the conversation; and when Bír Baṛ—that hellish dog—made a sneering remark at our religion, Shahbáz abused him roundly, and said, "You cursed infidel, do you talk in this manner? It would not take me long to settle you." It got quite uncomfortable, when His Majesty said to Shahbáz in particular, and to the others in general, "Would that a shoefull of excrements were thrown into your faces."

---

[1] Badáoní bewails the blindness of Akbar, Abulfazl, &c., who threw away the means of grace of the Islám (prayers, fasts).

[*p.* 276.]

"In this year the *Tamghá* (inland tolls) and the *Jazyah* (tax on infidels), which brought in several krors of *dáms*, were abolished, and edicts to this effect were sent over the whole empire."

In the same year a rebellion broke out at Jaunpúr, headed by Muhammad Ma'çúm of Kábul, Muhammad Ma'çúm Khán, Mu'izzul Mulk, 'Arab Bahádur, and other grandees. They objected to Akbar's innovations in religious matters, in as far as these innovations led to a withdrawal of grants of rent-free land. The rebels had consulted Mullá Muhammad of Yazd (*vide* above, pp. 175, 182), who was Qází-lquzát at Jaunpúr; and on obtaining his opinion that, under the circumstances, rebellion against the king of the land was lawful, they seized some tracts of land, and collected a large army. The course which this rebellion took, is known from general histories; *vide* Elphinstone, p. 511. Mullá Muhammad of Yazd, and Mu'izzulmulk, in the beginning of the rebellion, were called by the emperor to Ágrah, and drowned, on the road, at the command of the emperor, in the Jamnah.

In the same year the principal 'Ulamás, as Makhdúm ul mulk, Shaikh Munawwar, Mullá 'Abdushshukúr, &c., were sent as exiles to distant provinces.

[*p.* 278.]

"Hájí Ibráhím of Sarhind (*vide* above, p. 105) brought to court an old, worm-eaten MS. in queer characters, which, as he pretended, was written by Shaikh Ibn 'Arabí. In this book, it was said that the *Çáhib i Zamán*[1] was to have many wives, and that he would shave his beard. Some of the characteristics mentioned in the book as belonging to him, were found to agree with the usages of His Majesty. He also brought a fabricated tradition that the son of a *Çahábí* (one who knew Muhammad) had once come before the prophet with his beard cut off, when the prophet had said that the inhabitants of Paradise looked like that young man. But as the Hájí during discussions, behaved impudently towards Abulfazl, Hakím Abulfath, and Sháh Fathullah, he was sent to Rantanbhúr, where he died in 994.

Farmáns were also sent to the leading Shaikhs and 'Ulamás of the various districts to come to Court, as His Majesty wished personally to enquire into their grants (*vide* IId book, Áín 19) and their manner of living. When they came, the emperor examined them singly, giving

[1] *Çáhib i Zamán*, or 'Man of the Period,' is a title frequently given to Imám Mahdí.

them private interviews, and assigned to them some lands, as he thought fit. But when he got hold of one who had disciples, or held spiritual soirées, or practised similar tricks, he confined them in forts, or exiled them to Bengal or Bhakkar. This practice become quite common.*** The poor Shaikhs who were, moreover, left to the mercies of Hindu Financial Secretaries, forgot in exile their spiritual soirées, and had no other place where to live, except mouseholes."

[*p.* 288.]

"In this year (988) low and mean fellows, who pretended to be learned, but were in reality fools, collected evidences that His Majesty was the *Çáhib i Zamán*, who would remove all differences of opinion among the seventy-two sects of the Islám. Sharíf of Ámul brought proofs from the writings of Mahmúd of Basakhwán (*vide* above, p. 177), who had said that, in 990, a man would rise up who would do away with all that was wrong***.[1] And Khwájah Mauláná of Shíráz, the heretic of Jafrdán, came with a pamphlet by some of the Sharífs of Makkah, in which a tradition was quoted that the earth would exist for 7,000 years, and as that time was now over, the promised appearance of Imám Mahdí would immediately take place. The Mauláná also brought a pamphlet written by himself on the subject. The Shí'ahs mentioned similar nonsense connected with 'Alí, and some quoted the following Rubá'í, which is said to have been composed by Náçir i Khusrau,[2] or, according to some, by another poet:—

In 989, according to the decree of fate,
The stars from all sides shall meet together.
In the year of Leo, the month of Leo, and on the day of Leo,
The Lion of God will stand forth from behind the veil.

All this made His Majesty the more inclined to claim the dignity of a prophet, perhaps I should say, the dignity of something else."[3]

[*p.* 291.]

"At one of the meetings, the emperor asked those who were present, to mention each the name of man who could be considered the wisest man of the age; but they should not mention kings, as they formed an exception. Each then mentioned that man in whom he had confidence. Thus Hakím Humám (*vide* above, p. 175) mentioned himself, and Shaikh Abulfazl his own father.

---

[1] The text here does not give a clear meaning.

[2] A Persian poet of the fifth century of the Hijrah. As he was a free-thinker and Shí'ah, his poems were much read at the time of Akbar. The *Farhang i Jahángírí* is full of verses from the works of this ancient poet.

[3] God.

During this time, the four degrees of faith in His Majesty were defined. The four degrees consisted in readiness to sacrifice to the Emperor property, life, honor, and religion. Whoever had sacrificed these four things, possessed four degrees; and whoever had sacrificed one of these four, possessed one degree.

All the courtiers now put their names down as faithful disciples of the throne."

[*p.* 299.]

"At this time (end of 989), His Majesty sent Shaikh Jamál Bakhtyár to bring Shaikh Quṭbuddín of Jalesar who, though a wicked man, pretended to be 'attracted by God.' When Quṭbuddín came, the emperor brought him to a conference with some Christian priests, and rationalists, and some other great authorities of the age. After a discussion, the Shaikh exclaimed, 'Let us make a great fire, and in the presence of His Majesty I shall pass through it. And if any one else gets safely through, he proves by it the truth of his religion." The fire was made. The Shaikh pulled one of the Christian priests by the coat, and said to him, "Come on, in the name of God!" But none of the priests had the courage to go.

Soon after the Shaikh was sent into exile to Bhakkar, together with other faqírs, as His Majesty was jealous of his triumph.

A large number of Shaikhs and Faqírs were also sent to other places, mostly to Qandahár, where they were exchanged for horses. About the same time, the emperor captured a sect consisting of Shaikhs and disciples, and known under the name of *Iláhís*. They professed all sorts of nonsense, and practised deceits. His Majesty asked them whether they repented of their vanities. They replied, "Repentance is our Maid." And so they had invented similar names for the laws and religious commands of the Islám, and for the fast. At the command of His Majesty, they were sent to Bhakkar and Qandahár, and were given to merchants in exchange for Turkish colts."

[*p.* 301.]

"His Majesty was now (990) convinced that the Millennium of the Islámitic dispensation was drawing near. No obstacle, therefore, remained to promulgating the designs which he had planned in secret. The Shaikhs and 'Ulamás who, on account of their obstinacy and pride, had to be entirely discarded, were gone, and His Majesty was free to disprove the orders and principles of the Islám, and to ruin the faith of the nation by making new and absurd regulations. The first order which was passed was, that the coinage should shew the era of the Millennium, and that a history of the one thousand years should be written, but commencing from the death

of the prophet. Other extraordinary innovations were devised as political expedients, and such orders were given that one's senses got quite perplexed. Thus the *sijdah*, or prostration, was ordered to be performed as being proper for kings; but instead of *sijdah*, the word *zamínbos* was used. Wine also was allowed, if used for strengthening the body, as recommended by doctors; but no mischief or impropriety was to result from the use of it, and strict punishments were laid down for drunkenness, or gatherings, and uproars. For the sake of keeping everything within proper limits, His Majesty established a wine-shop near the palace, and put the wife of the porter in charge of it, as she belonged to the caste of wine-sellers. The price of wine was fixed by regulations, and any sick persons could obtain wine on sending his own name and the names of his father and grandfather to the clerk of the shop. Of course, people sent in fictitious names, and got supplies of wine; for who could strictly enquire into such a matter? It was in fact nothing else but licensing a shop for drunkards. Some people even said that pork formed a component part of this wine! Notwithstanding all restrictions, much mischief was done, and though a large number of people were daily punished, there was no sufficient check.

Similarly, according to the proverb,[1] 'Upset, but don't spill,' the prostitutes of the realm (who had collected at the capital, and could scarcely be counted, so large was their number), had a separate quarter of the town assigned to them, which was called *Shaiṭánpúrah*, or Devilsville. A Dárogah and a clerk also were appointed for it, who registered the names of such as went to prostitutes, or wanted to take some of them to their houses. People might indulge in such connexions, provided the toll collectors knew of it. But without permission, no one was allowed to take dancing girls to his house. If any wellknown courtier wanted to have a virgin, they should first apply to His Majesty, and get his permission. In the same way, boys prostituted themselves, and drunkenness and ignorance soon led to bloodshed. Though in some cases capital punishment was inflicted, certain privileged courtiers walked about proudly and insolently doing what they liked.

His Majesty himself called some of the principal prostitutes and asked them who had deprived them of their virginity. After hearing their replies, some of the principal and most renowned grandees were punished or censured, or confined for a long time in fortresses. Among them, His Majesty came across one whose name was Rájah Bír Baṛ, a member of the Divine Faith,

---

[1] *Kaj dár o maríz*, which is impossible. Akbar's order was well meant; but according to Badáoní, his Act of Segregation was unpractical. The passage is remarkable, as it shews the open profligacy among the Grandees, which annoyed Akbar very much. For another instance, *vide* Bad. II, p. 20.

ERRATA.

P. 104, Note 2, read *Panjú* for *Béchú*, and *Hadís*, *&c.*, for *Hadís*,
P. 180, l. 16, read *Puruk'hotam* for *Puzukhotam*.
P. 190, l. 15, read *the heretical wizard*, for *the heretic of Jafrdán*.

who had gone beyond the four degrees, and acquired the four cardinal virtues.[1] At that time he happened to live in his jágír in the Parganah of Karah; and when he heard of the affair, he applied for permission to turn Jógí; but His Majesty ordered him to come to Court, assuring him that he need not be afraid.

Beef was interdicted, and to touch beef was considered defiling. The reason of this was that, from his youth, His Majesty had been in company with Hindu libertines, and had thus learnt to look upon a cow—which in their opinion is one of the reasons why the world still exists—as something holy. Besides, the Emperor was subject to the influence of the numerous Hindu princesses of the Harem, who had gained so great an ascendancy over him, as to make him forswear beef, garlic, onions, and the wearing of a beard,[2] which things His Majesty still avoids. He had also introduced, though modified by his peculiar views, Hindu customs and heresies into the court assemblies, and introduces them still, in order to please and win the Hindus and their castes; he abstained from everything which they think repugnant to their nature, and looked upon shaving the beard as the highest sign of friendship and affection for him. Hence this custom has become very general. Pandering pimps also expressed the opinion that the beard takes its nourishment from the testicles; for no eunuch had a beard; and one could not exactly see of what merit or importance it was to cultivate a beard. Moreover, former ascetics had looked upon carelessness in letting the beard grow, as one way of mortifying one's flesh, because such carelessness exposed them to the reproach of the world; and as, at present, the silly lawyers of the Islám looked upon cutting down the beard as reproachful, it was clear that shaving was now a way of mortifying the flesh, and therefore praiseworthy, but not letting the beard grow. (But if any one considers this argument calmly, he will soon detect the fallacy.) Lying, cheating Muftís also quoted an unknown tradition, in which it was stated that 'some Qázís' of Persia had shaved their beards. But the words *kamá yaf'alu ba'zulquzáti* (as *some Qázis* have done), which occur in this tradition, are based upon a corrupt reading, and should be *kamá yaf'alu ba'zul'uzát* (as some *wicked men* have done). * * * *

The ringing of bells as in use with the Christians, and the showing of the figure of the cross, and[3]....., and other childish playthings of theirs, were daily in practice. The words *Kufr shái' shud*, or 'heresy became com-

[1] *Fazáil i arba'ah*, or the four virtues *viz.*, *hikmat* wisdom; *shujá'at* courage; *'iffat* chastity; *'adálat* justice. Books on *Akhláq* divide each into several kinds. Compare the above with the cardinal virtues of the ancient justice, prudence, temperance, and fortitude.

[2] 'The last three things are inconvenient in kissing.'

[3] The text has *o balbalán (?) kih khushgáh i ishánast*, which I do not understand.

mon', express the *Tárikh* (985). Ten or, twelve years after the commencement of these doings, matters had gone so far that wretches like Mírzá Jání, chief of Tattah, and other apostates, wrote their confessions on paper as follows :—'I, such a one, son of such a one, have willingly and cheerfully renounced and rejected the Islám in all its phases, whether low or high, as I have witnessed it in my ancestors, and have joined the Divine Faith of Sháh Akbar, and declare myself willing to sacrifice to him my property and life, my honor and religion.' And these papers—there could be no more effective letters of damnation—were handed over to the Mujtahid (Abulfazl) of the new Creed, and were considered a source of confidence or promotion. The Heavens might have parted asunder, and earth might have opened her abyss, and the mountains have crumbled to dust!

In opposition to the Islám, pigs and dogs were no longer looked upon as unclean. A large number of these animals was kept in the Harem, and in the vaults of the castle, and to inspect them daily, was considered a religious exercise. The Hindus, who believe in incarnations, said that the boar belonged to the ten forms which God Almighty had once assumed.

'God is indeed Almighty—but not what they say.'

The saying of some wise men that a dog had ten virtues, and that a man, if he possess one of them, was a saint, was also quoted as a proof. Certain courtiers and friends of His Majesty, who were known for their excellence in every department, and proverbial as court poets,[1] used to put dogs on a tablecloth and feed them, whilst other heretical poets, Persians and Hindustánís, followed this example, even taking the tongues of dogs into their own mouths, and then boasting of it.

Tell the Mír that thou hast, within thy skin, a dog and a carcass.[2]

A dog runs about in front of the house ; don't make him a messmate.

The ceremonial ablution after emission of *semen*[3] was no longer considered binding, and people quoted as proof that the essence of man was the *sperma genitale*, which was the origin of good and bad men. It was absurd that voiding urine and excrements should not require ceremonial ablutions, whilst the emission of so tender a fluid should necessitate ablution ; it would be far better, if people would first bathe, and then have connexion.

Further, it was absurd to prepare a feast in honour of a dead person ; for the corpse was mere matter, and could derive no pleasure from the feast. People should therefore make a grand feast on their birth-days.[4] Such feasts were called *Ásh i hayát*, food of life.[5]

The flesh of the wild boar and the tiger was also permitted, because the

[5] Provisions for the life to come.

courage which these two animals possess, would be transferred to any one who fed on such meat.

It was also forbidden to marry one's cousins or near relations, because such marriages are destructive of mutual love. Boys were not to marry before the age of 16, nor girls before 14, because the offspring of early marriages was weakly. The wearing of ornaments and silk dresses at the time of prayer was made obligatory.[1] * * * *

The prayers of the Islám, the fast, nay even the pilgrimage, were henceforth forbidden. Some bastards, as the son of Mullá Mubárik, a worthy disciple of Shaikh Abulfazl, wrote treatises, in order to revile and ridicule our religious practices, of course with proofs. His Majesty liked such productions, and promoted the authors.

The era of the Hijrah was now abolished, and a new era was introduced, of which the first year was the year of the emperor's accession (963). The months had the same names as at the time of the old Persian kings, and as given in the *Niçábuççibyán*.[2] Fourteen festivals also were introduced corresponding to the feasts of the Zoroastrians; but the feasts of the Musalmáns and their glory were trodden down, the Friday prayer alone being retained, because some old, decrepit, silly people[3] used to go to it. The new era was called *Tárikh i Iláhi*, or 'Divine Era.' On copper coins and gold muhurs, the era of the Millenium[4] was used, as indicating that the end of the religion of Muhammad, which was to last one thousand years, was drawing near. Reading and learning Arabic was looked upon as a crime; and Muhammedan law, the exegesis of the Qorán, and the Tradition, as also those who studied them, were considered bad and deserving of disapproval. Astronomy, philosophy, medicine, mathematics, poetry, history, and novels, were cultivated and thought necessary. Even the letters which are peculiar to the Arabic language, as the ث, ع, ح, ص, ض, and ط, were avoided. Thus for عبدالله *'Abdullah*, people wrote ابدالله *Abdullah;* and for احدی *Aḥadí*, اهدی *Ahadi*, *&c.* All this pleased His Majesty. Two verses from the Sháhnámah, which Firdausí gives as part of a story, were frequently quoted at court—

From eating the flesh of camels and lizards
The Arabs have made such progress,

---

[1] The Muhammadan law enjoins Muslims to go to the Mosques simply dressed. Silk is forbidden. Muhammadans disapprove of our 'Sunday dresses' and pewage.

[2] *Vide* p. 41, note 2.

[3] The text has an unintelligible sentence.

[4] That is, the word *alf* (one thousand) was put on the coins. From this passage it would appear that coins with *alf* on it (*vide* Marsden, p. 599) were struck about 991.

That they now wish to get hold of the kingdom of Persia.
Fie upon Fate ! Fie upon Fate !

Similarly other verses were eagerly seized, if they conveyed a calumny, as the verses from the .....,[1] in which the falling out of the teeth of our prophet is alluded to.

In the same manner, every doctrine and command of the Islám, whether special or general, as the prophetship, the harmony of the Islám with reason, the doctrines of *Rúyat*, *Taklíf*, and *Takwín*,[2] the details of the day of resurrection and judgment,—all were doubted and ridiculed. And if any one did object to this mode of arguing, his answer was not accepted. But it is well known how little chance a man has who cites proofs against one who will reject them, especially when his opponent has the power of life and death in his hands ; for equality in condition is a *sine quâ non* in arguing.

A man who will not listen, if you bring the Qorán and the Tradition,
Can only be replied to by not replying to him.

Many a family was ruined by these discussions. But perhaps 'discussions' is not the correct name ; we should call them meetings for arrogance and defamation. People who sold their religion, were busy to collect all kinds of exploded errors, and brought them to His Majesty, as if they were so many presents. Thus Laṭíf Khwájah, who came from a noble family in Turkistán, made a frivolous remark on a passage in Tirmizí's *Shamáil*,[3] and asked how in all the world the neck of the prophet could be compared to the neck of an *idol*. Other remarks were passed on the straying camel.[4] Some again expressed their astonishment, that the prophet, in the beginning of his career, plundered the caravans of Quraish ; that he had fourteen wives ; that any married woman was no longer to belong to her husband, if the prophet thought her agreeable, &c. * * * At night, when there were social

---

[1] The word in the text is *Sajarák* (P). In an engagement Muhammad lost two of his teeth.

[2] *Rúyat*, or *dídár i Iláhí dar jannat*, the actual seeing of God in Paradise, is a doctrine in high favour with the Sunnís. The Shí'ahs say, there will be no actual seeing.

Taklíf. A man is called *mukallaf bil-shar'*, bound by the law, *first*, if he belong to the *Islám* ; *secondly*, if he have *'aql* or a sound mind ; *thirdly*, if he have reached *bulúgh*, *i. e.*, if he be of age.

Takwín means existence between two non-existences (*adamain*). Thus a present event stands between a past and a future non-existence. This, the Islám says, is the case with the world, which will come to an end. But Akbar denied it, as he did not believe in a day of judgment.

[3] The book of the famous *Muhaddis* (Collector of Traditions) Tirmizí, which contains all Traditions regarding the figure and looks of the prophet. The word *idol* is expressive of great beauty ; but the courtiers laughed at the phrase as unsuited to Muhammad, who had abolished idols.

[4] This refers to the charge of adultery brought against *'Áishah*, Muhammad's favorite wife. The whole story will be found in Sale's Qorán, Sur. 24, p. 288.

assemblies, His Majesty told forty courtiers to sit down as 'The Forty,'[1] and every one might say or ask what he liked. If then any one brought up a question connected with law or religion, they said, "You had better ask the Mullás about that, as we only settle things which appeal to man's reason." But it is impossible for me to relate the blasphemous remarks which they made about the *Çahábah*, when historical books happened to be read out, especially such as contained the reigns of the first three Khalífahs, and the quarrel about Fadak, the war of Çiffín,[2] &c.,—would that I were deaf! The Shí'ahs, of course, gained the day, and the Sunnís were defeated; the good were in fear, and the wicked were secure. Every day a new order was given, and a new aspersion or a new doubt came up; and His Majesty saw in the discomfiture of one party a proof for his own infallibility, entirely forgetful of the proverb, 'Who slanders others, slanders himself.'* * * The ignorant vulgar had nothing on their tongues but '*Alláhu Akbar*', and they looked upon repeating this phrase, which created so much commotion, as a daily religious exercise. Mullá Sherí, at this time, composed a *qiṭ'ah* of ten verses, in which the following occur:—

It is madness to believe with the fool that love towards our prophet
Will ever vanish from the earth.
I smile, if I think that the following verse, in all its silliness,
Will be repeated at the feast of the rich, and as a prayer by the poor:

'This year the emperor has claimed prophetship,
Next year, if God will, he will be God.'

At the new year's day feasts, His Majesty forced many of the 'Ulamás and the pious, nay even the Qázís and the Muftí of the realm, to drink wine.* * * And afterwards the Mujtahids of the Divine Faith, especially Faizí, called out, "Here is a bumper to the confusion of the lawyers!" On the last day of this feast, when the sun enters the nineteenth degree of Aries (a day called *Sharafu-lsharaf*, and considered particularly holy by His Majesty), the grandees were promoted, or received new jágírs, or horses,

---

[1] The *Chihil tanán*, or 40 *Abdáls*. After the death of Muhammad, the last of the long series of prophets, the earth complained to God, that henceforth she would no longer be honored by prophets walking on her surface. God promised her, that there should always be on earth *forty* (according to some, *seventy-two*) holy men, Abdáls, for whose sake He would let the earth remain. The chief of the Forty is called *Ghaus*.

[2] *Fadak* is a village not far from Makkah, which Fátimah claimed as her own; but Abú Bakr would not let her have it. *Çiffín* is a place near the Euphrates, where a battle took place between 'Alí and Mu'áwiyah.

Both affairs form, even now-a-days, subjects of quarrel between Sunnís and Shí'ahs. Hence the author of the Dabistán has also made use of them in his Dialogues. The reader will find more particulars in the notes to the English translation of the Dabistán.

or dresses of honor, according to the rules of hospitality, or in proportion of the tribute they had brought."

In this year Gulbadan Begum [Akbar's aunt] and Salímah Sulṭán Begum returned from a pilgrimage to Makkah. Soon after Sháh Abú Turáb also, and I'timád Khán of Gujrát, returned from the pilgrimage, and brought an immense stone with them, which had to be transported on an elephant. The stone contained, according to Abú Turáb, an impression of the foot of the prophet. Akbar—though it is difficult to guess the motive—went four *kos* to meet it, and the grandees were ordered to carry the stone themselves by turns, and thus it was brought to town.

[*p.* 312.]

"In this year, Shaikh Mubárik of Nágor said in the presence of the emperor to Bír Bar, "Just as there are interpolations in your holy books, so there are many in ours (Qorán); hence it is impossible to trust either."

Some shameless and ill-starred wretches also asked His Majesty, why at the approaching close of the Millennium, he did not make use of the sword, 'the most convincing proof,' as Sháh Ismá'íl of Persia had done. But His Majesty, at last, was convinced that confidence in him as a leader was a matter of time and good counsel, and did not require the sword. And indeed, if His Majesty, in setting up his claims, and making his innovations, had spent a little money, he would have easily got most of the courtiers, and much more the vulgar, into his devilish nets.

The following Rubá'í of Náçir i Khusrau was often quoted at court —

I see in 992 two conjunctions,
I see the sign of Mahdí and that of Antichrist:
Either politics must change or religion.
I clearly see the hidden secret.

At a council meeting for renovating the religion of the empire, Rájah Bhagawán said, "I would willingly believe that Hindus and Musalmáns have each a bad religion; but only tell us where the new sect is, and what opinion they hold, so that I may believe." His Majesty reflected a little, and ceased to urge the Rájah. But the alteration of the orders of our glorious faith was continued. The *Tárikh* was found in the words *Ihdás i bid'at*, the innovation of heresy (990).

During those days also the public prayers and the *azán*, which was chanted five times a day for assembly to prayer in the statehall, were abolished. Names like *Ahmad*, *Muhammad*, *Muçṭafa*, &c., became offensive to His Majesty, who thereby wished to please the infidels outside, and the princesses inside, the Harem, till, after some time, those courtiers

who had such names, changed them; and names as *Yár Muhammad*, *Muhammad Khán*, were altered to *Rahmat*. To call such ill-starred wretches by the name of our blessed prophet would indeed be wrong, and there was not only room for improvement by altering their names, but it was even necessary to change them, according to the proverb, 'It is wrong to put fine jewels on the neck of a pig.'

And this destructive fire broke all out in Ágrah, burnt down great and small families, and did not even spare their family tombs—May God forsake these wretches!"

[*p.* 315.]

"In *Rabí'ussání* 990, Mír Fathullah came from the Dak'hin (*vide* above p. 33).* * * * As he had been an immediate pupil of Mír Ghiásuddín Mançúr of Shíráz, who had not been overstrict in religious matters, His Majesty thought that Fathullah would only be too glad to enter into his religious scheme. But Fathullah was such a stanch Shí'ah, and at the same time such a worldly office-hunter, and such a worshipper of mammon and of the nobility, that he would not give up a jot of the tittles of bigoted Shí'ism. Even in the statehall he said, with the greatest composure, his Shí'ah prayers—a thing which no one else would have dared to do. His Majesty, therefore, put him among the class of the bigots; but he connived at his practices, because he thought it desirable to encourage a man of such attainments and practical knowledge. Once the emperor, in Fathullah's presence,[1] said to Bír Bar, "I really wonder how any one in his senses can believe that a man, whose body has a certain weight, could, in the space of a moment, leave his bed, go up to heaven, there have 90,000 conversations with God, and yet on his return find his bed still warm?" So also was the splitting of the moon ridiculed. "Why," said His Majesty, lifting up one foot, "it is really impossible for me to lift up the other foot! What silly stories men will believe." And that wretch (Bír Bar) and some other wretches—whose names be forgotten—said, "Yea, we believe! Yea, we trust!" This great foot-experiment was repeated over and over again. But Fathullah—His Majesty had been every moment looking at him, because he wanted him to say something; for he was a new-comer—looked straight before himself, and did not utter a syllable, though he was all ear."

Here Badáoní mentions the translations from Sanscrit into Persian, which have been alluded to above, p. 104. 'It is not quite certain whether the translations were made from Sanscrit, or from Hindí trans-

[1] As Fathullah was a good mechanic, Akbar thought that by referring to the weight of a man, and the following experiment with his foot, he would induce Fathullah, to make a remark on the prophet's ascension (*mi'ráj*).

lations, or from both. Badáoní clearly states that for some translations, as as the At'harban, Hindus were used as interpreters. For other works as the Mahabhárat, there may have been Hindí translations or extracts, because Akbar himself (*vide* p. 105, note 1) translated passages to Naqíb Khán. Abulfazl also states that he was assisted by Pandits when writing the fourth book of the Á'ín. Compare Sir H. Elliott's Index to the Historians of India, p. 259.

[*p.* 321.]

"In these days (991) new orders were given. The killing of animals on certain days was forbidden, as on Sundays, because this day is sacred to the Sun; during the first eighteen days of the month of Farwardín; the whole month of Á'bán (the month in which His Majesty was born); and on several other days, to please the Hindus. This order was extended over the whole realm, and capital punishment was inflicted on every one who acted against the command. Many a family was ruined. During the time of these fasts, His Majesty abstained altogether from meat, as a religious penance, gradually extending the several fasts during a year over six months and even more, with the view of eventually discontinuing the use of meat altogether.

A second order was given that the Sun should be worshipped four times a day, in the morning, and evening, and at noon and midnight. His Majesty had also one thousand and one Sanscrit names of the Sun collected, and read them daily, devoutly turning towards the sun; he then used to get hold of both ears, and turning himself quickly round about, used to strike the lower ends of the ears with his fists. He also adopted several other practices connected with sun-worship. He used to wear the Hindu mark on his forehead, and ordered the band to play at midnight and at break of day. Mosques and prayer-rooms were changed into store rooms, or given to Hindu Chaukídárs. For the word *jamá'at* (public prayer), His Majesty used the term *jimá'* (copulation), and for *hayya*[2] *ala*, he said *yalalá talalá*.

The cemetry within the town was ordered to be sequestered."

[*p.* 324.]

"In the same year (991), His Majesty built outside the town two places for feeding poor Hindus and Muhammadans, one of them being called *Khairpúrah*, and the other *Dharmpúrah*. Some of Abulfazl's people were put in charge of them. They spent His Majesty's money in feeding the poor. As an immense number of *Jogís* also flocked to this establishment, a third

[2] *Hayya 'ala*, for 'hayya 'ala-ççaláh' [the *waqf* form of *çalát*], 'Come quick to the prayer,' is a phrase which occurs in the *Azán*. *Talalá talalá* is a phrase used by drunkards in the height of mirth.

place was built, which got the name of *Jogipúrah*. His Majesty also called some of the Jogís, and gave them at night private interviews, enquiring into abstruse truths; their articles of faith; their occupations; the influence of pensiveness; their several practices and usages; the power of being absent from the body; or into alchemy, physiognomy, and the power of omnipresence of the soul. His Majesty even learned alchemy, and shewed in public some of the gold made by him. Once a year also during a night called *Sivrát*, a great meeting was held of all Jogís of the empire, when the emperor ate and drank with the principal Jogís, who promised him that he should live three and four times as long as ordinary men. His Majesty fully believed it, and connecting their promises with other inferences he had drawn, he got quite convinced of it. Fawning court doctors, wisely enough, found proofs for the longevity of the emperor, and said that the cycle of the moon, during which the lives of men are short, was drawing to its close, and that the cycle of Saturn[1] was at hand, with which a new cycle of ages, and consequently the original longevity of mankind, would again commence. Thus they said, it was mentioned in some holy books that men used to live up to the age of one thousand years, whilst in Sanscrit books the ages of some men were put down as ten thousand years; and in Thibet, there were even now a class of *Lámahs*, or Mongolian devotees, and recluses, and hermits, that live two hundred years, and more. For this reason, His Majesty, in imitation of the usages of these Lámahs, limited the time he spent in the Harem, curtailed his food and drink, but especially abstained from meat. He also shaved the hair of the crown of his head, and let the hairs at the sides grow, because he believed that the soul of perfect beings, at the time of death, passes out by the crown (which is the tenth opening[2] of the human body) under a noise resembling thunder, which the dying man may look upon as a proof of his happiness and salvation from sin, and as a sign that his soul, by metempsychosis, will pass into the body of some grand and mighty king.

His Majesty gave his religious system the name of *Tauhíd i Iláhí*, or 'Divine Monotheism.'

---

[1] *Zuhal*, in Persian *Kaiwán*, Saturn. This planet is looked upon as the fountain of wisdom. Nizámí says *sawád é safínah bakaiwán supurd*, 'He (Muhammad) gave Saturn the power of writing.' *Anwár Suhailí*, in praise of some physician, *Zuhal shágird i ú dar nukhtahdání*, 'Saturn in wisdom is his pupil.' Hence the famous astronomer Abulqásim has the *laqab* (title) of *Ghulám i Zuhal*. Besides, there are several cycles of years, over which each of the seven planets reigns. The first cycle was that of Saturn, during which the ages of men were long. The last cycle is that of the moon, during which people do not attain a very old age. It existed already at the time of Háfiz, who says, *In chih shorest kih dar daur i qamar mibínim*, 'What misfortune is this which we witness in the cycle of the moon.'

[2] *Vide* my text edition, Fourth book, p. 8, l. 9.

He also called, according to the manner of the Jogís, a number of special disciples *Chelahs* (slaves). A lot of vile, swindling, wicked birds, who were not admitted to the palace, stood every morning opposite to the window, near which His Majesty used to pray to the sun, and declared, they had made vows not to rinse their mouths, nor to eat and drink, before they had seen the blessed countenance of the emperor; and every evening, there was a regular court assembly of needy Hindus and Muhammadans, all sorts of people, men and women, healthy and sick, a queer gathering, and a most terrible crowd. No sooner had His Majesty finished saying the 1001 names of the 'Greater Luminary', and stepped out into the balcony, than the whole crowd prostrated themselves. Cheating, thieving Brahmins collected another set of 1001 names of 'His Majesty the Sun,' and told the emperor that he was an incarnation, like Rám, Kishn, and other infidel kings; and though Lord of the world, he had assumed his shape, in order to play with the people of our planet. In order to flatter him, they also brought Sanscrit verses, said to have been taken from the sayings of ancient sages, in which it was predicted that a great conqueror would rise up in India, who would honor Brahmins and cows, and govern the earth with justice. They also wrote this nonsense on old looking paper, and shewed it to the emperor, who believed every word of it.

In this year also, in the state hall of Fathpúr, the ten cubit square of the Hanafís and the *Qullatain*[1] of the Sháfi'ís and Shí'ahs were compared. The fluid quantum of the Hanafís was greater than that of the others.

His Majesty once ordered that the Sunnís should stand separately from the Shí'ahs, when the Hindustánís, without exception, went to the Sunní side, and the Persians to the Shí'ah side."

[*p.* 336.]

"During this year [992], Mullá Iláhdád of Amrohah and Mullá Sherí attended at Court, in order to flatter the emperor; for they had been appointed to *Çadrships* in the Duáb of the Panjáb. Mullá Sherí presented to His Majesty a poem made by him, entitled *Hazár Shuá'*, or 'The Thousand Rays,' which contained 1,000 *qiṭa'hs* in praise of the Sun. His Majesty was much pleased."

At the feast of the emperor's accession in 992, numerous conversions took place. [Bad. II. p. 338.]

---

[1] *Qullatain*, two large jars containing 1,200 *raṭl i 'iráqí* ('iráqí pounds) of water. According to the Shí'ahs and the Sháfi'í sect, water does not become *najis*, or soiled, from its being used, provided the quantity of water weigh not less than 1,200 *raṭl*, or the cube of $3\frac{1}{2}$ spans. Hanífah fixed $(10 \text{ spans})^2$, just deep enough that the hand, in passing over it, do not touch the bottom. The experiment which Akbar made had for its object to throw blame on the Hanafí Sunnís.

"They were admitted as disciples in sets of twelve, one set at a time, and declared their willingness to adopt the new principles, and to follow the new religion. Instead of the usual tree,[1] His Majesty gave his likeness, upon which the disciples looked as a symbol of faith and the advancement of virtue and prosperity. They used to wrap it up in cloth studded with jewels, and wore it on the top of their turbans. The phrase '*Alláhu Akbar*' was ordered to be used as the heading in all writings. Playing with dice, and taking interest, were allowed, and so in fact was every thing else admitted which is forbidden in the Islám. A play-house was even built at Court, and money from the exchequer was lent to the players on interest (*vide* Second book, *Ain* 15). Interest and *shatal* (money given at the end of the play to the by-standers) were looked upon as very satisfactory things.

Girls before the age of fourteen, and boys before sixteen, were not to marry, and the story of the marriage night of the Prophet with *Çiddíqah*[2] was totally disapproved of.[3] But why should I mention other blasphemies—May the attention which any one pays to them run away like Quicksilver—really I do not know what human ears cannot bear to hear!

The sins which all prophets are known to have committed, were cited as a reason, why people should not believe the words of the prophets. So especially in the case of David[3] and the story of Uriah. And if any one dared to differ from the belief of these men, he was looked upon as fit to be killed, or as an apostate and everlastingly damned, or he was called a lawyer and enemy of the emperor. But according to the proverb, 'What people sow, that they shall reap,' they themselves became notorious in the whole world as the greatest heretics by their damnable innovations, and 'the infallible authority' got the nick name of *Abújahl*.[4] Yes, 'If the king is bad,

[1] Heads of sects give their pupils trees, not of genealogy, but of disiciple-ship, as, Ahmad, disciple of 'Alí, disciple of Mu'ín, disciple of Bayazíd, &c., ending with their own name and the name of that disciple to whom the tree (*shajarah*) is given.

[2] *Çiddíqah* is the title of *'Áishah*, the daughter of Abú Bakr. "She was six years old, when she was engaged to Muhammad, who was then fifty years old. The actual marriage took place, when she was nine years old. 'I sat,' she relates, 'with other girls in a swing, when my mother called me. I went to her, not knowing what she wanted. She took my hand, and led me to the door of the house. I now guessed what she wished to do with me: my heart throbbed, but I soon got again composed. I washed my face and my head, and was taken inside, where several women were assembled, who congratulated me, and dressed me up. When they had done, they handed me over to the prophet.' As she was so young, she took her toys to the house of the prophet. The prophet loved her so much, that even in the mosque, at the time of the service, he put his head under her veil, and caressed her, and played with her hair (Tha'labí Tafsír 2, 180); and he told the faithful that she would be his wife in Paradise." From Sprenger's Life of Muhammad III. p. 62.

[3] David counts as a prophet. The book revealed to him is the *zabúr*, or the Psalms.

[4] Properly *father of ignorance*. Badáoní means *Abulfazl*, which name signifies *father of wisdom*. Besides, Abulfazl had the title(*takhalluç*) *'Allamí*, the most learned.

the Vizier is worse.' Looking after worldly matters was placed before religious concerns; but of all things, these innovations were the most important, and every thing else was accessory.

In order to direct another blow at the honour of our religion, His Majesty ordered that the stalls of the Fancy bázárs, which are held on New year's-day, should, for a stated time, be given up for the enjoyment of the Begums and the women of the Harem, and also for any other married ladies. On such occasions, His Majesty spent much money; and the important affairs of Harem people, marriage-contracts, and betrothals of boys and girls, were arranged at such meetings.

The real object of those who became disciples was to get into office; and though His Majesty did everything to get this out of their heads, he acted very differently in the case of Hindus, of whom he could not get enough; for the Hindus, of course, are indispensible; to them belongs half the army and half the land. Neither the Hindústánís nor the Moghuls can point to such grand lords as the Hindus have among themselves. But if others than Hindus came, and wished to become disciples at any sacrifice, His Majesty reproved or punished them. For their honour and zeal he did not care, nor did he notice whether they fell in with his views or not."

[*p.* 340.]

"In this year Sulṭán Khwájah died. He also belonged to the elect disciples of His Majesty. After burying him, they laid down a new rule. They put a grate over his grave in such a manner that the light of the rising sun, which cleanses from all sins, could shine on the face of the corpse. People said, they had seen fiery tongues resting over his mouth, but God knows best."

During the month of *Çafar* (the second month of the year) 994, Akbar's troops were defeated by the Yúsufzaís. Badáoní says (p. 350):

"Nearly 8,000 men, perhaps even more, were killed. Bír Baṛ also, who had fled from fear of his life, was slain, and entered the row of the dogs in hell, and thus got something for the abominable deeds he had done during his lifetime. During the last night attack, many grandees and persons of renown were killed, as Hasán Khán,[1] and Khwájah 'Arab, paymaster (colonel) of Khán Jahán, and Mullá Sherí, the poet, and many others whose names I cannot specify. The words *az Khwájah 'Arab haif*[2]

[1] *Vide* List of grandees, Text edition of the Aín, p. 227, No. 220, where for *Husain* read *Hasan*. In the MSS. of the Aín he is called بتنی or بتّنی. My MS. of the Ṭabaqát reads پتّنی افغان *Pataní Afghán*, and calls him a *Hazárí*. The edition of Badáoní has wrong پنی His biography is not given in the *Maásir ulumará*.

[2] The letters give 993; hence one more = 994.

express the Táríkh of the defeat, by one less. Hakím Abulfath and Zain Khán, on the 5th Rabí'ulawwal, reached with their defeated troops the fort of Aṭak.* * * But His Majesty cared for the death of no grandee more than for that of Bír Baṛ. He said, "Alas! they could not even get his body out of the pass, that it might have been burned;" but at last, he consoled himself with the thought, that Bír Baṛ was now free and independent of all earthly fetters, and as the rays of the sun were sufficient for him, there was no necessity that he should be cleansed by fire."

New orders were given in the beginning of 995. [*Page* 356.]

"No one was to marry more than one wife, except in cases of barrenness; but in all other cases the rule was, 'One God, and one wife.' Women, on reaching the limit of their period of fertility, when their courses stop, should no longer wish for the husband. If widows liked to re-marry, they might do so, though this was[1] against the ideas of the Hindus. A Hindu girl, whose husband had died before the marriage was consummated, should not be burnt. If, however, the Hindus thought this a hardship, they should not be prevented (from burning the girl); but then a Hindu widow should take the girl.....[2]

Again, if disciples meet each other, one should say '*Alláhu Akbar*,' and the other should respond '*Jalla Jaláluhu*.' These formulas were to take the place of our *salám*, and the answer to the *salám*. The beginning of counting Hindu months should be the 28th day, and not the 15th, because the latter was the invention and innovation of Bikramájít. The Hindu feasts, likewise, were to take place in accordance with this rule. But the order was not obeyed, though farmáns to that effect, as early as 990, had been sent to Gujrát and Bengal.

Common people should no longer learn Arabic, because such people were generally the cause of much mischief. Cases between Hindus should be decided by learned Brahmins, and not by Musalmán Qázís. If it were necessary to have recourse to oaths, they should put heated irons into the hands of the accused, who was guilty if his hands were burnt, but innocent if not; or they should put the hands of the accused into hot, liquid butter; or the accused should jump into water, and if he came to the surface before an arrow had returned to the ground, which had been shot off when the man jumped into the water, he was guilty.

---

[1] The text has *was not against the ideas of the Hindus* (?).

[2] The text of the whole passage is doubtful. The readings of the three MSS. which Maulawí Aghá Ahmad 'Alí had in editing Badáoní, give no sense.

People should be buried with their heads towards the east, and their feet towards the west.[1] His Majesty even commenced to sleep in this position."

[*p.* 363.]

"In the same year the prohibition of the study of Arabic was extended to all. People should learn Astronomy, Mathematics, Medicine, and Philosophy. The Táríkh of this order is *Fasád i fazl* (995).* *

On the 10th day of Muharram 996, His Majesty had invited the Khán Khánán, and Mán Singh (who had just been appointed governor of Bahár, Hájípúr and Patna); and whilst they were drinking, His Majesty commenced to talk about the Divine Faith, in order to test Mán Singh. He said without reserve, "If Your Majesty mean by the term of membership, willingness to sacrifice one's life, I have given pretty clear proofs, and Your Majesty might dispense with examining me; but if the term has another meaning, and refers to religion, surely I am a Hindu. And if I am to become a Muhammadan, Your Majesty ought to say so— but besides Hinduism and Islám, I know of no other religion." The emperor then gave up urging him.

During the month of *Çafar* 996, Mírzá Fúlád Beg Barlás managed to get one night Mullá Ahmad of T'hat'hah, on some pretext, out of his house, and stabbed at him, because the Mullá openly reviled [as Shí'ahs do] the companions of the prophet. The Táríkh of this event is expressed by the words *Zihe khanjar i Fúlád*, 'Hail, steel of Fúlád,' or by *Khúk i saqarí*, 'hellish hog!' And really, when this dog of the age was in his agony, I saw that his face looked just like the head of a pig,[2] and others too witnessed it—O God! we take refuge with Thee against the evil which may befall us! His Majesty had Mírzá Fúlád tied to the foot of an elephant and dragged through the streets of Láhor; for when Hakím Abulfath, at the request of the emperor, had asked the Mírzá, whether he had stabbed at the Mullá from religious hatred, he had said, "If religious hatred had been my motive, it would have been better to kill a greater one[3] than the Mullá." The Hakím reported these words to His Majesty, who said, "This fellow is a scoundrel; he must not be allowed to remain alive," and ordered his execution, though the people of the Harem asked the emperor to spare him for his general bravery and courage. The Mullá outlived

---

[1] This was an insult, because the Muhammadans in India face the west during prayer. *Vide* Journal Asiatic Society, Bengal for 1868, p. 56.

[2] Sunnís assert that this transfiguration into an animal (*maskh*) happens very often to Shí'ahs, because they revile the *Çahábah*. Faizí, according to Badáoní, looked and barked like a dog, when dying. Another thing which the Sunnís all over India quote as a great proof of the correctness of their *mazhab*, is that no Shí'ah can ever become a *háfiz*, *i. e.*, no Shí'ah can commit the Qorán to memory.

[3] Either Akbar, or Abulfazl.

the Mírzá three or four days. The Shí'ahs, at the time of washing his corpse, say that, in conformity with their religion, they put a long nail into the *anus*, and plunged him several times into the river.[1] After his burial, Shaikh Faizí and Shaikh Abulfazl put guards over his grave; but notwithstanding all precaution, during the year His Majesty went to Kashmír, the people of Láhor, one night, took the hideous corpse of the Mullá from the grave, and burned it."

[*pp.* 375, 376, 380.]

"In 999, the flesh of oxen, buffaloes, goats, horses, and camels, was forbidden. If a Hindu woman wished to be burnt with her husband, they should not prevent her; but she should not be forced. Circumcision was forbidden before the age of twelve, and was then to be left to the will of the boys. If any one was seen eating together with a butcher, he was to lose his hand, or if he belonged to the butcher's relations, the fingers which he used in eating.

In 1000, the custom of shaving off the beard was introduced."

In 1002, special orders were given to the *kotwáls* to carry out Akbar's commands. They will be found in the Third book of the Áín, Áín 5. The following are new:

If any of the *darsaniyyah*[2] disciples died, whether man or woman, they should hang some uncooked grains and a burnt brick round the neck of the corpse, and throw it into the river, and then they should take out the corpse, and burn it at a place where no water was. But this order is based upon a fundamental rule, which His Majesty indicated, but which I cannot here mention.

If a woman was older than her husband by twelve years, he should not lie with her, and if a young girl was found running about town, whether veiled or not, or if a woman was bad, or quarrelled with her husband, she should be sent to the quarter of the prostitutes, to do there what she liked."

[*p.* 391.]

"At the time of famines and distress, parents were allowed to sell their children, but they might again buy them, if they acquired means to repay their price. Hindus who, when young, had from pressure become Musalmáns, were allowed to go back to the faith of their fathers. No man should be interfered with on account of his religion; and every one should be allowed to change his religion, if he liked. If a Hindu woman fall in love with a Muhammadan, and change her religion, she should be taken from him

---

[1] This was done to clean the intestines of *faeces*, which were thrown into the river from which the Sunnís got their water.

[2] From *darsan*, for which *vide* p. 157, l. 1.

by force, and be given back to her family. People should not be molested, if they wished to build churches and prayer rooms, or idol temples, or fire temples."

[*p.* 398.]

"In this year A'zam Khán returned from Makkah, where he had suffered much harm at the hands of the Sharífs,[1] and throwing away the blessing which he had derived from the pilgrimage, joined, immediately on his return, the Divine Faith, performing the *sijdah* and following all other rules of discipleship; he cut off his beard, and was very forward at social meetings and in conversation. He learnt the rules of the new faith from the Reverend Master Abulfazl, and got Gházípúr and Hájípúr as *jágír*."

[*p.* 404.]

"During the Muharram of 1004, Çadr Jahán, muftí of the empire, who had been promoted to a commandership of One Thousand, joined the Divine Faith, as also his two over-ambitious sons; and having taken the *Shaçt*[2] of the new religion, he ran into the net like a fish, and got his *Hazáríship*. He even asked His Majesty what he was to do with his beard, when he was told to let it be. On the same day, Mullá Taqí of Shushtar[3] joined, who looks upon himself as the learned of all learned, and is just now engaged in rendering the Sháhnámah into prose, according to the wishes of the emperor, using the phrase *jallat 'azmatuhu wa 'azza shánuhu*,[4] wherever the word *Sun* occurs. Among others that joined were Shaikhzádah Gosálah Khán of Banáras; Mullá Sháh Muhammad of Sháhábád;[5] and Çúfí Ahmad, who claimed to belong to the progeny of the famous Muhammad Ghaus. They all accepted the four degrees of faith, and received appointments as Commanders from One Hundred to Five Hundred, gave up their beards agreeably to the rules, and thus looked like the youths in Paradise. The words *mútarásh i chand*, or 'several shavers', express the *táríkh* of this event (1004). The new candidates behaved like Hindus that turn Muhammadan,[6] or like those who are dressed in red clothes, and look in their joy towards their relations, who say to them, "My dear little man, these rags will be old to-morrow, but the Islám will still remain on your neck. This Ahmad, 'the little Çúfí', is the same who claimed to be the pupil, or rather the perfect successor, of Shaikh Ahmad of Egypt. He said that at the express desire of that religious leader of the age, he had come to India, and the Shaikh had frequently told him, to assist the Sulṭán of India, should he commit an

[1] This is the title of the rulers of Makkah.

[2] *Shaçt*, which has been explained on p. 166, also means *a fish hook*.

[3] *Vide* List of Grandees, Second Book, No. 352.

[4] Because Muhammadans use such phrases after the name of God.

[5] *Vide p.* 106, note 1.

[6] That is, over-zealous.

error, and lead him back from everlasting damnation. But the opposite was the case."

So far Badáoní. We have, therefore, the following list of members of the Divine Faith. With the exception of Bír Bar, they are all Muhammadans; but to judge from Badáoní's remarks, the number of those that took the *Shaçt*, must have been much larger.

1. Abulfazl.
2. Faizí, his brother, Akbar's court-poet.
3. Shaikh Mubárik, of Nágor, their father.
4. Ja'far Beg Áçaf Khán, of Qazwín, a historian and poet.
5. Qásim i Káhí, a poet.
6. 'Abduççamad, Akbar's court-painter; also a poet.
7. A'zam Khán Kokah, after his return from Makkah.
8. Mullá Sháh Muhammad of Sháhábád, a historian.
9. Çúfí Ahmad.
10 to 12. Çadr Jahán, the crown-lawyer, and his two sons.
13. Mír Sharíf of Ámul, Akbar's apostle for Bengal.
14. Sulṭán Khwájah, a çadr.
15. Mírzá Jání, chief of T'hat'hah.
16. Ṭaqí of Shustar, a poet and commander of two hundred.
17. Shaikhzádah Gosálah of Banáras.
18. Bír Bar.

Nos. 4 to 6 are taken from the Áín; the others are mentioned in the above extracts from Badáoní. The literary element is well represented in the list.

The above extracts from Badáoní possess a peculiar value, because they show the rise and progress of Akbar's views, from the first doubt of the correctness of the Islám to its total rejection, and the gradual establishment of a new Faith combining the principal features of Hinduism and the Fireworship of the Párs'is. This value does not attach to the scattered remarks in the Áín, nor to the longer article in the Dabistán.

As the author of the latter work has used Badáoní, it will only be necessary to collect the few remarks which are new.

The following two miracles are connected with Akbar's birth.

[*Dabistán*, p. 390.[1]]

[1] *Vide* also *Shea and Troyers'* English Translation of the Dabistán, III, p. 49.

"Khwájah Mas'úd, son of Khwájah Mahmúd, son of Khwájah Murshid-ulhaq, who was a gifted *Çáhib i hál*,[1] said to the writer of this book, "My father related, he had heard from great saints, that the Lord of the faith and the world 'reveals himself.' I did not know, whether that august personage had appeared or would appear, till, at last, one night I saw that event, and when I awoke, I suddenly arrived at that place, where the blessed Lord was born, namely on a Sunday of the month of Rajab of the year 949, the lord Jaláluddín Akbar, the august son of Humáyún Pádisháh and Hamídah Bánú Begum."

The second miracle has been related above, on p. 163, note 3. These two miracles make up the first of the four chapters, into which the author of the Dabistán has divided his article on the "Divine Faith." The second chapter contains religious dialogues, and extracts from Badáoní, which are rather conjecturally rendered in Shea's Translation. The third chapter contains remarks on the worship of the sun and stars, chiefly with reference to the sun-worship of the Tátárs.[2] The last chapter contains extracts from the third and fifth books of the Aín.

P. 410. "His Majesty also sent money to Irán, to bring to India a wise Zoroastrian of the name of Ardsher."[3]

P. 412. Abulfazl wrote, *as a counterpart to his commentary on the Ayatul-kursi* (p. 169), a preface to the translation of the Mahábhárat (*vide* p. 105) of two *juz*.

P. 413. "When Sultán Khwájah,[4] who belonged to the members of the Divine Faith, was near his death, *he said that he hoped, His Majesty would not have him buried like a mad man.* He was therefore buried in a grave *with a peculiar lamp*, and a grate was laid over it, so that the greater luminary, whose light cleanses from all sins, might shine upon him.* * *

Should a Hindu woman fall in love with a Muhammadan, and be converted to the Islám, she would be taken away by force and handed over to her family; *but so should also a Musalmán woman, who had fallen in love with a Hindu, be prevented from joining Hinduism.*"[5]

P. 414. "I heard from Mullá Tarson of Badakhshán, who was a Hanafí

---

[1] *Vide* p. 171, note 2.

[2] The author of the Dabistán gives much prominence to the idea that the power and success of the Tátárs was in some way mysteriously connected with their sun and star worship, and that their conversion to the Islám was looked upon as the beginning of their decline. It looks as if the writer wished to connect this idea with Akbar's successes and sun-worship.

[3] Regarding this Ardsher, *vide* Journal Asiatic Society, Bengal for 1868, p. 14. Akbar's fire temple was in the Harem.

[4] *Vide* above, p. 204.

[5] The words in Italics are not in Badáoní. The object of the order was evidently to prevent a woman from doing what she liked; for, according to the Muhammadans, women are looked upon as *náqiç ul'aql*.

by sect, that once during the year 1058, he had gone on a pilgrimage to Sikandrah, the burial place of Akbar. "One of my companions," he said, "declined to enter the pure mausoleum, and even abused the Representative of God [Akbar]. My other companions said, "If Akbar possesses hidden knowledge, that man will certainly come to grief." Soon after a piece of a broken stone fell down, and crushed his toe."

P. 431. "In Multán, I saw Sháh Salámullah, who has renounced the world, and is a *muahhid* (Unitarian). He is very rigid in discipline, and avoids the society of men. He said, he had often been in company with Jaláluddín Akbar, and had heard him frequently say, "Had I formerly possessed the knowledge which I now have, I would never have chosen a wife for myself; for upon old women I look as mothers, on women of my age as sisters, and on girls as daughters." A friend of mine said, he had heard Nawáb Abul Hasan, called Lashkar Khán of Mashhad, report the same as having been said by Akbar.

Salámullah also said that God's Representative (Akbar) had often wept and said, "O that my body were larger than all bodies together, so that the people of the world could feed on it without hurting other living animals."

A sign of the sagacity of this king is this, that he employed in his service people of all classes,[1] Jews, Persians, Túránís, &c., because one class of people, if employed to the exclusion of others, would cause rebellions, as in the case of the Uzbaks and Qizilbáshes (Persians), who used to dethrone their kings. Hence Sháh 'Abbás, son of Sulṭán Khudábandah i Çafawí, imitated the practice of Akbar, and favoured the Gurjís (Georgians). Akbar paid likewise no regard to hereditary power, or genealogy and fame, but favoured those whom he thought to excel in knowledge and manners."

The passages in the Aín which refer to Akbar's religious views are the following:—p. III; 11; 48; 49; 54; 57; 58, l. 4 from below; Aín 26, p. 61; p. 90, notes 3 and 4, the Sanscrit names being very likely those which were alluded to by Badáoní, *vide* above p. 180, l. 18; p. 91, note 3; p. 103, note 3; 104, 105, 106; p. 108 l. 22, because the "making of likenesses" is as much forbidden by the Islám, as it was interdicted by the Mosaic law; Aín 72, p. 153; 159; Aín 77, p. 162; Aín 81, p. 216. In the Second Book, Aíns 18, 19, 22, 23, 24, 25; in the IIId book, end of Aín 1 (Táríkh Iláhí); Aíns 2, 5, 9, 10; and lastly, the greater part of the fifth book.

It will be observed that the remarks on Akbar's religious views do not extend beyond the year 1596, when the greater part of the Aín had

[1] *Vide* the notes to Aín 30 of the Second Book.

been completed. Badáoní's history ends with A. H. 1004, or A. D. 1595; but his remarks on Akbar's religion become more and more sparing towards the end, and as subsequent historians, even Jahángír in his 'Memoirs,' are almost entirely silent on the religious ideas of the emperor, we have no means of following them up after 1596. Akbar, in all probability, continued worshipping the sun, and retained all other peculiarities of his monotheistic Pársí-Hinduism, dying as he had lived. The story related in that edition of Jahángír's Memoirs which has been translated by Major Price, that Akbar died as a good Musalmán, and 'repented' on his death-bed, is most untrustworthy, as every other particular of that narrative.[1]

With Akbar's death,[2] the Divine Faith died out. Akbar, solely relying on his influence and example, had established no priesthood, and had appointed no proper person for propagating his faith. If we except the influence which his spirit of toleration exerted, the masses had remained passive. Most of the members, mentioned on p. 209, had died before Akbar; such as were still alive, as Sharíf of Ámul took

[1] The story of Akbar's 'conversion' is also repeated in Elphinstone's History, Second edition, p. 531. The Mullá whom Akbar, according to Price's Memoirs, is said to have called, is Çadr Jahán who, as remarked above on p. 209 was a member of the Divine Faith. This in itself is improbable. Besides, the Tuzuk i Jahángírí, as published by Sayyid Ahmad, says nothing about it. Nor does the Iqbálnámah, a poor production (though written in beautiful Irání Persian), or Kháfí Khán, allude to the conversion, which, if it had taken place, would certainly have been mentioned. Kháfí Khán especially would have mentioned it, because he says of Badáoní, that he said and wrote about the religious views of the Emperor things which he should not have related (*vide Kháfí Khán*, I., p. 196). The silence of the author of the Dabistán is still more convincing, whilst the story of Mullá Tarson, and the abuse uttered by his companion against Akbar (p. 210), are proofs that Akbar did not 'repent.' To this we have to add that Jahángír, in his Memoirs, adopts a respectful phraseology when mentioning the sun, which he calls *Hazrat Nayyir i A'zam;* he also continued the *sijdah*, though offensive to pious Muhammadans, and Akbar's Solar Era, though it involved a loss to the revenue, because for every 33 lunar years, the state only received taxes for 32 solar years; he allowed some Hindu customs at Court, as the *Rák'hí* (*vide* above p. 184), and passed an order, not to force Hindus to join the Islám (*Tuzuk*, p. 100).

[2] Akbar died on the *Shab i Chahár-shambih*, 12*th Jumáda-lukhra* 1014 A. H., which, according to note 3 of p. 171, is our Tuesday night [not Wednesday, as in Price, and all European Historians], the 15th October, 1605, old style. Hence Akbar would have died in the night which followed the day on which he celebrated his sixty-third birth-day, if we adopt our mode of reckoning; *vide* p. 62, note 1.

There is some confusion in the Histories regarding the exact day of Akbar's death.

The *Pádisháhnámah* (Vol. I, p. 66) says that Akbar died at the age of sixty-three (solar) years and one day, in the night of the *Chahárshambih* (the night between Tuesday and Wednesday) of the 12th *Jumádalukhra*, corresponding to the 2d *Abán* of Akbar's Era. The *Mir-át* and *Kháfí Khán* (I, p. 235) give the same; the latter adds that Akbar died at midnight.

The Pádisháhnámah (p. 69) and Kháfí Khán (p. 246) fix the *julús*, or accession, of Jahángír for Thursday the 20th Jumá-

again to sophistry, and tried to create sensations under Jahángír.[1] As Jahángír did not trouble himself about any religion, Akbar's spirit of toleration soon changed to indifference, and gradually died out, when a reaction in favour of bigotry set in under Aurangzeb. But people still talked of the Divine Faith in 1643 or 1648, when the author of the Dabistán collected his notes on Akbar's religion.[2]

ÁÍN 78.

THE MUSTER OF ELEPHANTS.

The beginning of the musters is made with this animal. The *Khásah* elephants with their furniture and ornaments are the first which are daily brought before His Majesty, namely, ten on the first day of every solar month. After this, the *Halqah* elephants are mustered according to their number. On Tuesdays from ten to twenty are mustered. The Bitikchí, during the muster, must be ready to answer any questions as to the name of each animal (there are more than five thousand elephants, each having a different name. His Majesty knows to which section most of the elephants belong—ten elephants form a section of ten (*dahái*), and are in charge of an experienced officer); as to how each elephant came into the possession of His Majesty; the price; the quantity of food; the age of the animal; where it was born; the period of heat, and the duration of that state each time; the date when an elephant was made *khásah;* its promotion in the *halqahs;* the time when

---

dalukhra, or the 10th Abán, *i. e.*, 8 days after Akbar's death.

Muhammad Hádí, in his preface to the *Tuzuk i Jahángírí*, says that Akbar died on the *Shab i Chahárshambih*, 13*th Jumádalukhra;* and Sayyid Ahmad's Edition of the Tuzuk refers the *Julús* to Thursday the *eighth* Jumádalukhra; but the word هشتم is often confounded in MSS. with بیستم.

Again the *Mir-át*, and Sharíf i Iráni in his *Iqbálnámah*, mention the *Julús* as having taken place on Thursday, the *eleventh* Jumádalukhra. Lastly, the prefaces of the *Farhang i Jahángírí* refer the *julús* to the third Thursday [the twentieth day] of Jumádalawwál [a mistake for *alukhra*], corresponding to the *roz i khur*, or the *eleventh*, of Abán.

[1] *Vide* Tuzuk, p. 22.

[2] Only one of Akbar's innovations, the *Sijdah*, was *formally* abolished by Sháhjahán. "During the reigns of *'Arsháshyání* [Akbar], and *Jannat Makání* [Jahángír], it was customary for courtiers on meeting their Majesties, or on receiving a present, to prostrate themselves, placing the forehead on the ground.* * * This custom had also obtained in antiquity, but had been abolished by the Islám.* * * When His Majesty [Sháhjahán] mounted the throne, he directed his imperial care to *the re-introduction of the customs of the Islám, the strict observance of which had died away*, and turned his august zeal to re-building the edifice of the law of the prophet, *which had all but decayed.* Hence on the very day of accession, His Majesty ordered that putting the forehead on the ground should be restricted to God. Mahábat Khán, the Commander-in-Chief, objected at first, &c. His Majesty would not even allow the *Zamínbos*, or kissing the ground, and subsequently introduced a fourth Taslím [Akbar had fixed three, *vide* p. 158, l. 5]." *Pádisháhnámah* I, p. 110.

the tusks are cut; how many times His Majesty has mounted it; how many times it was brought for riding out; the time of the last muster; the condition of the keepers; the name of the Amír in charge. For all other elephants eight things are to be reported, *viz.*, the change of its name (?); the repetition of it; its price; how it came into the possession of His Majesty; whether it is fit for riding, or for carrying burdens; its rank; whether it has plain furniture or not; which rank the Faujdár has assigned to it. The rule is, that every Faujdár divides his elephants into four classes, separating those that are best from those that are worst, whether they are to remain with him, or whether he has to give some to other Faujdárs.

Each day five *tahwíli* (transferable) elephants are inspected by an experienced man. The following custom is observed: When new elephants arrive for the government, they are handed over in fifties or hundreds to experienced officers, who fix their ranks. Such elephants are called *Tahwíli* elephants. When His Majesty inspects them, their rank is finally settled, and the elephants are transferred to the proper sections. Every Sunday one elephant is brought before His Majesty, to be given away as a present to some deserving servant. Several *halqahs* are set apart for this purpose. The rank of the *kháçah* elephants formerly depended on the number of times they had been inspected by His Majesty; but now their precedence is fixed by the number of times His Majesty has mounted them. In the *halqahs*, the precedence of elephants is determined by the price. When all elephants have been mustered, the kháçah elephants are again examined, ten every day. Then come the elephants of the princes, who mostly march them past themselves. After them come the halqahs. As they are arranged in sections according to the price, some elephants have, at every muster, their value either enhanced or lowered, and are then put among their equals. For this reason, many Faujdárs are anxious to complete their sets, and place themselves for this purpose in a row at the time of the musters. His Majesty then gives the elephants to whomsoever he likes. If the number of the elephants of any Faujdár is found correct, some more are put in his charge; for such officers are thought of first. Faujdárs, whose elephants are found to be lean, are preferred, in making up the complements, to such as bring less than their original number. Each Faujdár receives some, provided he musters all his elephants. The Mushrif (accountant) receives orders where to keep the elephants.

The elephants of the grandees also, though not belonging to the fixed establishment, are almost daily brought before His Majesty, who settles their rank, and orders them to be branded with a peculiar mark. Elephants of dealers also are brought before His Majesty, who fixes their rank and value.

ÁÍN 79.

THE MUSTER OF HORSES.

They begin with the stables of forty; then come the stables of the princes; then the *khâçah* courier horses; then the country-bred, and all other stables. When the ten muhur horses have been inspected, they bring the *Gúṭs*, *Qisráqs*, the horses on which the hunting leopards ride, and the *Bárgír* horses (*vide* p. 133, l. 12; p. 135, l. 10 from below, and Áín 54, p. 139). The place of the horses at the musters, is determined by their value, and in the case of horses of the same value, the precedence is determined by the time of service. Before the musters, the horses are inspected by clever officers, who again fix their value, and divide them into three classes. When the rank of a horse has been put higher or lower, it is placed among his proper class-fellows. Those horses which belong to the third class, form separate stables, and are given away as presents. If horses have their value raised, they are given over to such keepers as bring to the musters either the full complement of their horses, or at least a complement not more deficient than by two. Incomplete stables are daily filled up during the musters; or if not filled up, they are put in charge of separate keepers. Twenty horses are daily mustered. On Sundays, horses are the first that are mustered. Double the usual number are then inspected. Several horses are also kept in waiting at Court, *viz.*, one from each of the sixty to the forty muhur stables, and one more from each of the thirty to the ten muhur stables. They are given away as presents or as parts of salaries. The precedence at musters of bázár-horses is fixed according to the price. According to the number of horses available, from twenty to a hundred are daily mustered. Before the musters, experienced officers fix the prices, which are generally enhanced at the time of the parades. Horses above thirty muhurs, have their value fixed in the presence of His Majesty. A cash-keeper attached to the State-hall is entrusted with money, so that horse-dealers have not to wait long for payment of their claims. When horses have been bought, they are marked with a peculiar brand, so that there may be no fraudulent exchange.

From foresight, and on account of the large profits of the horse-dealers, His Majesty enforces a tax of three Rupees for every *'Iráqí*, *Mujannas* (*vide* p. 140, note 2), and Arab, imported from Kábul and Persia; two and a half Rupees for every Turkish and Arabian horse imported from Qandahár; and two for Kábul horses, and Indian Arab breed.

ÁÍN 80.

THE MUSTERS OF CAMELS.

The beginning is made with country-bred camels, of which five *qaṭárs* are daily inspected. Those *pançadís* (officers in charge of five hundred camels) come first who are oldest. The Head Dárogah has the permission to parade before His Majesty a qaṭár of excellent Bughdís and Jammázahs. Then come the Bughdís, and after them the Jammázahs, the G'hurds, the Loks, and all other camels. The commencement of the musters takes place on Fridays, on which day double the usual number marches past. The precedence of camels is determined by their value.

ÁÍN 81.

THE MUSTER OF CATTLE.

Cattle are mustered according to their value, ten yokes daily. The muster commences on Wednesdays, on which day double the usual number is inspected.

On the day of the *Díwáli*—an old festival of this country; on which the Hindus pray to the cow, as they look upon reverence shewn to cows as worship—several cows are adorned and brought before His Majesty. People are very fond of this custom.

ÁÍN 82.

THE MUSTERS OF MULES.

The musters of this beast of burden commence on Thursdays, when six *qaṭárs* are inspected in order of their value. Mules are mustered once a year.

Formerly all musters took place as above described. But now horses are inspected on Sundays; camels, cows, and mules, on Mondays; the soldiers, on Tuesdays; on Wednesdays, His Majesty transacts matters of Finance; on Thursdays, all judicial matters are settled; Fridays His Majesty spends in the Harem; on Saturdays, the elephants are mustered.

ÁÍN 83.

THE PÁGOSHT REGULATION.[1]

His Majesty has taught men something new and practical, and has made an excellent rule, which protects the animal, guards the stores, teaches equity, reveals the excellent, and stimulates the lazy man. Experienced people saw their wisdom increased, and such as inquired into this secret, obtained their desires.

His Majesty first determined the quantity of daily food for each domestic animal, and secondly determined the results, which different quanta of food produce in the strength of an animal. In his practical wisdom and from his desire of teaching people, His Majesty classifies the dishonest practices of men. This is done by the *Págosht* regulation. From time to time an experienced man is sent to the stables of these dumb creatures. He inspects them, and measures their fatness and leanness. At the time of the musters also the degrees of fatness or leanness are first examined into, and reports are made accordingly. His Majesty then inspects the animals himself, and decreases or increases the degrees of their fatness or leanness as reported, fixing at the same time the fine for leanness. If, for some reason, the allowance of grain or grass of an animal had been lessened, proper account is taken of such a decrease. The leanness of an elephant has been divided into thirteen classes. * * * [2]

---

[1] The object of *this* curious regulation was to determine the amount of the fines which Akbar could justly inflict on the officers in charge of the animals belonging to the Court, if the condition of the animals did not correspond to his expectations. The daily quanta of food supplied to the animals had been fixed by minute rules (Áíns 43, 51, 62, 67, 70), and the several Dároghahs (store-keepers) entered into their *roznámchahs*, or day-books, the quantum daily given to each animal. These day-books were produced at the musters, and special officers measured the fatness of each animal, and compared it with the food it had been receiving since the last muster, as shewn in the day-book. Akbar determined a maximum fatness (A), which corresponded to a maximum quantity of daily food (*a*). Similarly, he determined a fatness (B), resulting from a daily quantity of food (*b*), though Abulfazl does not specify how this was done. The quantities A, B, &c. were then divided into several fractions or degrees, as $\frac{8A}{8}$, $\frac{7A}{8}$, $\frac{6A}{8}$, &c. Thus in the case of elephants, the maximum fatness (A) was divided into 13 degrees.

Pá-gosht means *a quarter of flesh*, and evidently expresses that the food *a* only produced $\frac{3}{4}$A. instead of $\frac{4}{4}$A. The name was then transferred to the regulation.

We do not know how the mustering officers applied Akbar's rule, whether by measuring the circumference of an animal, or by weighing them. The rule may appear fanciful and unpractical; but it shews how determined Akbar was to fathom the dishonesty of his Dároghahs. Hence the carefulness which he shewed in assessing fines (Áíns 48, 57), in ordering frequent musters of animals and men, in reviving the regulations of branding animals as given by 'Aláuddín Khiljí and Sher Sháh, in fixing the perquisites, in paying cash for all supplies, in allowing veterinary surgeons certain powers, &c.

[2] The text (p. 103, l. 19) enumerates several fractions, or degrees of leanness, but they give no sense. The confusion of the MSS. is due to the want of interpunctuation.

For all other animals beside the elephant, six degrees have been laid down, *viz.* the second, third, fifth, seventh, ninth, and tenth [degrees of the thirteen for the elephant]. And as it is the custom of the Faujdárs, to mark, at the time of the musters of the halqahs, one halqah which is the best in their opinion, and to put separate that which is the worst, the officers who inquire into the leanness and fatness, deduct fifty *per cent.* from the degree of the former, and count one half for the latter halqah. If the Faujdár works in concert with the Dároghah, and both sign the entries in the day-book, the Faujdár is responsible for one-fourth, and the Dároghah for the remaining part of the food. The leanness of old elephants is fixed by the condition of the whole *halqah.* In the horse stables the grooms, water-carriers, and sweepers are fined one-fourth of the wages. In the case of camels, the Dároghah is fined the amount of the grain, and the driver for the share of the grass. In the case of oxen used for carriages, the Dároghah is fined for the part of the grass and the grain; but the driver is not liable. In case of heavy carriages, half the fine is remitted.

ÁÍN 84.

ON ANIMAL FIGHTS. REGULATIONS FOR BETTING.

His Majesty is desirous of establishing harmony among people of different classes. He wishes to arrange feasts of friendship and union, so that every thing may be done with propriety and order. But as all men do not possess a mind capable of selecting that which is true, and as every ear is not fit to listen to wisdom, His Majesty holds social meetings for amusement, to which he invites a large number of people. Through the careful arrangements of His Majesty, the court has been changed from a field of ambitious strife to a temple of a higher world, and the egotism and conceit of men have been directed to the worship of God. Even superficial, worldly people thus learn zeal and attachment, and are induced by these gatherings to enquire after the road of salvation.[1]

Deer-fights.

The manner of fighting of this animal is very interesting, and its method of stooping down and rising up again is a source of great amusement. Hence His Majesty pays much attention to this animal, and has succeeded in training this stubborn and timid creature. One hundred and one deer are *kháçah;* each has a name, and some peculiar qualities. A keeper is placed over every ten. There are three kinds of fighting deer,

[1] To join Akbar's Divine Faith.

first, those which fight with such as are born in captivity and with wild ones; *secondly*, such as fight best with tame ones; and *thirdly*, such as fiercely attack wild deer. The fights are conducted in three different ways. *First*, according to number, the first fighting with the second, the third with the fourth, and so on, for the whole. At the second go, the first fights with the third, the second with the fourth, and so on. If a deer runs away, it is placed last; and if it is known to have run away three times, it ceases to be *kháçah*. Betting on these fights is allowed; the stake does not exceed 5 dáms. *Secondly*, with those belonging to the princes. Five *kháçah* pair fight with each other, and afterwards, two kháçah pair from His Majesty's hunting-ground; then five other *kháçah* pair. At the same time two pair from the deer park of His Majesty's hunting-ground fight, and afterwards five *kháçah* deer engage with five deer of the eldest prince. Then fourteen *kháçah* pair engage with each other, and fight afterwards with the deer of the prince, till the fight with the deer of the prince is finished. Upon this, the deer of princes fight with each other, and then *kháçah* deer. The betting on such fights must not exceed one muhur. *Thirdly*, with the deer of other people.

His Majesty selects forty-two from his nearer friends, and appoints every two of them as opponents, forming thus one and twenty sets. The first winners receive each thirty deer, and all others get one less, so that the last get each eleven. To every set a *Mal*,[1] a water-buffalo, a cow, a *quchqár* (fighting ram), a goat, and a cock, are given. Fights between cows and goats are rarely mentioned to have been held in ancient times. Before the fighting commences, two *kháçah* deer are brought in trimmed up, and are set against two deer belonging to people of various sets. First, with a deer belonging to a powerful grandee, and then the fight takes place before His Majesty. If a general assembly is announced, the fight may also take place, if the deer belongs to a commander of One Thousand. The betting on *kháçah* deer is eight muhurs, and on deer belonging to one of a set, five muhurs, if it be an *Aṭkal*; and four, if an *Anín*. As deer have not equal strength and impetuosity of attack, the rule among deer-keepers is, once to select each of their deer in turn and take it to the arena. Such deer are called *Anín*. Another then estimates its strength, and brings a deer as opponent. The latter is called *Aṭkal*. In case of *Mals*, the betting is five muhurs; for water buffaloes and cocks, four; for cows and fighting rams, and goats, two. A commander of One Thousand is allowed to bet six muhurs on a *kháçah* deer; and with one of his own rank,[2] 3¾ muhurs, if the bet is on an *Aṭkal*; and three on an *Anín*; and so also in the same

[1] *Mal*, according to Aín 6 of the Second Book, is the name for a Gujrát wrestler.

[2] Or perhaps with his opponent in the set (*mísl*).

proportion on *Mals*, water-buffaloes, and cocks; but on cows, fighting rams, and goats, two. A commander of Nine Hundred may bet on a *khâçah* deer 50 Rupees; and with one of his own rank, 30¼ *R.* on an *Aṭkal*, and 25 *R.* on an *Anín;* on a *Mál* 3⅛ muhurs; on a water-buffalo and a cock 3½ *M.*; and on all other animals, 1½ *M.* A commander of Eight Hundred is allowed to bet 48 R. on a *khâçah* deer; with one of his rank, 30 *R.* on an *Aṭkal;* and 24 *R.* on an *Anín;* on a *Mal* 3⅛ *M.*; on a water-buffalo and cock, 2½ *M.*, and on other animals, as before. A commander of Seven Hundred is allowed to bet 44 *R.* on a *khâçah* deer; with one of his own rank on an *Aṭkal* 27½ *R.*; on an *Anín* 22 R.; on a *Mal* 3 *M*; on other animals as before. A Commander of Six Hundred may bet 40 *R.* on a *khâçah* deer; with one of his own rank, 25 *R.* on an *Aṭkal;* 20 *R.* on an *Anín;* on other animals as before. A Commander of Five Hundred may bet 4 *M.* [36 *R.*] on a *khâçah* deer; with one of his own rank 2½ *M.* on an *Aṭkal*, and 2 *M.* on a *Anín*; on other animals, as the preceding. A Commander of Four Hundred may bet 34 *R.* on a *khâçah* deer; with one of his own rank 21½ *R.* on an *Aṭkal;* 17 *R.* on an *Anín;* on a *Mal* 2¾ *M.;* on a water-buffalo and cock, 2 *M.*; on a cow, a fighting ram, and goat, 1 *M.* A Commander of Three Hundred may bet 30 *R.* on a *khâçah* deer; with one of his own rank, 18¾ *R.* on an *Aṭkal;* 15 *R.* on an *Anín;* 2½ *M.* on a *Mal;* on other animals as the preceding. A Commander of Two Hundred may bet 24 *R.* on a *khâçah* deer; with one of his own rank 15 *R.* on an *Aṭkal*, 12 *R.* on an *Anín*, and on other animals as before. A Commander of One Hundred may bet 2 *M.* on a *khâçah* deer; with one of his own rank 1½ *M.* on an *Aṭkal;* 1 *M.* on an *Anín*; and on other animals as before. A Commander of Eighty may bet 16 *R.* on a *khâçah* deer; with one of his own rank 10 *R.* on an *Aṭkal;* 8 *R.* on an *Anín;* 17 *R.* on a *Mal;* 1⅛ *M.* on a water-buffalo and a cock; on other animals as before. A Commander of Forty may bet 12 *R.* on a *khâçah* deer; with one of his own rank 7½ *R.* on an *Aṭkal;* 6 *R.* on a *Anín*; on other animals as before. A Commander of Twenty may bet 10 *R.* on a *khâçah* deer; 6½ *R.* with one of his own rank on an *Aṭkal;* 5 *R.* on an *Anín;* on other animals as before, A Commander of Ten may bet 8 *R.* on a *khâçah* deer, and 5 *R.* on an *Aṭkal*, with one of his own rank; 4 *R.* on an *Anín;* on other animals as before. People who hold no *mançabs*, bet 4 *R.* on a *khâçah* deer; with one of their own rank, 2½ *R.* on an *Aṭkal;* 2 *R.* on an *Anín;* 15 *R.* on a *Mal;* on other animals as before.

But if the opponent hold a less rank, the amount of the bet is determined according to the amount which the opponent is allowed to bet on an *Anín*. When the last pair comes, the betting is everywhere on the deer. A fourth part of what people take from each other in *Mal* fights, is given to the victorious wrestler. The presents which His Majesty makes on such occasions, have no limits.

The rule is that every one of such as keep animals brings on the fourteenth night of the moon one deer to the fight. The Bitikchí of this department appoints half the number of deer as *Anins*, and the other half as *Aṭkals*. He then writes the names of the *Aṭkals* on paper slips, folds them up, and takes them to His Majesty, who takes up one. The animal chosen has to fight with an *Anin*. As such nights are clear, fights are generally announced for that time.

Besides, there are two other classes of deer, *kotal*, and *half kotal*. The number of each is fixed. As often the number of *kháçah* deer decreases, the deficiency is made up from the *kotal* deer; and the deficiency in the number of *kotals* is made up from *half kotals*. One pair of *kotals* also is brought to the fight, so that they may be tried. Hunters supply continually wild deer, and bring them to His Majesty, who fixes the price. A fat superior deer costs 2 *M.*; a thin superior one, 1 *M.* to 15 *R.*; a fat middling one, 12 *R.*; Do. lean, 8 *R.*; a third class fat one, 7 *R.*; Do. thin, 5 *R.*; a fourth class fat one, 4 *R.*; Do. lean, 2½ to 2 *R.*

Deer are kept and fed as follows: *Kháçah* deer selected for fighting before His Majesty, get 2 *s.* grain, ½ *s.* boiled flour, ½ *s.* butter, and 1 *d.* for grass. Such as are kept on His Majesty's hunting-grounds, *kotals*, and fighting deer of the sets, get 1¾ *s.* of grain, and flour and butter as before. The grass is supplied by each amateur himself. All *kháçah*, home-bred, *kotal* deer, and those of His Majesty's hunting-ground, have each one keeper. The fighting deer of the sets have one keeper for every two; the single last one has a keeper for itself. Nothing is given for grass. Deer which are given to people to have them fattened, get 1¾ *s.* grain, and ½ *d.* for grass. They have one keeper for every four; but one for every two, if they are fit to become *kháçah*. Some deer are also sent to other towns; they get 1½ *s.* grain, and have each one keeper. If deer are newly caught, they get no regular food for seven days, after which they get ½ *s.* of grain for a fortnight. They then get 1 *s.*, and when one month is over, 1½ *s.*

In the deer park, Mançabdárs, Ahadís, and other soldiers are on staff-employ. The pay of foot-soldiers varies from 80 to 400 *d.*

His Majesty has 12,000 deer; they are divided into different classes, and proper regulations are made for each of them. There is also a stud for deer, in which new results are obtained. A large female gets 1½ *s.* grain, and ½ *d.* for grass. A new born deer drinks the milk of the dam for two months, which is reckoned as equivalent to ¼ *s.* of grain. Afterwards, every second month, the allowance is increased by a quarter ser of grain, so that after a period of two years, it gets the same as its dam. For grass, ¼ *d.* is given from the seventh to the tenth month. Young male ones also get weaned after two months, when they get ⅜ *s.* of grain, which is increased

by that quantity every second month, so that, after two years, they get 2½ *s.* From the fifth to the eighth month, they get ½ *d.* for grass, after which period they get ½ *d.* for grass.

I have given a short description of animal fights as announced for general assemblies. His Majesty announces them also for day time; but as often a more important act of worship is to be performed, he announces them for the night. Or else His Majesty thinks of God, and seeks for wisdom in self-examination; he cares neither for cold nor heat; he spends the time which others idle away in sleep, for the welfare of the people, and prefers labour to comfort.

ÁÍN 85.

ON BUILDINGS.

Regulations for house-building in general are necessary; they are required for the comfort of the army, and are a source of splendour for the government. People that are attached to the world will collect in towns, without which there would be no progress. Hence His Majesty plans splendid edifices, and dresses the work of his mind and heart in the garment of stone and clay. Thus mighty fortresses have been raised, which protect the timid, frighten the rebellious, and please the obedient. Delightful villas, and imposing towers have also been built. They afford excellent protection against cold and rain, provide for the comforts of the princesses of the Harem, and are conducive to that dignity which is so necessary for worldly power.

Everywhere also *Sarâis* have been built, which are the comfort of travellers and the asylum of poor strangers. Many tanks and wells are being dug for the benefit of men and the improvement of the soil. Schools and places of worship are being founded, and the triumphal arch of knowledge is newly adorned.

His Majesty has enquired into every detail connected with this department, which is so difficult to be managed, and requires such large sums. He has passed new regulations, kindled the lamp of honesty, and put a stock of practical knowledge into the hands of simple and inexperienced men.

ÁÍN 86.

THE PRICES OF BUILDING MATERIAL, &c.

Many people are desirous of building houses; but honesty and conscientiousness are rare, especially among traders. His Majesty has

carefully inquired into their profits and losses, and has fixed the prices of articles in such a manner, that both parties are satisfied.

Red sandstone costs 3 *d. per man.* It is obtainable in the hills of Fathpúr Síkrí, His Majesty's residence, and may be broken from the rocks at any length or breadth. Clever workmen chisel it so skilfully, as no turner could do with wood; and their works vie with the picture book of *Máni* [the great painter of the Sassanides]. Pieces of red standstone (*sang i gulúlah*), broken from the rocks in any shape, are sold by the *p'hari*, which means a heap of such stones, without admixture of earth, 3 *gaz* long, 2½ *g.* broad, and 1 *g.* high. Such a heap contains 172 *mans*, and has a value of 250 *d.*, *i. e.*, at the rate of 1 *d.* 11¼ *j. per man.*

Bricks are of three kinds: burnt, half burnt, unburnt. Though the first kind are generally made very heavy, they weigh in the average three *sers*, and cost 30 *d. per mille.* The second class cost 24 *d.*, and the third 10 *d.* per thousand.[1]

Wood. Eight kinds of wood are in general use. 1. *Sísaun*, unrivalled for its beauty and durability. A block 1 *Iláhí gaz* long, and 8 *Tassújes* broad and high, costs 15 *d.* 6 *j.* But if the height be only 5 or 6 *T.*, 11 *d.* 10¾ *j.* Other sizes according to the same proportion. 2. *Nazhú*, called in Hindí *Jídh.*[1] A beam, 10 *T.* broad and high, costs *per gaz* 5 *d.* 13¾ *j.*; and a half size beam, from 7 to 9 *T.* broad and high, costs *per gaz* 5 *d.* 3¾ *j.* 3. *Dasang* (?), called in Hindí *Karí;* a beam 3 *T.* broad, and 4 *gaz* long, costs 5 *d.* 17½ *j.* 4. *Ber*,[2] 1 *T.* broad and high, 4 *gaz* long, 5 *d.* 17¾ *j.*; so also *Tút*, or Mulbery. 5. *Mughilán* (Babúl), of the same cubic content as No. 4., 5 *d.* 2 *j.* 6. *Sirs*, size as before, 10 *d.* 4 *j.* 7. *Dayál*, same size, first quality 8 *d.* 22½ *j.*; second quality, 8 *d.* 6½ *j.* 8. *Bakáyin*, same size, 5 *d.* 2 *j.*

Gaj i Shírín, or sweet limestone. There is a quarry near Bahírah. When a merchant brings it, it costs 1 *R. per three mans*; but if any one sends his own carriers, only 1 *d. Sangín qal'i, per man* 5 *d.* 5 *j. Çadafí* 5 *d. Chúnah*, or quick lime, 2 *d. per man;* it is mostly boiled out of *kangur*, a kind a solid earth resembling stone in hardness.

Iron cramps, if tinned, 13 for 18 *d.*; plain ones, for 6 *d.*

Iron door-knockers, from Persia and Túrán, tinned; large ones, 8 *d. per pair;* small ones, 4 *d.* Indian do., tinned, 5½ *d.*; plain ones, 4 *d.* 12 *j.*

Gul Mekh (large nails with broad heads), 12 *d. per ser. Dinárinails*, 5 *d. per ser. Gogah*, or small nails, tinned, first quality 7 *d.* for one hundred; second quality, 5 *d.*; smallest, 4 *d.*

---

[1] This word is spelt *Chúdh* in Ain 90, No. 59.

[2] "The *Ber* was in great request in Akbar's time as a building timber, but is now little used, except for kingposts and tiebeams, as the direct cohesion of its fibres is equal to that of Salwood." *Balfour's Timber Trees of India.*

Screws and nuts, chiefly used for doors and boxes. Tinned, 12 *d. per ser;* plain, 4 *d.*

Rings, tinned, 6 *d. per ser;* plain, 4 *d.*

K'haprel, or tiles. They are one hand long and ten fingers broad, are burnt, and are used for the roofs of houses, as a protection against heat and cold. Plain ones, 86 *d. per mille;* enamelled, 30 *d.* for ten.

Qulbah, or spouts, to lead off water. Three for 2 *d.*

Báns, or bamboo. It is used for spears. First quality, 15 *d.* for twenty pieces; second quality, 12 *d.* for do.; third quality, 10 *d.* for do. The price of some kinds of bamboo is much higher. Thus a peculiar kind is sold at 8 *Ashrafís* [Muhurs] *per piece*. They are used for making thrones. Bamboo, at a rupee *per piece*, is common. *Patal* is made of the reed which is used for *qalams* (pens). It is used for covering ceilings. First quality, cleaned, 1½ *d. per square gaz;* second quality, 1 *d.* Sometimes they sell *patal* at 2 *d.* for pieces 2 *gaz* long, and 1½ *g.* broad. *Sirkí* is made of very fine *qalam* reeds, looks well, and is very smooth; it is sold at the rate of 1½ *d. per pair*, 1½ *g.* long, and 16 *girihs* broad. The ceilings and walls of houses are adorned with it.

K'has is the sweet-smelling root of a kind of grass, which grows along the banks of rivers. During summer, they make screens of it, which are placed before the door and sprinkled with water. This renders the air cool and perfumed. Price, 1½ *R. per man.*

Káh i chappar (reeds for thatching) is sold in bundles, which are called in Hindí *púlah, per ser* from 100 to 10 *d.*

Bhus, or wheat straw, used for mixing with mortar, 3 *d. per man.*

Káh i Dáb'h, straw, &c., which is put on roofs, 4 *d.* for a load of 2 *mans.*

Múnj, the bark of *qalam* reeds, used for making ropes to fasten the thatching, 20 *d. per man.*

San is a plant. Peasants mix it with quicklime. People also make ropes of it for well buckets, &c., 3 *d. per man.*

Gum, of an inferior quantity, is mixed with quicklime, 70 *d. per man.*

Sirish i káhí, or reed glue, is mixed with sweet limestone, 4 *d. per ser.*

Luk is the flower-bunch of the reed which is used for matting. People burn it, and use it as a candle. It is also mixed with quicklime and *Qal'í*. Price, 1 *R. per man.*

Simgil (silver clay) is a white and greasy clay, 1 *d. per man.* It is used for white-washing houses. It keeps a house cool and looks well. *Gil i surhh*, or red clay, called in Hindí *gerú*, 40 *d. per man.* There is a quarry of it in the hills of Gwáliár.

Glass is used for windows; price, 1 *R.* for 1¼ *s.*, or one pane for 4 *d.*

ÁÍN 87.

ON THE WAGES OF LABOURERS.

Gilkárs (workers in lime), first class workmen, 7 *d.*; second class, 6 *d.*; third class, 5 *d.*

Sangtarásh (stone-masons). The tracer gets 6 *d.* for each *gaz;* one who does plain work, 5 *d.* A labourer employed in quarries gets for every *man* he breaks, 22 *j.*

Carpenters, first class, 7 *d.*; second do., 6 *d.*; third do., 4 d.; fourth do., 3 *d.*; fifth do., 2 *d.* For plain job-work, a first class carpenter gets 1 *d.* 17 *j.* for one *gaz;* second class do., 1 *d.* 6 *j.*; third class do., 21 *j.*

Pinjarah sáz (Lattice work and wicker work). *First*, when the pieces are joined (fastened with strings), and the interstices be dodecagonal, 24 *d.* for every square *gaz;* when the interstices form twelve circles, 22 *d.*; when hexagonal, 18 *d.*; when *ja'farí* [or rhombus-like, one diagonal being vertical the other horizontal], 16 *d.*; when *shaṭranjí* [or square fields, as on a chess board], 12 *d.* for every square *gaz.*

Secondly, when the work is *ghair waçlí* (the sticks not being fastened with strings, but skilfully and tightly interwoven), for first class work, 48 *d.* per square *gaz;* for second class do., 40 *d.*

Arrahkash (one who saws beams). For job-work, *per square gaz* 2½ *d.*, if *sisaun* wood; if *nazhú* wood, 2 *d.* A labourer employed for the day, 2 *d.* There are three men for every saw, one above, two below.

Bildárs (bricklayers), first class, daily 3½ *d.*; second class do., 3 *d.* If employed by the job, for building fortress walls with battlements, 4 *d.* per *gaz;* for laying foundations, 2½ *d.*; for all other walls, 2 *d.* For digging ditches, ½ *d. per gaz.*

☞ The *gaz* of a labourer contains 32 *ṭassúje.*

Cháh-kan, or well diggers, first class work men, 2 *d. per gaz;* second class do., 1½ *d*; third class do., 1½ *d.*

Ghauṭah khur, or well-divers. They clean wells. In the cold season, 4 *d. per diem;* in the hot season, 3 *d.* By the job, 2 *R.* for cleaning a depth of one *gaz.*

Khisht tarásh, or tile makers, for 100 moulds, smoothened, 8 *d.*

Surkhíkob (pounders of old bricks), 1½ *d.* for a heap of 8 *mans.*

Glass-cutters, 100 *d. per gaz.*

Bamboo-cutters, 2 *d. per diem.*

Chapparband, or thatchers, 3 *d. per diem;* if done by the job, 24 *d.* for 100 *gaz.*

Patalband (*vide* p. 224), 1 *d.* for 4 *gaz.*

Lak'hírah. They varnish reeds, &c., with lac. Wages, 2 *d. per diem.*

Ábkash, or water-carriers. First class, 3 *d. per diem ;* second class do., 2 *d.* Such water-carriers as are used for furnishing house-builders with water for mortar and quicklime, get 2 *d. per diem.*

ÁÍN 88.

ON ESTIMATES OF HOUSE BUILDING.

Stonebuildings. For 12 *gaz*, one *p'ha* (*vide* above *Á'ín* 86) is required ; also 75 *mans chúnah ;* but if the walls be covered with red stone, 30 *mans chúnah* are required *per gaz.*

Brickbuildings. For every *gaz*, there are required 250 bricks of three *ser* each, 8 *mans chúnah*, and 2 *m.* 27 *s.* pounded brick (*surkhí*).

Claybuildings. 300 bricks are required for the same ; each brick-mould contains 1 *s.* of earth and ½ *s.* of water.

Astarkárí work. For every *gaz*, 1 *man chúnah*, 10 *s. qal'í*, 14 *s. surkhí*, and ¼ *s. san* (*vide* p. 224) are required.

Çandalahkárí work. For every *gaz*, 7 *s.* of *qal'í*, and 3 *s. surkhí* are required.

Safídkárí work. 10 *s.* of *qal'í* are required *per gaz.*

Gajkárí work (white-washing). For walls and ceilings, 10 *s. per gaz ;* for pantries, 6 *s.* ; chimneys, 10 *s.*

Windows require 24 *s.* of lime, 2½ *s.* of glass, 4 *s.* of *sirish i káhí* (putty).

Plaster for walls, for 14 *gaz* 1 *m.* of straw, and 20 *m.* earth ; for roofs and floors, do. for 10 *gaz.* For ceilings, and the inside of walls, do. for 15 *gaz.*

Lac (varnish work) used for *chighs* [sliced bamboo sticks, placed horizontally, and joined by strings, with narrow interstices between the sticks. They are painted, and are used as screens]. If red, 4 *s.* of lac, and 1 *s.* of vermilion ; if yellow, 4 *s.* of lac, 1 *s.* of *zarníkh* (auripigment). If green, ¼ *s.* of indigo is mixed with the lac, and *zarníkh* is added ; if black, 4 *s.* of lac and 8 *s.* of indigo.

ÁÍN 89.

RULES FOR ESTIMATING THE LOSS IN WOOD CHIPS.[1]

One *gaz* = 24 *tassúje*

1 *tassúj* = 24 *taswánsahs*

1 *taswánsah* = 24 *khám*

1 *khám* = 24 *zarrahs.*

Whatever quantity of wood be used, the chippings (?) are reckoned at

---

[1] I am not sure whether this Áín has been correctly translated.

one-eighth (?). In *Sísaun* wood, *per tassúj*, 26¼ *sers*, 15 *tánks*; *Babúl* wood 23½ *s.* 5 *d.*; *Sirs* wood, 21½ *s.* 15 *tánks*; *Nazhú* wood, 20 *s.*; *Ber* wood, 18½ *s.*; *Dayál* wood, 17 *s.* 20 *tánks*.

ÁÍN 90.

THE WEIGHT OF DIFFERENT KINDS OF WOOD.

His Majesty, from his practical knowledge, has for several reasons experimented on the weight of different kinds of wood, and has thus adorned the market place of the world. One cubic *gaz* of dry wood of every kind has been weighed, and their differences have thus been established. *Khanjak* wood has been found to be the heaviest, and *Safídár* the lightest wood. I shall mention 72 kinds of wood.

The weight of one cubic *gaz* of

		Máns.	*Sers.*	*Tánks.*
1.	Khanjak, ... is	27	14	—
2.	Amblí (*Tamarindus Indica*)	24	8¾	25
3.	Zaitún (*Gyrocarpus Asiaticus*,[1] *?*)	21	24	—
4.	Balúṭ (Oak), ...			
5.	K'her (*Acacia catechu*)	21	16	—
6.	K'hirní (*Mimusops*), ...			
7.	Parsiddh, ...	20	14	17
8.	Ábnús (Ebony), ...	20	9	20
9.	Sain (*Acacia Suma*), ...	19	32	10
10.	Baqqam (*Caesalpina sappan*), ...	19	22½	10
11.	K'harhar, ...	19	11¼	5
12.	Mahwá (*Bassia latifolia*), ...	18	32½	2
13.	Chandaní, ...	18	20½	10
14.	P'huláhí, ...			
15.	Red Sandal, in Hindí *Rakt Chandan*, (*Pterocarpus Santalinus*), ...	18	4½	10
16.	Chamrí, ...	18	2	7½
17.	Chamar Mamrí	17	16¼	—
18.	'Unnáb (*Zizyphus sativus*), ...	17	5	4
19.	Sisaun Patang (*vide* No. 40), ...	17	1¾	7
20.	Sándan, ...	17	1	28
21.	Shamshád (*Buxus Sempervirens*,)	16	18	25

[1] So according to Watson's Index. But Voigt, in his *Hortus Bengalensis* says, the wood of *Zaitún*, or *Gyrocarpus*, is very light, and is used for boats. Abulfazl puts *Zaitún* among the heaviest woods.

		Mans.	Sers.	Tánks.
22.	D'hau (*Grislea tomentosa*),	16	1	10
23.	Ámlah, *Hind.* Ánwlah, (*Emblica officinalis*),	16	1½	1

72.	Safidár,	6	7	22½

☞ In the above weights, the *ser* has been taken at 28 *dáms*.

End of the First Book.

BOOK SECOND.

THE ARMY.

ÁÍN 1.

THE DIVISIONS OF THE ARMY.

His Majesty guides the Imperial Army by his excellent advice and counsel, and checks in various ways attempts at insubordination. He has divided the army, on account of the multitude of the men, into several classes, and has thereby secured the peace of the country.

With some tribes, His Majesty is content, if they submit; he does not exact much service from them, and thus leads many wild races towards civilization.

The Zamindárs of the country furnish more than four millions, four hundred thousand men, as shall be detailed below (Third Book).

Some troopers are compelled by His Majesty to mark their horses with the Imperial brand. They are subject to divisions into ranks, and to musters.

Some soldiers are placed under the care and guidance of *one* commander. They are called *Ahadís*, because they are fit for a harmonious *unity*. His Majesty believes some capable of commanding, and appoints them as commanders.

A large number are worthy but poor; they receive the means of keeping a horse, and have lands assigned to themselves, without being obliged to mark their horses with the Imperial brand. Túránís and Persians get 25 *Rupees;* and Hindústánís, 20 *R.* If employed to collect the revenue, they get 15 *R.* Such troopers are called *Baráwardí.*

Some Commanders who find it troublesome to furnish men, get a number of such soldiers as accept the Imperial brand. Such troops are called *Dákhilís.*

In the contingent of a Commander (*mançabdár*) of Ten Thousand, other *mançabdárs* as high as *Hazáris* (Commanders of One Thousand) serve; in the contingent of a Commander of Eight Thousand, Mançabdárs up to *Hashtçadís* (Commanders of Eight Hundred) serve; in the contingent of a Commander of Seven Thousand, Mançabdárs up to Haftçadís (Commanders of Seven

Hundred) serve; in the contingent of a Commander of Five Thousand, other Mançabdárs as high *Pançadís* (commanders of Five Hundred) serve; and in the contingent of a *Pançadí*, Mançabdárs as high as *Çadís* (Commanders of One Hundred) serve. Mançabdárs of lower ranks do not serve in the contingents of high Mançabdárs.

Some Commanders also receive auxiliaries. Such reserves are called *Kumakis*.

At the present time, those troopers are preferred whose horses are marked with the Imperial brand. This class of soldiers is superior to others. His Majesty's chief object is to prevent the soldiers from borrowing horses (for the time of musters), or exchanging them for worse ones, and to make them take care of the Imperial horses; for he knows that avarice makes men so short-sighted, that they look upon a loss as a gain. In the beginning of the present reign, when His Majesty was still 'behind the veil,' many of his servants were given to dishonest practices, lived without check, and indulged, from want of honour, in the comforts of married life. Low, avaricious men sold their horses, and were content to serve as foot-soldiers, or brought instead of a superior horse, a *tatoo* that looked more like an ass. They were magniloquent in their dishonesty and greediness of pay, and even expressed dissatisfaction, or rebelled. Hence His Majesty had to introduce the Descriptive Roll System, and to make the issue of pay dependent upon the inspection of these rolls (*vide* below Aín 7). This stopped, in a short time, much lawlessness, and regenerated the whole military system. But at that time the regulations regarding the Imperial brand were not issued, as His Majesty had adopted the advice of some inexperienced men, who look upon branding an animal as an act of cruelty; hence avaricious men (who cannot distinguish that which is good from that which is bad, having neither respect for themselves nor their master, and who think to promote a cause by ruining it, thus acting against their own interest) adopted other vicious practices, which led to a considerable want of efficiency in the army. Horse borrowing was then the order of the day. His Majesty, therefore, made the branding of the horses compulsory, in addition to the Descriptive Roll System. Easy-minded idlers thus passed through a school of discipline and became worthy men, whilst importunate, low men were taught honorableness and manliness. The unfeeling and avaricious learned the luxury of magnanimity. The army resembled a newly irrigated garden. Even for the Treasury the new regulations proved beneficial. Such are the results which wisdom and practical knowledge can produce! Branding a horse may indeed inflict pain; but when viewed from a higher point, it is the cause of much satisfaction to the thinking man.

ÁÍN 2.

ON THE ANIMALS OF THE ARMY.

In the 18th year of his reign, His Majesty introduced the branding system [*vide* p. 140, note 1]. The ranks of the men were also laid down in the best manner, and the classification of the animals belonging to the army was attended to. The requirements for each were noted down, and excellent regulations were issued. The maximum and minimum prices were enquired into by His Majesty, and average prices were fixed. A proper check by accounts was enforced, and regulations on this subject were laid down. The Bakhshís were also freed from the heavy responsibility of bringing new men, and every thing went on smoothly.

1. *Horses.* They have been divided into seven classes. The rate of their daily food has also been fixed. These seven classes are *Arabs*, *Persian horses*, *Mujannas*, *Turkí horses*, *Yábús*, *Tázís*, and *Janglah* horses.

The first class are either Arab bred, or resemble them in gracefulness and prowess. They cost 720 *dáms per mensem*; and get daily 6 *s.* of grain (the price of which, in the estimates for each animal, is put down at 12 *d. per man*), 2½ *d.* of g'hí, 2 *d.* for sugar, and 3 *d.* for grass. Also, for a *jul*, *artak*, *yálposh*, *girth* (His Majesty does not call it *tang*, but *farákhí*), *gaddí*, *nakhtahband*, *qaizah* (which the vulgar pronounces *qáizah*), *magasrán*, curry comb, *hatt'hí* (a bag made of horse hair for washing the horse), towel, *páiband*, *nails*, &c., [*vide* p. 136], 70 *d. per mensem*, which outlay is called *kharj i yaráq i asp* (outlay for the harness of the horse). Besides, 60 *d.* for the saddle, and an *apchí* (?) every second month; 7 *d. per mensem* for shoes; and 63 *d.* for a groom, who gets double this allowance, if he takes charge of two horses. Total, 479 *d.* But as His Majesty cares for the comfort of the army, and enquires into the satisfactory condition of the soldiers, he increased, in the very beginning, this allowance of 479 *d.* by 81 *d.*; and when the value of the Rupee was increased from 35 to 40 *dáms*, His Majesty granted a second additional allowance of 80 *d.* This coin [the Rupee] is always counted at 40 *d.* in salaries. Afterwards, a third additional allowance of 2 *R.* (80 *d.*) was ordered to be given for each class of horses, except *Janglahs*, which horses are now-a-days entirely left out in the accounts.

The *second* class are horses bred in Persia, or such as resemble Persian horses in shape and bearing. Monthly allowance, 680 *d.* Of this, 458 *d.* are necessary expenses, being 21 *d.* less than the former, *viz.* 10 *d.* for the *yaráq*, 10 *d.* for saddle and bridle, and 1 *d.* for shoes. The first increase which was given, amounted to 67 *d.*; the second, to 75 *d.*; the third to 80 *d.* Total 680 *d.*

The *third* class, or *Mujannas* horses, resemble Persian horses [*vide* p. 140, note 2], and are mostly Turkí, or Persian geldings. Monthly cost

560 *d.* Of this, 358 *d.* are for necessaries. The allowance for these horses is 100 *d.* less than the preceding, *viz.*, 30 *d.* less for sugar; 30 *d.* less for saddle, bridle, &c.; 15 *d.* less in g'hí; 3 *d.* less for the groom; 2 *d.* less for shoeing. First increase sanctioned by His Majesty, 72 *d.*; second, 50 *d.*; third, 80 *d.*

The *fourth* class are horses imported from Túrán; though strong and well-formed, they do not come up to the preceding. Monthly allowance, 480 *d.* Of this, 298 *d.* are for necessaries. The allowance is 60 *d.* less than for *Mujannas* horses, *viz.*, 30 *d.* less for sugar, 30 *d.* less for grass; 10 *d.* less for the *yaráq;* 4 *d.* less for the saddle, bridle, &c.; 2 *d.* less for shoeing; 2 *d.* less for g'hí. But the daily allowance of grain was increased by 2 *sers* (which amounts to 18 *d. per mensem*), as the sugar had been left out. First increase 52 *d.*; second, 50 *d.*; third 80 *d.*

The *fifth* class (*yábú* horses) are bred in this country, but fall short in strength and size. Their performances also are mostly bad. They are the offspring of Turkí horses with an inferior breed. Monthly cost 400 *d.* Of this, 239 *d.* are for necessaries. The allowance is 59 *d.* less than the preceding; *viz.*, 28 *d.* for *g'hí;* 15 *d.* less for the groom; 10 *d.* less for the *yaráq;* and 6 *d.* less for the saddle, bridle, &c. First increase, 41 *d.*; second increase, 40 *d.*; third, 80 *d.*

The last two classes also are mostly Indian breed. The best kind is called *Tázís;* middling ones, *Janglahs;* inferior ones, *Tátús.*

Good mares are reckoned as *Tázís;* if not, they are counted as *Janglahs.*

1. *Tázís.* Monthly cost, 320 *d.*, of which 188 *d.* are for necessaries. The allowance is 51 *d.* less than for the *Yábú, viz.*, 18 *d.* less for grain, as they only get 6 *sers per diem;* 15 *d.* less for grass; 10 *d.* less for g'hí and sugar; 8 *d.* less for *yaráq.* First increase, 22 *d.*; second, 30 *d.*; third, 80 *d.*

2. *Janglahs.* Monthly cost, 240 *d.*, of which 145½ *d.* are for necessaries. The allowance is 42½ *d.* less than for *Tázís.* The daily allowance of grain has been fixed at 5 *sers.* Hence there are 15 *d.* less for grass; 9 *d.* less for grain; 6 *d.* less for g'hí and molasses; 4½ *d.* less for the *yaráq;* 2 *d.* less for shoeing. First increase, 29½ *d.*; second 25 *d.*; third, 40 *d.*

Formerly, mules were reckoned as *Tází* horses; but now-a-days, as *Janglahs.*

For *Tátús* the monthly expenditure is 160 *d.*; but this animal is now altogether thrown out.

Note by the Translator. We may arrange Abulfazl's items in a tabular form. From several remarks in Badáoní, we may conclude that the horses of the Imperial army were mostly fourth and sixth class horses. The exportation of horses from Hindustán was strictly prohibited by Akbar, who made the kotwáls responsible for it; *vide Bad.* II, p. 390, l. 5 from below. Many recruits on joining the contingent of a *Mançabdár*, brought horses

with them, for which the Mançabdár received from the Treasury an allowance according to the following table.

	I. Arabs.	II. Persian Horses.	III. Mujannas Horses.	IV. Turkí Horses.	V. Yábús.	VI. Tázis.	VII. Janglahs.	VIII. Tátús.
Gram,	54 *d.*	54 *d.*	54 *d.*	72 *d.*	72 *d.*	54 *d.*	45 *d.*	
G'hí,	75 *d.*	75 *d.*	60 *d.*	} 58	30 *d.* {	10 *d.*	4 *d.*	
Sugar,	60 *d.*	60 *d.*	30 *d.*	}	{	10 *d.*	4 *d.*	
Grass,	90 *d.*	90 *d.*	90 *d.*	60 *d.*	60 *d.*	45 *d.*	30 *d.*	Not
Yaráq,	70 *d.*	60 *d.*	40 *d.*	30 *d.*	20 *d.*	12 *d.*	7½ *d.*	specified.
Saddle, &c.,	60 *d.*	50 *d.*	20 *d.*	16 *d.*	10 *d.*	10 *d.*	10 *d.*

3rd Ditto,	80 *d.*	80 *d.*	80 *d.*	80 *d.*	80 *d.*	80 *d.*	40 *d.*	specified.
Total monthly cost in *dáms*,	720 *d.*	680 *d.*	560 *d.*	480 *d.*	400 *d.*	320 *d.*	240 *d.*	160 *d.*

The allowance of sugar, or molasses, according to Abulfazl ceases from Class IV.; but as he goes on mentioning it in the inferior classes, I have made brackets. G'hí and molasses were generally given together; *vide* p. 135.

2. *Elephants.* The branded elephants of the army are divided into *seven* classes: *Masti*, *Shergír*, *Sádah*, *Manjholah*, *Karha*, *P'handurkiya*, and *Mokal*, elephants; but there are no subdivisions, as in His Majesty's elephant stables [*vide* p. 124, l. 17].

The monthly allowance for *Mast* elephants is 1320 dáms [33 Rupees]. Daily allowance of grain, 2½ *mans*. No elephant has more than three servants, a *Maháwat*, a *Bhoi*, and a *Meth*, of whom the first gets 120 *d.*, and the two last 90 *d.* An increase of 120 *d.* was given. From the beginning elephants were branded; but now certain differences are made.

Shergír Elephants. Monthly cost, 1100 *d.*, which is 220 *d.* less than the former. Grain, 2 *m. per diem*, which makes 180 *d.* less *per mensem*; also 15 *d.* less for the Mahawat and the Bhoi. His Majesty increased the allowance by 110 *d.*

Sádah Elephants. Monthly cost, 800 *d.*, which is 300 *d.* less than the preceding. Grain 1½ *m. per diem*, which gives 180 *d.* less *per month*. Besides

30 *d.* less for the Meth, and 15 *d.* less for the Mahâwat and the Bhoí. An increase of 50 *d.* was sanctioned.

Manjholah Elephants. Monthly cost, 600 *d.* Grain 1 *m.* The decrease is the same as in the preceding; but an additional allowance of 90 *d.* was sanctioned.

Karha Elephants. Monthly cost, 420 *d.* Grain, 30 *s.* Hence there is a decrease of 30 *d.* on this account, and of 15 *d.* for the Mahâwat. No Bhoí is allowed. The additional grant is 60 *d.*

P'handurkiya Elephants. Monthly cost, 300 *d.* Grain, 15 *s. per diem*, which gives a decrease of 135 *d. per mensem.* Only one servant is allowed, at 60 *d. per month.* An additional grant of 105 *d.* was sanctioned.

Mokal elephants were formerly not counted. Now they are considered worthy of entering the classes. Monthly allowance, 280 *d.*

In all payments on account of elephants, *dâms* are taken, not rupees, so that there is no possibility of fluctuation.

3. *Camels.* Monthly cost, 240 *d.* Grain, 6 *s.*; grass, 1 *d.*; furniture, 20 *d.*; the driver, 60 *d.* An addition of 58 *d.* was sanctioned; and when the value of the Rupee was fixed at 40 *dâms*, 20 *d.* more were allowed.

4. *Oxen.* Monthly allowance, 120 *d.* Grain, 4 *s.*; grass 1 *d.*; furniture, 6 *d.* Additional grant, 38 *d.* At the time when the value of the rupee was raised, 10 *d.* more were given.

5. *Oxen for the waggons.* For each waggon, the monthly expenditure is 600 *d.*, *viz.*, 480 *d.* for four oxen; 120 *d.* for grease, repairs, and additional comforts.

Elephants and waggons are only allowed to Mançabdârs, and to those who bring good horses and camels, and middling oxen to be branded.

ÁIN 3.

THE MANÇABDÁRS.[1]

Wise inquirers follow out the same principles, and the people of the present age do not differ in opinion from those of ancient times. They all agree that if that which is numerous be not pervaded by a principle of harmony, the dust of disturbances will not settle down, and the troubles of lawlessness will not cease to rise. It is so with the elements: as long as the uniting principle is absent, they are dead, and incapable of exhibiting the wonders of the kingdoms of nature. Even animals form unions among

[1] The Arabians say *mançib*; in Persia and India, the word is pronounced *mançab*. It means a post, an office, hence *mançabdár*, an officer; but the word is generally restricted to high officials.

themselves, and avoid wilful violence; hence they live comfortably, and watch over their advantages and disadvantages. But men, from the wickedness of their passions, stand much more in need of a just leader, round whom they may rally; in fact their social existence depends upon their being ruled by a monarch; for the extraordinary wickedness of men, and their inclination to that which is evil, teach their passions and lusts new ways of perversity, and even cause them to look upon committing bloodshed and doing harm as a religious command.[1] To disperse this cloud of ignorance, God chooses one, whom he guides with perfect help and daily increasing favor. That man will quell the strife among men by his experience, intrepidity, and magnanimity, and thus infuse into them new vigour.

But as the strength of one man is scarcely adequate to such an arduous undertaking, he selects, guided by the light of his knowledge, some excellent men to help him, appointing at the same time servants for them. For this cause did His Majesty establish the ranks of the Mançabdárs, from the *Dahbáshí* (Commander often) to the *Dah Hazárí* (Commander of Ten Thousand), limiting, however, all commands above Five Thousand, to his august sons.

The deep-sighted saw a sign, and enquirers got a hint from above, when they found the value of the letters of God's holy name;[2] they read in it glad tidings for the present illustrious reign, and considered it a most auspicious omen. The number of Mançabs is sixty-six, the same as the value of the letters in the name of *Allah*, which is an announcement of eternal bliss.

---

[1] "When the collector of the Díwán asks them (the Hindus) to pay the tax, they should pay it with all humility and submission. And if the Collector wishes to spit into their mouths, they should open their mouths without the slightest fear of contamination (*taqazzuz*), so that the Collector may do so. In this state [with their mouths open], they should stand before the Collector. The object of such humiliations and spitting into their mouths is to prove the obedience of Infidel subjects under protection, and to promote the glory of the Islám, the true religion, and to show contempt to false religions. God himself orders us to despise them; for He says (Sur. 9, 29), 'Out of hand, whilst they are reduced low.' To treat the Hindus contemptuously is a religious duty, because they are the greatest enemies of Mustafa (Muhammad), because Mustafa, regarding the killing, and plundering of Hindus, and making slaves of them, has ordered, 'They must either accept the Islám, or be killed or be made slaves, and their property must be plundered;' and with the exception of the Imám i A'zam (Abú Hanífah), to whose sect we all belong, there is no other authority for taking the *Jazyáh* from Hindus; but all other lawyers say, 'Either death or the Islám.' *Táríkh i Fíróz Sháhí*, *p.* 290. Akbar often reproached the Muhammadans for converting with the sword. This, he said, was inhuman. And yet, he allowed the suttee.

[2] *Jalálah*. This curious word is, according to *Bahár i 'Ajám*, an abbreviation of the phrase *Jalla jalálahu*, 'May His glory shine forth.' It is then used in the sense of *God*; thus the dual *jalálatain*, saying *Allah! Allah!*; and *khatm i jalálah* saying the word *Allah* 125,000 times. Similarly here; the 66 mançabs correspond to the value of the letters of *Jalálah*, *i. e.* ا ل ل ه = 1 + 30 + 30 + 5 = 66. Abulfazl makes much of the coincidence; for Akbar's name was *Jalál uddín*, and Akbar was a divinity. Perhaps I should not say *coincidence*, because of the sixty-six mançabs only one half existed.

In selecting his officers, His Majesty is assisted by his knowledge of the spirit of the age, a knowledge which sheds a peculiar light on the jewel of his wisdom. His Majesty sees through some men at the first glance,[1] and confers upon them high rank. Sometimes he increases the mançab of a servant, but decreases his contingent. He also fixes the number of the beasts of burden. The monthly grants made to the Mançabdárs vary according to the condition of their contingents. An officer whose contingent comes up to his mançab, is put into the first class of his rank; if his contingent is one half and upwards of the fixed number, he is put into the second class; the third class contains those contingents which are still less, as is shewn in the table below.

Yúzbáshis (Commanders of One Hundred) are of eleven classes. The *first* class contains such as furnish one hundred troopers. Their monthly salary is 700 Rupees. The *eleventh* class contains such as have no troops of their own in accordance with the statement made above, that *Dákhilí* troops are now-a-days preferred. This class gets 500 Rupees. The nine intermediate classes have monthly allowances decreasing from 700 Rupees by 20 Rupees for every ten troopers which they furnish less.

In the live stock accounts of the *Dúbístís*, the fixed number of *Turkí* and *Janglah* horses, and of elephants, is not enforced. For Commanders of Thirty and Twenty, four horses are reckoned, generally *Mujannas*, rarely *Yábús*; and *Dahbáshís* are excused the *Turkí* horse, though their salaries remain as before.

Note by the Translator on the Mancabs.

The sixty-six Mançabs, detailed by Abulfazl in the following table appear to be the result of a minute classification rather than a representation of the Mançabs which actually existed at the time of Akbar. The table may represent Akbar's plan; but the list of grandees, as given by Abulfazl himself in the 30th Aín of this Book, only mentions *thirty-three*—the three commands of the three Princes from 10000 to 7000; and thirty commands of the Mançabdárs, namely commands of 5000, 4500, 4000, 3500, 3000, 2500, 2000, 1500, 1250, 1000, 900 ?, 800, 700, 600, 500, 400, 350, 300 ?, 250, 200, 150, 120, 100, 80, 60, 50, 40, 30, 20, 10. Of the last thirty commands, two are somewhat doubtful (the commands of 900 and 300), as not given in all MSS. of the Aín, though the List of Grandees of Sháh Jahán's time (*Pádisháhnámah*, II. p. 717) mentions a command of 900. It does not specify a command of 300, because no Mançabs under 500 are enumerated in that list.

[1] Abulfazl often praises Akbar as a good physiognomist. Badáoní says, Akbar learnt the art from the Jogís.

Abulfazl specifies below the names of all of Akbar's Commanders up to the Mançabdárs of 500; he then gives the names of the Commanders of 500 to 200, who were living, when he made the list. Of the Commands below 200, he merely gives the numbers of those that were alive, *viz.*,

of Commanders of	150	.....	53
	120	.....	1
	100	(*Yúzbáshis*)	250
	80	.....	91
	60	.....	204
	50	.....	16
	40	.....	260
	30	.....	39
	20	.....	250
	10	.....	224

in all, 1388 Commanders from 150 to 10. The number of the higher Mançabdars from 5000 to 200 is 412, of which about 150 may have been dead, when Abulfazl made his list.

As Abulfazl's List (Aín 30), according to the testimony of Nizám i Harawí is a complete list,[1] it is certain that of the 66 Mançabs of the following table, only 33 existed in reality. The first eighteen of these 33 are commands down to 500, which corresponds to the List of Sháhjahán's grandees in the *Pádisháhnámah*, which likewise gives 18 commands to 500.

The commands as detailed in the *Pádisháhnámah* are:—Four commands of the princes (Dárá Shikoh, 20,000; Sháh Shujá, 15,000; Aurangzeb, 15,000; Murad Bakhsh, 12,000) and commands of 9000, 7000, 6000, 5000, 4000, 3000, 2500, 2000, 1500, 1000, 900, 800, 700, 600, 500.

From the fact that Abulfazl only gives names up to commanders of 200, and the *Pádisháhnámah* up to 500, we may conclude that, at Akbar's time, Mançabs under 200, and at Sháhjahán's time, Mançabs under 500, did not entitle the holder to the title of *Amír*. To judge from *Nizám's Tabaqát* and the *Maásir i Rahimi*, Mançabdárs from the Hazárí (Commander of 1000) were, at Akbar's time, styled *umará-i-*

[1] Nizám says in the introduction to his List of the principal grandees of Akbar's Court, that it was unnecessary for him to specify all, because *tafçíl i asámí i* har yak *rá afázilpanáh Shaikh Abulfazl dar kitáb i Akbarnámah marqúm i qalam i baddá'raqam gardanídah.*

kibár, or *umará-i-'izám*, great Amírs; and I am not quite sure whether the title of Amír is not restricted to Mançabdárs from the *Hazárís* upwards. Nizám does restrict his phrases *ba martabah i imárat rasíd*, or *dar jargah* (or *silk*, or *zumrah*) *i umará muntazim gasht*, to commanders from Hazárís.

The title *Amír ul Umará* (the Amír of the Amírs, principal Amír), which from its meaning would seem to be applicable to one at the time, seems to have been held by several simultaneously. Nizám gives this title to Adham Khán, Khizr Khwájah Khán, Mír Muhammad Khán Atkah, Muzaffar Khán, Quṭbuddín Muhammad Khán, and to the three commanders-in-chief, Bairám Khán, Mun'im Khán, and Mírzá 'Abdurrahím, the three latter being styled *Khán Khánán*,[1] or *Khán Khánán o Sipahsálár*.

In the *Pádisháhnamáh*, however, the title of *Amírul Umará* is restricted to the first living grandee ('Alí Mardán Khán).

It is noticeable that Nizám only mentions commanders of 5000, 4000, 3000, 2500, 2000, 1500, and 1000—for lower Mançabs he does not specify names. Abulfazl gives three intermediate Mançabs of 4500, 3500, and 1250; but as he only gives five names for these three ranks, we may conclude that these Mançabs were unusual. This agrees also with the salaries of the commanders; for if we leave out the commands of 4500, 3500, and 1250, we have, according to Aín 30, *twelve* steps from 5000 to 500, and the monthly salary of a commander of 500 (Rs. 2500) is the *twelfth* part of the salary of a commander of 5000 (Rs. 30,000). The *Pádisháhnámah* gives *fourteen* steps between the commanders of 7000 and 500, and fixes the salary of a Commander of 7000 at *one kror* of *dáms per annum*, or 250000 *Rs.*, stating at the same time that the salaries decrease in proportion. The Persian Dictionary, entitled *Ghiás ullughát*, states that the salary of a commander of 5000 is 1 *kror*, or 250,000 *Rs.*, and that the salary of a *Pançadi*, or commander of 500, is 20,000 Rs. *per annum*, the $12\frac{1}{2}$th part of the former.

It would thus appear that the salaries of the Mançabdárs, as given by Abulfazl in the following table, are somewhat *higher* than those given in the *Pádisháhnámah* and the *Ghiás*, whatever may have been the source of the latter.

The salaries appear to be unusually high; but they would be

[1] For *Khán i Khánán*, the Khán of the Kháns. In such titles the Persian *Izáfat* is left out.

considerably reduced, if each Mançabdár had to keep up the establishment of horses, elephants, camels, carts, &c., which Abulfazl specifies for each rank. Taking the preceding Áín and the table in the note as a guide, the establishment of horses, &c., mentioned in the following table, would amount

for a Commander of 5000 (monthly salary 30,000 *R.*) to 10637 *R.*
1000 (ditto 8200 *R.*) to 3015⅓ *R.*
100 (ditto 700 *R.*) to 313 *R.*

The three classes which Abulfazl mentions for each Mançab differ very slightly, and cannot refer to p. 238, l. 7.

A commander of 5000 was not necessarily at the head of a contingent of 5000 men. In fact, the numbers rarely even approach the number expressed by the title of a Mançabdár. Thus Nizám says of Todar Mall and Quṭbuddín Muhammad Khán, as if it was something worth mentioning, that the former had 4000 cavalry, and the latter 5000 *naukars*, or servants, *i. e.*, soldiers, though Todar Mall was a commander of 4000 (Nizám says 5000), and Quṭbuddín a commander of 5000. Of 'Abdul Majíd Áçaf Khán, a commander of 3000 (*vide* Áín 30, No. 49), Nizám says, 'he reached a point when he had 20,000.' In the Pádisháhnámah, where more details are given regarding the number of men under each commander, we find that of the 115 Commanders of 500 under Sháhjahán only six had contingents of 500, whilst the last had only 50 troopers. This also explains the use of the word ذات *zát* after the titles of Mançabdárs; as *panj házárí i zát sihhazár suwár*, "a Commander of 5000, personally (*zát*, or by rank), and in actual command of 3000 cavalry." Sometimes we meet with another phrase, the meaning of which will be explained below, as *Sháistah Khán panjhazárí, panj hazár suwár i duaspah sihaspah*, "Sháistah Khán, a Commander of 5000, contingent 5000 cavalry, *with two horses, with three horses.*" A trooper is called *duaspah*, if he has two horses, and *sihaspah*, if three, in order to change horses during *elghárs* or forced marches. But keeping *duashpah sihaspah* troopers was a distinction, as in the *Pádisháhnámah* only the senior Mançabdárs of some ranks are so designated, *viz.*, 8 (out of 20) Panjhazáris; 1 Chahárhazárí; 2 Sihhazárí; 2 Duhazárí; 2 Hazár o pançadí; 1 Hazárí; and 1 Haftçadí.

The higher Mançabdárs were mostly governors of Çúbahs. The governors were at first called *sipahsálárs*; towards the end of Akbar's reign we find them called *Hákims*, and afterwards, *Çáhib Çúbah* or

Çúbahdárs, and still later merely *Çúbahs*. The other Mançabdárs held *Jágírs*, which after the times of Akbar were frequently changed. The Mançabdárs are also called *ta'ínátiyán* (appointed), whilst the troops of their contingents are called *tábínát* (followers);[1] hence *tábínbáshí*, the Mançabdár himself, or his *Bakhshí* (pay-master, colonel).

The contingents of the Mançabdárs, which formed the greater part of the army, were mustered at stated times, and paid from the general, or the local treasuries; *vide* Áíns 6, 7, 8. Akbar had much trouble with these musters, as fraudulent practices were quite common. The reform of the army dates from the time when Shahbáz Khán (*vide* pp. 140, 188) was appointed *Mír Bakhshí*. The following passage from Badáoní (II, p. 190) is interesting:

"The whole country, with the exception of the *Kháliçah* lands (domains), was held by the Amírs as jágír; and as they were wicked and rebellious, and spent large sums on their stores and workshops, and amassed wealth, they had no leisure to look after the troops or take an interest in the people. In cases of emergency, they came themselves with some of their slaves and Moghul attendants to the scene of the war; but really useful soldiers there were none. Shahbáz Khán,[2] the Mír Bakhshí, introduced the custom and rule of the *dágh o mahallí*, which had been the rule of A'láuddín Khiljí,[3] and afterwards the law under Sher Sháh. It was settled that every Amír should commence as a commander of twenty (*bísti*), and be ready with his followers to mount guard and....,[4] as had been ordered; and when, according to the rule, he had brought the horses of his twenty troopers to be branded, he was then to be made a *Çadí*, or Commander of 100 or more. They were likewise to keep elephants, horses, and camels, in proportion to their Mançabs, according to the same rule. When they had brought to the musters their new contingent complete, they were to be promoted according to their merits and circumstances to the post of *Hazárí*, *Duhazárí*, and even *Panjhazárí*, which is the highest Mançab; but if they did not do well at the musters, they were to be put down. But notwithstanding this new regulation, the condition of the soldiers got worse, because the Amírs did what they liked; for they put most of their own servants and mounted

[1] تعيناتيان, pl. of تعيني, from تعين *ta'ín*, the Indian pronunciation of تعيين *ta'yín*, to appoint. *tábín*, تابين, *to follow*; then as an adj., *one who follows*. This corrects the erroneous meanings of *tábín* on p. 62 of the Journal A. S. of Bengal for 1868.

[2] The passage in the printed edition is frightfully unintelligible. For *kih* read *Kambú*; for *baú dahanídah*, we have perhaps to read *yád dahánídah*, having brought to the memory of (Akbar); for *tábtán*, read *tábínán*; for *panáh Khudá*, read *panáh ba Khudá*; for *án ham*, read *án hamah*.

[3] The Táríkh i *Fíróz Sháhí* says but little regarding it. The words *dágh o mahallí* occur very often together.

[4] *Ojár o maljár* (?). For *jár*, a Turkish word, *vide* Vullers.

attendants into soldiers' clothes (*libás i sipáhí*), brought them to the musters, and performed everything according to their duties. But when they got their jágírs, they gave leave to their mounted attendants, and when a new emergency arose, they mustered as many 'borrowed' soldiers as were required, and sent them again away, when they had served their purpose. Hence while the income and expenditure of the Mançabdár remained *in statu quo*, 'dust fell into the platter of the helpless soldier,' so much so, that he was no longer fit for anything. But from all sides there came a lot of low tradespeople, weavers, and cotton-cleaners (*naddáf*), carpenters, and green-grocers, Hindu and Musalmán, and brought borrowed horses, got them branded, and were appointed to a Mançab, or were made *Kroris* (*vide* p. 13, l. 5 from below), or Ahadís, or Dákhilís to some one (*vide* p. 231); and when a few days afterwards no trace was to be found of the imaginary horse and the visionary saddle, they had to perform their duties on foot. Many times it happened at the musters, before the emperor himself in the Díwán-khánah i kháç, that they were weighed in their clothes, with their hands and feet tied, when they were found to weigh from 2½ to 3 *man*, more or less (?) and after inquiry, it was found that all were hired, and that their very clothes and saddles were borrowed articles. His Majesty then used to say, "With my eyes thus open, I must give these men pay, that they may have something to live on." After some time had passed away, His Majesty divided the Ahadís into *duaspah*, *yakaspah* (having one horse), and *nímaspah* (having half a share in a horse), in which latter case two troopers kept one horse together, and shared the stipulated salary, which amounted to six rupees.[1]

Weigh well these facts, but put no question!

These were things of daily occurrence,.....;[2] but notwithstanding all this, His Majesty's good luck overcame all enemies, so that large numbers of soldiers were not so very necessary, and the Amírs had no longer to suffer from the inconvenient reluctance of their servants."

Hence the repeated musters which Akbar held, both of men, and of animals, carts, &c.; the minuteness of some of the regulations recorded in the Aín; and the heavy fines imposed on neglectful servants (p. 217, note). The carefulness with which Akbar entered into details (*kasrat*), in order to understand the whole (*wahdat*)—an unusual thing for rulers of former times—is the secret of his success.[3]

We have not sufficient data to form an exact estimate of the strength of Akbar's army. We may, however, quote a statement in

[1] So according to one MS. The passage is not quite clear.

[2] Here follows a sentence which I do not know how to translate.

[3] *Vide* p. 11, note.

the *Pádisháhnámah* regarding the strength of Sháhjahán's army; *vide Pádisháhn.* II, p. 715.

"The paid army of the present reign consists of 200,000 cavalry, according to the rule of branding the fourth part, as has been mentioned above. This is exclusive of the soldiers that are allowed to the Faujdárs, Krorís, and tax-collectors, for the administration of the Parganahs. These 200,000 cavalry are made up as follows—

8000 Mançabdárs.

7000 mounted Ahadís and mounted *Barqandázes.*

185,000 Cavalry, consisting of the contingents (*tábínán*) of the Princes, the Chief grandees, and the other Mançabdárs.

"Besides these 200,000 cavalry, there are 40,000 foot, musketeers, artillery, and rocket-bearers. Of these 40,000, 10,000 accompany the emperor, and the remaining 30,000[1] are in the Çúbahs and the forts."

The 'Rule of branding the fourth part' is described among the events of the year 1056, as follows (II, p. 506) :—

"The following law was made during the present reign (Sháhjahán). If a Mançabdár holds a jágír in the same çúbah, in which he holds his mançab, he has to muster *one-third* of the force indicated by his rank.[2] Accordingly a *Sih Hazárí i zát sihhazár suwár* (a Commander of 3000, personal rank; contingent, 3000 cavalry) has to muster (bring to the brand) 1000 cavalry. But if he holds an appointment in another çúbah, he has only to muster *a fourth* part. Accordingly, a *Chahárhazárí chahárhazár suwár* (a Commander of 4000; contingent, 4000) has only to muster 1000 cavalry.

At the time when the Imperial army was ordered to take Balkh and Samarqand [1055], His Majesty, on account of the distance of those countries, gave the order that as long as the expedition should last, each Mançabdár should only muster one-fifth. Accordingly a *Panjhazárí panjhazár suwár* (a commander of 5000; contingent, 5000) mustered only 1000, *viz.*, 300 *Sihaspah* troopers, 600 *Duaspah* troopers, 100 *yakaspah* troopers [*i. e.*, 1000 men with 2200 horses], provided the income (*háçil*) of his jágír was fixed at 12 months; or 250 *Sihaspah* troopers, 500 *duaspah* troopers, and 250 yakaspah troopers [*i. e.*, 1000 men with 2000 horses], provided the income of his jágír was fixed at 11 months; or 800 *duaspah* troopers, and 200 *yakaspah* troopers [*i. e.*, 1000 men and 1800 horses], if the income of his jágír was fixed at 10 months; or 600 *duaspah* troopers and 400 *yakaspah*, if at 9 months; or 450 *duaspah* and 550 *yakaspah* troopers, if at 8 months;

---

[1] The edition of the *Pádisháhnámah* has wrongly 3000.

[2] Literally, *he has to bring his followers (troopers) to the brand* (dágh) *according to the third part.*

or 250 *duaspah* and 750 *yakaspah* troopers, if at 7 months; or 100 *duaspah* and 900 *yakaspah* troopers, if at 6 months; or 1000 *yakaspah*, if at 5 months.

But if the troopers to a mançab had all been fixed as *sihaspah duaspah* [in other words, if the Commander was not a *Panj hazárí, panj hazár suwár*, but a *Panj hazárí panj hazár suwár i duaspah siaspah*] he musters, as his proportion of duaspah and sihaspah troopers, double the number which he would have to muster, if his mançab had been as in the preceding. Accordingly, a *Panj hazárí panj hazár tamám duaspah sihaspah* (a Commander of 5000; contingent, only *duaspah* and *sihaspah*), would muster 600 troopers with three horses, 1200 troopers with two horses, and 200 troopers with one horse each [*i. e.*, 2000 men with 4400 horses], provided the income of his jágír be fixed at 12 months, and so on."

From this important passage, it is clear that one-fourth of that number of troopers, which is indicated by the title of a Mançabdár, was the average strength of the contingents at the time of Sháhjahán. Thus if a Commander of 1000 troopers had the title of *Hazárí hazár suwár*, the strength of his contingent was $\frac{1000}{4} = 250$ men with 650 horses, *viz.* 75 *sihaspah*, 150 *duaspah*, and 25 *yakaspah*; and if his title was *Hazárí hazár suwár i duaspah siaspah*, the strength of his contingent was 500 men with 1300 horses, *viz.* 150 *sihaspah*, 300 *duaspah*, and 50 *yakaspah*, if the income of his jágír was drawn by him for every month of the year. The above passage also indicates that the proportions of sihaspah, and duaspah, and yakaspah troopers was for all mançabs as 300 : 600 : 100, or as 3 : 6 : 1.

As the author of the *Padisháhnamáh* does not mention the restriction as to the number of months for which the Mançabdárs drew the income, we may assume that the difference in strength of the contingents mentioned after the name of each grandee depended on the value of their jágírs.

From an incidental remark (*Pádisháhnámah*, I. p. 113), we see that the pay of a Commander of *sihashpah duaspah* troopers was double the pay allowed to a Commander of *yakaspahs*. This agrees with the fact that the former had double the number of men and horses of the latter.

The strength also of Aurangzeb's army, on a statement by Bernier, was conjectured to have been 200,000 cavalry, *vide* Elphinstone's History, Second Edition, p. 546, last line.

Akbar's army must have been smaller. It is impossible to compute the strength of the contingents, which was continually fluctuating, and depended rather on emergencies. We can, however, guess at the

strength of Akbar's *standing* army. At the end of Aín 30, Abulfazl states that there were alive at the time he wrote the Aín

250	Commanders of 100 (Yúzbáshís)
204	60
260	40
250	20
224	10

As these numbers are very uniform, the regular army could not have been larger than 250 × 100, or 25,000 men (troopers, musketeers, and artillery). The Imperial stables contained 12,000 horses (*vide* p. 132, l. 6 from below), which were under the immediate charge of Mírzá Abdurrahím Khán Khánán, Akbar's Commander-in-Chief. Hence there may have been about 12,000 standing cavalry. The rest were matchlock-bearers and artillery. In Aín 6, Abulfazl states that there were 12,000 matchlock-bearers. The number of Ahadís, of which Sháhjahán had 7000, cannot have been very large. Many of them were on staff employ in the various offices, store-houses, Imperial workshops; others were employed as adjutants and carriers of important orders. They were, at Akbar's time, gentlemen rather than common soldiers, as they had to buy their own horse on joining. Badáoní mentions an Ahadí of the name of Khwájah Ibráhím Husain as one of his friends (II, p. 394). The number of Mançabdárs, which under Sháhjahán amounted to 8000, was also much less. Of the 415 Mançabdárs, whose names are given in Aín 30, about 150 were dead, when Abulfazl wrote it,[1] so that there would be about 250 higher Mançabdárs, to which we have to add 1388 lower Mançabdárs, from the Commanders of 150 downwards; hence altogether about 1600 Mançabdárs.

But Akbar's Mançabdárs, on the whole, had larger contingents, especially more horses, than the Mançabdárs of the following reigns, during which the brevet ranks (*zát*) were multiplied.

In the beginning of Akbar's reign, Mançabdárs had even to furnish men with four horses (*cháháraspah*). A *Dahbáshi*, or Commander

[1] The list of grandees in Aín 30 is quoted in Nizám's Tabaqát which do not go beyond A. H. 1002, as the author died in October 1594; but it may be still older, as Nizám assigns to several Mançabdárs a higher rank than the one mentioned by Abulfazl. In fact, the list refers to a time prior to the year 993, when the three princes (*Bad.* II, p. 342) were appointed Commanders of 12000, 9000, and 7000 respectively, whilst in Abulfazl's List, Prince Salím (Jahángír) is still put down as a Commander of 10000, Murád as Commander of 8000, and Dányál as of 7000.

of Ten, had to furnish 10 men with 25 horses; but in later times, (*vide* Áín 5) the *Chahárraspahs* were discontinued, and a *Dahbáshi* furnished 10 men with 18 horses. As the other ranks had to furnish horses in proportion, one of Akbar's Hazáris would have had to bring 1800 horses, whilst a Hazárí at the time of Shahjahán only furnished 650.

Of Non-Commissioned officers a *Mírdahah* is mentioned; *vide* note 1, p. 116. The pay of a Mírdahah of matchlock-bearers varied from $7\frac{1}{3}$ to $6\frac{1}{3}$ *R. per mensem.* Common matchlock-bearers received from $6\frac{1}{4}$ to $2\frac{2}{3}$ *R.* As they were standing (household) troops, Abulfazl has put them into the first Book of this work (Áins 36 to 40); and generally, the reader will have to bear in mind that the second book, relating to the army, treats chiefly of the contingents of the Mançabdárs.

Badáoní, in the above extract, p. 243, speaks of a *libás i sipáhí*, or soldier's uniform (armour?).

The distinctions conferred by the emperor on the Mançabdárs consisted in certain flags (*vide* p. 50, l. 6, from below), and the *gharyál* or gong (*vide* in the beginning of the Fourth Book, *Áín i Gharyál*).

Á'ÍN 4.

THE AHADÍS.

There are many brave and worthy persons whom His Majesty does not appoint to a Mançab, but whom he frees from being under the orders of any one. Such persons belong to the immediate servants of His Majesty, and are dignified by their independence. They go through the school of learning their duties, and have their knowledge tested. As it is the aim of His Majesty to confer a spiritual meaning on that which is external, he calls such persons *Ahadís* (from *ahad*, one). They are thus reminded of the *unity* of God.

A new regulation regarding rank was given.

For the sake of the convenience of the Ahadís, a separate Díwán and a paymaster were appointed, and one of the great Amírs is their chief. A fit person has also been selected to introduce to His Majesty such as are candidates for Ahadíships. Without partiality or accepting bribes, he takes daily several before His Majesty, who examines them. When they have been approved of, they pass through the *Yáddásht*, the *Ta'líqah*, the descriptive roll, and accounts [*vide* Á'ín 10]. The paymaster then takes security, and introduces the candidate a second time to His Majesty, who generally

increases his pay from an eighth to three-fourths, or even to more than six-sevenths.[1] Many Ahadís have indeed more than 500 Rupees *per mensem*.[2] He then gets the number *nine* as his brand [*vide* Aín 7]. In the beginning, when their rank was first established, some Ahadís mustered eight horses; but now, the limit is five. On his *sarkhaṭ* [*vide* Aín 11] each receives a *farmánchah* (rank and pay certificate), on which year after year the treasurer makes payments.

Ahadís are mustered every four months, when on a certificate signed by the Diwán and the Bakhshí, which is called now-a-days *Taçhíhah*,[3] the clerk of the treasury writes out a receipt, to be countersigned by the principal grandees. This the treasurer keeps, and pays the claim. Before the period (of four months) is over, he gets one month's salary in advance. In the course of the year, he receives cash for ten months, after deducting from it one-twentieth of the sum, the total stoppage being made on account of his horses and other expenses. On joining the service, an Ahadí generally finds his own horse; but afterwards he gets it from the Government; and if the certificate of the inspectors, which is called *Saqaṭnámah*,[4] explains the reason why the horse is not forthcoming, he is held indemnified for his dead horse, but does not receive the money for keeping a horse until he gets a new one. But if he has no *Saqaṭnámah* to shew, he is not allowed anything from the time of the last muster. Those who are in want of horses, are continually taken before His Majesty, who gives away many horses as presents or as part of the pay, one-half being reckoned as *irmás* money,[5] and the other half being deducted in four instalments at the subsequent four musters; or if the Ahadí be in debt, in eight instalments.

Aín 5.

OTHER KINDS OF TROOPERS.

As I have said something about the Mançabdárs and the Ahadís, I shall give a few details regarding the third class of troopers.

---

[1] Or as we would say, by 75 or even 85⅞ *per cent.* *Vide* note 4 p. 88.

[2] This agrees with a statement which I have seen in some historian of Akbar's reign that a senior *Ahadí* was promoted to a *Yúzbáshíship*, as the next step. *Vide* p. 20, note 1.

[3] The *Taçhíhah* corresponds therefore to a 'life certificate.' Arabic infinitives II. take in modern Persian a final ه; thus *ta'líqah* [*vide* below Aín 10], *takhfífah* [*vide* p. 95, note, 1], *&c.*

[4] From *saqaṭa* he fell.

[5] Or *armás* money. The word ارماس may be Inf. IV., or plural of *rams*, a grave. Badáoní evidently reads *irmás*, because in II, p. 202, he explains *irmás* by *zawál i dushman* the burying, or destruction, of the foes, 'which word the grandees used instead of *ṭalab i ajnás*, requesting stores, &c.' Hence *irmás*, a request made for military supplies or for salary.

The horse-dealer fixes the quality of the horses, which are carefully inspected by the Bakhshís. The description of the man is then taken down in writing. If a trooper has more than one horse, they add to his establishment a camel or an ox, for which he gets half the allowance usually given to troopers of a superior class; or if this be not given, he gets an addition of two-fifths.

A *Yakaspah* trooper is paid according to the following rates. If his horse be an 'Iráqí, he gets 30 *R. per mensem;* if *mujannas*, 25 *R.;* if *Turkí*, 20 *R.*; if a *Yábú*, 18 *R.*; if a *Tází*, 15 *R.*; if a *Janglah*, 12 *R.*

The Revenue collectors of domain lands got formerly 25 *R.*, but now only 15 *R.*

Troopers of this kind mustered formerly up to four horses, but now the order is not to exceed three.

Every *Dahbáshí* had to muster 2 *chahároaspah*, 3 *sihaspah*, 3 *duaspah*, and 2 *yakaspah* troopers [*i. e.*, 10 troopers with 25 horses], and the other Mançabdárs in the same proportion. But now a Dahbáshí's contingent consists of 3 *sihúspah*, 4 *duaspah*, and 3 *yakaspah* troopers [*i. e.*, 10 troopers with 18 horses].

ÁÍN 6.

THE INFANTRY.

As I have said something about the Cavalry, I shall make a few remarks on foot soldiers. They are of various kinds, and perform remarkable duties. His Majesty has made suitable regulations for their several ranks, and guides great and small in the most satisfactory manner.

The writer of these....[1] is the *Awárahnawis*. Inasmuch as they are of importance, they are counted as belonging to the infantry. There are several classes of them. The first class gets 500 *dáms;* the second 400 *d.*; the third, 300 *d.*; the fourth, 240 *d.*

The Bandúqchis or Matchlock-bearers.

There are 12,000 Imperial Matchlock-bearers. Attached to this service is an experienced *Bitikchí*, an honest treasurer, and an active Dárogah. A few *Bandúqchis* are selected for these offices; the others hold the following ranks. Some are distinguished by their experience and zeal, and are therefore appointed over a certain number of others, so that uniformity may pervade the whole, and the duties be performed with propriety and understanding. The pay of these [non-commissioned] officers is of four grades, *first*, 300 *d.*; *second*, 280 *d.*; *third*, 270 *d.*; *fourth*, 260 *d.*

[1] The text has a word which does not suit.

Common *Bandúqchís* are divided into *five* classes, and each class into three subdivisions. *First class*, 250, 240, and 230 *d.* *Second class*, 220, 210, 200 *d.* *Third class*, 190, 180, and 170 *d.* *Fourth class*, 160, 150, and 140 *d.* *Fifth class*, 130, 120, and 110 *d.*

The Darbáns, or Porters.

A thousand of these active men are employed to guard the palace. The pay of the *Mírdahahs* is fivefold, 200, 160, 140, 130, and 120 *d.* Common *Darbáns* have from 100 to 120 *d.*

The Khidmatiyyahs.

The *Khidmatiyyahs* also belong to the infantry. They guard the environs of the palace, and see that certain orders are carried out. *Panjáhís* to *Bístís* have 200 *d.*; and a *Dahbáshi* gets 180 and 140 *d.* The others get 120, 110, and 100 *d.*

The caste to which they belong was notorious for highway robbery and theft; former rulers were not able to keep them in check. The effective orders of His Majesty have led them to honesty: they are now famous for their trustworthiness. They were formerly called *Máwís*. Their chief has received the title of *Khidmat Rái*. Being near the person of His Majesty, he lives in affluence. His men are called *Khidmatiyyahs*.[1]

The Mewṛahs.[2]

They are natives of Mewát, and are famous as runners. They bring from great distances with zeal anything that may be required. They are excellent spies, and will perform the most intricate duties. There are likewise one thousand of them, ready to carry out orders. Their wages are the same as the preceding.

The Shamsherbáz, or gladiators.

There are several kinds of them, each performing astonishing feats. In fighting they shew much swiftness and agility, and join courage to skill in stooping down and rising up again. Some of them use shields in fighting, others use cudgels. The latter are called *Lakráit*. Others again use no means of defence, and fight with one hand only; these are called *yak-hát'h*. The former class come chiefly from the Eastern districts, and use a somewhat smaller shield, which they call *chirwah*. Those who come from the southern districts, make their shields large enough to conceal a horseman. This kind of shield they call *tilwah*.

---

[1] They are called in the Tuzuk i Jahángírí *Piyádahá i Khidmatiyyah*. The name of their chief under Jahángír was *Rái Mán*. He once picked up the young Sháh Shujá', who had fallen from an upper window to the ground. *Tuzuk i Jahángírí*, p. 303.

[2] "Among the innovations made by Akbar are the *Ḍák-Mewṛahs*, of whom some were stationed at every place." *Kháfí Khán* I, p. 243. Hence the *Mewṛahs* were chiefly postmen.

Another class goes by the name of *P'haráits*. They use a shield not quite so large as to conceal a man, but a *gaz* broad.

Some again are called *Banáits*. They use a long sword, the handle of which is more than a *gaz* long, and seizing it with both hands, they perform extraordinary feats of skill.

The class which goes by the name of *Bankúlis* are likewise famous. They use a peculiar sword which, though bent towards the point, is straight near the handle. But they do not make use of a shield. The skill which they exhibit passes all description. Others make various kinds of daggers and knives, and perform with them the most extraordinary feats. Each class of these men has a different name; they also differ in their performances. But it is really impossible to give a mere description of them; nor would mere listening to my descriptions be sufficient.

There are more than a hundred thousand of them. At Court one thousand of them are always in readiness. Their *Çadí* (commander of one hundred) holds the rank of an Ahadí, and even a higher one. Their salaries vary from 80 to 600 *d.*

The Pahluwáns, or Wrestlers.

There are many Persian and Túráni wrestlers and boxers at Court, as also stone-throwers, athletes of Hindústán, clever *Mals* from Gujrát, and many other kinds of fighting men. Their pay varies from 70 to 450 *d.* Every day two well-matched men fight with each other. Many presents are made to them on such occasions. The following belong to the best wrestlers of the age—Mírzá Khán of Gílán; Muhammad Qulí of Tabríz, to whom His Majesty has given the name of *Sher hamlah*, or Lion-attacker; Çádiq of Bukhárá; 'Alí of Tabríz; Murád of Turkistán; Muhammad 'Alí of Túrán; Fúlád of Tabríz; Qásim of Tabríz; Mírzá Kuhnahsuwár of Tabríz; Sháh Qulí of Kurdistán; Hilál of Abyssinia; Sadhú Dayál; 'Alí; Srí Rám; Kanhyá; Mangol; Ganesh; Anbá; Nánká; Balbhadr; Bajrnát'h.

The Chelahs, or Slaves.

His Majesty, from religious motives, dislikes the name *bandah*, or slave; for he believes that mastership belongs to no one but God. He therefore calls this class of men *Chelahs*, which Hindí term signifies a *faithful disciple*.[1] Through His Majesty's kindness, many of them have chosen the road to happiness.[2]

---

[1] The word *Chelah* is the same as the Arab. *murid*, a disciple who places implicit belief in his *murshid* or *pír*, the head of the sect. "And many of His Majesty's special disciples, in 991, called themselves *chelahs* in imitation of the use of this term among Jogís." *Badáoní* II, p. 325.

The author of the pretty Tazkirah, entitled *Kalimátushshu'ará*, which contains biographies of the poets of the eleventh century, was called *Chelah*. His real name is Mírzá Muhammad Afzal; as a poet he is known as *Sarkhush*.

[2] By joining the Divine Faith.

Various meanings attach to the term *slave*. *First*, that which people in general mean by a slave. Some men obtain power over such as do not belong to their sect, and sell and buy them. The wise look upon this as abominable. *Secondly*, he is called a slave, who leaves the path of selfishness, and chooses the road of spiritual obedience.[1] *Thirdly*, one's child. *Fourthly*, one who kills a man, in order to inherit his property. *Fifthly*, a robber who repents and attaches himself to the man whom he had robbed. *Sixthly*, a murderer whose guilt has been atoned by payment of money, in which case the murderer becomes the slave of the man who releases him. *Seventhly*, he who cheerfully and freely prefers to live as a slave.

The pay of Chelahs varies from 1 *R.* to 1 *d. per diem.* His Majesty has divided them into several sections, and has handed them over to active and experienced people, who give them instruction in several things. Thus they acquire knowledge, elevate their position, and learn to perform their duties with propriety.

His Majesty who encourages everything which is excellent, and knows the value of talent, honors people of various classes with appointments in the ranks of the army; and raises them from the position of a common soldier to the dignity of a grandee.

The Kuhárs, or Pálkí bearers.

They form a class of foot-servants peculiar to India. They carry heavy loads on their shoulders, and travel through mountains and valleys. With their *pálkis*, *singhásans*, *chaudols*, and *dúlis*, they walk so evenly, that the man inside is not inconvenienced by any jolting. There are many in this country; but the best came from the Dak'hin and Bengal. At Court, several thousands of them are kept. The pay of a head bearer varies from 192 to 384 *d.* Common bearers get from 120 to 160 *d.*

Dákhilí troops.

A fixed number of these troops are handed over to the Mançabdárs; but they are paid by the State. His Majesty has ordered to designate these infantry soldiers in the descriptive rolls as *nímah suwárán*, or half troopers.

The fourth part of Dákhilí troops are matchlock-bearers; the others carry bows.

Carpenters, workers in iron, water-carriers, pioneers, belong to this class.

A non-commissioned officer of the matchlock-bearers receives 160 *d.*, or 4 *R.*; common matchlock-bearers get 140 *d.* The Mírdahahs of the archers get from 120 to 180 *d.*; common archers from 100 to 120 *d.*

---

[1] Inasmuch as such a man blindly follows his *pír*.

I could say much more on this subject, but I must content myself with having described the principal classes. I have also given some details in speaking of the several workshops and offices of the Household.

ÁÍN 7.

REGULATIONS REGARDING THE BRANDING OF ANIMALS.

When His Majesty had fixed the ranks of the army, and enquired into the quality of the horses, he ordered that upright *Bitikchís* should make out descriptive rolls of the soldiers and write down their peculiar marks. Their ages, the names of their fathers, dwelling-places, and race, were to be registered. A Dárogah also was appointed, whose duty it is to see that the men are not unnecessarily detained. They were to perform their duties without taking bribes or asking for remunerations.

Every one who wishes to join the army, is taken before His Majesty, in whose presence his rank is fixed, after which the clerks make out the *Ta'liqah* [*vide* Áín 10].

Dákhilí troops are admitted on the signature of the Mançabdárs.

His Majesty has also appointed five experienced officers who have to look after the condition of the men, their horses, and the stipulated amount of pay. His Majesty has the men assembled in an open place, and receives the several descriptive rolls, when the men with their horses are handed over to the above five officers. The amount of their pay is then entered at the bottom of the descriptive rolls, and is countersigned by those officers, which serves as a proof, and prevents fraudulent alterations. Each roll is then handed over to the inspecting Dárogah. He takes them in the manner described above [*vide* Áín 4.] to His Majesty, who orders the pay to be increased or decreased. His Majesty discerns the value of a man by the lineaments of his forehead, and can therefore increase or decrease his pay. He also distinguishes a tradesman by the look of his face from a soldier, so much so that experienced people are astonished, and refer His Majesty's power of discernment to 'hidden knowledge.' When the roll is thus certified, it is also signed by the *Wáqi'ah Nawís* (Áín 10), the *Mír 'Arz*, and the officer commanding the guards. On the strength of this certificate, the Dárogah of the *dágh* (brand) marks the horses.

When the brand was first introduced, it was made in the shape of the head of the letter *sín* [*i. e.* like this, ﺮ], and was put on the right side of the neck of the horse. For some time, it was made in shape of two *alifs* intersecting at right angles, the heads of the *alif* being made heavy, as in this

figure and put on the right thigh. For some time again, it was made like a bow with the string taken off. At last, numerals were introduced, which plan best frustrates fraudulent practices. They make iron numerals, by which all indistinctness is avoided. These new signs are likewise put on the right thigh. Formerly, each horse on being mustered for the first time, was marked with a 1; the second time with a 2, and so on; but now His Majesty has ordered that separate numerals should be used for the horses of the princes, the Mançabdárs, the governors of the provinces, and all other dignitaries attached to the Court.

The carefulness with which the system of marking horses was attended to, resulted at once in truthful reports regarding dead horses; for when a soldier, after the introduction of the system of repeated marks (*vide* next Áín), brought a horse which had been exchanged, he would demand his pay from the time he had last received his pay, whilst the Bakhshí commenced to count from the day he brought his (exchanged) horse. But since the present mark was introduced, the rule was made that each horse with which, instead of with his old one, a trooper came to the muster, should be described, and should get the same mark as the dead one; the Bakhshís, at the subsequent musters held for repeating the marks, were to inspect it and go by the brand. Horses answering the description in the rolls were even hired, and substituted for the old ones; but as the mark was not forthcoming, the deception was detected, and the soldiers thus learnt to be honest.

ÁÍN 8.

ON THE REPETITION OF THE MARK.

The servants (Mançabdárs) of His Majesty have their horses every year newly marked, and thus maintain the efficiency of the army, as by their endeavours, unprincipled people learn to choose the path of honesty. If a Mançabdár delays bringing his men to the muster, one-tenth of his jágír (*aqṭá'*)[1] is withheld. Formerly when the mark was repeated, they put the number on the muster of the horse, marking, for example, a horse with a 2, when it was mustered the second time, and so on; but now, as each class of soldiers has a particular mark, the mark is merely repeated at the

[1] Properly *iqṭá'*, Inf. IV. of *qaṭa'a*; but in India the word is mostly pronounced as *aqṭá'*. The king is therefore called *muqṭi'*, one who confers lands on the nobles; abstr. n. *muqṭi'í* the giving of lands to nobles, of which the Moghul Historians accuse Sher Sháh. *Vide* end of Áín 10, Third Book. *Muqṭa'*, past part., one on whom lands have been conferred; so often in the *Táríkh i Fírúz Sháhí*. From the times of Akbar the words *aqṭá'* and *jágír* are used as synonyms; before his time we only find *aqṭá'* used; but *jágír*, or *jáigír*, occurs in its etymological sense. In later Historians the word *aqṭá'* is but rarely met with.

subsequent musters. In the case of Ahadís, the former custom was retained. Some Bitikchís, and near servants of His Majesty who have no leisure to look after jágírs, receive their monthly salaries in cash, and muster their horses every eighteen months. Grandees whose jágírs are very remote, do not bring their horses to muster before twelve years have elapsed; but when six years have elapsed since the last muster, one-tenth of their income is retrenched. And if a Mançabdár has been promoted to a higher Mançab, and three years have elapsed since he last presented his horses at muster, he receives a personal (داؤ) increase of salary, but draws the allowance for the increased number of his men after the first muster. His old and his new men then get their assignments. If at the renewal of the mark at subsequent musters, any soldier brings a superior horse in exchange for his old one, he is taken before His Majesty, who inspects and accepts it.

ÁÍN 9.

RULES ABOUT MOUNTING GUARD.

Mounting guard is called in Hindí *chaukí*. There are three kinds of guards. The four divisions of the army have been divided into seven parts, each of which is appointed for one day, under the superintendence of a trustworthy Mançabdár. Another, fully acquainted with all ceremonies at Court, is appointed as *Mír 'Arz*. All orders of His Majesty are made known through these two officers (the *Mír 'Arz* and the Commander of the Palace). They are day and night in attendance about the palace, ready for any orders His Majesty may issue. In the evening, the Imperial *Qur* (*vide* p. 110) is taken to the State hall. The mounting guards stand on the right; the ranks of the guards to be relieved are drawn up on the other side. His Majesty generally inspects the guards himself, and takes notice of the presence or absence of the soldiers. Both ranks salute His Majesty. If His Majesty be prevented by more important affairs from attending, one of the princes is ordered to inspect the guards. From predilection and a desire to teach soldiers their duties, as also from a regard to general efficiency, His Majesty pays much attention to the guards. If any one is absent without having a proper excuse, or from laziness, he is fined one week's pay, or receives a suitable reprimand.

The Imperial army has been divided into twelve parts, each of which mounts guard for the space of one month. This gives all troops, whether near or far, an opportunity to come to Court, and to partake of the liberality of His Majesty. But those who are stationed at the frontiers, or told off for any important duty, merely send in reports of their exact

condition, and continue to perform His Majesty's special orders. On the first of every solar month, the guards are drawn up to salute His Majesty, as is usual on weekly parades, and are then distinguished by royal marks of favour.

The Imperial army has also been divided into twelve other divisions, each of which is selected in turn, to come to Court for one year and do duty near the person of His Majesty.

ÁÍN 10.

REGULATIONS REGARDING THE WÁQI'AHNAWÍS.[1]

Keeping records is an excellent thing for a government; it is even necessary for every rank of society. Though a trace of this office may have existed in ancient times, its higher objects were but recognized in the present reign. His Majesty has appointed fourteen zealous, experienced, and impartial clerks, two of whom do daily duty in rotation, so that the turn of each comes after a fortnight.[2] Some other suitable men are selected as supernumeraries, each of whom is appointed for one day; and if any of the fourteen be detained by an important business, this additional person acts for him. Hence they are called *kotal* (supernumeraries).

Their duty is to write down the orders and the doings of His Majesty and whatever the heads of the departments report; what His Majesty eats and drinks; when he sleeps, and when he rises; the etiquette in the State hall; the time His Majesty spends in the Harem; when he goes to the general and private assemblies; the nature of hunting-parties; the slaying of animals;[3] when he marches, and when he halts; the acts of His Majesty as the spiritual guide of the nation; vows made to him; his remarks (*vide* Fifth Book); what books he has read out to him; what alms he bestows; what presents he makes; the daily and monthly exercises[4] which he imposes on himself; appointments to manṣabs; contingents of troops; salaries; jágírs; *Irmás* money (*vide* above, p. 250, note 5); *sayúrghál* (rentfree land); the increase or decrease of taxes; contracts; sales; money transfers; *peshkash* (tribute receipts); despatch; the issue of orders; the

---

[1] From *wáqia'h* an event, and *nawís* a writer. Instead of *wáqi'ah nawís* we also find *majlis nawís*.

There was a *Wáqi'ahnawís*, or recorder, in each Çúbah. From several places in the *Tuzuk i Jahángírí*, we see that the Bakhshís of the Çúbahs often held the posts of *Wáqi'ahnawís* at the same time. *Vide* Tuzuk, p. 121, l. 2.; p. 137, l. 1.; p. 171, l. 5.

[2] Hence the arrangement must have been as follows—first day, first and second writers; second day, second and third writers; third day, third and fourth writers, and so on.

[3] Akbar wished to restrict the slaying of animals. *Vide* above, p. 200, l. 9.

[4] Especially fasts.

papers which are signed by His Majesty; the arrival of reports; the minutes thereon; the arrivals of courtiers; their departures; the fixing[1] of periods; the inspection of the guards; battles, victories, and peace; obituaries of well-known persons; animal-fights and the bettings on them; the dying of horses; capital punishments; pardons granted by His Majesty; the proceedings of the general assemblies; marriages, births; *chaugán* games (*vide* Aín 29); chaupar, nard, chess, card games, &c.; extraordinary phenomena; the harvests of the year; the reports on events.

After the diary has been corrected by one of His Majesty's servants, it is laid before the emperor, and approved by him. The clerk then makes a copy of each report, signs it, and hands it over to those who require it as a voucher, when it is also signed by the *Parwánchi*, by the *Mír 'Arz*, and by that person who laid it before His Majesty. The report in this state is called *yáddásht*, or memorandum.

Besides, there are several copyists who write a good hand and a lucid style. They receive the *yáddasht* when completed, keep it with themselves, and make a proper abridgment of it. After signing it, they return this instead of the *yáddásht*, when the abridgment is signed and sealed by the *Wáqi'ahnawís*, and the *Risálahdár*,[2] the *Mír 'Arz*, and the *Dárogah*. The abridgment, thus completed, is called *Ta'líqah*, and the writer is called *Ta'líqahnawís*.

The *Ta'líqah* is then signed, as stated above, and sealed by the ministers of State.

His Majesty's object is, that every duty be properly performed; that there be no undue increase, or decrease in any department; that dishonest people be removed, and trustworthy people be held in esteem; and that active servants may work without fear, and negligent and forgetful men be held in check.

AÍN 11.

ON SANADS.

Every money matter will be satisfactorily settled, when the parties express their minds clearly, then take a pen, and write down the statement in legible handwriting. Every written statement of accounts is called a *sanad*. All classes of men adopt such a practice.

---

[1] *Ta'ín i muddat*, the fixing of periodical inspections; opp. *beta'íní ámadan* to come at times not appointed before hand, unexpectedly.

[2] The text has *risálah*, which stands for *risálahdár*, as, in later times, *Çúbah* for *Çúbahdár*.

For *Mír 'Arz* we find in the early Historians *'áriz*.

The *sanad* is the voucher which relieves the treasurer of all responsibility, and on which people receive payment of their claims. Honest experienced officers, upon whose forehead the stamp of correctness shines, write the agreement upon loose pages and leaves, so that the transaction cannot be forgotten. These loose sheets into which all sanads are entered, are called the *Daftar*.[1]

His Majesty has made himself acquainted with this department and brought it into proper working order. He has appointed clever, honest, incorruptible, experienced writers, and entrusts the *daftar* to impartial officers, who are under his immediate control.

The *Daftar* of the empire is divided into three parts:—

1. The *Abwábulmál*, or entries referring to the revenue of the country. This part of the Daftar explains the revenue of the empire, details any increase or decrease, and specifies every other source of income (as presents, &c.)

2. The *Arbáb uttaháwíl*.[2] This part explains the manner in which the sums for the Household have been expended; it contains the debits and credits entered on account of the cashkeepers employed at Court; and lastly, contains the accounts of daily expenditure, &c., for things bought or sold.

3. The *Taujíh*.[3] This part contains all entries referring to the pay of the army, and shows the manner in which the pay is given out.

Some *sanads* are merely sealed with the imperial seal. Other *sanads* are first signed and sealed by the ministers of State, and are afterwards laid before His Majesty for signature. Many *sanads*, however, are only signed and sealed by the grandees of the Court. This will be explained in the following.

The Farmán i sabtí.

Farmán i sabtís are issued for three purposes:—

1. For appointments to a Mançab; to the Vakílship; to the post of *Sipahsálár* (governor of a province and Commander-in-Chief); to the tutorship of the princes; to the rank of *Amírulumará* (*vide* p. 240); to a *Náhiatí*, or

[1] English writers of the last century often refer to this system of keeping all documents in loose sheets, instead of bound books. The sheets were kept together by a string drawn through them. This custom, I am informed, is still in use in Persia; and suits eastern countries, the hot and damp climate of which soon destroys the binding of books. The word *daftar* is the Greek διφθέρα, a tanned hide, parchment. *Cáhib i daftar*, Minister of Finance, the same as *Díwán* and *Vazír*. *Daftarí* means in India a man kept in every office for mending pens, ruling paper and forms, &c.

[2] *The* men *who get transfer receipts on the Treasury.* This part of the Daftar contained all Household accounts, as specified above. Though all MSS. read *Arbáb*, it is probable that *abwáb* is the more usual expression.

[3] Or, *the giving of* wajh (*pay*). *to the army;* hence *taujíh* military accounts. For *taujíh*, some MSS. read *tanjíhah*.

districtship; to the post of *Vazír*, or Finance Minister; to the *Bakhshíship*, (Pay master and Adjutant General); to the post of a *Çadr*, or a judge.

2. For appointments to *jágírs*, without military service;[1] for taking charge of a newly conquered territory; sometimes....[2]

3. For conferring *Sayúrgháls* (*vide* Aín 19); for grants on account of daily subsistence allowance; and for grants for beneficent purposes.

When the *Ta'líqah* has been made out, the *Díwán i Jágír* (who keeps the Jágír accounts) pays the stipulated grant. If the jágír is given for military services, with the order of bringing horses to the muster, the grant is once more sent to the *Bakhshís* for inspection, when the following words are written either on the back or the corner of the paper—*kháçah, o mardum baráward numáyand; kárgarán i in shughl chihrahnawísí kunand* (this is special; the estimate for the salary may be made out. The proper officers are to prepare the descriptive rolls). When the horses are then branded at the time of the muster, the *Bakhshigeneral* takes the *Ta'líqah*, keeps it, and hands instead of it a writing specifying the amount of the monthly salary, duly signed and sealed.

This paper, which the *Bakhshí* grants instead of the *Ta'líqah*, is called *Sarkhaṭ*.

The *Sarkhaṭs* are entered in the daftars of all *Sub-Bakhshís*, and are distinguished by particular marks. The *Díwán* then keeps the *Sarkhaṭ* with himself, prepares an account of the annual and monthly salary due on it, and reports the matter to His Majesty. If His Majesty gives the order to confer a jágír on the person specified in the *Sarkhaṭ*, the following words are entered on the top of the report: *Ta'líqah i tan qalamí numáyand* (they are to write out a *Ta'líqah i tan* (certificate of salary). This order suffices for the clerks; they keep the order, and make out a draft to that effect. The draft is then inspected by the Díwán, who verifies it by writing on it the words *sabt numáyand* (ordered to be entered). The mark of the Daftar, and the seal of the Díwán, the Bakhshí, and the Accountant the Díwán, are put on the draft in order, when the Imperial grant is written on the outside. The draft thus completed is sent for signature to the Díwán.

The *Çáhib i Taujíh*, or Military accountant, keeps the former *Ta'líqah* with himself, writes its details on the *Farmán*, and seals and signs it. It is

---

[1] *Jágírs*, to which no military service attaches, appear to be called *bedágh o mahallí*, *i. e.*, the holder had nothing to do with the army and the musters, at which the Mançabdárs drew the salaries of their contingents, nor with the collection of the taxes of the several *Mahalls* or Parganahs. Thus Fathullah of Shíráz (*vide* p. 199) received Basáwar as his jágír *bedágh o mahallí*. *Badáoní*, p. 315. Badáoní also had a jágír of 1000 Big'has, at which he often grumbles, calling himself by way of joke *Hazárí*, or Commander of One Thousand.

[2] The text has *jáe* (sometimes ?) *ba 'umwán i mulk* (*milk* ?) *dádan*—which I do not understand.

then inspected by the *Mustaufí*, and is signed and sealed by him. Afterwards the *Názir* and the *Bakhshís* do so likewise, when it is sealed by the Díwán, his Accountant, and the *Vakíl* of the State.

If His Majesty's order specifies a cash payment, the *farmán* is made out in the same manner, but is generally called *Barát* (cheque). A statement of accounts of the transaction is appended at the bottom of it. After the *Názir*, the *Díwán i Buyútát* signs it, and when it has passed through the hands of the Bakhshís and the Díwán, it is sealed and signed by the *Khán Sámán*. The receipts and expenditure of the Imperial workshops, the deposits and payments of salaries to the workmen (of whom some draw their pay on [military] descriptive rolls, and others according to the services performed by them, as the men engaged in the Imperial elephant and horse stables, and in the waggon department) are all made by *baráts*. The accountant of each workshop (or stable) writes out annually two *baráts*, one for the six months from *Farwardín* (February—March) to *Shahríwar*, and the other from *Mihr* (September) to *Isfandiyármuz*. He writes down the allowances on account of grain, grass, &c., both in shape of cash and stores, and the salaries of the workmen, and signs the statement. The *Díwán i Buyútát* inspects them, passes the order for payment, enquires into the increase or decrease, if any, and writes on the margin *az tahwíl i faláni barát nawísand*, 'Let a *barát* be made out shewing the amount to be deposited with such and such a Mushrif.' The Mushrif of the workshop or stable then takes it, writes out an order and the receipt, and seals and signs it. In all cash payments, one-fourth is deducted, as another *sanad* is given for this amount. The *Díwán i Buyútát* then gives the order to have it entered. The Mushrif does so, signs and seals the *barát* and the receipt. It then passes through the hands of the Military Accountant, the Názir, the Díwán i Buyútát, the Díwán i Kul, the Khán Sámán, the Mushrif of the Díwán, and the Vakíl, who sign and seal it. In every case the estimate is sent along with it, so that there may be no mistake. When it has been laid before His Majesty, the Mushrif writes out the receipt, which is then in the same manner entered into the several *daftars*. The mode of payment also is detailed on the back of it, *viz.* one-fourth is to be paid in gold (*ashrafís*); one-half in silver (*rúpís*) and one part in copper (*dáms*), according to the fixed values of the coins.

The *Farmáns* in favor of Mançabdárs are made out in the same manner; they are, however, never sent to the officers of the workshops and stables.

In case of *Sayúrghals* (*vide* Aín 19), the farmáns, after having been signed by the Mustaufí, are entered in the *daftars* of the *Díwán i Sa'ádat* (*vide* Aín 19); they are then signed and sealed by the *Çadr*, and the *Díwán i Kul*.

Farmáns are sometimes written in *Ṭughrá* character; but the two first lines are not made short. Such a Farmán is called a *Parwánchah*.

Parwánchahs are made out for the stipulated salaries of the Begums and the princes; for the stipends of people under the care of the *Díwán i Sa'ádat* (*vide* Aín 19); the salaries of the Ahadís, Chelahs, and of some officers in the workshops; and for the allowances on account of the food of *Bárgír* horses (*vide* p. 139, Aín 54). The treasurer does not annually demand a new *sanad*, but pays the allowances on the mere receipt, signed and sealed by the ministers of the State. The Mushrif (accountant) writes out the receipt, which is signed by the recipient, and is then sent to the Díwán for orders. It is then signed by the Mushrif, the Mustaufí, the Názir i Buyútát, the Díwán i Kul, the Khán-Sámán, the Mushrif of the Díwán. In the *Parwánchahs* given to Ahadís, the signature, seal, and orders of the *Ahadíbáshí*, or Commander of the Ahadís, are required after those of the Mustaufí, the Díwán, and the Bakhshís, because His Majesty, from motives of kindness, and from a desire to avoid delay, has ordered that these *Parwánchahs* need not be laid before him.

Nor does His Majesty sign *sarkhaṭs*, sale and purchase receipts, price-lists, *'arznámchahs* (statements of sums forwarded to Court by the collectors of the Imperial domains) *qarár námahs* (which specify the revenue collections of the collectors on account of the ryots), and the *muqásá* (statements of account which *Tahwíldárs* take from the Mustaufí, showing that the sums which they had received as deposits, have been correctly expended).

ÁÍN 12.

THE ORDER OF THE SEALS.

Farmáns, Parwánchahs, and Baráts, are made into several folds beginning from the bottom. On the first fold which is less broad, at a place towards the edge where the paper is cut off, the Vakíl puts his seal; opposite to it, but a little lower, the Mushrif of the Díwán puts his seal, in such a manner that half of it goes to the second fold. Then, in like manner but a little lower, comes the seal of the Çadr. But when Shaikh 'Abdunnabí and Sulṭán Khwájah were *çadrs* (*vide* note to Aín 19), they used to put their seals opposite to that of the Vakíl. In the middle of that fold is the place where that person puts his seal who comes nearest in rank to the Vakíl, as Atkah Khán did at the time of Mun'im Khán, and Adham Khán. The Mír Mál, the Khán Sámán, the Parwánchí, &c., seal on the second fold, but in such a manner that a smaller part of their seals goes to the first fold. The seals of the Díwán, and the Bakhshí do not go beyond the edge of the second fold, whilst the Díwán i juz, the Bakhshí i juz, and the Díwán i Buyútát put their seals on the third

fold. The Mustaufí puts his seal on the fourth, and the Çáhib i Taujíh on the fifth fold. The seal of His Majesty is put above the *Ṭughrá* lines on the top of the Farmán, where the princes also put their seals in *Ta'liqahs*.

ÁÍN 13.

THE FARMÁN I BAYÁZÍ.

Some matters connected with the Government do not admit of delay, or must not to be known to every one. Such an order receives only the Imperial seal, and is called a *Farmán i Bayází*.[1] The farmán is folded up, and two edges are made to meet, when a knot of paper is put over them, which is sealed up, in such manner, that the contents cannot be seen. The sealing wax is made of the gum of the Kunár, the Baṛ, the Pípal, and other trees. Like wax, it gets warm when exposed to fire, but gets afterwards cool and hard. When thus sealed, the farmán is put into a golden cover; for His Majesty looks upon the use of external signs of grandeur as an act of divine worship. Such farmáns are carried by Mançabdárs, Ahadís, or common foot-soldiers, to the parties concerned.

When an officer receives such an order he proceeds a proper distance to meet it, performs various acts of obeisance, puts it on the crown of his head, makes the *sijdah*, and rewards the messenger according to the favour conferred upon himself, or according to his circumstances. According to His Majesty's wishes, the bags in which reports are sent, are secured in the same manner as a *Farmán i Bayází*, so that no alterations are possible. In consequence of this, much trouble is avoided, and dishonest practices are put a stop to.

ÁÍN 14.

ON THE MANNER IN WHICH SALARIES ARE PAID.

When any one has the good fortune of joining the army, he receives, on bringing his horses to the muster, a proper *sanad* without delay and without costs. All accounts of salaries are made out in *dáms*; but at the time of making out the estimate, he receives one half in rupees, reckoned at thirty-eight *dáms*[2] each. Half of the remainder is paid in muhurs at nine rupees each, and the last quarter is given in dáms for stores. When the value of the rupee was raised to forty dáms, the soldiers, through His Majesty's kindness, received dáms at the same rate. Every year one month's pay is subtracted on account of the horse, the value of which is

[1] That is, a *blank* farmán.

[2] The MSS. have forty-eight.

raised fifty per cent. above prime cost, and for accoutrements; but as much care is shewn in buying horses, this increase is not productive of any loss for the soldier. Besides, Ahadís are continually employed for affairs of importance, and are permitted to carry the orders of His Majesty; and whatever is given to them as an acknowledgment for their services by the recipients of the orders, is allowed to be kept by the Ahadís as a present, if they bear a good character; but if not, a part of it is reckoned as monthly pay.

With the view of teaching zeal and removing the stamp of laziness, His Majesty fines soldiers for absence from guard: an Ahadí loses fifteen days' pay, and other soldiers one week's.

The Commandor of every contingent (*Tábínbáshí*) is allowed to keep for himself the twentieth part of the pay of his men, which reimburses him for various expenses.

ÁÍN 15.

MUSA'ADAT, OR LOANS TO OFFICERS.

Higher Officers, who receive lands or monthly salaries may occasionally come into difficulties when it would be against the rules of the government for them to ask for a present. For this reason His Majesty appointed a treasurer and a separate *Mír 'Arz*, and those who wish to borrow money, may now do so without prejudice to their honour, or annoyance of delay. For the first year, nothing is charged; in the second, the loan is increased by a sixteenth part of it; in the third year, by one-eighth; in the fourth year, by one-fourth; from the fifth to the seventh, by one-half; from the eighth to the tenth year, by three-fourths; from the tenth year and longer, double the original loan is charged, after which there is no further increase.

His Majesty's only object[1] is to teach propriety in transactions; else mutual esteem will never increase among men from the nature of their mercantile affairs.

This regulation brought unprincipled usurers to the proper path, and thus prevented much impropriety.

ÁÍN 16.

ON DONATIONS.

His Majesty, from his knowledge of man's nature, gives donations in various ways. It looks as if he lends, but in his heart, he makes a present;

[1] It is needless to remind the reader that charging interest on loans is against the Muhammadan law. But Akbar was a Hindu in such matters.

or he calls the donation a loan, but never asks it back. The far and near, the rich and poor, share His Majesty's liberality. He gives away elephants, horses, and other valuable articles. The Bakhshís read out daily the names of the guards and other soldiers, mentioning such first as have never received anything. His Majesty gives them horses. When a soldier has received a horse, he is not recommended to His Majesty for the space of a year for any other donation.

ÁÍN 17.

ON ALMS.

His Majesty bestows upon the needy money and necessaries, winning the hearts of all in public or private. Many enjoy daily, monthly, or yearly allowances, which they receive without being kept waiting. It is impossible for me to detail the sums which some people receive in consequence of representations having been made of their circumstances by such as stand near the throne; and it would take up too much time to describe the presents made daily to beggars, or the eating houses which have been established for the poor.[1]

There is a treasurer always in waiting[2] at Court; and every beggar whom His Majesty sees, is sure to find relief.

ÁÍN 18.

THE CEREMONY OF WEIGHING HIS MAJESTY.

From reasons of auspiciousness, and as an opportunity of bestowing presents upon the poor, His Majesty is weighed twice a year. Various articles are put into the scales.

On the first day of the month of Ábán [15th October], which is the solar anniversary of the emperor, His Majesty is weighed twelve times against the following articles: gold, quicksilver, silk, perfumes, copper, rúh i tútiyá, drugs, g'hí, iron, rice-milk, seven kinds of grain, salt; the order of these articles being determined by their costliness. According to the number of years His Majesty has lived, there is given away an equal number of sheep, goats, fowls, to people that breed these animals. A great number of small animals are also set at liberty.

His Majesty is weighed a second time on the 5th of Rajab,[3] against eight articles, *viz.*, silver, tin, cloth, lead, fruits, mustard oil, and vegetables.

---

[1] *Vide* p. 200, l. 5 from below.
[2] *Vide* p. 15, l. 1.
[3] The lunar birthday of the emperor. As this was the *Muḥammadan* birthday, the articles were of course fewer, and less valuable.

On both occasions the festival of *Sálgirih* (birthday) is celebrated, when donations, or grants of pardon, are bestowed upon people of all ranks.

The Imperial princes, sons, and grandsons of His Majesty, are weighed once in every solar year. They are for the first time weighed, when two years old, but only against one thing. Every year, however, a new additional thing is put on the scales. When grown up, they are generally weighed against seven or eight things, but not against more than twelve. Animals are set free as usual.

A separate treasurer and an accountant are appointed for this purpose, so that the expenditure may be made with every propriety.[1]

[1] According to the *Tuzuk i Jahángírí* (p. 163) and *Pádisháhnámah* (I, p. 243), the weighing of the Royal person was introduced by Akbar. It is an old Hindu custom. At first, the weighing took place once a year, on the birthday of the emperor; but with the introduction of Akbar's Divine (solar) Era, we find in the history of every year the record of a *wazn i shamsí*, or *solar* weighing, and a *wazn i qamarí*, or *lunar* weighing. There was, of course, a *jashn*, or feast, on such occasions, and courtiers, on the same day, were promoted to higher Mançabs, or presented their *peshkash*. The feast was of special importance for the Harem. It appears (*vide* Pádisháhnámah, p. 243) that the articles against which the royal person was weighed, were sent from the Harem, or by the mother of the reigning emperor. Jahángír, according to several remarks in the *Tuzuk* (pp. 69, 70, 276, &c.) was even weighed in the palace of his august mother, to whom the *Tuzuk* gives the title of *Maryam Zamání*, the Mary of the age, as Akbar's mother had been styled *Maryam Makání* (*vide* p. 48, note 1). The solar wazn was even retained by Aurangzeb; *vide* 'Alamgírnámah, p. 229.

The birthday of the emperor was of importance for the Harem, as there the string was kept, which numbered as many knots, as the emperor numbered years; hence also *sálgirih* (or *salgirah*, as the word is pronounced all over India) 'the year's knot,' or birthday.

Tying knots, or bits of string or ribbon to the tombs of saints is considered by barren women as a means of obtaining a son, and the tomb of *Salím i Chishtí* in Fathpúr Síkrí, in whose house Jahángír was born, is even now-a-days visited by Hindu and Musalmán women, who tie bits of string to the marble trellice surrounding the tomb. Similar vows are even placed on Akbar's tomb in Sikandrah, near Ágrah.

Akbar's regulation, as given in the above Áín, appears to have been continued under Jahángír. Sháhjahán made some alterations, in as far as he was weighed on each feast first against gold, and silver, and then against other articles. The articles themselves were given away to the courtiers, or to pious men, and beggars, as a means of keeping the royal person from all bodily and mental harm. The gold and the silver against which Jahángír was once weighed, amounted to Rs. 33,000; but according to the *Tuzuk*, the money was distributed among the women of the Harem. On another occasion (*Tuzuk*, p. 163), Jahángír was found to weigh 6514 tolahs. Taking the tolah at 186 grains (Prinsep's useful Tables, by E. Thomas, p. 111), Jahángír, at the age of forty-seven, would have weighed $210\frac{1}{3}$ lbs Troy.

Akbar, in accordance with his Hindu tendencies, used to give the money to Brahmins. "On the fifth of Rajab 973, which is the day on which the Emperor was born, the feast of weighing His Majesty was held at Nizámábad, a town belonging to the Sirkár of Jaunpúr; for according to established custom, the emperor is weighed twice a year, on his solar and lunar birthdays, against gold, silver, &c., which is given as a present to the Brahmins of India, and others. Poets used, and still use, such opportunities for presenting nice poems." *Badáoní*, II, p. 84.

Occasionally, courtiers were weighed for important personal services. Thus Jahángír had once his Court doctor Rúhullah weighed in silver (*Tuzuk*, p. 283), the sum being given him as a fee in addition to three villages, which were bestowed upon him as *jágír*.

AÍN 19.

ÒN SAYURGHÁLS.[1]

His Majesty, in his care for the nation, confers benefits on people of various classes; and in the higher wisdom which God has conferred upon him, he considers doing so an act of divine worship.

His Majesty, from his desire to promote rank distinctions, confers lands and subsistence allowances on the following four classes of men, *first*, on enquirers after wisdom, who have withdrawn from all worldly occupation, and make no difference between night and daytime in searching after true knowledge; *secondly*, on such as toil and practise self-denial, and while engaged in the struggle with the selfish passions of human nature, have renounced the society of men; *thirdly*, on such as are weak and poor, and have no strength for enquiry; *fourthly*, on honorable men of gentle birth who from want of knowledge, are unable to provide for themselves by taking up a trade.

Subsistence allowances, paid in cash, are called *Wazífah;* lands conferred are called *Milk*, or *Madad i ma'ásh*. In this way, krors are given away, and yet the grants are daily increasing in number.

As the circumstances of men have to be enquired into, before grants are made, and their petitions must be considered in fairness, an experienced man of correct intentions is employed for this office. He ought to be at peace with every party, and must be kind towards the people at large in word and action. Such an officer is called *Çadr*. The *Qázi* and the *Mir 'Adl* are under his orders. He is assisted in his important duties by a clerk, who has to look after the financial business, and is now-a-days styled *Diwán i Sa'ádat*.

His Majesty, in his mercy, orders his servants to introduce to him such as are worthy of grants, and a large number receive the assistance they desire.

When His Majesty commenced to enquire into this department, it was discovered that the former *Çadrs* had been guilty of bribery and dishonest practices. He therefore appointed, at the recommendation of near friends, Shaikh 'Abdunnabí to this important office. The lands which were then held by Afgháns and Chaudrís, were taken away, and became domain lands (*khalsah*),[2] whilst all others that held grants were referred to the Shaikh who enquired into, and certified, their grants. After some time it was reported that those who held grants, had not the lands in one and the same place, whereby the weak whose grounds lay near *khálisah* lands or

[1] Vide the note at the end of this Aín.

[2] This is the Indian pronunciation for the Arabic and Persian *khálisah*.

near the jágírs of Mançabdárs, were exposed to vexations, and were encroached upon by unprincipled men. His Majesty then ordered that they should get lands on one spot, which they might choose. This order proved beneficial for both parties. The officers of the government, on receiving this order, told off certain villages for this purpose: those who were weak were protected, and the encroachments of the unprincipled were put a stop to.

But when Time, according to his custom, commenced to tear the veil of secrets, rumours also regarding this *Çadr* ['Abdunnabí] came to the ears of His Majesty. An order was therefore given that all those who held more than five hundred bíg'hahs should lay their *farmáns* personally before His Majesty, and in default, should lose their lands. As, however, the practices of these grant-holders did not come up to the wise counsels of His Majesty, the order was passed, that the excess of all lands above one hundred bíg'hahs, if left unspecified in the farmáns, should be reduced to two-fifths of it, three-fifths of the excess being annexed to the domain lands. Irání and Túráni women alone were excepted from this rule.

As it was reported that impudent, avaricious people used to leave their old grounds, and take possession of new places, it was ordered that every one who should leave his place, should lose one-fourth of his lands and receive a new grant.

Again, when His Majesty discovered that the Qázís were in the habit of taking bribes from the grant-holders, he resolved, with the view of obtaining God's favour, to place no further reliance on these men [the Qázis], who wear a turban as a sign of respectability, but are bad at heart, and who wear long sleeves, but fall short in sense. He examined into the whole matter, and dismissed all Qázís, except those who had been appointed during the *Çadrship* of Sulṭán Khwájah. The Irání and Túráni women also were convicted of fraud, and the order was passed that every excess of land above one hundred bíg'hahs held by them, should be enquired into, whether it was correctly held or not.

During the *Çadrship* of 'Azaduddaulah [Mír Fathullah of Shíráz] the following order was given:—If any one held a Sayúrghál together with a partner, and the farmán contained no reference to the share possessed by each partner, the *Çadr* should, in the event of one of the partners dying, proceed without further enquiry to a division, the share of the deceased partner lapsing to the Crown and remaining domain land, till the heirs should personally apply to His Majesty. The new *Çadr* was at the same time prevented from granting, without previous reference to His Majesty, more than fifteen bíg'hahs.

On account of the general peace and security in the empire, the grant-holders commenced to lay out their lands in gardens, and thereby derived so much profit, that it tempted the greediness of the Government

officers, who had certain notions of how much was sufficient for Sayúrghál-holders, to demand revenue taxes; but this displeased His Majesty, who commanded that such profits should not be interfered with.

Again, when it was found out that holders of one hundred bíg'hahs and even less were guilty of bribery, the order was given that Mír Çadr Jahán should bring these people before His Majesty; and afterwards it was determined that the Çadr with the concurrence of the writer of this work should either increase or decrease the grants. The rule now followed is this, that all Sayúrghál land should consist of one-half of tilled land, and of one-half of land capable of cultivation; if the latter half be not so [*i. e.*, if the whole be tilled land], one-fourth of the whole should be taken away and a new grant be issued for the remainder.

The revenue derived from each bíg'hah varies in the several districts, but is never less than one rupee.

His Majesty, with the view of teaching wisdom and promoting true piety, pays much attention to this department, and appoints disinterested men as *Çadrs* of districts and *Çadr* of the realm.

Note by the Translator on the Çadrs of Akbar's reign.

In this Áín—one of the most interesting in the whole work—the Chagatái word *sáyúrghál* is translated by the Arabic *madad ul ma'ásh*, in Persian *madad i ma'ásh*, for which we often find in MSS. *madad o ma'ásh*. The latter term signifies 'assistance of livelihood,' and, like its equivalent *milk*, or property, it denotes *lands given for benevolent purposes*, as specified by Abulfazl. Such lands were hereditary, and differ for this reason from *jágír* or *tuyúl* lands, which were conferred, for a specified time, on Mançabdárs in lieu of salaries.

This Áín proves that Akbar considerably interfered with *Sayúrghál* lands, arbitrarily resuming whatever lands he liked, and increasing the domain, or *kháliçah*,[1] lands to the ruin of many a Muhammadan (Afghán) family. He also completely broke the power of the *Çadr*, whose dignity, especially before the Moghul dynasty, had been very great. It was the *Çadr*, or as he was then generally styled, *Çadr i Jahán*, whose edict legalized the *julús*, or accession, of a new king. During the reign of Akbar also, he ranked as the fourth officer of the empire (*vide* end of Áín 30). Their power was immense. They were the highest law-officers, and had the powers which Administrators-General have among us; they were in

[1] Regarding the turning out of *Altamghá* and *Madad i ma'ásh* holders, *vide* Elliot's Glossary, under *Altamghá* p. 18.

charge of all lands devoted to ecclesiastical and benevolent purposes, and possessed an almost unlimited authority of conferring such lands independently of the king. They were also the highest ecclesiastical law-officers, and might exercise the powers of High Inquisitors. Thus 'Abdunnabí, during his *Çadr*ship, ordered two men to be killed for heresy (*vide* p. 177, l. 4 from below).

In the times before the Moghuls, the terms *idrárát, wazáif, milk, in'ám i dehhá, in'ám i zamínhá, &c.*, occur for the word *sayúrghál* (or *siyúrgál*, or *sughúrghál*, as some dictionaries spell it.)

Among the former kings, 'Aláuddín i Khiljí is notorious for the disregard with which he cancelled the grants of former rulers. He resumed the greater part of the *madad i ma'ásh* tenures, and made them domain lands. He also lowered the dignity of the *Çadr* by appointing his keybearer to this high office (*Tárikh i Fírúzsháhi*, p. 353). Quṭbuddín Mubárikshàh, however, during the four years and four months of his reign, reinstated many whom 'Aláuddín had deprived (*T. F.*, p. 382). Fírúz Sháh is still more praised for his liberality in conferring lands (*T. F.*, p. 558).

That Sher Sháh has often been accused by Moghul Historians for his bounty in conferring lands, has been mentioned above (p. 256, note); and this may have been one of the reasons why Akbar shewed such an unexpected severity towards the grant-holders of his time.

Each *Çúbah* had a *Çadr i juz*, or Provincial *Çadr*, who was under the orders of the Chief Çadr (*Çadr i Jahán*, or *Çadr i Kúl*, or *Çadr i Çudúr*).

As in every other department, bribery was extensively carried on in the offices of the *Çadrs*. The land specified in the *farmán* of a holder rarely corresponded in extent to the land which he actually held; or the language of the farmán was ambiguously worded, to enable the holder to take possession of as much as he could, and keep it as long as he bribed the *Qázis* and provincial *Çadrs*. Hence Akbar had every reason, after repeated enquiries, to cancel grants conferred by former rulers. The religious views of the emperor (*vide* p. 167), and the hatred which he shewed to the 'Ulamá, most of whom held lands, furnished him with a personal, and therefore stronger, reason to resume their grants, and drive them away to Bhakkar in Sind, or to Bengal, the climate of which, in those days, was as notorious as, in later days, that of Gombroon. After the fall of 'Abdunnabí—a man whom Akbar used once to honor by holding the slippers before his feet,—Sulṭán Khwájah,

a member of the Divine Faith, (*vide* p. 204) was appointed as *Çadr*; and the Çadrs after him were so limited in conferring lands independently of Akbar, and had so few grants to look after, as to tempt Badáoní to indulge in sarcastical remarks. The following were Akbar's Çadrs:—

1. Shaikh Gadáí, a Shí'ah, appointed at the recommendation of Bairám Khán, till 968.
2. Khwájah Muhammad Çálih, till 971.
3. Shaikh 'Abdunnabí, till 986.
4. Sulṭán Khwájah, till his death in 993.
5. Amír Fathullah of Shíráz, till 997.
6. Çadr Jahán, whose name coincides with the title of his office.

Abulfazl also mentions a *Çadr* Mauláná 'Abdul Báqí; but I do not know when he held office.

I extract a few short passages from Badáoní.

Page 29. Shaikh Gadáí cancelled the *Madad i ma'ásh* lands, and took away the legacies[1] of the *Khánzádahs* (Afgháns), and gave a Ṣayúrghál to any one that would bear up with humiliating treatment, but not otherwise. Nevertheless, in comparison with the present time, when obstacles are raised to the possession of every *jarib* of ground, nay, even less, you may call the Shaikh an *'Álambakhsh* (one who gives away a world).

Page 52. After Shaikh Gadáí, Khájagí Muhammad Çálih was, in 968, appointed *Çadr*; but he did not possess such extensive powers in conferring lands as *madad i ma'ásh*, because he was dependent on the Díwáns.

Page 71. In 972, or perhaps more correctly in 971, Shaikh 'Abdunnabí was made Çadr. In giving away lands, he was to consult Muzaffar Khán, at that time Vazír and Vakíl. But soon after, the Shaikh acquired such absolute powers, that he conferred on deserving people whole worlds of subsistence allowances, lands, and pensions, so much so that if you place the grants of all former kings of Hindústán in one scale, and those of the Shaikh into the other, his scale would weigh more. But several years later the scale went up, as it had been under former kings, and matters took an adverse turn.

Page 204. In 983, His Majesty gave the order that the *Aimahs* of the whole empire should not be let off by the *krorís* of each Perganah, unless they brought the farmáns in which their grants, subsistence allowances, and pensions were described, to the Çadr for inspection and verification. For this reason, a large number of worthy people, from the eastern districts

[1] *Auqáf*. The text of Badáoní has wrongly *auqát*. For *bár* read *bárah*.

up to Bhakkar on the Indus, came to Court. If any of them had a powerful protector in one of the grandees or near friends of His Majesty, he could manage to have his affair settled; but those who were destitute of such recommendations, had to bribe Sayyid 'Abdurrasúl, the Shaikh's head man, or make presents to his farráshes, darbáns (porters), syces (grooms), and mehters (sweepers), 'in order to get their blanket out of the mire.' Unless, however, they had either strong recommendations, or had recourse to bribery, they were utterly ruined. Many of the *Aimahs*, without obtaining their object, died from the heat caused by the crowding of the multitudes. Though a report of this came to the ears of His Majesty, no one dared to take these unfortunate people before the emperor. And when the Shaikh, in all his pride and haughtiness, sat upon his *masnad* (cushion), and influential grandees introduced to him, in his office, scientific or pious men, the Shaikh received them in his filthy way, paid respect to no one,[1] and after much asking, begging, and exaggerating, he allowed, for example, a teacher of the *Hidáyah* (a book on law) and other college books 100 Big'hahs, more or less; and though such a man might have been for a long time in possession of more extensive lands, the Shaikh took them away. But to men of no renown, to low fellows, even to Hindus, he gave primitive lands as marks[2] of personal favor. Hence science and scientific men fell in estimation.* * * At no time had a *Çadr*, for so long a time, exercised more tyranical powers.

The fate of Abdunnabí has been related above. Akbar gave him money for the poor of Makkah, and sent him on a pilgrimage. When he came back, he was called to account for the money, was put in prison, and murdered 'by some scoundrel' in 992.

The next *Çadr* was Sulṭán Khwájah. Matters relating to Sayúrgháls now took a very different course. Akbar had rejected the Islám, and the new *Çadr*, who had just returned from Makkah,[3] become a member of the Divine Faith. The systematic persecution of the learned and the lawyers had commenced, and His Majesty enquired personally into all grants (*vide* p. 189, last *para.*). The lands were now steadily withdrawn, and according to Badáoní, who had managed to get 1000

[1] Badáoní says that even in the State hall, when before the time of prayer he washed his hands and feet, he took care to spirt water on the grandees standing near him.

[2] For *batafzíl* in the text (p. 205), one MS. of Badáoní reads *zamín i ibtidáí batafazzul az khúd mídád.*

[3] The same happened afterwards to Mírzá 'Azíz Kokah. In fact, several examples are on record that devout pilgrims returned so disappointed and 'fleeced' from Makkah as to assume a hostile position to the Islám. There is a proverb current in the East, *Al-shaitán fi-lharamain*, 'The Devil dwells in Makkah and Madínah.'

bíg'hahs, at first to the great disgust of 'Abdunnabí, many a Muhammadan family was impoverished or utterly ruined.

In 993, Fathullah of Shíráz (*vide* p. 38) was appointed *Çadr*. As the *Sayúrghál* duties, and with them the dignity of the *Çadr*, had dwindled down to nothing, Fathullah, though *Çadr*, could be spared for missions to the Dak'hin, *Bad.* p. 343.

"His Shírází servant *Kamál* officiated for him during his absence, and looked after these lacklands of Aimahdárs,[1] who had a few spots here and there; for the dignity of the Çadr had approached its *kamál* (perfection). Fathullah had not even the power of conferring five bíg'hahs: in fact he was an imaginary *Çadr*, as all lands had been withdrawn. And yet, the lands which had been withdrawn became the dwelling-places of wild animals, and thus belonged neither to the *Aimahdárs*, nor to farmers. However, of all these oppressions, there is at least a record left in the books of the *Çadr*, though of the office of the *Çadr* the name only is left.

Page 368. Fathullah [the *Çadr* himself] laid before His Majesty a bag containing the sum of Rs. 1,000, which his collector by means of oppression, or under the pretext that an Aimahdár was not forthcoming or dead, had squeezed out of the widows and unfortunate orphans of the Parganah of Basáwar [which was his jágír], and said, "My collectors have this much collected from the *Aimahdárs* as a *kifáyat* (*i. e.* because the collectors thought the Sáyúrghál holders had more than *sufficient* to live upon)." But the emperor allowed him to keep the sum for himself.

The next *Çadr*, Çadr Jahán, was a member of the Divine Faith. Though appointed *Çadr* immediately after the death of Fathullah, Badáoní continues calling him *Mufti i mamálik i mahrúsah*, the Muftí of the empire, which had been his title before. Perhaps it was no longer necessary to have a separate officer for the *Çadr*ship. Çadr Jahán continued to serve under Jahángír.

A great portion of the Sayúrghál lands is specified by Abulfazl in the geographical tables of the Third Book.

---

[1] *Maqṭú'ularází*, a pun reminding of *muqṭa'* (past part. IV), one on whom lands have been conferred, and *muqṭí'* (part. act. IV) one who confers lands. Observe that Badáoní uses the word *aimah* not only in the plural sense of *aimahdárs*, but as an equivalent of *those who hold a Sayúrghál*.

Regarding the punishments which grasping Çadrs were subject to, *vide* Elliot's Index, p. 253, note, of which, however, the first para. ought to be expunged as unhistorical.

AÍN 20.

ON THE CARRIAGES, &c., INVENTED BY HIS MAJESTY.

His Majesty has invented an extraordinary carriage, which has proved a source of much comfort for various people. When this carriage is used for travelling, or for carrying loads, it may be employed for grinding corn.[1]

His Majesty also invented a large cart, which is drawn by one elephant. It is made sufficiently large so as to hold several bath-rooms, and thus serves as a travelling bath. It is also easily drawn by cattle.

Camels and horses also are used for pulling carriages, and thus contribute to the comfort of mankind. Finely built carriages are called *bahals*[2]; if used on even ground, several may sit together and travel on.

Water wheels and carts have also been so constructed, that water may be fetched from far, low places. Two oxen may pull four such wheels at the same time, or one ox two.

Another machine exists which conveys water from a well, and moves at the same time a millstone.

AÍN 21.

THE TEN SER TAX (DAHSERÍ).

His Majesty takes from each bíg'hah of tilled land ten sers of grain as a royalty. Storehouses have been constructed in every district. They supply the animals belonging to the State with food, which is never bought in the bázárs. These stores prove at the same time of great use for the people; for poor cultivators may receive grain for sowing purposes, or people may buy cheap grain at the time of famines. But the stores are only used to supply necessities. They are also used for benevolent purposes; for His Majesty has established in his empire many houses[3] for the poor, where indigent people may get something to eat. He also appoints everywhere experienced people to look after these store-houses, and selects for this purpose active Dárogahs and clever writers, who watch the receipts and charges.

---

[1] This was, according to Nizám's Tabaqát, an invention of Fathullah of Shíráz (*vide* p. 38, note). Nizám says, "He constructed a millstone which was placed on a cart. It turned itself and ground corn. He also invented a looking-glass which, whether seen near or at a distance, showed all sorts of curious figures. Also a wheel, which cleaned at once twelve barrels." The last mentioned wheel also is ascribed by Abúlfazl to Akbar; *vide* Book I. Aín 38, p. 115.

[2] Regarding English carriages (*rat'h i angrezí*) brought to India under Jahángír, *vide* Tuzuk pp. 167, 168.

[3] *Vide* pp. 200 and 201.

AÍN 22.

ON FEASTS.

His Majesty enquires into the excellent customs of past ages, and without looking to the men of the past in particular, he takes up that which is proper, though he have to pay a high price for it. He bestows his fostering care upon men of various classes, and seeks for occasions to make presents. Thus, when His Majesty was informed of the feasts of the Jamsheds, and the festivals of the Pársí priests, he adopted them, and used them as opportunities of conferring benefits. The following are the most important feasts. 1. *The New Year's day feast.*[1] It commences on the day when the Sun in his splendour moves to Aries, and lasts till the nineteenth day of the month [Farwardín]. Two days of this period are considered great festivals, when much money and numerous other things are given away as presents: the first day of the month of Farwardín, and the nineteenth, which is the time of the *Sharaf*. Again, His Majesty followed the custom of the ancient Pársís, who held banquets on those days the names of which coincided with the name of a month.[2] The following are the days which have the same name as a month: 19th Farwardín; 3rd Urdíbihisht; 6th Khúrdád; 13th Tír; 7th Amurdád; 4th Shahríwar; 16th Mihr; 10th Ábán; 9th Ázar; 8th, 15th, 23rd, Dai: 2nd Bahman; 5th Isfandármuz. Feasts, are actually and ideally, held on each of these days. People in their happiness raise the strain of inward joy. In the beginning of each *pahr* the *naqqárahs* (*vide* p. 51, l. 1.) are beaten, when the singers and musicians fall in. On the first of the above feasts coloured lamps are used for three nights: on the second for one night, and the joy is general.

I have given a few particulars in the first Book (Aín 18).

AÍN 23.

THE KHUSHROZ OR DAY OF FANCY BAZARS.

On the third feast-day of every month, His Majesty holds a large assembly for the purpose of enquiring into the many wonderful things found in this world. The merchants of the age are eager to attend, and lay out articles from all countries. The people of His Majesty's Harem come, and the women of other men also are invited, and buying and selling is quite general. His Majesty uses such days to select any articles which he wishes to buy, or to

---

[1] Badáoní generally calls this day *Nauróz i Jaláli*; *vide* p. 183, note 2.

[2] Thus *Ábán* was the name of the eighth month (October-November): but the tenth day also of every month had the same name.

fix the price of things, and thus add to his knowledge. The secrets of the empire, the character of the people, the good and bad qualities of each office and workshop, will then appear. His Majesty gives to such days the name of *Khushrúz*, or the joyful day, as they are a source of much enjoyment.

After the Fancy bázárs for women, bázárs for the men are held. Merchants of all countries then sell their wares. His Majesty watches the transactions, and such as are admitted to Court indulge in the pleasure of buying. Bázár people, on such occasions, may lay their grievances before His Majesty, without being prevented by the mace-bearers, and may use the opportunity of laying out their stores, in order to explain their circumstances. For those who are good, the dawn of success rises, whilst wicked bázár people are called to account.

His Majesty has appointed for this purpose a separate treasurer and an accountant, so that the sellers may get paid without delay. The profit made by tradesmen on such occasions is very great.[1]

ÁÍN 24.

REGULATIONS REGARDING MARRIAGES.

Every care bestowed upon this wonderful tie between men is a means of preserving the stability of the human race, and ensuring the progress of the world; it is a preventive against the outbreak of evil passions, and leads to the establishment of homes. Hence His Majesty, inasmuch as he is benign, watches over great and small, and imbues men with his notions of the spiritual union and the equality of essence which he sees in marriage. He abhors marriages which take place between man and woman before the age of puberty. They bring forth no fruit, and His Majesty thinks them even hurtful; for afterwards, when such a couple ripens into manhood, they dislike having connexion, and their home is desolate.

Here in India, where a man cannot see the woman to whom he is betrothed, there are peculiar obstacles; but His Majesty maintains that the consent of the bride and bridegroom, and the permission of the parents, are absolutely necessary in marriage contracts.

Marriage between near relations His Majesty thinks highly improper. He says, "The fact that, in ancient times (?) even, a girl was not given to her twin brother, ought to silence those who are fond of historical proofs. Marriage between first cousins, however, does not strike the bigoted

---

[1] Regarding these Fancy bázárs, *vide* above Badáoní's remarks on p. 204, l. 4.

followers of Muhammad's religion as wrong; for the beginning of a religion resembles, in this regard, the beginning of the creation of mankind."

His Majesty disapproves of high dowries; for as they are rarely ever paid, they are mere sham; but he admits that the fixing of high dowries is a preventive against rash divorces. Nor does His Majesty approve of every one marrying more than one wife; for this ruins a man's health, and disturbs the peace of the home. He censures old women that take young husbands, and says that doing so is against all modesty.

He has also appointed two sober and sensible men, one of whom enquires into the circumstances of the bridegroom, and the other into those of the bride. These two officers have the title of *Túibegí*, or masters of marriages. In many cases, the duties are performed by one and the same officer. His Majesty also takes a tax from both parties, to enable them to shew their gratitude. The payment of this tax is looked upon as auspicious. Mançabdárs commanding from five to one thousand, pay 10 Muhurs; do. from one thousand to five hundred, 4 *M.*; do. to Commanders of one hundred, 2 *M.*; do. to Commanders of forty, 1 *M.*; do. to Commanders of ten, 4 *R.* The latter fee is also paid by rich people. The middle classes pay 1 *R.*, and common people 1 *dám.*[1] In demanding this tax, the officers have to pay regard to the circumstances of the father of the bride.

ÁÍN 25.

REGULATIONS REGARDING EDUCATION.

In every country, but especially in Hindústán, boys are kept for years at school, where they learn the consonants and vowels. A great portion of the life of the students is wasted by making them read many books. His Majesty orders that every school boy should first learn to write the letters of the Alphabet, and also learn to trace their several forms.[2] He ought to learn the shape and name of each letter, which may be done in two days, when the boy should proceed to write the joined letters. They may be practised for a week, after which the boy should learn some prose and poetry by heart, and then commit to memory some verses to the praise of God, or moral sentences, each written separately. Care is to be taken

---

[1] "The sons and daughters of common people were not allowed to marry, unless they came to the office of the kotwál, and were stared at by the kotwál's men, who had to take down their respective ages; and you may imagine what advantages and fine opportunities the officers thus had, especially the people of the kotwál, and the *khánú i kalál* (?), and their other low assistants outside." *Bad.* II, p. 391. *Vide* also Third Book, Áín 5.

[2] Boys in the East generally learn to write by running their pens over the characters of the copyslips (*qit'aks*).

that he learns to understand everything himself; but the teacher may assist him a little. He then ought for some time be daily practised in writing a hemistich or a verse, and will soon acquire a current hand. The teacher ought especially to look after five things: knowledge of the letters; meanings of words; the hemistich; the verse; the former lesson. If this method of teaching be adopted, a boy will learn in a month, or even in a day, what it took others years to understand, so much so that people will get quite astonished. Every boy ought to read books on morals, arithmetic, the notation peculiar to arithmetic, agriculture, mensuration, geometry, astronomy, physiognomy, household matters, the rules of government, medicine, logic, the *ṭabí'í*, *riyází*, and *iláhí*, sciences,[1] and history; all of which may be gradually acquired.

In studying Sanscrit, students ought to learn the Bayákaran, Niyáí, Bedanta, and Pátanjal. No one should be allowed to neglect those things which the present time requires.

These regulations shed a new light on schools, and cast a bright lustre over Madrasahs.

AÍN 26.

THE ADMIRALTY.

This department is of great use for the successful operations of the army, and for the benefit of the country in general; it furnishes means of obtaining things of value, provides for agriculture, and His Majesty's household. His Majesty, in fostering this source of power, keeps four objects in view, and looks upon promoting the efficiency of this department as an act of divine worship.

First.—The fitting out of strong boats, capable of carrying elephants. Some are made in such a manner as to be of use in sieges and for the conquest of strong forts. Experienced officers look upon ships as if they were houses and dromedaries, and use them as excellent means of conquest. So especially in Turkey, Zanzibar, and Europe. In every part of His Majesty's empire, ships are numerous; but in Bengal, Kashmír, and T'hat'hah (Sind) they are the pivot of all commerce. His Majesty had the sterns of the boats made in shape of wonderful animals, and thus combines terror with amusement. Turrets and pleasing kiosks, markets, and beautiful flower-beds, have likewise been constructed on the rivers. Along

---

[1] This is the three-fold division of sciences. *Iláhí*, or *divine*, sciences comprise everything connected with theology and the means of acquiring a knowledge of God. *Riyázi* sciences treat of quantity, and comprise mathematics, astronomy, music, mechanics. *Ṭabí'í* sciences comprehend physical sciences.

Some dictionaries call the last class of sciences *ṭaba'í*, instead of *ṭabí'í*.

the coasts of the ocean, in the west, east, and south of India, large ships are built, which are suitable for voyages. The harbours have been put into excellent condition, and the experience of seamen has much improved. Large ships are also built at Iláhábás and Láhor, and are then sent to the coast. In Kashmír, a model of a ship was made which was much admired.

Secondly.—To appoint experienced seamen, acquainted with the tides, the depths of the ocean, the time when the several winds blow, and their advantages and disadvantages. They must be familiar with shallows and banks. Besides, a seaman must be hale and strong, a good swimmer, kind hearted, hard working, capable of bearing fatigue, patient; in fact he must possess all good qualities. Men of such character can only be found after much trouble. The best seamen come from Malíbár (Malabar).

Boatmen also bring men and their things from one side of the river to the other.

The number of sailors in a ship varies according to the size of the vessel. In large ships there are twelve classes. 1. The *Nákhudá*, or owner of the ship. This word is evidently a short form of *Návkhudá*. He fixes the course of the ship. 2. The *Mu'allim*, or Captain. He must be acquainted with the depths and the shallow places of the ocean, and must know astronomy. It is he who guides the ship to her destination, and prevents her from falling into dangers. 3. The *Tandíl*, or chief of the *khaláçís*, or sailors. Sailors, in seamen's language, are called *khaláçís* or *khárwahs*. 4. The *Nákhudá-khashab*. He supplies the passengers with firewood and straw, and assists in shipping and unlading the cargo. 5. The *Sarhang*, or mate, superintends the docking and landing of the ship, and often acts for the *Mu'allim*. 6. The *Bhandárí* has the charge of the stores. 7. The *Karráni*[1] is a writer who keeps the accounts of the ship, and serves out water to the passengers. 8. The *Sukkángír*, or helmsman. He steers the ship according to the orders of the *Mu'allim*. Some ships carry several helmsmen, but never more than twenty. 9. The *Panjarí* looks out from the top of the mast, and gives notice when he sees land, or a ship, or a coming storm, &c. 10. The *Gunmtí* belongs to the class of *khaláçís*. He throws out the water which has leaked through the ship. 11. The *Topandáz*, or gunner, is required in naval fights; their number depends on the size of the ship. 12. The *Khárwah*, or common sailor. They set and furl the sails. Some of them perform the duty of divers, and stop leaks, or set the anchor free when it sticks fast. The amount of their wages varies, and depends on the voyage, or *kúsh*, as seamen call it. In the harbour of *Sátgánw* (*Húghlí*) a *Nákhudá* gets 400 *R.*; besides

[1] This word is now-a-days pronounced *Kiráni*, and is applied to any clerk. The word is often used contemptuously.

he is allowed four *malikh*, or cabins, which he fills with wares for his own profit. Every ship is divided into several divisions, for the accommodation of passengers and the stowage of goods, each of the divisions being called a *malikh*. The *Mu'allim* gets 200 *R.* and two *malikhs*; the *Tandil*, 120 *R.*; the *Karráni*, 50 *R.* and one *malikh*; the *Nákhudá khashab*, 30 *R.*; the *Sarhang*, 25 *R.*; the *Sukkángir*, *Pánjarí* and *Bhandárí*, each 15 *R.*; each *Khárwah*, or common sailor, 40 *R.*, and his daily food in addition; the *Degandáz*, or gunner, 12 *R.*

In *Kambháyat* (Cambay), a *Nákhudá* gets 800 *R.*, and the other men in the same proportion.

In *Láharí*, a nákhudá gets 300 *R.*, and the rest in proportion.

In *Achin* he gets half as much again as in southern harbours; in Portugal, two and a half as much again; and in Malacca, twice as much again. In Pegu, and Dahnasarí, he gets half as much again as in Cambay. All these rates vary according to the place and the length of the voyage. But it would take me too long to give more details.

Boatmen on rivers have wages varying from 100 to 500 *d. per mensem.*

Thirdly, an experienced man has been appointed to look after the rivers. He must be an imposing and fearless man, must have a loud voice, must be capable of bearing fatigue, active, zealous, kind, fond of travelling, a good swimmer. As he possesses experience, he settles every difficulty which arises regarding fords, and takes care that such places are not overcrowded, or too narrow, or very uneven, or full of mud. He regulates the number of passengers which a ferry may carry; he must not allow travellers to be delayed, and sees that poor people are passed over *gratis*. He ought not to allow people to swim across, or wares to be deposited anywhere else but at fording places. He should also prevent people from crossing at night, unless in cases of necessity.

Fourthly, the remission of duties. His Majesty, in his mercy, has remitted many tolls, though the income derived from them equalled the revenue of a whole country. He only wishes that boatmen should get their wages. The state takes certain taxes in harbour places; but they never exceed two and a half *per cent.*, which is so little compared with the taxes formerly levied, that merchants look upon harbour taxes as totally remitted.

The following sums are levied as river tolls. For every boat, 1 *R. per kos* at the rate of 1000 *mans*, provided the boat and the men belong to one and the same owner. But if the boat belongs to another man and everything in the boat to the man who has hired it, the tax is 1 *R.* for every 2½ *kos*. At ferry places, an elephant has to pay 10 *d.* for crossing; a laden cart, 4 *d.*; do. empty, 2 *d.*; a laden camel, 1 *d.*; empty camels, horses, cattle with their things, ½ *d.*; do. empty, ¼ *d.* Other beasts of burden pay $\frac{1}{16}$ *d.*, which

includes the toll due by the driver. Twenty people pay 1 *d.* for crossing; but they are often taken *gratis*.

The rule is that one-half or one-third of the tolls thus collected go to the State (the other half goes to the boatmen).

Merchants are therefore well treated, and the articles of foreign countries are imported in large quantities.

ÁÍN 27.

OF HUNTING.

Superficial, worldly observers see in killing an animal a sort of pleasure, and in their ignorance stride about, as if senseless, on the field of their passions. But deep enquirers see in hunting a means of acquisition of knowledge, and the temple of their worship derives from it a peculiar lustre. This is the case with His Majesty. He always makes hunting a means of increasing his knowledge, and besides, uses hunting parties as occasions to enquire, without having first given notice of his coming, into the condition of the people and the army. He travels *incognito*, and examines into matters referring to taxation, or to *Sayúrghál* lands, or to affairs connected with the household. He lifts up such as are oppressed, and punishes the oppressors. On account of these higher reasons His Majesty indulges in the chase, and shews himself quite enamoured of it. Short-sighted and shallow observers think that His Majesty has no other object in view but hunting; but the wise and experienced know that he pursues higher aims.

When His Majesty starts on a hunting party, active *Qaráwals* [men employed by the *Mír Shikár*, or Master of Hunting] surround the hunting ground, the *Qur* (p. 110) remaining at a distance of about five *kos* from it. Near the *Qur*, the grandees and other people await the arrival of His Majesty. The men who look after the things sit down and watch. About a yard behind them the *Mír Tozak* stands ready for service, and about a *kos* and one-half behind them stand some of the *Khidmatiyyah* (p. 225) and other servants of His Majesty. The *Khidmatiyyah* are told off to watch at that place. At about the same distance, there stands a vigilant officer with some of His Majesty's servants. He advances very slowly, and guards the private hunting ground. Behind them an experienced officer is stationed to superintend the whole. Several near servants of His Majesty have admission to this place; but generally only such are allowed to come as are required to render services at the chase.

When a certain distance has been passed over, His Majesty selects a few to accompany him, and then moves on; and after having gone over

another distance, he generally goes alone, or accompanied by one or two. When the hour of rest comes, both parties which had been left behind, again join His Majesty.

As I have stated the views of His Majesty regarding the chase, and have written down some remarks on the arrangements which are made during hunting parties, I shall give a few particulars as to the several modes of chasing, and the wonderful contrivances which people have recourse to.

1. *Tiger hunting.*

They make a large cage, and having fastened it (on the ground) with strong iron ties, they put it in places frequented by tigers. The door is left open; but it is arranged in such a manner that the slightest shaking will cause it to close. Within the cage they put a goat, which is protected by a screen so constructed that the tiger can see the goat, but not get hold of it. Hunger will lead the tiger to the cage. As soon as he enters, he is caught.

Another method. They put a poisoned arrow on a bow, painted green, in such a manner that a slight movement will cause the arrow to go off. The bow is hung upon a tree, and when the tiger passes, and shakes it a little, the arrow will hit the animal and kill it.

Another method. They tie a sheep to a place in a road frequented by tigers, putting round about the sheep on the ground small stalks of hay covered with glue. The tiger comes rushing forward, and gets his claws full of the glue. The more he tries to get rid of it, the more will the glue stick to his feet, and when he is quite senseless and exhausted, the hunters come from the ambush and kill him. Or they catch him alive, and tame him.

His Majesty, from his straightforwardness, dislikes having recourse to such tricks, and prefers with bows or matchlocks openly to attack this brute, which destroys so many lives.

Another method. An intrepid experienced hunter gets on the back of a male buffalo, and makes it attack the tiger. The buffalo will quickly get hold of the tiger with its horns, and fling him violently upwards, so that he dies. It is impossible to describe the excitement of this manner of hunting the tiger. One does not know what to admire more, the courage of the rider, or his skill in standing firm on the slippery back of the buffalo.

One day, notice was given that a man-eating tiger had made its appearance in the district of Bárí. His Majesty got on the elephant *Náhir Khán*, and went into the jungle. The brute was stirred up; and striking its claws into the forehead of the elephant, it pulled the head of the animal to the ground, when the tiger was killed by the men. This occurrence astonished the most intrepid and experienced hunters.

On another occasion, His Majesty hunted near Todah. The tiger had

stretched one of the party to the ground. His Majesty aimed at the brute, killed it, and thus saved the life of the man.

Once during a *qamarghah*[1] chase, a large tiger was stirred up. The animal attacked His Majesty, when he shot it in time through the head, and killed it.

Once a tiger struck his claws into a man. All who witnessed it, despaired of his life. His Majesty shot the brute right through the body, and released the unfortunate man.

A remarkable scene took place in the forest of Mut'hra. Shujá'at Khán (*vide* Ain 30, No. 51), who had advanced very far, got suddenly timid. His Majesty remained standing where he was, and looked furiously at the tiger. The brute cowered[2] down before that divine glance, and turned right about trembling all over. In a short time it was killed.

The feats of His Majesty are too numerous to be imagined; much less can a Hindustání, as I am, describe them in a dignified style.

He slays lions, but would not hurt an ant.
He girds himself for the fray; but the lion drops his claws from fear.[3]

Elephant-hunts.

There are several modes of hunting elephants.

1. *K'hedah.*[4] The hunters are both on horseback and on foot. They go during summer to the grazing places of this wonderful animal, and commence to beat drums and blow the pipes, the noise of which makes the elephants quite frightened. They commence to rush about, till from their heaviness and exertions no strength is left in them. They are then sure to run under a tree for shade, when some experienced hunters throw a rope, made of hemp or bark, round their feet or necks, and thus tie them to the trees. They are afterwards led off in company with some trained elephants, and gradually get tame. One-fourth of the value of an elephant thus caught is given to the hunters as wages.

2. *Chor k'hedah.* They take a tame female elephant to the grazing place of wild elephants, the driver stretching himself on the back of the elephant, without moving or giving any other sign of his presence. The elephants then commence to fight, when the driver manages to secure one by throwing a rope round the foot.

3. *Gád.* A deep pit is constructed in a place frequented by elephants, which is covered up with grass. As soon as the elephants come near it,

---

[1] *Qamarghah* is a chase for which drivers are employed.

[2] This is one of Akbar's miracles.

[3] These two verses are taken from Faizí's *Nal Daman; vide* p. 106, note 4.

[4] Hence our elephant *kheddas.*

the hunters from their ambush commence to make a great noise. The elephants get confused, and losing their habitual cautiousness, they fall rapidly and noisily into the hole. They are then starved and kept without water, when they soon get tame.

4. *Bár.* They dig a ditch round the resting place of elephants, leaving only one road open, before which they put up a door, which is fastened with ropes. The door is left open, but closes when the rope is cut. The hunters then put both inside and outside the door such food as elephants like. The elephants eat it up greedily; their voraciousness makes them forgot all cautiousness, and without fear they enter at the door. A fearless hunter, who has been lying concealed, then cuts the rope, and the door closes. The elephants start up, and in their fury try to break the door. They are all in commotion. The hunters then kindle fires and make much noise. The elephants run about till they get tired, and no strength is left in them. Tame females are then brought to the place, by whose means the wild elephants are caught. They soon get tame.

From times of old, people have enjoyed elephant hunts by any of the above modes; His Majesty has invented a new manner, which admits of a remarkable *finesse*. In fact, all excellent modes of hunting are inventions of His Majesty. A wild herd of elephants is surrounded on three sides by drivers, one side alone being left open. At it several female elephants are stationed. From all sides, male elephants will approach to cover the females. The latter then go gradually into an enclosure, whither the males follow. They are now caught as shewn above.[1]

Leopard hunting.

Leopards, when wild, select three places. In one part of the country they hunt; in another part they rest and sleep; and in a third district they play and amuse themselves. They mostly sleep on the top of a hill. The shade of a tree is sufficient for the leopard. He rubs himself against

[1] "A large number of people had surrounded the whole jungle, outside of which, on a small empty space, a throne made of wood had been put on a tree, as a seat for the emperor [Jahángír], and on the neighbouring trees beams had been put, upon which the courtiers were to sit and enjoy the sight. About two hundred male elephants with strong nooses, and many females were in readiness. Upon each elephant there sat two men of the *Jhariyyah* caste, who chiefly occupy themselves in this part of India [Gujrát] with elephant hunting. The plan was to drive the wild elephants from all parts of the jungle near the place where the emperor sat, so that he might enjoy the sight of this exciting scene. When the drivers closed up from all sides of the jungle, their ring unfortunately broke on account of the density and impenetrability of the wood, and the arrangements of the drivers partially failed. The wild elephants ran about as if mad; but twelve male and female elephants were caught before the eyes of the emperor." *Iqbálnámah*, p. 113.

the trunk. Round about the tree, they deposit their excrements, which are called in Hindí *ák'har*.

Formerly, hunters used to make deep holes and cover them with grass. These pits were called *odí*. The leopards on coming near them, fell down to the bottom; but they often broke their feet in pieces, or managed by jumping to get out again. Nor could you catch more than one in each pit. His Majesty therefore invented a new method, which has astonished the most experienced hunters. He made a pit only two or three *gaz* deep, and constructed a peculiar trapdoor, which closes when the leopard falls into the hole. The animal is thus never hurt. Sometimes more than one go into the trap. On one occasion no less than seven leopards were caught. At the time of their heat, which takes place in winter, a female leopard had been walking about on the field, and six male leopards were after her. Accidentally she fell into a pit, and her male companions, unwilling to let her off, dropped in one after the other,—a nice scene, indeed.

His Majesty also catches leopards by tiring them out, which is very interesting to look at.

Another method is to fasten nooses to the foot of the above mentioned tree. When the animal comes to scratch itself, it gets entangled.

His Majesty generally hunts leopards thirty or forty *kos* from Ágrah, especially in the districts of Bárí, Símáwalí, Alápúr, Sunnám, Bhaṭindah, Bhaṭnír, Paṭan in the Panjáb, Fathpúr, Jhinjhanú, Nágor, Mírt'ha, Jodhpúr, Jaisalmír, Amrsarnáyin; but several other more remote spots have been selected as hunting grounds. His Majesty used often to go to the first mentioned places, take out the leopards that had fallen into a pit, and hand them over to the keepers. He would often travel over great distances, and was perhaps just on the point of resting a little; but before he had done so, good news were brought from some other hunting ground, when he hastened away on a fleet courser.

In former times, people managed to train a newly caught leopard for the chase in the space of three months, or if they exerted themselves, in two months. From the attention which His Majesty pays to this animal, leopards are now trained, in an excellent manner, in the short space of eighteen days. Old and active keepers were surprised at such results, and extolled the charm of His Majesty's knowledge. From good motives, and from a desire to add splendour to his court, His Majesty used to take it upon himself to keep and train leopards, astonishing the most experienced by his success.

A rather remarkable case is the following. Once a leopard had been caught, and without previous training, on a mere hint by His Majesty, it brought in the prey like trained leopards. Those who were present had

their eyes opened to truth, and experienced the blessing of prostrating themselves in belief on His Majesty.[1]

Attracted by the wonderful influence of the loving heart of His Majesty, a leopard once followed the imperial suite without collar or chain, and like a sensible human being, obeyed every command, and at every leopard chase enjoyed it very much to have its skill brought to the test.

There are two hundred keepers in charge of the *khâçah* leopards. A proper system of training has been laid down.

ÂÎN 28.

THE FOOD ALLOWED TO LEOPARDS. THE WAGES OF THE KEEPERS.

First class leopards get 5 *s.* of meat every day; second class, 4½ *s.*; third class, 4 *s.*; fourth class, 3¾ *s.*; fifth class, 3½ *s.*; sixth class, 3¼ *s.*; seventh class, 3 *s.*; eighth class, 2¾ *s.* The meat is given in a lump; and as on Sundays no animals are killed,[2] double the daily portion is given on Saturdays.

[1] Formerly every six months, but now annually, four *sers* of butter and one-tenth of a *ser* of brimstone are given as ointment, which prevents itch. Four men also were appointed to train and look after each leopard; but now there are three men told off for such leopards as sit on horses when taken to the hunting ground, and only two for such as sit on carts and on doolies. The wages of the keepers vary from 30 *R.* to 5 *R. per mensem;* but they have at the same time to look after the cattle which draw the leopard carts. The servants who look after the cattle, are divided into seniors and juniors, each class being subdivided into five divisions. The seniors get 300 *d.*, 260 *d.*, 220 *d.*, 200 *d.*, and 180 *d.*, which is the lowest allowance; the juniors get 160 *d.*, 140 *d.*, 120 *d.*, 110 *d.*, and 100 *d.* For the sake of show, the leopards get brocaded saddle cloths, chains studded with jewels, and coarse blankets, and *Gushkâní*[3] carpets to sit on. Grandees of the court also are appointed to superintend the keepers of each leopard; they are to take care that the animals are nicely dressed, and that new ones are added to the establishment. Each leopard has a name which indicates some of his qualities. Every ten leopards form a *Misl* or *Ṭaraf* (set); they are also divided according to their rank as follows.

---

[1] Two more miracles of Akbar's.

[2] According to the order mentioned on p. 200, l. 10.

[3] In my text edition, p. 208, l. 8. كشكاني. This should perhaps be گشكاني or گوشكاني *goskhâni*, Goshkân, (in Arabic *Joshqân*), being a town in Irân, famous for its carpets.

One thousand[1] leopards are kept in His Majesty's park, and an interesting encampment they form. The three first sets are *khá̤çah;* they are kept at Court together with two other sets. For their conveyance two litters (*mihaffah*) are hung over the back of an elephant, one litter on each side. On each litter one leopard sits, looking out for a prey. Litters are also put on camels, horses, and mules. Carts even are made for the leopards, and are drawn by horses or cattle; or they are made to sit on horses; and sometimes they are carried by men in doolies. The best leopard which His Majesty has, goes by the name of *Samand mánik;* he is carried on a *Chaudol*, and proceeds with much pomp. His servants, fully equipped, run at his side; the *naqqárah* (a large drum) is beaten in front, and sometimes he is carried by two men on horseback, the two ends of the pole of the *Chaudol* resting on the necks of their horses. Formerly two horses were kept for every leopard; but now three horses are given to two leopards. Others have a dooly, or a cart drawn by four oxen. Many travel alone on one and the same dooly. A tame, trained leopard has the dooly carried by three men; others by two.

Skill exhibited by hunting leopards.

Leopards will go against the wind, and thus they get scent of a prey, or come to hear its voice. They then plan an attack, and give the hunters notice where the prey is. The hunters keep the animal near themselves, and proceed to catch the prey. This is done in three ways.

1. *U̱parg'haṭí.* The hunters let off the leopard to the right from the place where the deer was seen. The leopard swiftly seizes it with his claws. 2. *Rig'hní.* The leopard lies concealed, and is shewn the deer from a distance. The collar is then taken off, when the leopard, with perfect skill, will dash off, jumping from ambush to ambush till he catches the deer. 3. *Muhárí.* The leopard is put in an ambush, having the wind towards himself. The cart is then taken away to the opposite direction. This perplexes the deer, when the leopard will suddenly make his way near it, and catch it.

It is impossible to describe the wonderful feats of this animal; language

[1] "Among the curious events which happened during the present [Jahángir's] reign, I must mention that a leopard in captivity covered a female leopard, which gave birth to three cubs. The late emperor [Akbar], during his youth, was passionately fond of leopards and hunting with leopards. He had about 9000 leopards collected during his reign, and tried much to pair them, so as to get cubs, but in vain. He even allowed some leopards to run about in the gardens without collars, letting them walk about and hunt after their fashion: but they would not pair. During this year a male leopard broke its collar, and covered a female, which after a space of two months and a half gave birth to three cubs. They went on well, and grew big." *Iqbálnámah*, p. 70.

CORRECTIONS.

On p. 309, l. 3, read *Ruqaiyah* for *Raqiyah*; p. 310, l. 10 from below, *unnisá* for *Nisá*; p. 312, l. 2, *Ma'álí* for *Ma'aní*; p. 345, l. 17, read *Bajgorah*, or rather *Pajkorah*; p. 358, note 2, dele *and the latter* to *Editors*.

fails to express his skill and cunning. Thus he will raise up the dust with his forefeet and hind legs, in order to conceal himself; or he will lie down so flat, that you cannot distinguish him from the surface of the ground.

Formerly a leopard would not kill more than three deer at one and the same chase; but now he will hunt as many as twelve.

His Majesty has also invented a method called *chatrmandal*. The hunters lie in ambush near a place frequented by deer, and commence the chase from this place, as if it was a *qamarghah* hunt (in which drivers are used). The leopards are then let off in all directions, and many deer are thus caught.

The men employed to train and keep the imperial leopards, receive presents on all occasions when the animals exhibit skill, as an encouragement to further exertions. A special present has been fixed for each animal, but I cannot specify this.

Once, from the kindness shewn by His Majesty, a deer made friendship with a leopard. They lived together and enjoyed each other's company. The most remarkable thing was this, that the leopard when let off against other deer, would pounce upon them as any other leopard.

In former times leopards were never allowed to remain loose towards the close of the day; for people were afraid of their stubbornness and anxiety to run away. But now, in consequence of the practical rules made by His Majesty, they are let loose in the evenings, and yet remain obedient. Formerly leopards were also kept blind-folded, except at the time of the chase; for the leopards used to get brisk and run about as if mad. But now-a-days they are kept without covers for their heads. The Grandees of the court are allowed to bet on forty *kháçah* leopards; whoever wins takes the amount of his bet from the others. If a leopard is first in bringing twenty deer, his *Doriyah*[1] gets five rupees from his equals. The Grandee in charge of the kháçah leopards, Sayyid Ahmad of Bárha,[2] gets one muhur from each bet, by which he makes a good deal of money. As often as a Grandee lays before His Majesty twenty pair of deer horns,[3] he takes an *Ashrafí* from each of his equals. So also do the *Ṭarafdárs* and *Qaráwals*[4] bet; in fact every

[1] The man who holds the chain to which the leopard is fastened.

[2] He was a *Duhazárí; vide* Aín 30, No. 91.

[3] Akbar required the horns of deer.

"In this year (981), His Majesty built several edifices and castles on the road from Agrah to Ajmír. The reason was this. He thought it incumbent upon him once a year to make a pilgrimage to the tomb (*dargáh*) of Mu'ín i Chishtí at Ajmír; he therefore had houses built at every stage on the road to that town. He also erected at every *kos* a tower (*manárah*), and had a well made near it. The towers were studded with several hundred thousand horns of deer which His Majesty had killed during his lifetime. The words *míl i shákh* contain the *Tárikh* (981). I wished His Majesty had made gardens and *saráis* for travellers instead." *Badáoní*, II, p. 173. *Vide* also Elliot's Index, p. 243, note.

[4] *Tarafdárs*, the men in charge of a *taraf*, which word Abulfazl above used in the same sense as *misl*, or set. *Tarafdár* means also a Zamíndár. A *Qaráwal* is a driver.

one shews his zeal in trying to get as many deer as possible. The skins of the deer are often given to poor people as part of money presents.

It is remarkable that His Majesty can at once tell by seeing a hide to what hunting ground the deer belonged.

His Majesty, in fulfilment of a vow made by him before the birth of the eldest prince, never hunts on Fridays.[1]

The Siyágosh.[2]

His Majesty is very fond of using this plucky little animal for hunting purposes. In former times it would attack a hare or a fox; but now it kills black deer. It eats daily 1 *s.* of meat. Each has a separate keeper, who gets 100 *d. per mensem.*

Dogs.

His Majesty likes this animal very much for his excellent qualities, and imports dogs from all countries. Excellent dogs come from Kábul, especially from the Hazárah district [north of Ráúl Pindí]. They even ornament dogs, and give them names.[3] Dogs will attack every kind of animals, and more remarkable still, they will attack a tiger. Several also will join, and hunt down the enemy. *Kháçah* dogs get daily 2 *s.* of meat; others get 1¼ *s.* There is one keeper for every two *Tází* (hunting) dogs; their wages are 100 *d. per mensem.*

---

[1] "It was at this time, [1027 A. H. or A. D. 1618] that Sháhzádah Shujá', son of Sháhjahán, fell ill, and as I am so much attached to him, and the doctors could not cure him of the insensibility in which he had lain for several days, I humbly prayed to God, and asked Him a favor. During the prayer, it occurred to me that I had already made a contract with my God and had promised Him to give up hunting after reaching the age of fifty, not to touch after that an arrow or a gun, and never again to slay an animal with my own hands; and I thought that if I should carry into effect my former vow from the present time, which would prevent so many animals from being killed, God might grant my prayer for the prince's recovery. I then made this contract with God, and promised, in all singleness of intention and true belief, never again to harm an animal with my own hand. Through God's mercy the sufferings of the prince were entirely allayed. When I was in the womb of my mother, it happened one day that I did not quicken as usual. The servants of the Harem grew alarmed, and reported the fact to my august father [Akbar]. In those days my father was continually hunting with leopards. That day happened to be Friday. My father then, with a view of making God inclined to preserve me, made a vow never again, to the end of his life, to hunt on Fridays. I have followed the practice of my father, and have never hunted with leopards on a Friday." *Tuzuk i Jahángírí*, p. 249.

Jahángír's self-denial was not great; for when the prince was sick, Jahángír was fifty years of age!

[2] Or *black ear*, the Persian translation of the Turkish *qara-qolaq*, whence our *Felis caracal.*

[3] This would not strike us as something worth mentioning. But as dogs are considered unclean animals by Muhammadans, they are not looked upon as domestic. Now-a-days we hear occasionally names, as *kallú, bachhú;* or English names as *fení* (Fanny), *buldág* (bull dog), &c.

European bloodhounds were early imported by the Portuguese. Jahángír once said to Roe 'I only desire you to help me to a horse of the greatest size, and a male and female of mastiffes, and the tall Irish greyhounds, and such other dogges as hunt in your lands.' Regarding European dogs in India, *vide* also *Tuzuk*, p. 138, l. 3 from below.

Hunting Deer with Deer.

This timid animal also may be tamed and trained. They put a net over his horns, and let it off against wild deer, which from fear will fight with them. During the struggle, the horn, or the foot, or the ears of the wild deer will get entangled in the net; the hunters, who have been lying in ambush, will then run up to it, and catch it. The deer thus caught passes through a course of instruction, and gets tame. If the net should break, or the deer get tired during the struggle, it will return to the keeper, who either puts a new net on it, or sends out a fresh deer.

Sulṭán Fírúz i Khiljí used to indulge in this sport; but His Majesty reduced this manner of hunting to a proper system.

Sometimes it happens that a wild deer will carry on the struggle from morning till evening, defeating as many as four tamed deer; but at last it will succumb to the fifth. Deer are now-a-days rendered so perfectly obedient as to hunt at night; of their own accord they will return to their keepers, should the net break, or the wild deer run away; on hearing the call, they will discontinue a fight, come back, and then again engage, if ordered to do so.

In former times deer were never let loose at night time; for people were afraid, lest they should run away. Hence they attached a heavy ball to one of their feet, when the deer were let loose.

Many stories are related of the sagacity and faithfulness of trained deer.

Only lately a deer created much sensation. It had run away from Iláhábád, and after bravely crossing rivers and plains, returned to the Panjáb, its home, and rejoined its former keeper.

In former times, two persons at most enjoyed together the pleasures of deer hunting. They would even, from fear of the timidity of the deer, alter the style of their dress, and lie concealed among shrubs. Nor would they employ other than wild deer; they caught them somehow, and taught them to hunt. His Majesty has introduced a new way, according to which more than two hundred may at the same time go deer hunting. They drive slowly about forty cattle towards a place where deer are; the hunters are thus concealed, and when arrived enjoy the chase.

There are now-a-days also deer-studs; the deer born in captivity are employed as hunting deer.

The keepers will also bend forward, and allow the trained deer to jump on them from behind. Wild deer, on seeing this, will think that they are in the act of copulation, and come near to fight. This way of hunting is disapproved of by His Majesty, who uses female deer as a means of making wild deer fight.

Once a deer caught a leopard, whose foot had got entangled in the net. Both were brought together from Gujrát, as mentioned above (?).

G'hanṭaherah is the name given to the following mode of hunting. The hunter takes a shield, or a basket, the concave side being turned from him. He then lights a lamp, which being put in the concavity of the shield, will conceal him, and commences to ring bells. Other hunters lie at the same time in wait. The light of the lamp, and the sound of the bells, will attract the animals towards the place, when they are shot by the hunters in ambush. The sound of musical instruments will so enchant deer, that they are easily caught; or sometimes hunters will charm them with a song, and when the deer approach, will rise up, and cruelly slay them. From a long time His Majesty has disapproved of these two methods.

T'hángí. The hunter manages to get opposite a wild deer; and bareheaded, from a distance, he commences to throw himself into odd attitudes. The deer then mistakes him for a mad man, and from curiosity will approach him. At this moment the hunters come from the ambush and kill it.

Baukárah. The hunters lie in ambush, against the scent, at a good distance from each other. Some others drive the deer towards them, each of the drivers swinging a white sheet above his head. The deer naturally will take fright, and run towards the hunters in ambush, who kill them.

Ḍaḍáwan. Two good shots, dressed in green, place themselves as before, and have the deer driven towards themselves. This manner of hunting yields much amusement, as the deer get quite perplexed.

Ajárah. The hunters tie green twigs round their bodies from head to foot, and similarly conceal their bows and arrows. They then move boldly to a place where deer generally pass, and enjoy the chase. Or they make ropes of deer skin, and attach them to trees, or let them hang down from poles all round about the place where wild deer sleep. They then lay down some nooses at a place situate against the wind. When the hunters shew themselves from the side, the deer are compelled to run towards the spot where the nooses lie, and thus get caught. Sometimes the hunter will take his place behind a tree, and imitate the voice of deer. As soon as deer approach him, he kills them. Or, they tie a female deer to a place in a plain, or they let a trained deer go to the pasture place of wild deer. The latter will soon come near it, and get entangled with their feet.

T'hagí. The hunter....[1] walks about bareheaded as if mad; his clothes are stained all over with *pán* juice, and the man himself acts as if he

[1] The text has *dar khánah i zín*, in the hollow of a saddle (?).

were wounded. Wild animals and others will soon gather round him, waiting for his death; but their greediness and desire lead them to destruction.

Buffalo Hunts.

At a place where buffaloes sleep, a rope is laid in the ground; but the end forming a loop is left outside. Another long rope is attached to it. To this they tie a female buffalo that wants the male. A courageous active man lies in ambush. As soon as a wild male buffalo comes to the spot, and covers the female, the hunter makes use of the opportunity, and fastens the foot of the male; but it frequently happens that the man loses courage, and has to pay for the attempt with his life.

Another mode of catching them is to go near the ponds which they frequent. They put snares round the ponds; and sitting on tame buffaloes, the hunters go into the water with spears in their hands. Some buffaloes are then killed with spears, others are caught in the snares. A similar method may be adopted, when buffaloes are attacked on their pastures.

On Hunting with Hawks.

His Majesty is very fond of these remarkable animals, and often uses them for hunting purposes. Though he trains the *báz*, *sháhín*, *shunqár*, and *burkat* falcons, and makes them perform wonderful deeds, His Majesty prefers the *báshah*, to which class of hawks he gives various names.

As I am compelled to hurry on, and must restrict myself to summary accounts, it is impossible to say much about this matter, or about the skill of the several birds, especially as I know little about it, being by nature averse to destroying life. I shall, however, give a few details, and lead enquirers to the retired spot of knowledge.

In the middle of spring the birds are inspected; after this they are allowed to moult, and are sent into the country. As soon as the time of moulting is over, they are again inspected. The commencement is made with the *kháçah* falcons (*báz*), which are inspected in the order in which they have been bought. The precedence of *jurrahs* is determined by the number of game killed by them. Then come the *báshahs*, the *sháhíns*, the *k'helahs*, the *chappak báshahs*, the *bahrís*, the young *bahrís*, the *shikarahs*, the *chappak shikarahs*, the *turmatís*, the *rekís*, the *besrahs*, the *dhotís*, the *charghs*, the *chargílahs*, the *lagars*, and the *jhagars* (which His Majesty calls the *chappak* kind of the *lagar*). The *Molchíns* also are inspected—the *molchín* is an animal resembling the sparrow, of yellowish plumage, like the *sháhín*; it will kill a *kulang* crane. People say that, whilst flying, it will break the wing of the *kulang*, and others maintain that it pierces its eyes;

but this cannot be proved. *Odhpapars*[1] also are brought from Kashmír. This bird has a bluish (*sabz*) colour and is smaller than a parrot; its beak is red, straight, and long; its tail is rather elongated. It brings down small birds, and returns to the hand of the keeper.

Many other birds can be trained for the chase, though I cannot specify all. Thus the crow, the sparrow, the *bodnah*, and the *sárú* will learn to attack.

His Majesty, from motives of generosity and from a wish to add splendour to his Court, is fond of hunting with falcons, though superficial observers think that merely hunting is his object.

In this department many Mançabdárs, Ahadís, and other soldiers are employed. The footmen are mostly Kashmírís or Hindústánís. Their pay is as follows. *First class* of the former, first grade, 7½ *R.*; second, 7 *R.*; third, 6¾ *R.* *Second class*, first grade, 6½ *R.*; second, 6¼ *R.*; third, 5¾ *R.* *Third class*, first grade, 5½ *R.*; second, 5 *R.*; third, 4½ *R.* *First class* of the latter (Hindústání), first grade, 5 *R.*; second 4¾ *R.*; third, 4½ *R.* *Second class*, first grade, 4¼ *R.*; second, 4 *R.*; third 3¾ *R.* *Third class*, first grade, 3½ *R.*; second, 3¼ *R.*; third, 3 *R.*

Allowance of Food.

In Kashmír and in the aviaries of Indian amateurs, the birds are generally fed once a day; but at Court they are fed twice. A *báz* falcon gets a quantity of meat weighing 7 *dáms;* the *jurrah*, 6 *d.*; the *bahrí*, *láchín*, and *k'helah*, 5 *d.*; the *báshah*, 3 *d.*; the *chappak báshah*, *shikarah*, *chappak shikarah*, *besrah*, *dhotís*, &c., 2 *d.* Towards the close of every day, they are fed on sparrows, of which the *báz*, *jurrah*, and *bahrí*, get each seven; the *láchín*, five; the *báshah*, three; others, two. *Charghs* and *lagars* get at the same time meat. *Shunqárs*, *sháhbázes*, *burkats*, get one *ser*. On the hunting grounds they feed them on the game they take.

Prices of Falcons.

From eagerness to purchase, and from inexperience, people pay high sums for falcons. His Majesty allows dealers every reasonable profit; but from motives of equity, he has limited the prices. The dealers are to get their gain, but buyers ought not to be cheated. In purchasing falcons people should see to which of the following three classes birds belong. First, *khánah kurís* birds; they have moulted whilst in charge of experienced trainers, and have got new feathers. Second, *choz* birds; they have not yet moulted. Third, *Tarínák* birds; they have moulted before they were

[1] The name of this bird is doubtful. It is not to be found among the names of *Kashmírí* birds given in the *Iqbálnámah*, p. 159.

captured. *First class*, a superior *báz* costs 12 *muhurs*; second grade do., 9 *M.*; third do., 6 *M.* *Second class*, first, 10 *M.*; second, 7 *M.*; third, 4 *M.* A *third class báz* is somewhat cheaper than second class ones.

Jurrahs. First class, 8 5, 2, 1 *M.* Second class, 6, 4, 1½, 1 *M.*, 5 *R.*

Báshahs. First class, 3, 2, 1 *M.*, 4 *R.* Second class, 2, 1 *M.*, 5 *R.*

Sháhíns of both kinds, 3, 2, 1 *M.*

Bahrís, 2, 1½, 1 *M.* Young *Bahrís* a little less.

K'helahs, 1½, 1, ½ *M.*

Charghs, 2½ *R.*, 2, 1½ *R.*

Chappak báshahs, 1 *R.*; ½, ¼ *R.*

Shikarahs, 1½ *R.*, 1, ½ *R.*

Besrahs, 2 *R.*, 1½, 1 *R.*

Chappak shikarahs, lagars, jhagars, turmatís, rekís, 1 *R.*, ½, ¼ *R.* Their prices are not classified.

His Majesty rewards the *Mír Shikárs* (superintendents of the chase) according to their ranks, with suitable presents. There are also fixed donations for each game brought in, varying from 1 *M.* to 1 *d.* If the falcons bring the game alive or dead, attention is paid to the skill which it exhibited, and to the size of the prey. The man who keeps the falcon gets one-half of the allowance. If His Majesty hunts himself, fifty *per cent.* of the donation is stopped. If birds are received by the Imperial aviary as *peshkash* (tribute), the *Qushbegí* (Superintendent of the Aviary) gets for every *báz* 1½ *R.*, and the accountant, ½ *R.* For *jurrahs*, the Qushbegí gets 1 *R.*; the accountant, ¼ *R.*; for *báshahs*, the former receives ¼ *R.*; the latter, ⅛ *R.*; for every *láchín*, *chargh*, *chargílah*, *k'helah*, *bahrí bachchah*, the former gets ⅛ *R.*, the latter $\frac{1}{10}$ *R.*; for every *chhappak*, *báshah*, *dhotí*, &c., the former receives $\frac{1}{10}$, the other $\frac{1}{20}$ *R.* (*súkí*).

The minimum number of *báz* and *sháhín* falcons, kept at Court, is forty; of *jurrahs*, thirty; of *báshahs*, one hundred; of *bahrís*, *charghs*, twenty; of *lagars*, and *shikarahs*, ten.

Waterfowls.

Hunting waterfowls affords much amusement. A rather curious way of catching them is the following. They make an artificial bird of the skin of a waterfowl with the wings, the beak, and the tail on it. Two holes are made in the skin for looking through. The body is hollow. The hunter puts his head into it, and stands in the water up to his neck. He then gets carefully near the birds, and pulls them one after the other below the water. But sometimes they are cunning, and fly away.

In Kashmír they teach *báz* falcons to seize the birds whilst swimming about, and to return with them to the boat of the hunter. Or the hawk will keep a waterfowl down, and sit on it [till the man in the boat comes].

Another method is to let water buffaloes go into the water, between which the hunter conceals himself, and thus catches the birds.

Durráj hunting. There are various methods. Some get a young one and train it till it obeys every call. It will fight with other birds. They put it into a cage, and place hair-nets round about it. At the signal of the fowler, the bird commences to sing, when wild ones come near it either from friendship, or a desire to fight, and get entangled in the snares.

Bodnahs. The hunter makes a clay pot with a narrow neck and, at night time, blows into it, which produces a noise like an owl's cry. The *bodnahs*, frightened by the noise, come together. Another man then lights a bundle of straw, and swings it about, so that the eyes of the birds get dazzled. The fowlers thereupon seize the birds, and put them into cages.

Lagars. They resemble *chargh*s: in body they are as large *jurrahs*. They hang nets (about the body of a trained *lagar*), and put birds' feathers into its claws. It is then allowed to fly up. The birds think that it has got hold of a prey, and when they get entangled in the nets, they commence to fight, and fall to the ground.

Ghaughá'i. They fasten together on a cross-stick an owl and a *ghaughá'i*, and hang hair nets round about them. The owl will soon get restless; the birds think that the owl wishes to fight, and commence to cry out. Other *ghaughá'is* and owls will come to their assistance; and get entangled in the nets.

Frogs.

Frogs also may be trained to catch sparrows. This looks very funny.

His Majesty, from curiosity, likes to see spiders fight, and amuses himself in watching the attempts of the flies to escape, their jumps, and combats with their foe.

I am in the power of love; and if I have thousands of wishes, it is no crime;

And if my passionate heart has an (unlawful) desire, it is no crime.

And in truth, His Majesty's fondness for leopards is an example of the power of love,[1] and an instance of his wonderful insight.

It would take me too long to give more details. It is impossible to enumerate all particulars; hence it is better to go to another subject.

---

[1] The Historian may thank Abulfazl for having preserved this little trait of Akbar's character. In several places of the Áín, Abulfazl tries hard to ascribe to His Majesty higher motives, in order to bring the emperor's passion for hunting in harmony with his character as the spiritual guide of the nation. But as 'higher motives' were insufficient to explain the fancy which Akbar took in frog and spider fights, Abulfazl has to recognize the fact that peculiar leanings will lead even a sensible man to oddities and to actions opposed to the general tenor of his character.

ÁÍN 29.

ON AMUSEMENTS.

His Majesty devises means of amusement, and makes his pleasures a means of testing the character of men.

There are several kinds of amusements, of which I shall give a few details.

The game of Chaugán (hockey).[1]

Superficial observers look upon this game as a mere amusement, and consider it mere play; but men of more exalted views see in it a means of learning promptitude and decision. It tests the value of a man, and strengthens bonds of friendship. Strong men learn in playing this game the art of riding; and the animals learn to perform feats of agility and to obey the reins. Hence His Majesty is very fond of this game. Externally, the game adds to the splendour of the Court; but viewed from a higher point, it reveals concealed talents.

When His Majesty goes to the *maidán* (open field), in order to play this game, he selects an opponent and some active and clever players, who are only filled with one thought, namely, to shew their skill against the opponent of His Majesty. From motives of kindness, His Majesty never orders any one to be a player; but chooses the pairs by the cast of the die. There are not more than ten players; but many more keep themselves in readiness. When one *g'harí* (20 minutes) has passed, two players take rest, and two others supply their place.

The game itself is played in two ways. The first way is to get hold of the ball with the crooked end of the *chaugán* stick, and to move it slowly from the middle to the *hál*.[2] This manner is called in Hindí *rol*. The other way consists in taking deliberate aim, and forcibly hitting the ball with the *chaugán* stick out of the middle; the player then gallops after it, quicker than the others, and throws the ball back. This mode is called *belah*, and may be performed in various ways. The player may either strike the ball with the stick in his right hand, and send it to the right forwards or backwards; or he may do so with his left hand; or he may send the ball in front of the horse to the right or to the left. The ball may be thrown in

[1] There is scarcely a Muhammadan Historian that does not allude to this game. Bábar says, it is played all over Thibet. In the East of India, the people of Munnipore (Assam) are looked upon as clever hockey-players. *Vide* Vigne's Travels in Cashmir, II, p. 289.

Sayyid 'Abdullah Khán, son of Mír Khwándah, was Akbar's *chaugánbegí*, or Superintendent of the game of *chaugán; vide* Bad. II, p. 368. In the beginning of Akbar's reign, after 970, G'hariwalí, which lies a *farsang* from Ágrah, was the favorite spot for *chaugán* playing. Bad. II. p. 70.
